We have been favoured by Mr. George Morant, jun., of Shirley House, Carrickmacross, Ireland, with an account of the finding of a beautiful neck ornament in an artificial island, or "crannoge," in a lake near the above place. The ornament is a locket of crystal, set in silver; the cable and other parts much corroded, are supposed to be mediæval work (fourteenth or fifteenth century). Near it was found a smaller ornament of gold, like a modern watchkey. On another of the "crannoges," or fortified islands, were recently found a very perfect bronze pin, several coins of Mary's reign run together by the action of fire, a stone celt, and a spearhead. The islands are surrounded by posts, some above and others below the waterline of this day: quantities of the bones and teeth of animals, charcoal, and ashes are found in them. Upon this communication we may remark: in the *Archæological Journal* for March, 1846, is a very interesting paper, "On Crannoges, and Remains discovered in them." It was the practice of the northern chieftains of Ireland to intrust their defence rather to water than to stone walls: in other words, they ensconced themselves rather in islands than in castles; to the latter, indeed, they appear to have had a particular prejudice." At a comparatively late period we find, in reply to an inquiry, in 1567, from the Lords of Queen Elizabeth's Council, as to "what castles or forts O'Neil hath, and of what strength they be?" that he only depended upon "*sartin ffreshwater loghe's* in his country, which from the sea there come neither ship nor boat to approach them; it is thought that there, in ye said *fortified islands*, lyeth all his plate, which is much, and money, prisoners, and gages." These fortified islands were generally artificial, and upon them were constructed wooden huts or cabins, called in Irish *crannoges*. Then follow notices of crannoges, commencing with A. D. 1246 and terminating with 1844, when a *crannog* was discovered on the lake of Monalty, about half a mile from Carrickmacross. A canoe, or boat, formed of one piece of oak, was then brought to light close to a low island on the south side of the lake; and relics were also found on an island on the adjoining Lake of Lough-na-Glack. The objects of greatest antiquity found on these islands are stone cells of the common type; a rough piece of flint, apparently intended for an arrowhead; and stones with indentations, evidently made for slings. Of bronze weapons and ornaments there were numerous specimens, of which a javelin and bronze pin are engraved. Amber and blue glass beads, and a comb, apparently ivory, are mentioned; with iron instruments, bullets of lead, earthenware, small Dutch tobacco-pipes, a pair of quern stones, &c. The paper concludes thus:—

> From the great variety of these remains, extending from the remote period when weapons of stone and bronze were used, to the firearms of the seventeenth century, it cannot be doubted that these islands, or *crannoges*, were, for many ages, the resorts of petty chieftains, probably of the MacMahon sept: and afterwards, perhaps, of gangs of freebooters, or *Tories*, although the traditions of the neighbourhood have not preserved the memory of the fact.

Windsor Castle has, within memory, almost entirely lost its appearance of antiquity. The other day we met with a long picture of the castle from the slopes, painted by Smith, of Chichester, and showing the mongrel pile in the reign of George II. His Majesty's successor employed James Wyatt to gothicise it; but it was reserved for George IV. and his pet architect, Jeffry Wyatt, to renovate and remodel the whole edifice; and, though his mixture of early and late styles is much censured, he, who had so changed the castle, was rewarded with many years' commission, and knighthood, with a change of name. Canon Bowles, in his odd way, said Wyatville's castle appeared "chiselled and mortared as if it had been washed every morning with soap and water;" so that it has not even the unclean crust of antiquity. Nevertheless, occasional repairs disentomb fragments of the earlier castle. A few days since some workmen employed in the restoration of Wolsey's Chapel, on cutting away a portion of the wall on each side of the doorway opening into the cloisters, found imbedded in mortar sixteen or eighteen pieces of a doorway-jamb, supposed to be a portion of the chapel erected by Henry III. These relics are sculptured with an angel's wing, and the mouldings and surfaces are decorated with crimson, green, red, and black, in curved and zigzag lines; the pieces had been used as material in the inner wall of the chapel in the reign of Henry VIII. We also learn that the apartments in the York Tower, the easternmost of the two large towers flanking George IV.'s Gateway, directly facing the Long Walk, are being fitted up for the reception of their Royal Highnesses the Prince and Princess of Wales when residing at Windsor. The tower distinguished as "The Prince of Wales's" is the northernmost in the east front, and was greatly injured by fire a few years since: here is the state dining-room. The Prince of Wales, it is said, as Constable or Governor of the castle, will also occupy the Keep, or Round Tower, the most historical feature of the castle.

CHESS.

TO CORRESPONDENTS.

TOMASO.—Mr. Buckle, we know, played a few games with Kieseritzky; but were they recorded? We do not think he ever played with Mr. Cochrane.

I. H. M.—Stale-mate makes a drawn game.

M. KELLY.—Unless by special agreement, drawn games do not count in a match. Black, in the case you mention, can therefore demand another game shall be played.

W. H. A.—Yes; very pretty, but a *little* too evident to any but a novice in the game. We prefer the "two-mover."

H. C. C., Rusper.—The solution in question is perfectly correct.

NICHOLAS.—It was reported some time since that the famous Russian Chess Amateur, the friend of M. de Jaenisch and the author of an excellent work on the game, was about to visit London, but we have not heard of his arrival. 2. Mr. G. Dufresne, the great supporter of chess in Holland, has left Rotterdam to take up his abode in Batavia.

BOOKWORM.—We know only of two copies of Lucena's work in England. One of these, now in the possession of Mr. Remington Wilson, belonged to Lord Audley; the other, now in the British Museum, belonged to the late Mr. Mercier.

M. B. T., Blackheath.—Your letter, with solutions of several chess enigmas, has been mislaid, and only this moment came to light. The solutions shall have immediate attention, and a report of them be given in our next.

LEARNER.—The moment a Pawn reaches its eighth square it becomes a piece—Queen, Rook, Bishop, or Knight, as its owner chooses, and such piece should be immediately substituted for it.

T. SMITH.—A report on the last shall be given in our next.

H. E. KIDSON.—Did you not omit to insert the diagram referred to in your note?

I., Eccles.—Your solution of the extremely clever two-move problem, given in the Notices to Chess Correspondents last week, is the true one.

I. REMINGTON WILSON.—Perfectly correct.

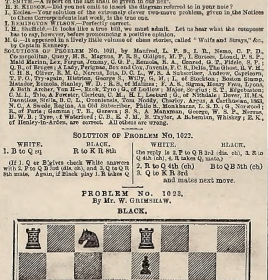
I. H., Sheffield.—It looks like a true bill, we must admit. Let us hear what the composer has to say, however, before pronouncing a positive opinion.

M. G.—It appeared in a lively little volume of chess stories, called "Waifs and Strays," &c., by Captain Kenneoy.

SOLUTIONS OF PROBLEM NO. 1021, by Manfred, L. P. S., I. R., Nemo, C. P. D., Cosmopolitan, Query, H. S., Magnus, F. R. S., Œdipus, M. P., I. Surtees, Lionel, P. S. B., E. J. M., B. Taylor, A Bohemian, Whiskey; E. K., of Henley-in-Arden, are correct. All others are wrong.

SOLUTION OF PROBLEM NO. 1022.

WHITE.	BLACK.
1. B to Q sq	R to K R 8th



(If 1. Q or B gives check White answers with 2. P to Q B 3rd (dis. ch), and 3. Q to Q R 8th mate. Again, if Black play 1. R takes Q the reply is 2. P to Q B 3rd (dis. ch), 3. R to Q 4th (ch), 4. R takes Q, mate.)

WHITE.	BLACK.
2. R to Q 4th (ch)	B to Q B 5th (ch)
3. Q to K R 3rd	

and mates next move.

PROBLEM NO. 1023.
By Mr. W. GRIMSHAW.

BLACK.

WHITE.

White, playing first, gives mate in three moves.

CONTINUATION OF MR. BUCKLE'S GAMES.

Mr. BUCKLE gives the Q Kt to an Amateur.

(*Remove Black's Q Kt from the Board.—Irregular Opening.*)

BLACK (Mr. B.)	WHITE (Amateur.)
1. P to K B 4th	P to Q 4th
2. P to Q Kt 3rd	B to K B 4th
3. B to Q Kt 2nd	Kt to K B 3rd
4. Kt to K B 3rd	Kt to Q B 3rd
5. R to Q B sq	P to K 3rd
6. P to K 3rd	P to Q R 3rd
7. P to K R 3rd	B to K 2nd
8. P to Q 3rd	P to Q Kt 4th
9. P to K Kt 4th	B to K Kt 3rd
10. B to K Kt 2nd	Kt to Q Kt 5th

(Losing time. A prevalent fault among inexperienced players.)

BLACK (Mr. B.)	WHITE (Amateur.)
11. P to Q R 3rd	Kt to Q B 3rd
12. Q to K 2nd	R to K Kt sq

(Apprehensive that Black would force the K Kt away, and then take the K Kt Pawn with his Bishop.)

BLACK (Mr. B.)	WHITE (Amateur.)
13. Castles	P to K R 4th
14. P to K Kt 5th	Kt to Q 2nd
15. P to Q B 4th	Kt to Q R 4th
16. P takes Q P	P takes P
17. P to Q Kt 4th	Kt to Q Kt 2nd
18. Kt to Q 4th	Kt to Q Kt 3rd
19. P to K B 5th	

(The attack now is quite irresistible, and victory only a matter of time.)

BLACK (Mr. B.)	WHITE (Amateur.)
19.	B to K R 2nd
20. P to K Kt 6th	

(More elegant, though not so effective, perhaps, as taking the K R Pawn with his Queen.)

BLACK (Mr. B.)	WHITE (Amateur.)
20.	P takes P
21. Kt to K 6th	Q to Q 3rd
22. Kt tks Q B P (ch)	K to Q 2nd
23. Kt takes Q R	Kt takes Kt
24. P to K 4th	P takes K B P
25. P to K 5th	

(This is all in the first order of fine play.)

BLACK (Mr. B.)	WHITE (Amateur.)
25.	Q to K Kt 3rd
26. K to R sq	Kt to Q Kt 3rd
27. P to K 6th (ch)	Q takes P

(Obviously fatal; but White's position has long been hopeless.)

BLACK (Mr. B.)	WHITE (Amateur.)
28. R to Q B 7th (ch)	K takes R
29. Q takes Q	R to K sq
30. R to Q B sq (ch)	Kt to Q B 5th
31. P takes Kt	

And White resigns.

Mr. BUCKLE gives the Pawn and two moves to an Amateur.

(*Remove Black's K B P from the Board.*)

WHITE (Amateur.)	BLACK (Mr. B.)
1. P to K 4th	
2. P to Q 4th	P to K 3rd
3. Kt to Q B 3rd	B to Q Kt 5th
4. B to Q 3rd	P to Q B 4th
5. Kt to K B 3rd	P takes P
6. Kt takes P	Kt to Q B 3rd
7. B to K 3rd	B takes Kt (ch)
8. P takes B	K Kt to K 2nd
9. Castles	Castles
10. P to K B 4th	P to Q 4th
11. P to K 5th	B to Q 2nd
12. R to Q Kt sq	P to Q Kt 3rd
13. Q to K R 5th	P to K Kt 3rd
14. Q to K Kt 4th	Kt takes Kt
15. P takes Kt	R to Q B sq
16. P to K R 4th	Kt to K B 4th
17. B to Q 2nd	Kt takes K R P
18. K to B 2nd	

(An eccentric move, but one which enables him to open a battery of Rooks with some effect upon the adverse King.)

WHITE (Amateur.)	BLACK (Mr. B.)
18.	Kt to K B 4th
19. R to K R sq	R to K B 2nd
20. R to K R 3rd	B to K sq
21. Q R to K R sq	R to K Kt 2nd
22. P to Q B 3rd	P to Q Kt 4th
23. Q to K B 3rd	Q to Q R 4th

(Having in view the taking the Q Pawn with Kt, if White does not provide against it.)

WHITE (Amateur.)	BLACK (Mr. B.)
24. B takes Kt	K Kt P takes B
25. P to Q R 3rd	B to K Kt 3rd
26. Q to K Kt 3rd	Q takes Q R P
27. Q to K Kt 5th	Q to K 2nd
28. Q to K Kt 3rd	P to Q R 4th
29. Q to Q 3rd	R to Q B 5th
30. R to Q Kt sq	Q to Q 2nd
31. B to Q B sq	B to K sq
32. B to Q R 3rd	R to K Kt 5th

(Pawn to Q Kt 5th, followed by Q to Q R 5th would have equally maintained the ascendancy which Black had so ably acquired.)

WHITE (Amateur.)	BLACK (Mr. B.)
33. K R to K Kt 3rd	Q to K Kt 2nd

And wins.

CHESS ENIGMAS.

No. 1353.—By the Anonyme, of Lille.

White: K at K R 5th, Q at K Kt 2nd, R at K R sq, Kt at K B 5th.

Black: K at K R sq, Q at Q Kt 3rd, Rs at K B sq and Q R sq, Bs at Q 5th and Q Kt 4th, Kt at Q 4th, and P at Q R 3rd.

White to play, and mate in six moves.

No. 1354.—By the Same.

White: K at Q B 3rd, Q at K Kt 5th, B at Q 8th, Ps at Q B 4th, and Q R 5th.

Black: K at Q 3rd, R at Q R sq, B at Q B 4th, Kts at K Kt 5th and Q Kt sq; Ps at K R 4th, K 3rd, Q 2nd, Q B 3rd, and Q R 3rd.

White to play, and mate in six moves.

No. 1355.—By an Amateur.

White: K at K 3rd, R at K 8th, Kt at Q B 7th, Ps at K B 2nd and K 4th.

Black: K at K 4th; Ps at K B 2nd, K 3rd, and Q 2nd.

White, playing first, to mate in three moves.

No. 1356.—By an Amateur.

White: K at Q R 7th, R at Q R 8th; Ps at K R 6th, K Kt 5th, K 6th, Q 4th, and 5th.

Black: K at K R 2nd, Ps at K Kt 3rd and K 2nd.

White to play, and mate in four moves.

OBITUARY OF EMINENT PERSONS.

DR. FABER.

The Very Rev. Frederic William Faber, D.D., Superior of the Oratory at Brompton, a poet, writer, and divine of great distinction, was the son of Mr. Faber, Solicitor of the Bishop of Durham, and Judge or Assessor of the Bishop's Court for the Palatinate of Durham, and was brother of Colonel Faber; of the Rev. Francis Atkinson Faber, B.D., Rector of Saunderton, Bucks; and of Henry Faber, Esq., of Stockton-on-Tees. He was also nephew of the celebrated George Stanley Faber, B.D., the author of the works on prophecy. He was born in 1814, and was educated at Harrow School and University College, Oxford, where he obtained a fellowship. In 1836 he won the Newdegate prize for his poem, "The Knights of St. John." Having taken holy orders in the Church of England, he retained his fellowship at University College till 1843, when he accepted the College living at Elton, Huntingdonshire. Mr. Faber had early in his University career adopted High Church opinions, and in this spirit he published his popular "Sights and Thoughts in Foreign Churches, and among Foreign Peoples," which he dedicated to his friend, the poet Wordsworth. Mr. Faber remained at Elton for rather more than two years, during which time he restored his church. In November, 1845, Mr. Faber was received into the Roman Catholic Church by the Right Rev. Dr. Wareing, Vicar Apostolic of the Northern District, at St. Felix Chapel, Northampton. Mr. Faber was for some time a resident at St. Wilfrid's, Staffordshire. In 1849 he came to London and established there the brotherhood known as "The Oratory of St. Philip Neri," in King William-street, Strand. He brought with him six priests. In 1854 the Oratory was removed to the spacious and handsome buildings in Brompton, where there are now twenty priests and many lay members and novices. Here, having become a D.D., Dr. Faber laboured with much success, the congregation having increased to a very great extent. Dr. Faber was a poet of no ordinary power. Long before his devotion to his sacred calling absorbed all other thoughts, he published an exquisite piece of verse, entitled "The Lily of the Cherwell." Amongst Dr. Faber's religious works are his popular "All for Jesus," "The Saints and Servants of God," "The Spirit and Genius of St. Philip Neri," "Sir Launcelot," "Spiritual Conferences," "Growth in Holiness," "Jesus and Mary," "Tales of the Angels," and "Discourse on the Sacraments." Many of his works have been translated into French, German, and Dutch. Dr. Faber was a very elegant and effective preacher. He died at the Oratory, Brompton, on the 26th ult. "Of all the converts to Roman Catholicism from the Anglican faith, none," writes a contemporary, "have been more zealous, more successful, more earnest, than Dr. Faber. His accomplishments, his administrative tact, his brilliant conversational powers, his unfailing good temper and geniality, have brought round him a band of devoted and attached friends, who attended him day and night during his painful illness, and now bitterly lament his death."

ALFRED DE VIGNY.

Count Alfred de Vigny, the celebrated author of "Cinq Mars," one of the best modern romances in the French language, was the scion of an old Beaucean family of military repute, and was the son of M. de Vigny, a cavalry officer, by his wife, the daughter of Admiral Baraudin, and cousin of the great navigator, the Baron de Bougainville. He was born at Loches, in the department of Indre et Loir, the 27th March, 1799. He at an early age was sent to Paris for education, and soon evinced a desire to enter the military service. When sixteen years old he was enrolled in the Red Musketeers of the Royal Household, and during the hundred days accompanied Louis XVIII. on his route to Ghent, as far as the frontier of France. He afterwards served in the Royal Guards, and in a regiment of the Line. He was quartered in the Pyrenees in 1823, but had no opportunity of taking an active part in the Duke of Angoulême's Spanish campaign of that date. He retired from the army in 1828, and resolved to devote himself entirely to letters. He had already written some poetry, chiefly of a religious character, of which "Eloa" has been looked on as a *chef d'œuvre*; and in 1826, he published his historical romance, "Cinq Mars; ou, une Conjuration sous Louis XIII.," laying the opening scenes in the Touraine, not far from his native Loches. The work is chastely and charmingly written, and well deserves the very great success that attended its production. It went rapidly through several editions, and is now a standard book. The plot of Bulwer's fine play of "Richelieu" was taken from it, and it has since been translated into English. De Vigny's other prose work of fiction, "Stello; or, Blue Devils," quite of a different character to "Cinq Mars," is quaint, witty, and of much interest. He also brought out translations of "Othello," and "The Merchant of Venice:" one drama of his own composition, "Chatterton," was performed with enormous success, and was at one time quite the vogue. To these were subsequently added several pieces of graceful poetry. He was received an Academician in 1845, but he latterly relinquished the pen, as he had previously done the sword, and for many years ceased to appear as an author. Count de Vigny married an English lady, Miss Bunbury, a scion of the Baronet's family of that name. His death has just occurred in Paris.

JACOB GRIMM.

Jacob Ludwick Grimm, a very eminent philologist, was born at Hanau, in Cassell, in 1785. He was brother of the celebrated William Charles Grimm, the author of "Count Rudolf," the poem of "Hildebrand," "The Garden of Roses," the song of "Roland," and "Old German Dialogues." A younger brother, Louis Emile Grimm, was a painter and engraver of distinction, and professor of painting in the Academy of Cassell. Jacob Grimm, like his brother William, was educated at the Lyceum at Cassell, and at the University of Marbourg. His early career was marked by his deep study of the literature of the middle ages, especially as regarded German subjects. He was, when Jerome Bonaparte was King of Westphalia, auditor of the Council of State and Conservator of the Library. After the restoration of the Prince of Hesse, Grimm went to Paris as secretary of the Hessian Embassy, and he was subsequently Professor of German Literature in the University of Göttingen. He was President of the Society of German Philologists at their congress, held at Frankfort in 1846. He was also a foreign member of the Institute of France. In 1848 Grimm sat in the Assembly of Frankfort, acting on the moderate Liberal side. Grimm's productions are of varied character; and, while his fame will be lastingly based on his philological works, he was also great as an archæologist and a poet. His "Andra and Helena" and his famous "Reynard the Fox" have European popularity. In 1835 he brought out a book on German mythology. In 1848 appeared "The History of the German Language." His "Forests of Ancient Germany," his "Poems of the Reign of Frederick I.," and his contributions to the *Journal of German Antiquities* and the *Dissertations of the Academy of Berlin* should be also mentioned. He was, with his late brother William, employed in the publication of a large German dictionary, which promises to be of immense value when completed. Jacob Grimm leaves it unfinished, having only reached the letter F at the time of his death. In reference to the joint labours of himself and his brother William, Grimm at one time feelingly wrote thus:—"Several of my books have been published in common with William. We lived from our youth up in brotherly community; goods, money, books, and collectanea belonging to us in common; and it was natural to combine our toil." Jacob Grimm died on the 20th ult., at Berlin, after a short illness.

WILLS AND BEQUESTS.

The will of Sir John Walter Pollen, Bart., of Rendenham, near Andover, Hants, was proved in London on the 17th ult. by his relict, Lady Pollen, the sole executrix. The personal property was sworn under £14,000. The testator succeeded to the baronetcy on the death of his father, in 1814; was twice returned M.P. for Andover, was late Colonel of the South Hants Militia and Deputy Lieutenant for the county, and died at the age of seventy-nine, having executed his will in April, 1862. To his relict, Lady Pollen, he bequeaths a life interest in his estate and residence at Rendenham, with the lands thereto, and directs that certain portions of the plate, &c., shall be held as heirlooms with the succession to his estate and title, which has descended to his nephew, now Sir Richard Hungerford Pollen, Bart. The testator also leaves to his relict, Lady Pollen, the interest arising from his personal estate, which, upon her Ladyship's decease, is to be applied to the renewal of the leases of the advowson and tithes of Andover.

The will of the Rev. John Russell, D.D., Canon of Canterbury, Rector of St. Botolph, Bishopgate, was proved in the London Court by his sons and executors—Francis Russell, Esq., barrister-at-law, and the Rev. William Russell. The personal property was sworn under £35,000. Dr. Russell was appointed to a canonry in Canterbury in 1827, and to the rectory of St. Botolph's in 1832: this valuable living is returned in the "Clergy List" at £2290 a year. Dr. Russell executed his will in April, 1862; and died in the Oak Precincts, in the city of Canterbury, in June last. The will is attested by the Revs. James Bell and William Gill, Curates of St. Botolph's. He bequeaths to his wife a life interest in his property, saving an annuity of £250 to his daughter Mary; and upon the decease of his relict leaves to each of his daughters, Augusta and Mary, such a sum as with other securities will make up £8000 to each. The remainder of his property to be equally divided between his two sons, his executors. Some liberal legacies are left to servants.

The will of Major Francis Wingrave Pinkney, C.B., late a Commissioner of Jhansee, in Central India, a Major in her Majesty's Indian Forces, was proved in London by John Rees Withecombe, Esq., M.D., one of the executors—power being reserved to Lieutenant H. P. Lane, of the Madras Artillery, the other executor and trustee nominated in the will. This gallant military officer executed his will a few months before his decease, devising his freehold estates in Glamorganshire to his eldest son, and dividing his personal property amongst his children.

A gigantic mine was exploded on the 18th ult. near Mergozzo (Piedmont), in a quarry belonging to Messrs. Mazzola and Pattoni. A gallery had been pierced under the granite hill to be blasted, a work which it had taken a whole year to complete. The mine was charged with twenty metrical quintals (4430 lb.) of gunpowder, and fired from three different points at a time. The quantity of granite thus detached was estimated at 30,000 cubic metres, much less than was calculated upon; but the rest is so shattered that a small quantity of gunpowder will easily complete the work. The firm was obliged, before the explosion, to deposit a sum of 1,000,000 f., as a security for damages to the neighbouring landholders in case of a disaster; but the shock was so slight that it was hardly felt at a distance of two kilometres.

(Continued from page 354.)

dance, or "corroberie," which forms the groundwork or principal characteristic in every instance. The subject of my sketch is what the natives call the "cobbawngo corroberie," or great corroberie of mysteries, performed but once a year by the aborigines of the far interior. The time selected for this great event is every twelfth moon, and during her declination. For several days previous a number of tribes whose territories adjoin one another congregate at a particular spot, characterised by an immense mound of earth covered with ashes (known amongst the white inhabitants as "a black's oven") and surrounded by plenty of "conaway" or water holes. To this place they bring numbers of kangaroos, possums, emus, and wild ducks, and a large quantity of wild honey, together with a grain, from the seed of which they make a sort of bread. Upon the evening on which the corroberie is celebrated a number of old men (one from each tribe), called by the natives "wammaroogo," signifying medicine-men or charm-men, repair to the top of the mound, where, after lighting a fire, they walk round it, muttering sentences and throwing into it portions of old charms which they have worn round their necks for the past twelve months. This is continued for about half an hour, when they descend, each carrying a fire stick, which he places at the outskirts of the camp, and which is supposed to prevent evil spirits approaching. As soon as this is over, during which a most profound silence is observed by all, the men of the tribe prepare their toilet for the "corroberie," daubing themselves over with chalk, red ochre, and fat.

While the men are thus engaged the gentler sex are busy arranging themselves in a long line, and in a sitting posture, with rugs made of possum-skins doubled round their legs, and a small stick, called "mulli-mulla," in each hand. A fire is lit in front of them, and tended by one of the old charmers. As the men are ready, they seat themselves cross-legged like tailors, and in regular "serried file," at the opposite side of the fire to the women, while one of the "medicine men" takes up his position on the top of the mound to watch the rising of the moon, which is the signal for "corroberie." All is now still: nothing disturbs the silence save the occasional jabber of a woman or child, and even that, after a few minutes, is hushed. The blaze of the fire throws a fitful light along the battalion-like front of the black phalanx, and the hideous

SKETCHES IN AUSTRALIA: NATIVE DANCE.

faces, daubed with paint and smeared with grease, show out at each a moment to anything but advantage.

As soon as the old gentleman who has been "taking the lunar" announces the advent of that planet, which seems to exercise as great an influence over the actions of these people as over many of those amongst ourselves, the corroberie commences. The women beat the little sticks together, keeping time to a peculiar monotonous air, and repeating words the burden of which, when translated, may be—

The kangaroo is swift, but swifter is Ngoyullemun;
The snake is cunning, but more cunning is Ngoyullooman, &c.—

each woman using the name of her husband or favourite in the tribe. The men spring to their feet with a yell that rings through the forest, and, brandishing their spears, boomerangs, &c., commence their dance, flinging themselves into all sorts of attitudes, howling, laughing, grinning, and singing; and this they continue till sheer exhaustion compels them to desist, after which they roast and eat the product of the chase, gathered for the occasion, and then drop off to sleep one by one.

ROYAL MARRIAGE FESTIVITIES AT CHRISTCHURCH, NEW ZEALAND.

THE marriage of the Prince and Princess of Wales was duly honoured in all parts of the world where Englishmen reside, It was commemorated with the same fervent loyalty in British possessions at the antipodes as it was at home. In the provinces of New Zealand the event was everywhere celebrated with great rejoicings. A sketch of the procession in Christchurch, the chief town of Canterbury settlement, on the commemoration-day (July 9), has been forwarded to us, and is engraved below. The procession extended more than a mile and a half, and included all the notabilities of the town and province. Two commemoration-trees, which were subsequently planted, were borne in the procession, and the passing of the carts containing these up High-street forms the subject of our illustration.

The procession formed near the Trolisway works, on the Papanui road, and traversed the entire length of the town as far as the Town Belt. There the two young oaks, which were presented by Mr. William Wilson, of Christchurch, were planted by Mrs. Beakey, Mrs. J. Hall, Mrs. Fitzgerald, and Mrs. Bowen. Prayers were offered by the Lord Bishop of the diocese, and his Honour the Superintendent delivered a suitable address. The procession then returned to Cathedral-square, where it dispersed. One of the most interesting events of the day was the Maori entertainment at the new Music-hall; about one hundred Maories sat down to a plentiful dinner. At night the town was illuminated; and a public ball, which was numerously attended, brought the proceedings to a happy termination.

ROYAL MARRIAGE FESTIVITIES AT CHRISTCHURCH, NEW ZEALAND.

THE ILLUSTRATED LONDON NEWS.

No. 1226.—VOL. XLIII. SATURDAY, OCTOBER 10, 1863. WITH A SUPPLEMENT, FIVEPENCE

THE HOUSING OF INDUSTRY.

THE poor may well thank Heaven that there is in this country such an institution as the Parliamentary recess. When legislators have gone their several ways in search of recreation for their jaded powers—when the fashionable world, the political world, the busy world, are all out of town inhaling the sea-breezes, climbing the mountain peaks, cruising in the Baltic or the Mediterranean, stalking the deer, shooting grouse, partridges, and hares, angling in the streams and lakes, and otherwise diverting themselves—when the newspaper press is struggling with the horrors of "the dead season," and writers and readers are alike eager for the faintest taste of novelty—then the poor have a chance of kindly notice. Their Session, if we may so designate it, begins when all other Sessions have ended. Their affairs are then discussed, not, indeed, in public meetings nor in representative assemblies, but, still better, by the members of "the fourth estate of the realm." No resolutions are passed—no laws are enacted—no Royal speech opens or closes the deliberations of public opinion upon their condition, their wants, their wrongs, their vices, their progress, or their prospects; but there can be no doubt that the poor of this country owe whatever hopes they may entertain of a slow improvement of their lot to the laudable and effective use to which the columns of daily and weekly journals are customarily turned in their behalf when the World and his wife are abroad for the holidays.

The principal domestic topic under examination and debate in the papers for some weeks past has been what, by a flagrant misapplication of terms, is commonly referred to as the house accommodation of our labouring class. Accommodation, forsooth! In regard to how large a proportion of those who produce our wealth is the use of the word a grim irony? After an attentive perusal of the letters on "Labourers' Cottages" which have appeared day after day in the *Times*, and a glance at the startling revelations made by the commissioner of the *Daily Telegraph* as to the domiciliary characteristics of Hollybush-place, in the Bethnal-green district, one feels guilty of something like heartless mockery in employing the phrase "*Homes* of the Poor." What better reason have we

PHAM-PHU-THU. PHAN-THANH-GIANG. NGUY-VAN-DAN

THE ANNAMITE AMBASSADORS IN PARIS.—SEE PAGE 361.

in countless instances, to desecrate that word by using it to describe the places in which hard-working labourers and hungry *proletaires* lie down to rest, than we have so to designate the dens, holes, lairs, burrows, in which the brutes shelter themselves from inclement skies? Many of them, indeed, we can hardly call dwellings—for the wretched tenants do little more than find nightly lodging in them, except when their physical energies are laid prostrate by one or other of the various forms of epidemic disease that incessantly hover over their crowded haunts. Employ what phrases we will, however, the housing of the poorer classes of our workpeople, whether in town or country, is a foul blot upon the otherwise fair fame of England—a state of things indicating a hideous flaw in our social arrangements—a perpetual ulcerous sore which, if not absolutely dangerous, establishes an exhaustive drain upon the physical and moral health of the nation, and reflects obscure upon the system which permits it.

Who should, in fairness, be held responsible for this evil, the nurse if not the parent of so many others, it is less necessary to inquire than how it may be remedied. It appears as though it had been the inevitable outcome of the mistakes, partly innocent, mostly selfish, of many successive generations. It is one of the consequences inseparable, perhaps, from a general tendency to hold man cheap in comparison with property. The blame does not fall exclusively upon any one class, although some classes more than others may seem to be exposed to it. But what if us would find ourselves arraigned in the first stone? We are all, more or less, involved in the disgrace, as we have all, more or less, shared in giving sanction to the social habits which have culminated in it. They are but few—"faithful among the faithless"—who can absolve themselves from the guilt of that neglect which alone could have produced such a state of things possible. It has been observed, too truly, that one half the world neither knows nor cares how the other half lives. No doubt, it is out of this fearful element of ignorance and indifference that the pestilence will now under notice germinated and grew to such frightful proportions. But in this, as in all similar cases, there must have been specific agencies at work, to the operation of which the utterly inadequate and miserable housing of the poor may be visibly traced. The enormous increase of municipal government from the outlying but populous districts of the metropolis, and the legal facilities given for the construction of new thoroughfares, railways, streets, and markets, without the smallest provision for the house accommodation of those whose dwellings the demands of commerce have swept away, will explain how it is that the mischief has reached in London the intensity of an ever-withering curse; while in the rural districts, where space is less precious, the law of settlement has tended, in more ways than we can stay to enumerate, to deprive the labourer of attractive or even decent habitation. But, if in omission and in commission, Parliament is chargeable with having aggravated the disabilities which rob the poor of house room and render them practically a homeless class; and upon Parliament devolves the duty of initiating the change which cannot be safely deferred much longer.

But, whilst the Legislature may justly be expected to remove any causes, having their origin in law, by which this disgrace to the country and injustice to the labourer is made much worse than it otherwise would be, and to confer the requisite powers and facilities of local organisation and self-government, the want of which gives indefinite scope to private selfishness and inconsideration, the question as to how and by whom the poor are to be provided with suitable domiciles belongs rather to public opinion than to law. The awakening of the conscience to a recognition of the ties which connect the rich and the poor, and of the duties which property owes to industry and indigence, which, of late years, has done so much in other directions to ameliorate wretchedness, to dry up the sources of crime, to neutralise the virulence of the great agencies of demoralisation, and, as far as possible, to quicken in the bosoms of the most degraded the sentiment of self-respect, will, doubtless, operate in this direction also. Indeed, it has been by no means inactive in reference to this most painful subject. Social science (shall we call it?) has expended the great and active religious sentiment, is already busy in exploring and in laying bare the long unprobed sore, in tracing it to its causes, in showing its ramifications into other forms of suffering and depravity, and in tentative efforts to discover the speediest and most effectual remedy. Public opinion soon finds its powerful aid. The mischief is one which cannot long thrive in the full daylight of public opinion. Proprietors of estates, municipal authorities, boards of direction, capitalists, and even builders will, after a time, feel the force of the great sentiment which will encompass them as an atmosphere; and to allow the labourer to be housed like a beast of the field will come to be regarded with a shame as profound as that with which handowners now blush for a district without schools. There must be terrible neglect of social obligations somewhere, or men and women who toil hard for their bread would not be compelled to put up with a ruder and filthier shelter than cattle or swine: and it may be confidently assumed that public discussion will in the end bring home the guilt of that neglect to those upon whom it is justly chargeable, and either destroy their peace or remodel their practice. True sentiment on matters of social duty comes of fulness of light; and wherever we have the latter the former may be trusted to do its proper work.

We, therefore, congratulate the poor; we congratulate the rich also, for they are deeply interested in the matter, if they did but know it, on the renewed consideration of the manner in which, both in this vast metropolis and in country villages, the labourers are lodged. We welcome the reiterated exposulations of the "S.O.S." of the press. We listen, not without a thrill of horror, but with fresh yearnings of hope, to the sickening details which personal and searching investigation is week after week uncovering to the light. It is thus that all great social ameliorations are effected in this country. Society is conscious of some urgent want, but lives on in the neglect of its obligations, and reaps the penalty. Then, men of sensitive consciences, large hearts, and indomitable resolution, are inwardly impelled to cast about for a remedy. They become, each in his own sphere, "preachers of righteousness," inculcate upon individuals their responsibility, hold up before society its forgotten duty, and appeal it, by persuasion, to attention. Presently, a few kindred spirits wake up from previous torpor, respond to the appeals with which they are addressed, and, gathering about the original nucleus, swell the amount of moral influence. Combination follows—organisation is effected—and the remedy can be at hand. Information is collected, and arguments are marshalled and sent forth to invade and subdue the general indifference. New domains are won from the vast territory of public listlessness. Public spirit of moral reformation consummated. Whole classes are seized by it. Sympathy grows to be as universal as it is spontaneous; and under the incessant action of the public mind the evil which once seemed unassailable crumbles away and becomes a thing of the past. Such may be the process and such the issue, of that philanthropy which is now concentrating its notice upon the dwellings of the poor.

FOREIGN AND COLONIAL NEWS.

FRANCE.

The Emperor and Empress went on Saturday week to San Sebastian where their Majesties met with a cordial reception.

The Empress embarked on Saturday morning, returning to France by way of the Mediterranean. Her Majesty has paid a visit of congratulation to the King of Portugal.

The Empress and the Prince Imperial left Biarritz on Sunday morning for Bordeaux, where they remained during Monday. The Emperor, on his way from Biarritz, visited Arachon, a bathing-place created by M. Isaac Pereire, at whose house he stopped to partake of refreshment. He also visited the *landes* south of Bordeaux, which are being cultivated by the Duke de Bastiani. He himself satisfied with all the engineering and agricultural operations that have been undertaken there within the last few years. A dinner was given at Bordeaux on Sunday evening on board the Reine Hortense, and the municipal authorities were last night invited. At night the town was illuminated. On Monday morning the Emperor reviewed the troops of the garrison. His Majesty has presented to the town of Bordeaux the five portraits of Napoleon I. by Gerard. The Emperor arrived on Tuesday morning at La Rochelle, and was present at some artillery experiments. His Majesty returned to Paris in the evening, and on Wednesday morning presided at a Council of Ministers at the Tuileries.

Prince Napoleon returned to Paris on Sunday morning from his journey to England. The *Presse* says :—"This trip, which has given rise to so many comments, had in reality no object but that of seeing some agricultural establishments, as we learn by the English papers, to which we have had access. The Prince visited the Duke of Bedford's estate, Woburn Abbey, and the celebrated farms of Prince Albert at Windsor. Prince Napoleon has again left Paris for his estate of Prangins, on the Lake of Geneva, in Switzerland.

The anniversary of the death of Queen Hortense was celebrated on Monday at Rueil by a solemn mass. Marshal Magnan, Marshal Vaillant, some old friends of this amiable personage, and all the members of the Emperor's household now in Paris. The villagers sang in the neighbourhood of Malmaison also attended. But none of the Imperial family were present, they all being, with the exception of Prince Jerome, in the provinces. The remains of Queen Hortense were, many years ago, transported here from Switzerland, where she died. The Queen, who in accordance with the opening clause of her will, in which she begged that her ashes might be placed beside those of her mother, the Empress Josephine.

M. Billault has been seriously ill, but is now considered out of danger.

The Paris papers assert that the intention of a change in the English Embassy is given up. Baron Gros is to remain.

The Archduke Maximilian continues to visit the various remarkable establishments of the capital. We give Portraits of the Ambassadors on the preceding page, and some particulars relating to them will be found at page 364.

A circular of the Minister of War orders that all soldiers at present with their regiments who have served fifteen years, or who have enrolled in 1863, shall be immediately struck off the active lists and enrolled in the reserve. The Vigie, Cherbourg, states that the new ironclad frigates are completed, and ready for launching and fitting out. Their names are—Flandre, Gaulois, Guyenne, Magnanime. Provence, Heracles, Surveillante, Surveillante, Alecton, and Fulton.

Mr. Hall, an Englishman, was called to the French Bar on Tuesday week, being the first instance of a foreigner doing so. The privilege of pleading at our language has become necessary to barristers in Paris in consequence of the numerous commercial as well as criminal cases in which British subjects are engaged.

The Paris Jockey Club has taken possession of its new premises in the corner of the Champs Elysées and the Rue de Marbeuf. Its apartments in the Rue de Grammont are closed.

The Paris Bourse has been remarkable for a complete success. The players muster in sufficient numbers to ensure periodical matches.

Ballooning on a gigantic scale has been attempted in Paris. On Sunday the splendid balloon ever made, constructed by M. Nadar, a photographer, went up, with thirteen passengers, from the Champ de Mars. An Engraving and a description of the giant balloon are given at page 377.

The Government having decided on founding a penal colony in New Caledonia, the maritime Prefect of Toulon has received orders to prepare the naval matériel necessary for the installation of 250 convicts, which will be transported to New Caledonia in the month of December next.

The *Journal de Rouen* mentions that a smart shock of earthquake was felt at Randol, in the department of Eure, last Sunday.

THE ARCHDUKE MAXIMILIAN AND THE MEXICAN DEPUTATION.

The Mexican deputation was received on Saturday by the Archduke Maximilian at the Miramar residence, near Trieste. Admiral Bedrada spoke in the name of the deputation. The Archduke, in reply, said :—

The wishes of the Mexican assembly of notables have touched me deeply. It cannot but be exceedingly flattering for our house that they have turned their eyes to the descendants of Charles V.

Although the mission of maintaining the independence and welfare of Mexico is a heavy and difficult one, I, who have never yet paid a visit of congratulation to the King of Portugal.

THE ARCHDUKE MAXIMILIAN AND THE MEXICAN DEPUTATION.

The Mexican deputation was received on Saturday by the Archduke Maximilian at the Miramar residence, near Trieste. Admiral Bedrada spoke in the name of the deputation. The Archduke, in reply, said :—

The wishes of the Mexican assembly of notables have touched me deeply. It cannot but be exceedingly flattering for our house that they have turned their eyes to the descendants of Charles V.

Although the mission of maintaining the independence and welfare of Mexico is a heavy and difficult one, I, who have never yet paid a visit of, must nevertheless, in accordance with the views of the Emperor Napoleon, declare that I have recently received from Mexico a legitimate and free basis without a spontaneous expression of the wishes of the whole nation.

I must make known to you that I have accepted the crown of Mexico only on the whole country. On the other hand, it would be my duty to ask for guarantees which are indispensable to secure future to me and to my descendants the dangers when thereon her integrity and independence.

Should these guarantees be obtained and the universal vote of the nation be given in my favour, I am ready to accept the crown, subject to the approval of the Emperor, my brother.

In case you should call me to this high mission, I accept at once declare that from internation to open the path of progress by a Constitution, as was done by my brother; and after the complete pacification of the country, to seal the fundamental law with an oath.

By such means only can a new and really national polity be called into existence, by which all parties, forgetting old disputes, would co-operate with me in raising Mexico to a prominent rank among nations. Carry back with you these frank declarations to your fellow-citizens, and act in such a manner that it may become possible for the nation to declare what form of Government it desires to have

It is believed that the conditions of the Archduke's acceptance of the crown will not be those named in October, 1861, according to which he considers the co-operation of France and England to be the only means by which order can be re-established, and that a free manifestation of the wish of the whole nation is absolutely necessary.

The Archduke stated in conversation with the members of the deputation that he would only accept the crown if all these conditions were fulfilled, and that he would await their fulfilment.

SPAIN.

The Ministry intend to lay before the Cortes the draught of a new law on the press, the principal features of which will be trial by jury and a reduction in the existing scale of fines.

The Democratic Committee has issued a proclamation in which the electors are recommended to abstain from voting at the coming elections. The proclamation demands on behalf of the Democrats of Spain universal suffrage, freedom of the press, and the abolishment of the system of administrative centralisation.

The Ministry are believed to be quite confident as to the results of the elections.

ITALY.

Sir James Hudson was on Sunday received in audience by the King, and presented his letters of recall.

Chevalier di Nigra, Minister at the French Court, arrived at Turin on Sunday from Aix, and was received in audience by the King. The Chevalier left Turin in the evening.

The treaty of commerce between Russia and Italy has been signed.

The official *Gazette* publishes a Royal decree authorising an additional expenditure of about 8,000,000 lire in the budgets of the different Ministers. The decree at the same time orders various reductions to the same amount in the expenses of other branches of the public administration.

The general result of expenditure for 1863 has not been increased. The report of the Minister of Finance, which precedes the decree, points out the inconvenience resulting from the privilege granted to the Government to contract loans during the last few parliamentary recess, and the rebedies which are to be applied by the new law on the public accounts, which has already been submitted to Parliament. In the present case the amount voted for the Budget of this year will not be exceeded.

Dr. Magglorani, who was expelled from Rome, where he was professor in the University and physician to the French Embassy, has just been appointed professor in the University of Palermo.

The Public Consistory at Rome was occupied on the morning of the 1st inst. in the bestowal of the Roman Christian Pallium. The Pope's Secret Consistory afterwards appointed four Bishops of Spain, one for Portugal, and three *in partibus*.

The new and splendid bridge over the Voltarno, on the Roman line of railway, has been opened.

GERMANY.

The Federal Diet has unanimously accepted the proposition of the united committees in favour of federal execution in Holstein. As, however, an interval of six weeks will elapse—the time given to Denmark to comply with the demands of the Federal Diet—the occupation can take place, it may be hoped that this measure, so dangerous to the peace of Europe, may yet be averted.

AUSTRIA.

The Minister of Finance has submitted to the Reichsrath a proposal for a complete reform of the system of taxation, of which we have yet to see the details. It appears, however, that extraordinary taxes will be imposed for the purpose of defraying extraordinary expenditure.

In the Lower House of the Reichsrath, on Monday, the Minister of State read an Imperial message, again exceptionally empowering the House, with its present constituent numbers, to discuss the budget for the whole empire for 1864. The House, however, resolved to wait the arrival of the Transylvanian deputies before discussing the Budget.

PRUSSIA.

The Ministry has fixed the elections of the first degree for the 20th inst., and those of the second for the 28th.

The *New Prussian Gazette* of Monday evening says :—"We learn that a Royal order addressed to the Minister of War directs that at the forthcoming elections officers and soldiers are not to be urged in an official manner to participate in the elections."

THE POLISH INSURRECTION.

Warsaw remains in a state of terrorism from both the contending parties. At the bidding of the secret National Government all the workmen employed on the official National Journal of Warsaw have left the printing-office; and the Russian Government is unable to find an editor for the journal, although offering a salary equivalent to nearly £1000 a year.

The Commissariat Department of Warsaw has been informed that 30,000 fresh troops are expected to arrive in the course of April, and remain there during the winter months. Every little town will be garrisoned.

We continue to receive accounts of engagements between the Russian troops and the Poles in various parts of the provinces.

It is credibly reported that the National Committee have named Mieroslawski "Organisateur General" of the "Polish troops." This would seem to indicate that they have given up all hopes of French aid, and called in that of the Revolutionists. The aid of Mieroslawski, it will be remembered, was rejected in the early days of the rising, on the ground of his extreme views. Further, it is stated by the Vienna *Botschafter* that, since Mieroslawski's acceptance by the National Committee, Garibaldi's son-in-law Bordas has been assembling Italian recruits for the winter campaign.

The chief Commissary, Count Wielopolski, brought before a court-martial, by order of the National Government, in order that the circumstance of his late defeat may be investigated.

GREECE.

Advices from Athens state that the attempts of the Greek National Assembly to unite the different military parties have failed."

The Russian Ambassador has had an audience of the King. Great enthusiasm prevailed among the members. In its sitting of Monday it accepted the proposed annexation to Greece, and expressed its thanks to England for the proposition. There now only remain a few formalities to complete the transfer of the islands from the protection of Great Britain to that of Greece. The date of this event arrives opportunely with the coming of the young King of the Greeks to England.

EGYPT.

The inundation of the Nile has assumed alarming proportions. According to a despatch from Alexandria on Saturday last, six breaches of the Cairo canal had occurred, and the water was submerging the lodge at Kaffre Zaiatt is seriously damaged.

The Alexandria correspondent of the *Times*, in a letter dated September 26, says :—

The Nile is the great topic of conversation here; indeed, I may say the only one; the great river is the master of everyone's fortune, from the Viceroy down to the meanest fellah. On the night of the 16th great alarm prevailed, as the water had risen four feet in twenty-four hours, and was flowing over the top of Choubrah dyke at Cairo, was over the transit wharf at Boulak, had flooded Gitsh and part of the Ezbekieh garden, and was pouring into the Pasha's sea telegraph, and was threatening the railway from here to Cairo; the station-house at Kaffre Zaiatt, and the line between that and Tantah, was submerged with water. At the apex of the Delta four villages had been entirely swept away, Tantah, seat of the great religious festival, was in danger, and the whole country, and people had time to congratulate themselves that the Viceroy had not neglected the dykes, but had acted with vigour and determination. The Viceroy has done all he can; he makes the Governors inspect their districts every week, and bodies of men patrol the dykes by day, and watch at night with large fires kindled at short distances from one another. Ismail Pacha himself is always on the move, seeing everything himself, and giving orders with his own lips, which is the only way in the East. If we still had Said Pacha on the throne we should have had a far worse inundation than in 1861. The day before yesterday the dyke of Dalta, opposite Mansourah, gave way, and a portion of the section of railway just opened has been destroyed, besides some damage having been done to the crops. The Viceroy being there, every effort was made to stop the gaps, and it is believed that no very serious loss will be sustained. Alarm still prevails, as usually the Nile makes one great effort before finally subsiding for the year.

AMERICA.

BATTLES BETWEEN GENERALS BRAGG AND ROSENCRANZ. RETREAT OF THE LATTER.

As announced in our town edition last week, there have been two days' severe fighting between the Confederate forces under General Bragg and the army of General Rosencranz near Chickamanga Creek, in the north-west corner of Georgia—the result being that Rosencranz was defeated and compelled to retreat to Chattanooga.

The following is a summarised account of the two days' battle:—At eleven on the morning of the 19th ult. the Confederates attacked General Rosencranz near Chickamanga Creek. A fierce musketry engagement ensued, the woody nature of the ground preventing the use of artillery. Early in the engagement the Confederates captured five guns of the celebrated Loomas battery. Fierce fighting continued till two o'clock in the afternoon, when the Federal centre was pushed, broken, and retreated in disorder, pursued by the Confederates, who were, however, afterwards checked and driven back. The Confederates then drove General Davis's division back with heavy loss, capturing every gun of the 8th Indiana Regiment. Davis, however, succeeded in rallying his forces and re-took his guns. General Reynolds's division suffered severely, but maintained its position. Palmer's division lost two guns. Van Cleve's division lost ground and did not regain its position. A general fight continued until long after dark. At its termination both armies are said to have occupied the same ground as at the commencement. The Federals captured ten guns and lost seven.

At ten a.m. on Sunday Thomas's division, which held the left of Rosencranz's line, was assailed with great fury, and was very shortly compelled to call for reinforcements, and at noon he was forced to retire. The whole of M'Cook's corps, except the divisions of Sheridan and Davis, was then withdrawn from the right, where a portion of it was in the line of battle, and from the centre, where it was in reserve, and sent to Thomas's support. Its place in the centre was filled as well as it could be by the divisions of Sheridan and Davis. This change had been no sooner effected than a furious onslaught was made on the centre, and Sheridan and Davis were driven off the ground in disorder, borne down by superior force, and were not rallied and brought into action again for some hours. Thomas found his right flank thus exposed, and made his dispositions accordingly, and received and repulsed attack after attack until nightfall. He retired during the night towards Rossville, bringing off all his wounded.

On the following afternoon, according to one account, the Confederates attacked General Thomas, but were repulsed, and Thomas proceeded to Chattanooga, where Rosencranz had concentrated his forces and was awaiting reinforcements.

General Rosencranz telegraphed to Washington on the night of the 23rd that he could not be dislodged from his position.

The *Washington National Republican* says the killed and wounded on both sides will probably not fall short of 30,000. The Federal loss in killed, wounded, and prisoners is estimated at 12,000 men. 1000 Confederate prisoners have been sent to Nashville.

General Bragg officially reports to his Government that after two days' fighting the enemy had been driven from several positions, but still confronted him. He captured twenty guns and 2500 prisoners.

The strength of the two sides prior to the engagement is not clearly known. Bragg is said to have had 71,000 men, including Buckner's and Johnston's corps. If to this be added either Ewell's or Longstreet's corps of say 20,000, it would give him about 90,000 men. Rosencranz's effective available force is believed to have been about 40,000.

According to one account, Burnside, with the ninth corps, 20,000 strong, was in peril on his way from Knoxville to Chattanooga. According to another he had joined Rosencranz on the 23rd, and the former was expecting help from Grant.

OTHER WAR NEWS.

Charleston news to the 22nd ult. has been received. Both sides were firing vigorously, but there is no material change in the situation.

In Virginia everything presaged a battle. Meade's army was moving, and the Confederates were reported in his front prepared to meet him. Nothing definite was known as to their strength.

The Federals are said to have sustained reverses in Texas.

An important Federal movement is taking place on the line of the Baltimore and Ohio Railroad.

MISCELLANEOUS.

The Confederate Government is declared, on the authority of the *Richmond Despatch*, to have effected a loan on cotton of 100,000,000 francs in France. The *New York Herald* states an important rumour—that Vice-President Stephens had gone to Europe with an offer to cede Texas to France in return for French assistance to the Confederate Government.

The Russian flag-ship Alexander Newsky, Admiral Lasofski, with four other Russian men-of-war, have anchored in New York harbour. It is rumoured they will remain there all the winter. The press urge that an hospitable welcome be given to the Russian officers.

It was reported at New Orleans that the French had occupied Matamoras with 5000 troops, and that a collision between them and the Federal gun-boats at the mouth of the Rio Grande was imminent.

BRITISH NORTH AMERICA.

A vote of want of confidence in the Government has been defeated in the Canadian Parliament by a majority of two.

The *Canadian News* states that the Marquis of Normanby (late Lord Mulgrave) is to be succeeded in the governorship of Nova Scotia by the Hon. Arthur Gordon, now Governor of New Brunswick. The Hon. J. Rose, Q.C., of Montreal, is to be the new Governor of New Brunswick. The same authority states that Captain Kennedy has been appointed Governor of Vancouver Island in the room of Governor Douglas.

INDIA.

By the arrival of the Bombay mail we have advices from Bombay to Sept. 9, and from Calcutta to Aug. 29.

The Governor-General was to leave Simla on the 25th of September. His Excellency would first visit the Kangra valley to see the progress of tea-planting there. He was then to proceed to Peshawur. From Peshawur he was to return to Lahore and open the Punjaub Exhibition. The Rifle Brigade from Delhi will form his Excellency's escort through the Punjaub.

The reputed Nana Sahib, captured at Ajmere, arrived at Cawnpore on the 22nd of August, whither he was sent by Government for examination. The Cawnpore authorities, after hearing and sifting all the evidence and testimony that could be obtained at Cawnpore and Bhitoor, have definitively pronounced that the prisoner is not the Nana Sahib.

His Excellency the Governor of Bombay laid the foundation-stone of St. Paul's Church, at Poonah, on the 29th of August. The church is to be a large and elegant structure. His Excellency afterwards went on a visit to Ahmednugger, where he arrived with his Staff on the 2nd of September.

His Highness Meer Jaffer Allee Khan Bahadoor, the Nawab of Surat, died on Friday, Aug. 21.

The Council of Regency at Oodeypore having failed to administer justice, civil and criminal, the Viceroy and Governor-General, by a proclamation, dated Simla, Aug. 14, 1863, has conferred on the Political Agent for the time being the full powers of a sessions judge in criminal cases, of superintendent of police, and of commissioner and civil judge in revenue and civil suits. Such powers to be exercised until the Maharajah is pronounced of age and capable of undertaking the responsibility of the administration of the Meywar State.

JAPAN.

Advices from Kanagawa to the 10th of August state that the British fleet had sailed for the western shores to punish the damios.

Sigismund Dietrichsen, the Hungarian who absconded with over £8000 which he had fraudulently obtained in London, has been captured at Pesth.

The Conservator of the Library at Riga has published at Brussels a pamphlet, entitled, "Le Testament de Pierre le Grand," and the object of which is to prove that the celebrated will of the Czar Peter is only an apocryphal document, drawn up by order of Napoleon I. in 1812. The author of the pamphlet states positively that it was only in 1836 that the will was published for the first time under the form of an authentic document, in a work by M. Gaillardet.

LATEST NEWS FROM ABROAD.

The following telegrams have been received through Mr. Reuter's office:—

FRANCE.—Paris, Oct. 8.—The Emperor will preside at a Council of Ministers to-morrow. M. Drouyn de Lhuys received the Diplomatic Corps to-day. The *Pays* of this evening announces that the iron-plated fleet will shortly leave Brest to continue its experiments. The same journal, in an article on the Polish question, says that France is determined to preserve to the Polish question its European character, and not to separate its action from that of the other Powers. The *Patrie* of this evening maintains the complete accuracy of its statement that Prince Czartoriski had demanded from the Cabinets of London and Paris the recognition of Poland as a belligerent nation.

SPAIN.—Seville, Oct. 8.—The Empress of the French arrived here yesterday evening, and will proceed on her journey on Saturday.

THE SCHLESWIG-HOLSTEIN QUESTION.—Frankfort, Oct. 8.—In to-day's sitting of the federal Diet the four Governments called upon by the federal decree of the 1st inst. to carry out the execution in Holstein announced that they would obey the order in the event of its becoming necessary. Oldenburg has renewed its former proposal to declare the stipulations in the Treaty of 1851-2 to have lapsed, should the execution be opposed by Denmark.

THE EARTHQUAKE.

On Tuesday morning, about half-past three, the central and western parts of England were shaken by an earthquake. Comparing the various reports received from the districts over which the wave of agitation travelled, we gather that the shocks were as nearly as possible simultaneous from Milford Haven to Burton-on-Trent, and from the Mersey to Plymouth. The sky appears to have been clear and the air still, an observation quite consistent with the experience of travellers in countries where earthquakes are most frequent and violent. The shocks were in many if not in most places unaccompanied by any subterranean noise. In all the effects were about the same—the furniture was shaken in houses, gates rattled, and high buildings oscillated alarmingly, but no actual damage was done. In the case of a vessel at sea, about twenty miles from Milford Haven, which felt the earthquake, the captain says that the ship reeled as if she had struck on a rock.

A zigzag line drawn from Liverpool through Derby, Wolverhampton, Birmingham, Worcester, Hereford, and Taunton, to Exeter, would seem to mark the course along which the main shock proceeded. The shock seems to have been general throughout a large stretch of country, embracing South Staffordshire and parts of Warwick and Worcestershire.

One of the correspondents of a Birmingham paper says that at the time of the shock he was lying in bed awake, when he heard a sound as of the rushing of a very strong wind, which had scarcely subsided when it was succeeded by a smothered rumbling which caused his bedroom window to rattle. The sound, he adds, increased in intensity, and immediately he felt a swaying, rocking, or undulatory motion, inducing nausea. Another correspondent says the motion, which was very palpable, appeared more like an upheaving than an oscillatory movement; while a third felt a rocking under his bed, and experienced a sensation as of standing upon the platform of a railway station while an express-train is passing. Another finds his bed "upheaved;" another his bed "shaken;" a third hears a sound as of kettle-drums in the distance; a fourth finds his windows rattling; a fifth hears all the bells in his house ringing; a sixth fancies there is thunder in the distance.

A gentleman residing at Smallheath, one of the suburbs of Birmingham, gives the following description of his experience of the shock:—"I was first startled by a sudden crash, which was quickly followed without intermission by a slightly rolling motion not unlike that of a railway train. The windows of my bedroom rattled as though some person was violently shaking them, and the furniture of the room shook as if somebody had brushed against each separate article. The shock lasted probably about three seconds, and then—though, perhaps, only by force of contrast—there seemed to be a preternatural quietness. I did not notice any gust of wind before the shock; but the incidents of the shock itself were so distinctly marked, that even at the time I had no doubt about its character."

At Wolverhampton the alarm was universal, and the impression of many in that important manufacturing town was that a terrible boiler explosion had taken place.

In Walsall, Wednesbury, Darlaston, Cannock, and other districts within and bordering upon the "black country," the trembling of the earth was very distinctly felt. The same was the case at Stourbridge, where the shock caused a small fracture in the brickwork of a glass manufactory.

At Wordsley the shock appears to have been remarkably severe. The Rev. R. B. Girdlestone writes as follows to a local paper:—"Last night I was awakened about 3.15 by a shock which made the whole house quiver; the bed shook violently, the windows rattled, and all the furniture seemed to shiver. The effects of the first shock had hardly subsided when a second followed it, with a sound as of a heavy explosion beneath the cellars, which made the house shake from the bottom to the top.

At Derby, Worcester, Hereford, and Gloucester the subterranean noises and the shakings of the earth were also comparatively severe. At Hereford, indeed, several chimneys are said to have been thrown down. "The policemen on duty," says a correspondent writing from the locality, "were in some instances much terrified; and it is affirmed that the Infirmary, which stands on a gentle eminence overlooking the Wye, St. Nicholas Church, and other buildings were seen distinctly to heave and throe with the motion of the earth. Near the Castle Green large trees were also perceived as it were in a condition of fearful agitation, and a police-officer on duty in that neighbourhood was compelled to rush to a gatepost to support himself, the earth throwing him backwards and forwards."

A gentleman writes to us from Monmouth as follows:—"A violent shock of an earthquake was felt here on Tuesday morning last, at 3.30, causing great consternation to many of the inhabitants. Persons were rocked in their beds by the oscillations; and Mr. Matthews, grocer, Church-street, on going down to his shop found the floor strewed with goods shaken off the window-shelves. This visitation was attended by a sudden and powerful detonation, resembling the booming of distant artillery."

In Bristol the phenomenon was not made manifest in a very striking manner, some persons noticing it, and a large number being entirely ignorant of anything unusual taking place.

On both sides of the Bristol Channel the shocks appear to have been felt with more or less distinctness.

In Swansea noises were heard which were supposed to be the booming of guns, and the vibrations around Mumble Head lasted a considerable time, and created the utmost consternation. A local paper says:—"Throughout Swansea and Sketty, and all along the seacoast, numbers of individuals testify to the noises which the vibrations of the earthquake induced. At Haverfordwest several persons felt the shocks of the earthquake. At Llanelly many persons were aroused from their beds between three or four in the morning by the sudden plunging about of household furniture, glasses, &c."

At Taunton the utmost alarm was created by the earthquake and the noise which accompanied it, and a large number of persons betook themselves to the streets and open spaces to escape being crushed by the fall of buildings which they anticipated.

The trembling of the earth and noises were felt with great intensity in Exeter and along the South Devon coast, causing everywhere considerable alarm.

Shocks were also felt in Leicester and Sheffield, but apparently with nothing like the severity observable elsewhere.

From Nottingham Mr. Haythorn writes, describing the rocking of his bed and the entire house on the occasion of the earthquake. He says:—"The movement was very easy, and similar to that experienced on board a steam-vessel when first put in motion. I at once concluded there had been an earthquake. It was then 3.20, starlight, but not any wind, nor any noise afterwards. I think it probable there had been a previous shock, as the cause of my being awoke. My sister, in an adjoining room, was also awakened by the windows shaking; but I can hear of none of my neighbours having perceived anything of the kind."

In London and the suburbs the shock was also felt.

Mr. Hinde writes as follows from Mr. Bishop's observatory, Twickenham:—"It appeared to me that the oscillatory motion was from E.N.E. to W.S.W., lasting three seconds, or rather less. I heard no sound whatever after the shock; but cannot say positively whether any preceded it. The sky was partially clear at the time, and the air perfectly still. The sensation produced by the tremor was very peculiar, and different from that of ordinary vibration."

From the Beeston Observatory, near Nottingham, Mr. Lowe thus writes:—"A smart shock of an earthquake was felt here this morning, at 3.30. Many persons awoke from the shaking of their beds and windows. At the time the sky was cloudless, the wind west, barometer stationary, and the temperature 31 deg. The motion of the earthquake pendulum at this observatory was from W.N.W. to E.S.E., and the displacement of chalk by the 30-ft. rod was half an inch, the index-needle moving the chalk so as to leave an oval, or rather a lengthened-oval, hole. There must have been at least two shocks, as numerous letters describe the time as both 2.35 a.m. and 3.30 a.m. That the latter was the time of a severe lateral shock is certain, as the zero pencils on my atmospheric recorder marked the paper in a remarkable manner at that hour."

Mr. Charles Dickens, writing from his residence, Gad's-hill-place, Kent, thus vividly records his observation of the earthquake shock:—"I was awakened by a violent swaying of my bedstead from side to side, accompanied by a singular heaving motion. It was exactly as if some great beast had been crouching asleep under the bedstead and were now shaking itself and trying to rise. The time by my watch was twenty minutes past three, and I suppose the shock to have lasted nearly a minute. The bedstead, a large iron one, standing nearly north and south, appeared to me to be the only piece of furniture in the room that was heavily shaken. Neither the doors nor the windows rattled, though they rattle enough in windy weather, this house standing alone, on high ground, in the neighbourhood of two great rivers. There was no noise. The air was very still, and much warmer than it had been in the earlier part of the night. Although the previous afternoon had been wet, the glass had not fallen. I had mentioned my surprise at its standing near the letter 'i' in 'Fair,' and having a tendency to rise. It is recorded in the second volume of the *Philosophical Transactions* that the glass stood high at Oxford when an earthquake was felt there in September, 1683."

Most accounts describe the shaking as from east to west; a writer from Cheltenham, however, says it was from south to north. All accounts agree that the night was calm. About ten years ago a shock was experienced in the same part of England, but it was of a upheaving, and not of a shaking, character, or accompanied with a noise.

Mrs. Somerville, in her "Physical Geography," says that no fewer than 255 earthquakes have taken place in Great Britain. This country has, however, suffered but little from earthquakes within the memory of man. One which was felt throughout England occurred in 1089; a shock was "severely felt" at Lincoln in 1142; another was felt throughout England in 1274; and "the greatest ever known" in this country happened on the 14th of November, 1828. An earthquake was felt in London in 1580, when part of St. Paul's and the Temple churches fell; and another shock was "severely felt" in Ireland in 1690.

On Wednesday, at the Sheriffs' Court, Red Lion-square, before Mr. Under-Sheriff Burchell and a special jury, a novel case of compensation, "Deneulain v. the Charing-cross Railway Company," was tried, and occupied the whole day. Mr. Kydd appeared for the claimant, Emma Deneulain; and Mr. Hawkins, Q.C., with Mr. Mellor, represented the company. The claim was about £1000, and a part arose for the destruction of "ancient lights," after a possession of twenty years, by the erection of the wall of the proposed hotel and the wall of the railway station. The house was now darkened and part of the air shut out by the railway. Several witnesses were called on the part of the claimant, and it was contended that the lady, who had been injured in her boarding and lodging house, was entitled to ample compensation. Mr. Hawkins called no witnesses, but in his address complained of the claim being most extravagant; and, further, that by the alterations she was not entitled to compensation for destroying the "ancient lights." The house, No. 41, Craven-street, would be improved by the opening of the Charing-cross Railway. The Under-Sheriff told the jury to compensate the claimant for the obstruction of the "ancient lights," and for compensation for the injury sustained. The jury awarded £150.

On Thursday week a thunderstorm of considerable severity passed over Colvend. The farmhouse of Portling was struck by the lightning and nearly destroyed. On visiting it on the morrow we found that the west gable-end had been thrown down, the bulk of the stones and rubbish falling inwards; that the walls, both back and front, were rent in several places; that the windows and doors were shattered to pieces; that the roof was forced over the front wall in one part, and rendered dangerous even to pass under, not to say to sleep beneath; and that the whole furniture of the family, with the exception of a chest of drawers and a bed in the best room, was broken and torn in a manner truly distressing to behold; and yet, wonderful to relate, although there were four of the family sitting in different parts of the kitchen end at the time when the lightning struck the house, and although they were leaning on or standing by articles which were shattered around them, not one of them was killed—only a young woman had her left arm scorched, and a boy had a clog taken off his foot; another young woman had a letter which she was reading snatched out of her hand, and a steel hoop, which she had in her dress, completely torn out. The escape of the family amid all this wreck and ruin was truly marvellous. This is now the third cottage in Colvend which we remember to have been struck with lightning within the past few years; but never before did we witness such a ruin as may now be seen at Portling.—*Dumfries Courier.*

SEAMEN OF OLD.—The fighting life and the nautical life of an ancient man-of-war were two distinct worlds. The *epibatæ* of the Greeks—the *classiarii milites* of the Romans—were soldiers who fought afloat, and not sailors, in our sense of the word, at all. Ingenious lexicographers describe them as "marines," but this is to suggest an incomplete analogy. The great bulk of the fighting power of a modern man-of-war is nautical in the strictest sense. The broadside is fired by seamen-gunners—the same seamen who do all the work of the vessel. The marines form an auxiliary military body—infinitely respectable, no doubt; but quite disproportionate in numbers and importance. Now, in the old world, the military men were the sole fighting force, and the sailor belonged to a distinctly inferior rank; and hence the curious circumstance—one of the many frequent contrasts between ancient and modern life—that the seaman was held in little honour by the ancients. In the first place, the gentleman seaman—the Collingwood of our experience—was a character of which antiquity knew nothing either in history or fiction. A Greek Tennyson or a Roman Wellington could easily be found; not so a Nelson of the Ægean, or a Jervis of Latium. Nay, our common seaman—Jack himself—was not a character to be matched in the ancient world, and though we have hints of his existence, classical literature does not take kindly to him. The philosophers thought the nautical element bad politically, turbulent, and ultra-democratic. The poets and satirists heard the sailor carol about his mistress, and noted that his voice was husky with wine, but treated him as no more picturesque or interesting than other social riffraff. Juvenal, in glancing at somebody who frequented the lowest haunts, observes that you may find him mingling with sailors, thieves, and fugitives.—*Cornhill Magazine.*

DANISH STATISTICS.—From the records of the last census in Denmark, lately published, we extract the following interesting details:—The whole Danish monarchy has a population of somewhat above two millions and three quarters, of which about 2,600,000 live in Denmark proper—Schleswig-Holstein and Lauenberg—and 150,000 in the Danish colonies out of Europe. The increase of the population during the five years immediately preceding the census was between 5 and 6 per cent, but the ratio of increase was greater in the town than in the country districts. The largest town is Copenhagen, with 155,000 inhabitants; next, Altona, 45,000; then two with between 15,000 and 20,000 (Kiel and Flensburg), five between 10,000 and 15,000 (Odense, Schleswig, Aarhuus, Rendsburg, and Aalborg), and fourteen between 5000 and 10,000 inhabitants. The average population on a Danish square mile (about eighteen English) is 2532, but the islands and Holstein are proportionately better populated than Jutland and Schleswig. Out of an average of 1000 inhabitants only 241 live in the towns, the remainder in the country districts, which clearly proves the position of Denmark as chiefly an agricultural country. Looking at the modes of living, we find, further, that out of the same average of 1000 people 395 live exclusively by agriculture, 228 by manufactures and trades, 187 are day labourers, 53 are commercial men, 29 mariners, 20 paupers, 16 ministers and schoolmasters, or connected with education; 15 pensioners, or people living on "aftagt" (an allowance to those who cede their farms from old age, &c.); 13 servants, between 11 and 12 hold appointments in the civil offices, 9 are commissioned and non-commissioned officers in the army and navy, 9 capitalists, 7 follow literary and scientific pursuits, &c. (including students at the Universities), about 5 have no fixed means of living, and a little over 1 are "kept locked up by their country for their country's good." The increase in the population by births has, on an average, been at the rate of 165 children to every 1000 women between 20 and 50 years of age. Out of the above number of children one in every 10 or 11 has been illegitimate, and between 4 and 5 per cent stillborn. Twins have been born in one case out of 69, three children once in 5783 births, and four children at a birth have come into the world only once in 211,062 cases.

THE INTERNATIONAL STEEPLECHASE, LIMERICK: THE START.—SEE PAGE 369.

SCENES ON BOARD THE ALABAMA.

FROM PHOTOGRAPHS.

THE last mail from the Cape brought some news of the Confederate war-steamer Alabama. She has been cruising, together with her consort the Georgia, and her armed prize the Conrad, now named the Tuscaloosa, in the neighbourhood of the Cape of Good Hope. She had captured the Federal barque Sea Bride, in the sight of thousands of spectators, while running into Table Bay. This capture was alleged by the Federal Consul to have been made within British jurisdiction, which he considered to extend to the distance of "an Armstrong cannon shot" from the shore, and he consequently protested. His protest was, however, disallowed by the Governor, who likewise rejected his demand that the Tuscaloosa—which he maintained to be an uncondemned prize, and consequently excluded by the Queen's proclamation from British ports—should be delivered up to him for her owners. The Confederate vessels were allowed to make some repairs and take in supplies in the Cape harbours, and it was thought that they might probably cruise very successfully for Federal vessels bound to or from the East Indies and China.

CAPT. SEMMES' SECRETARY. MR. BULLOCK, MASTER.

A supplement to the *Cape Argus* of Aug. 20 gives copious details of the excitement caused among the inhabitants of Cape Town by the presence of these two vessels in their bay. The *Argus* reporter gives the following list of the officers of the Alabama, some of whose portraits we have engraved:—Captain Semmes, Lieutenants M'Intyre, Kell, Armstrong, Wilson, and Sinclair; Surgeon and Paymaster Galt, Master J. S. Bullock; Lieutenant Howell, Marines (brother-in-law of President Davis); Assistant Surgeon Llewellyn, Chief Engineer Freeman; Assistant Engineers Brooks, O'Brien, Pundt; Midshipmen E. A. Maffitt (son of the commander of the Florida) and E. M. Anderson; Master's Assistants Fulham and Evans; Boatswain M'Cuskie, Gunner Liddy, Carpenter Robinson, and Captain Semmes's secretary, Mr. Smith; a young officer, Assistant Engineer. Captain Semmes he describes as being about forty-eight years of age. He wears a moustache à la Napoleon, is rather grey, and has sharp, intelligent features. He wears a military frock coat of gray colour, with very little ornament.

Captain Semmes read from his record-book to the *Argus* reporter a list of his captures, as follows:—"The Ocmulgee, a whaler, of 400 tons, thirty-two men on board, burned; the Starlight, of Boston, a schooner, burned off the Western Islands; the Ocean Rover, a whaler, barque, burned; the Alert, a whaler, of 700 tons, burned; the whaling-schooner Weathergauge, burned; the whaling-brig Altamaha, burned; the whaling-ship Benjamin Tucker, burned; the whaling-schooner Courser, burned; the whaling barque Virginia, burned; the barque Manchester, a whaler, burned; the ship Brilliant, with 1000 tons of grain on board, burned; the Emily Farnum, released as a cartel, and having so many prisoners we put some of them on board her and sent them off; the Wave Crest, with a general cargo on board for Europe, burned; the Dunkirk, brig, with a general cargo on board, burned; the ship Tonawanda, with a valuable freight on board, released, after taking a bond for a thousand dollars; the ship Manchester, with a cargo of grain, burned; the barque Lamplighter, with an assorted cargo, burned; the barque Lafayette, with an assorted cargo, burned; the schooner Crenshaw, with an assorted cargo on board for the West Indies, burned; the barque Lauretta, for Europe, with an assorted cargo on board, burned; the brig Baron de Castine, a bonded taken and released; the whaling-ship Levi Starbuck, burned; the T. B. Wales, from Calcutta to Boston, with a valuable cargo on board, burned; the barque Martha, from Calcutta to the West Indies, with an assorted cargo, burned; the schooner Union had some English property on board, and was released on bond; the mail-steamer Ariel, running between New York and Aspinwal, released on bond; the United States gun-boat Hatteras, who came out to fight us, had the same number of guns and crew—our guns were a little heavier than hers, but we equalised that by permitting her to fight us at 300 yards—we sunk him thirteen minutes by the watch; the barque Golden Rule, with an assorted cargo, burned; the brig Chastelaine, burned; the schooner Palmetto, burned; the barque Olive Jane, burned; the Golden Eagle, laden with guano, burned; the Washington, from the Pacific, with guano, released on bond; the Bethia Thayer, from East India, with a valuable cargo on board, released on bond; the John A. Parker, with flour and lumber, from Boston to Buenos Ayres, burned; the Punjaub, from East India, found to have some English cargo on board, released on bond; the ship Morning Star, released on bond; the whaling-schooner King Fisher, burned; the ship Nora, from Liverpool to the West Indies, with salt, burned; the Charles Hill, also from Liverpool, with coal, burned; the ship Louisa Hatch, from Cardiff to the West Indies, burned; the barque Lafayette, whaler, burned; the whaling-brig Kate Cory, burned; the whaling-barque Nye, burned; the ship Dorcas Price, with a general cargo, burned; the ship Lelah, with a general cargo for the East Indies, burned; the barque Union Jack, from Boston to Shanghai, burned; the ship Gildensleeve, from New York to the East Indies, burned; the barque Juniana, released on bond to take home prisoners; the ship Abe Snow, from New York to the East Indies, burned; the barque Amazonian, from Boston to Buenos Ayres, burned; the ship Talisman, from New York to the East Indies, burned; the barque Conrad, fitted up as a Confederate cruiser, a tender to the Alabama. We call her the Tuscaloosa. After these came the Anna F. Schmidt, the Express, and the Sea Bride you saw us take to-day. The estimated value of these captures is 4,200,000 dols."

The Confederate cruiser Tuscaloosa, Lieutenant Low, commander, formerly the Conrad, of Philadelphia, captured by the Alabama, and converted by Captain Semmes into a tender to his ship, put into Simon's Bay two days before the Alabama arrived there, for the purpose of refitting. She carried two guns and ten men before the mast.

CAPTAIN SEMMES.

MR. MACINTYRE KELL, FIRST LIEUTENANT.

About fourteen days before she fell in with the American ship Sustem, bound from Rangoon to Falmouth, and captured her; but, as the vessel was laden with cargo belonging to British owners, she was allowed to proceed on giving a bond for 150,000 dollars. A few days afterwards the Tuscaloosa fell in with the American China clipper-ship Snow Squall, 800 tons, homeward bound. It was blowing hard at the time; and the Tuscaloosa having fired at the Snow Squall without bringing her to, made chase; but the latter, being the fastest sailer, escaped.

On Sunday afternoon, Aug. 16, the Confederate steamer Georgia, Captain Maury, entered Simon's Bay for coals and repairs. She appears (says the *Argus*) to be an ordinary iron-built packet-boat, certainly not intended for a fighting craft; but, having a good crew, and being armed with two Whitworth rifled guns of, on large 56-pr. fore and aft, and two 32s on her quarter-deck, and being a fast sailer, is well suited to capture merchant ships, and run from war-vessels of superior armament but inferior speed. We are indebted to one of her officers for a history of the vessel and her exploits. The Georgia was built by Messrs. Denny and Co., of Greenock. Her officers joined her off Ushant Island on the 9th of April, on which day she finished getting her armament on board, hauled down the English, and run up the Confederate flag. She then put to sea. On the 25th of April she captured the ship Dictator, of New York, bound to Shanghai with coal. After burning the Dictator she proceeded to the Cape de Verd Islands to land her prisoners. As she got into the entrance of the harbour of St. Vincent she discovered a man-of-war with the American colours flying, put about, and went to the north side of the island, where she lay until dark, and then hauled out for sea. On the 13th of May she arrived in Bahia, where the Alabama was lying at the time. From Bahia she proceeded down the South American coast. Off Cape Frio, in sight of land, she captured the George Griswold, which vessel had a British cargo on board, and was therefore bonded. The Georgia then proceeded to the island of Trinidad, on her way capturing the barque Good Hope, of Boston, bound to Aguilhas, with a general cargo. Her captain had died some days before, and his body, being preserved in salt, Captain Maury had brought on board the Georgia, read the funeral service over it, and committed it to the deep. During the service the barque J. W. Sever hove in sight, and was chased by the Georgia. She was from Boston, bound to the Amoor river with machinery for the Russian Government. The prisoners of the Good Hope were put on board and she was bonded. On June 18 the Georgia arrived at the Island of Trinidad. On June 25 she captured the ship Constitution, of New York, laden with coal for Shanghai, made a prize of her, and took her in to the island. On July 26 the Georgia captured the ship City of Bath, of Bath, from Calloo to Antwerp; the cargo being neutral, she was bonded, and the prisoners of the Constitution were put on board her. On July 30 the Georgia captured the ship Prince of Wales, of Bath, from Valparaiso, bound to Antwerp with guano. The cargo being neutral, the ship was bonded.

The excitement in the bay is thus described by the *Argus* reporter:—"We went off in our boat in the midst of a vast fleet of dingies, cargo-boats, gigs, and wherries, all in full as they could hold. Nearly all the city was at sea. The rowing clubs, in uniform, pulled off with favoured members of their respective clubs on board. The crews feathered their oars in double-quick time. We passed the Federal barque Urania at her anchorage; and that ship, regardful of the enemy, sported all her bunting with becoming pluck. The stars and stripes floated defiantly from her mizen peak and her name from her main. On getting alongside the Alabama we found about a dozen boats before us; and we had not been on board five minutes before she was surrounded by nearly every boat in Table Bay, and as boat after boat arrived, three hearty cheers were given for Captain Semmes and the Alabama."

CALENDAR FOR THE WEEK ENDING OCT. 17.

SUNDAY, Oct. 11.—Nineteenth Sunday after Trinity. Old Michaelmas Day. The first Great Exhibition closed, 1851.
MONDAY, 12.—Columbus lands on one of the Bahamas, and names it San Salvador, 1492. Pekin surrendered to the English and French Army, 1860. New Moon, 6h. 42m. p.m.
TUESDAY, 13.—Translation of King Edward the Confessor (died 1066). The King of Prussia closes the Legislative Session, proposing to govern "outside the Constitution," 1862.
WEDNESDAY, 14.—Battle of Hastings, 1066. Frederick the Great defeated by the Austrians at Hochkirchen, and the gallant Scotch Marshal Keith killed, 1758. Napoleon's great victories over the Prussians at Jena and Auerstadt, 1806.
THURSDAY, 15.—Torricelli, inventor of the barometer, born, 1608. The Hartley Institution, Southampton, opened by Lord Palmerston, 1862.
FRIDAY, 16.—Marie Antoinette, Queen of France, judicially murdered, 1793. The Houses of Parliament, Westminster, burnt, 1834. Death of Thaddeus Kosciusko, the great Polish patriot, 1817.
SATURDAY, 17.—St. Etheldreda (or Audrey), Queen and Virgin. Agra, the "key of Hindostan," taken by Lake, 1803. Kinburn Fort taken, by the allied English and French, by means of "floating batteries," 1855. The Neapolitans defeated at Isernia by the Sardinian General Cialdini, 1860. Breaking out of the Greek insurrection against King Otho, 1862.

Class 2, Half-guinea Numbered Stalls.—Single Subscription, Three Guineas; Family Subscription, for three, Six Guineas.
Class 3, Five-Shilling Numbered Stalls.—Single Subscription, Two Guineas; Family Subscription, for three, Five Guineas.
Class 4, Three-Shilling Reserved Seats (unnumbered).—Single Subscription, One Guinea; Family Subscription, for three, Two Guineas and a Half.
All Subscribers' Tickets are transferable. Subscriptions will be received daily, from Ten till Six, at the Society's Offices, 14 and 15, Exeter Hall; where a Plan of the Hall may be seen, and Seats—for which immediate application is necessary—may be secured.

HOME for CONVALESCENT CHILDREN at BRIGHTON. WANTED, a MATRON. She must be a member of the Church of England, accustomed to children, able to keep accounts, between thirty and forty years of age. All applications to be made by letter to the Secretary of the Home for Convalescent Children, 70, Montpelier-road, Brighton.

PICTURE FRAMES, Cheapest in London. Handsome gilt Frames, complete, 2s. each. Two-inch Maple or Rosewood and gilt, 3s. each, for the Coloured Pictures given last week, at GEO. REES', 57, Drury-lane.

HAIR JEWELLERY.—ARTIST in HAIR.—DEWDNEY begs to inform Ladies or Gentlemen that he beautifully makes, and elegantly mounts in Gold, Hair Bracelets, Chains, Brooches, Rings, Pins, Studs, &c., and forwards the same at about one half the usual charge. A beautiful collection of specimens, handsomely mounted, kept for inspection. An Illustrated book sent post-free.—Dewdney, 172, Fenchurch-street, London.

BREECH-LOADERS, with all the Latest Improvements. Double Grip, Lockfast, and Self-closing, new and secondhand, 15 to 30 guineas. E. M. REILLY and CO., 315 and 502, Oxford-street, London.

BERNERS HOTEL, Berners-street, W., a FIRST-CLASS FAMILY HOTEL, large and small suites of apartments, quiet coffee-room for gentlemen—all scrupulously clean and comfortable. Charges moderate. Established by present Proprietress 1825.

MONEY ADVANCED by Mr. LUXMOORE, Silversmith, &c., of 92, St. Martin's-lane, W.C. (opposite New-street, Covent-garden), on plate and jewellery, at much less interest than is usually charged.—N.B. Jewels and plate bought.

DELICATE CHILDREN.—A Lady residing in a very healthy locality, at a short distance from Oxford, wishes to receive into her family TWO or THREE CHILDREN to bring up and educate with her own. They would receive the most careful, mental, and physical training, and their health and happiness would be promoted by every possible means. Their education, with strict reference always to their age and strength, would be systematically carried on under her immediate direction. Children requiring special care, from delicate health, or whose parents are abroad, would here meet with peculiar advantages.—Address A. B. C., care of A. Mac Laren, Esq., The Gymnasium, Oxford.

TO PARENTS AND GUARDIANS.
WOODS and COCKSEDGE, Agricultural Engineers and Millwrights, Stowmarket, have a Vacancy for a Young Gentleman as Engineering Pupil. He will have great facilities for learning the general agricultural engineering business in all its branches, under the supervision of W. and C., assisted by experienced foremen.
A comfortable home can be provided if necessary. References given and required. Address, Suffolk Ironworks, Stowmarket; or No. 117, Bishopsgate-street Within, City.

BRADFORD'S WASHING-MACHINE.—In consequence of the extraordinary success of these Machines, to which an important improvement has just been added, many other machines, with a purposed resemblance, have during the last few years been introduced, upon terms offering strong inducements to dealers having no definite agency. Numerous cases having of late come to the Patentee's and his appointed Agents' knowledge of intending purchasers, desiring a Bradford's Patent, having been induced to purchase other machines, upon the strength of the dealers' assertion that they also sold Bradford's Patent, &c. &c., such assertion being simply untrue, necessitating this Caution, and the public announcement that Bradford's Patent can now only be had either from the undersigned or definitely appointed Agents. Intending purchasers are advised that Bradford's Patent Washing Machines are now delivered carriage-free to any railway station in the United Kingdom, and satisfaction guaranteed by a Month's Trial before Payment. Illustrated pamphlet of Washing-Machines, Indiarubber, and other Clothes Wringing-Machines, Mangles, Presses, &c., upon application to Thomas Bradford, Patentee and Manufacturer, Cathedral-steps, Manchester; 63, Fleet-street, London; and 23 Dawson-street, Dublin.

THE ILLUSTRATED LONDON ALMANACK FOR 1864,
containing Fresh-Water Fish, from Paintings by H. L. Rolfe, with interesting descriptions, by James G. Bertram, printed in the highest style of the Chromatic Art by Leighton Brothers; Twelve Fine-Art Engravings; Astronomical Diagrams of Remarkable Phenomena, with Explanatory Notes; and Twelve Original Designs as Headings to the Calendar, by F. W. Keyl.
It contains also Lists of the Royal Family of Great Britain; the Queen's Household; her Majesty's Ministers; and Public Offices and Officers; Law and University Terms; Fixed and Movable Festivals; Anniversaries and Remarkable Events; Times of High Water at London and Liverpool; Tables of Stamps, Taxes, and Government Duties; the Christian, Jewish, and Mohammedan Calendars; Astronomical Symbols and Abbreviations; and a considerable amount of useful and interesting information, rendering the ILLUSTRATED LONDON ALMANACK an acceptable and elegant companion to the library, boudoir, or drawing-room; whilst, as regards price, it is the cheapest Almanack published.
The ILLUSTRATED LONDON ALMANACK is inclosed in an elegant cover printed in colours.
Published at the Office of the ILLUSTRATED LONDON NEWS, 198, Strand, and sold by all Booksellers and Newsagents.

THE ILLUSTRATED LONDON NEWS.

LONDON: SATURDAY, OCTOBER 10, 1863.

IF anything can forcibly illustrate the utter stagnation of domestic affairs at this time it is the fact that a mass of Irishmen have climbed nearly to the top of one of the Tipperary mountains to protest against England generally, and that the feat has been deemed worthy of grave record by the British journalists. We think that this is the climax of proof that "nothing is going on," and in this sense only do we take notice of the ludicrous incident. It becomes the event of the week. Even the little earthquake, which resembles one whereof George Selwyn said "it was so tame you might stroke it," must give place to the Tipperary mountain meeting.

We do not know who attended, but we know of two or three notorieties of a small kind who stayed away, but wrote that they would have been present if their presence would have rendered the assembly more imposing. As the gentleman who calls himself The O'Donoghue was one of these, and the most remarkable, an approximation to an estimate of the political standing of the others may be easily made. It is better so. We prefer the mystery. We do not want to know what Father O'Learys and what Father O'Toddies were there; what Rory, and Phelim, and Dennis respectively howled at the Saxon. Let us rest in the knowledge that from that Tipperary mountain the howl went forth, and England was execrated by the scrambling patriots.

But one would like to know why they climbed up a mountain to perform the feat. Could they not have denounced England as well from a field, within easy reach of the public-house? Or was it thought that the loftiness which the eloquence might lack would be imparted by physical elevation? It will hardly be alleged that the patriots were afraid of Saxon persecution, or dreaded lest the minions of a grinding tyranny, who are better known as the police, should interfere with the large utterances of freedom. We are quite sure that the gallant, nay, reckless voyager, Lord Carlisle, gave no savage orders to put down this terrible demonstration, and that the serenity of the Castle was unmoved by the news that England was to be solemnly cursed by a band of enemies. This could not have been the reason for the brave Irishmen scaling the crag. They ran into far greater danger by doing so than they would have done by letting their indignation foam away in the fields. There is another mystery about this choice of a location, and we should certainly sleep easier if we could be told why the patriots resolved to breathe

The difficult air of the iced mountain top.

Left in the dark here, and only hoping that they found or took with them some comfort under the distressing circumstances of the Union, some consolation in the form of the dew which is associated with mountains, we may be allowed to speculate upon what the aspiring patriots had to say. General denunciation of England is all very well; but they must have read that every week in their newspapers, and such of them as have been in gaol must have heard it almost *ad nauseam;* for it seems that even the prison-birds have learned the song, and, with some justice, set down their discomfort in being detained between walls as part of the atrocious system of law enforced by the British Parliament. There must have been some special provocation which took this mass of patriots up a mountain to bellow at John Bull. We may be over curious. Perhaps we get so about trifles in a slack time. We grow provincial, and are interested in local twaddle. But we own frankly that we covet and desire to know the grievance of these Irishmen, or, at least, what they had to say to England beyond calling her bad names, as the *Nation* does, and the *New York Stabber* does, and the *New York Slanderer* does; and, in fact, as most of the enlightened organs of Irishism do.

They could not accuse us of causing a bad harvest this time, because there has been a good one; and though, as a general rule, a lie might not stand in the way of an impassioned patriot, the fact was too patent to the class of men who must have assembled. Even a patriot, lying, requires a semblance of probability for his inventions. Nor could they say that England had caused bad weather; that, again, was a matter within the knowledge of the meeting. Could they have had a grievance about the Pope? We have been doing and saying nothing about the Pope, except rather applauding his Holiness's attempt in favour of the Poles. No, England has laid herself open to no possible charge of annoying the Pope. Was the grievance that the English Parliament has lately voted money to pay the Catholic priests who should attend Catholic prisoners in gaol? The topic had, probably, interest for a good many of the audience; but we scarcely see how England could be abused for her conduct, especially as the vote was given in accordance with the representations of the Irish Liberals. What else was there? We have passed no restrictive laws, laid on no duties or taxes, deplored no disaffection, disarmed no volunteers; in fact, unless the hanging of a couple of Irishmen for murder (a fate to which they might have been liable in some counties of Ireland itself) have given offence to Tipperary, we cannot recall a single act of the Session or the recess that could justify the protest against England. To be sure, a justification is not the one thing needful to an Irish patriot.

Well, the protest has been made from the top of the Tipperary mountain, and England, up to the present time, does not seem much the worse. We should be false to our own convictions if we said that we believed the protest had caused the little earthquake. Nor can we conscientiously say that we recognise any other result of the howl raised on that hill. In the days of the Greeks things were different, and we all know that Achilles did but shout three times and the whole Trojan army ran away, except those who in the confusion stuck themselves on their own spears or got under their own chariots. Not such awful effects have followed the yell from Tipperary. But perhaps, like the echoes of the same land, it has an eccentric method of producing its effect, so we will wait, as courageously as we may.

THE COURT.

The Queen, surrounded by the members of her family, remains at Balmoral, in good health.

On Wednesday se'nnight her Majesty, in the morning, accompanied by Princess Louis of Hesse, and later in the day by Princess Helena, drove out, visiting the Ballochberie in the afternoon. The Prince and Princess of Wales dined with the Queen at Balmoral.

On Thursday se'nnight the Queen, accompanied by Prince and Princess Louis of Hesse, drove in the vicinity of the castle. On the same day Princess Helena and Princess Louisa, attended by Lady Churchill, rode to Invercauld.

On Friday se'nnight the Queen, accompanied by Princess Louis of Hesse and Princess Helena, drove out. On the same day, at seven o'clock, her Majesty, accompanied by Prince and Princess Louis of Hesse, Princess Helena, Princess Louisa, and Princess Beatrice, and attended by Lady Churchill and Lady Augusta Bruce, drove to Abergeldie Castle to receive the Crown Prince and Princess of Prussia, and Prince William, Princess Charlotte, and Prince Albert Henry of Prussia, &c., on their arrival from Edinburgh.

On Saturday last the Queen, accompanied by the Crown Prince of Prussia and Princess Helena, walked in the grounds adjacent to the Castle; subsequently her Majesty, accompanied by Princess Louisa, and attended by Baroness von Schenck, drove round the Lion's Face. On the same day Prince and Princess Louis of Hesse and Princess Helena rode out.

On Sunday the Queen, accompanied by Princess Helena and attended by Lady Churchill, Lady Augusta Bruce, and Lord C. Fitzroy, attended Divine service in the parish church of Crathie. The Rev. A. Anderson officiated.

On Monday the Queen, accompanied by Prince and Princess Louis of Hesse, drove to the Lynn of Quoich. On the same day the Crown Prince and Princess of Prussia dined with her Majesty at the castle.

The Queen and the Royal family take daily walks and drives in the grounds adjacent to the castle.

The Queen and the Royal family are expected to return to Windsor from Balmoral on or about Tuesday, the 20th inst. The Royal family circle at the castle will then include the Crown Prince and Princess of Prussia and their children, and the Prince and Princess of Wales The Queen will, after a visit probably to Osborne, spend the Christmas with the rest of the Royal family, at Windsor Castle.

THE PRINCE AND PRINCESS OF WALES.

The Prince and Princess of Wales arrived at Marlborough House at a quarter past ten o'clock on Saturday night, from the King's-cross terminus of the Great Northern Railway. Their Royal Highnesses were attended by Lieutenant-General Knollys, Captain Grey, and the Hon. Mrs. W. Grey.

The Prince and Princess, with their suite, left Abergeldie Castle en route for the south, on Thursday week, at half-past nine o'clock a.m. Their Royal Highnesses posted direct to Aboyne, where they arrived at five minutes past eleven. There was a considerable number of people congregated outside the station, who gave the Prince and Princess a very hearty reception, which was graciously acknowledged by their Royal Highnesses. Inside the station a select party of ladies and gentlemen were assembled, who also greeted the Prince and Princess most heartily. Miss Dyce Nicol, daughter of Mr. Dyce Nicol, of Ballovie, presented a beautiful bouquet to the Princess, who received it most graciously. The Prince and Princess travelled by special train, and were conducted to their carriage by the chairman and two of the directors of the Deeside Railway Company; the train moved out of the station amid the enthusiastic cheering of the spectators, repeatedly acknowledged by the Prince and Princess. Their Royal Highnesses arrived at the Waverley station at twelve minutes to seven.

The visit of the Prince and Princess being strictly private, the customary guard of honour and military formalities were dispensed with, and the arrangements made for the reception of the Royal travellers were of the most undemonstrative character. The Lord Provost, the Earl of Kintore, and the municipal authorities were upon the platform to receive the Prince and Princess. Shortly after six o'clock the Crown Prince and Princess of Prussia, attended by Lord C. Fitzroy and Countess Hohenthal, drove to the station to meet the Prince and Princess. Upon the arrival of the train the Crown Princess advanced and affectionately kissed the Princess. The greeting between the Crown Prince and the Prince was also most cordial. The Royal party were conducted to their carriages by the

Lord Provost and Sheriff Gordon. Their Royal Highnesses left the station and proceeded to Slaney's Hotel amid the enthusiastic cheering of the multitude assembled to greet them.

On Friday, shortly before twelve o'clock, the Prince and Princess, accompanied by their suite, left Slaney's Hotel in open carriages, and proceeded to Holyrood Palace. Along the whole route crowds of people had assembled, who cheered vociferously as the Royal party passed. The Princess, who looked exceedingly well, wore a white bonnet trimmed with white flowers and green leaves, with white veil, and was dressed in a mauve dress, and a black velvet cloak lined with white silk. Their Royal Highnesses, upon alighting at the palace gates, were received by the Lord Provost and the municipal authorities. A guard of the 92nd Highlanders was drawn up in the vestibule, and presented arms on the arrival of their Royal Highnesses. The Prince and Princess proceeded to the Throne-room. The Lord Provost, magistrates, and council having also assembled in the Throne-room, addresses were presented to their Royal Highnesses, to which the Prince most graciously responded. A magnificent casket, the gift of the ladies of Edinburgh—of which an Engraving is given on page 376—was also presented to the Princess, who graciously accepted the gift, and, in acknowledging it, expressed her warm thanks to the ladies of Edinburgh and her admiration of the beauty of the casket.

Immediately after the presentation the Prince and Princess returned to the hotel. About half-past two their Royal Highnesses and suite again left the hotel and proceeded in open carriages to Dalkeith Palace. The Prince and Princess spent some time in going through the palace, driving over the grounds, and walking in the gardens. Their Royal Highnesses returned to the hotel about five o'clock. In the evening the Prince and Princess honoured the Lord Provost with their company at dinner at his residence, in George-square, where a select company was assembled to meet their Royal Highnesses. The Lord Provost also gave an evening party in honour of the Prince and Princess. Their Royal Highnesses took their departure at eleven.

The Prince and Princess, attended by their suite, left Edinburgh on Saturday morning en route for London.

During the short stay of the Prince and Princess at the Douglas Hotel his Excellency M. Sandemeyer, the Belgian Minister, and Dr. Schmitz had the honour of being presented to their Royal Highnesses.

On Sunday the Prince and Princess attended Divine service in the Chapel Royal, St. James's. The sermon was preached by the Rev. Mr. Garden, sub-Dean.

On Monday the Prince, attended by Captain Grey, rode on horseback. The Princess, attended by the Hon. Mrs. W. Grey, took a drive. The King of Greece arrived this day at Marlborough House.

On Tuesday the Prince, accompanied by the King, rode out. The Princess, also accompanied by the King, took a drive. His Majesty subsequently visited the Duke of Cambridge at Gloucester House. In the evening the Prince and Princess gave a dinner party in honour of the King of Greece.

On Wednesday the Prince and Princess, accompanied by the King, took a drive in an open carriage, and visited the Duchess of Inverness at her residence in Kensington Palace. In the evening the Prince and Princess and the King, attended by Baron Guldencrone, Captain Grey, and the Hon. Mrs. W. Grey, honoured the Adelphi Theatre with their presence.

Captain Grey has succeeded Lieutenant-Colonel Keppel as Equerry in Waiting to the Prince.

THE CROWN PRINCE AND PRINCESS OF PRUSSIA.

The Crown Prince and Princess of Prussia, accompanied by their three children and attended by their suite, arrived in Edinburgh on Thursday week. Their Royal Highnesses were received at the railway station by the Lord Provost. The Royal party drove in covered carriages to Slaney's Hotel, where their arrival was hailed with loud cheers by a large concourse of people. Shortly after, the Prince and Princess left the hotel and drove to Messrs. Marshall's, jewellers, where they purchased a varied selection of Scotch jewellery. The next place visited was Messrs. Romanes and Paterson's, her Majesty's tartan manufacturers, where their Royal Highnesses made several purchases. Leaving the North Bridge, amid the enthusiastic cheers of the people, the Royal party proceeded to the castle. Thence, after inspecting various places of interest, their Royal Highnesses returned to the hotel. About half-past three o'clock the Prince and Princess again left the hotel, and drove to Holyrood, where they spent an hour in inspecting the various places of interest within its walls. Leaving the palace, they proceeded by the Queen's drive to the hotel, where they arrived at half-past five. Shortly after six o'clock their Royal Highnesses drove to the Waverley station to meet the Prince and Princess of Wales.

On Friday the Crown Prince and Princess and the Royal children and suite left Edinburgh by the 9.15 express-train on the Scottish Central Railway en route for Abergeldie. Their Royal Highnesses were received at the castle most affectionately by the Queen and the Royal family. All the tenants and servants of the Balmoral and Abergeldie estates were assembled near the bridge to welcome the Crown Princess upon her return to the Highlands. The Crown Prince and Princess pay frequent visits to the Queen and the Royal family at Balmoral.

Earl and Countess Russell had the honour of an interview with the Crown Prince and Princess during their stay in Edinburgh. The Lord Provost and Mr. A. W. Beda, Prussian Consul, also had the honour of being introduced to their Royal Highnesses.

THE KING OF THE GREEKS.

The King of the Greeks arrived in London from the Continent at six o'clock on Monday evening. His Majesty is attended by Count Sponneck, Baron de Guldencrone, Professor A. L. Koeppen, Captain Leth, Captain Funck, and Dr. Philemon. The King was met at the Victoria station by the Prince of Wales. His Royal Highness accompanied his Majesty to Marlborough House, where he was received by his sister, the Princess of Wales. The King will remain the guest of the Prince and Princess of Wales during nearly the whole time his Majesty will spend in England. The King will visit the Queen at Balmoral, and will leave England next week en route for Paris. After a short stay in that capital he will proceed to Toulon, where he will embark for Athens on board the Russian frigate Oleg, which has been specially fitted up for the conveyance of King George to his dominions.

The Duke of Cambridge visited the King at Marlborough House. The Danish Minister also attended to pay his respects to his Majesty. The presentation of the address to the King from the Greek residents in London was to take place on Thursday. Other addresses will be presented to his Majesty by deputations of the Greek residents at Manchester and Liverpool. It is expected that Prince and Princess Christian of Denmark will come to London in a few days to take leave of the King previous to his departure from England.

PRINCE ALFRED.

Prince Alfred, attended by Major Cowell, left Balmoral on Tuesday en route for Edinburgh, where he arrived at half-past ten o'clock. His Royal Highness was received at the Waverley Bridge station by the Lord Provost, Captain Speke, and several of the officers of the garrison. The Prince was loudly cheered by those assembled, which his Royal Highness graciously acknowledged. The Prince immediately drove to Holyrood Palace, where he will reside for the winter, for the purpose of attending the University. Prince William of Hesse will also reside at Holyrood during the winter.

Their Royal Highnesses the Duchess of Cambridge and Princess Mary have arrived in Paris from Germany. Their Royal Highnesses are expected in town the end of this week.

Her Highness Princess Anatole Bariatinski, accompanied by her son, Prince Alexander, has arrived at the Clarendon Hotel from the Isle of Wight.

His Excellency the Belgian Minister and Mdme. Van de Weyer have left town on a tour of visits in Scotland.

The Duke and Duchess of Wellington have left Apsley House for Brighton for a few weeks.

The Duke and Duchess of Somerset, and Lady Gwendolin St. Maur and the Earl St. Maur, have left the Duke's official residence at the Admiralty for Stover Park, the family seat in Devonshire.

Emily, Duchess of Beaufort has left Dupplin Castle on a visit to Lord and Lady Londesborough, at Tulchan Lodge, Glenlsta.

The Duke and Duchess of Saldanha and Mdlle. Saldanha have arrived at Llanover, in South Wales, on a visit to Lord and Lady Llanover.

The Duke of Hamilton will this month enter on his studies at Christ Church, Oxford.

The Marquis of Conyngham has left town for his seat, Mount Charles, Donegal.

The Marquis and Marchioness of Clanricarde left Stratton-street on Tuesday for their seat, Portumna Castle, Galway.

Earl and Countess Russell, with Viscount Amberley and the Ladies Russell, have arrived at Beaudesert, near Lichfield.

Lord Blantyre, accompanied by his son, has left town on a Continental tour.

MARRIAGES IN HIGH LIFE.—The marriage of the Hon. Colonel Byng and Lady Henrietta Danneskiold-Samsoe, niece of the Marquis of Ailesbury, is appointed to take place on the 15th inst. The marriage of the Hon. Mr. Herbert, brother of the Earl of Powis, with Miss Sykes, daughter of Sir Tatton Sykes, is also fixed to take place on the 15th inst.

CHURCH AND UNIVERSITIES.

St. Paul's Church, Cheltenham, was reopened on Sunday, after undergoing a thorough restoration.

St. Clement's Church, Cambridge, has been reopened, after restoration. More frequent services are to be held in the sacred edifice in future.

The chapel of the Exeter Diocesan Training College was opened on the 23rd ult., when full morning service, with the Litany and Holy Communion, was gone through.

The foundation-stone of a new church was laid last week at Brooke, a life-boat station at the back of the Isle of Wight. The stone was laid by Mrs. Seely, the wife of Charles Seely, Esq., M.P., who is lord of the manor of Brooke.

Some important alterations were carried out in Eton College chapel during the recess. All the seats for the boys are now on the same level, the steps having been removed and placed in front of the altar, which is now approached by a flight of five or six steps stretching across the chapel, thus giving additional sitting accommodation. Gas has also been introduced.

St. Thomas's Church, Lower Crumpsall, the foundation-stone of which was laid in October last, and which is the second erected in the parish of Crumpsall within a period of four years, was consecrated by the Bishop of Manchester, on Saturday afternoon. The church itself is a neat and commodious building, and occupies a site of about 4500 yards, which was the gift of Mr. Lewis Loyd, banker, London. The cost of the building has been £2800, most of which has been raised by voluntary subscription.

PREFERMENTS AND APPOINTMENTS.—*Rectory:* The Rev. K. H. Barnes to Cattistock, Dorset. *Vicarages:* The Rev. C. W. Bradford to Clyffe Pypard, Wilts; Rev. R. W. Marriott to Aldborough; Rev. F. B. Paul to Blazey, Cornwall. *Incumbencies:* The Rev. J. T. Brown to Nayland; Rev. R. Forster to Choppington; Rev. R. S. Hopkins to Hilderstone; Rev. J. H. Usher to Cambois; Rev. F. Pocock to Monckton Combe, near Bath; Rev. V. Saulez to Canton, Cardiff. *Perpetual Curacies:* Rev. W. C. Badger to East Kennet, Wilts; Rev. J. E. Burnet to Wilsden-cum-Allerton, near Bradford. *Curacies:* The Rev. J. G. Baber to Thorverton; Rev. F. B. De Chair to Morley, Wymondham; Rev. A. H. Fairbairn to Wilton, Wilts; Rev. F. Fisher to Maiden, Newton; Rev. J. Hilton to Endellion; Rev. W. W. Howard to Westerham; Rev. R. G. Mead, to Heytesbury-cum-Knook and Tytherington; Rev. J. J. Scott to Bulford, Wilts; Rev. G. H. Wynne to Belchalwell, Dorset. *Chaplaincies:* The Rev. F. Palmer, Curate of Loughton, to be Chaplain to Sheriff Cave; Rev. H. H. Evans, Perpetual Curate of Leytonstone, to be Chaplain to Sheriff Nissen.—*Guardian.*

SOCIAL SCIENCE CONGRESS AT EDINBURGH.

The seventh annual meeting of the National Association for the Promotion of Social Science was opened at Edinburgh on Wednesday. A sermon was preached at two o'clock, by the Rev. Dr. Arnot, in St. Giles's Church. In the evening there was a full meeting in the Free Church Assembly Hall, which was densely crowded to hear the opening address of Lord Brougham, the president of the association.

Lord Brougham, who was most enthusiastically received, commenced his address by referring to the losses which the association had sustained by the death of Sir Benjamin Brodie and Sir James Stephen. As evidence of the progress which social science had made in other countries, his Lordship referred to the Emperor of Russia emancipating the serfs in that country; but he said it was painful to find that the scenes exhibited in Poland made it too likely that with his succession to the throne the character of the Emperor of Russia had undergone a change. He expressed a hope that, though the sufferings of Poland were deeply to be lamented, and though the conduct of her oppressors was strongly to be censured, the universal opinion of Europe might avail to obtain redress for her without any hostile interference. The occupation of Mexico, he said, was likely to produce an uneasy feeling in the now, unhappily, disunited States of America, and might, by no remote possibility, lead to an amicable intercourse with the South, not, perhaps, against the North, but in formal recognition of the secession and in breach of the blockade. The term "civil war" was, he maintained, now hardly applicable to the miserable contest in America. Each party sought to cast on the other the heavy blame of breaking the peace. On one side was the wicked allegation of property in human beings; on the other, the hollow pretext of making war to free America of slavery, her shame and her curse, as all except slaveowners admitted it to be—hollow, we might well call it, for those who proclaimed emancipation confessed that it was a measure of hostility to the whites and designed to produce slave insurrection, from which the much-enduring nature of the unhappy negro saved the country. The feeling towards England which prevailed among the American people, though arising from the excess of national vanity and its kindred envy, was certainly in part the remains of the old quarrel that led to the separation. We were hated and despised—neither feeling was at all reciprocal, but among our kinsfolk it prevailed in a degree almost amounting to mental aberration. It could hardly be accounted for without recurring to the ancient grudge of the American war; and it illustrated the soundness of the view taken by those who had most considered the great subject of colonial policy—that we must so govern our settlements as to prepare for a separation on friendly terms, always assuming that sooner or later their growth would bring about their independence.

Proceeding next to home matters, his Lordship noticed the leading legislative measures of the last Session so far as these had promoted the objects of the association. He noticed the progress of the education question during last year, referring to the fact that the half-school system of training, physical and mental, had been adopted in the Army by the Education Council; and noticed the enormous circulation of cheap periodicals as among the advantages of the effects of education in the island. The subject of co-operation was noticed by his Lordship, who gave a brief account of the origin and progress of the co-operative movement in the country, concluding his address by referring to the great increase of savings banks since last congress, and by referring to the admirable manner in which the working classes had struggled under the heavy pressure of distress during the last twelve months. It was truly touching to remark, not only their peaceful demeanour, but their firm resolution of only accepting, when absolute necessity required, the assistance amply provided by the wealthier classes and given with great delicacy—their determination to suffer the greatest privations before yielding to that necessity. A more convincing proof could not be given of the blessed effects that have flowed from their progress in education than in their habits thus acquired of sober reflection upon the state of affairs, on their own position in society, and in their real interest as well as duties to the community of which they formed so important a part. Whoever recollected the very different conduct of the same classes half a century ago, when suffering under an incomparably less pressure from the same interruption of the American trade, would at once feel thankful for the change and proud of his countrymen and country.

His Lordship's address was frequently applauded, and at the close a cordial vote of thanks was given to him, on the motion of the Lord Advocate of Scotland, seconded by the Right Hon. Joseph Napier, late Lord Chancellor of Ireland.

Prince Alfred was present at the meeting, and on his entrance into the hall was received with loud and prolonged cheers by the immense assemblage.

The annual report of the council was read by Mr. Hastings, the honorary secretary, and on the motion of the Right Hon. C. B. Adderley, M.P., seconded by Lord Ardmillan, the report was received and ordered to be printed.

Alfred de Vigny has bequeathed all his manuscripts to Louis Ratisbonne, who is preparing their speedy publication.

The Queen has appointed Frederick Eden, Esq.; Wallace Houstoun, Esq., Captain in her Majesty's Navy; and William O'Connor Morris, Esq., Barrister-at-Law, to be "The Special Commissioners for Irish Fisheries," under "The Salmon Fishery (Ireland) Act, 1863."

The general management of the Great Western Railway (amalgamated lines) has been been bestowed on Mr. J. Grierson, hitherto goods manager of the Great Western proper, who has had great experience in connection with the Parliamentary and general business of the company. The office of joint-secretary has been allotted to Mr. Frederick Saunders, hitherto secretary and general manager of the South Wales line. Mr. Walter Stevenson, who, under the designation of assistant secretary to Mr. C. A. Saunders, has hitherto conducted the financial business of the Great Western Company, is to continue to perform the same duties on the establishment of the amalgamated concern, with the title of financial secretary.

ECHOES OF THE WEEK.

THE earthquake! The "sickening surge of the earth-wave," as one sentimental penny-a-liner has described the astonishing vibration and oscillation of Tuesday morning—the earthquake is on everybody's lips throughout the length and breadth of this land. Quiet people who went to bed on Monday night in blissful ignorance as to the earth's crust and the seas of molten metal or red-hot lava which may be simmering beneath it woke up the next morning to be told that England forms a link in the chain of the great volcanic belt, and is connected, somehow, with Mount Hecla and the Lipari Islands. Science will have its say over the late phenomenon; and a multitude of voices will darken counsel. Pert sciolists will settle the why and the wherefore of Nature's upheaving, and flippant savants will tell us precisely what the earthquake might have done and what it didn't do. We should not be surprised if the theory of earthquakes became one of the "ologies." Those of humbler minds will be content to acknowledge that they can possibly know nothing about the matter, and will resolve all their doubts into one reverent aspiration—"Thy will be done!"

Of the shoals of letters which the occurrence has brought forth, that addressed to the *Times* by Mr. Charles Dickens is the most remarkable and the most intelligent. Mr. Dickens discusses, with his usual felicitous particularity, the sensations he experienced and the extent to which he felt the shock lying in bed at his house at Gadshill, near Rochester. It is not, however, for the purpose of analysing his account of the earthquake that we allude to it. We notice it in consequence of a curious coincidence between the wonderfully graphic image Mr. Dickens gives of the shock upon himself and one of the finest passages in Milton's "Ode on the Nativity." The great prose writer says, "It was exactly as though some great beast had been crouching asleep under the bedstead and were now shaking itself and trying to rise." Now hear John Milton:—

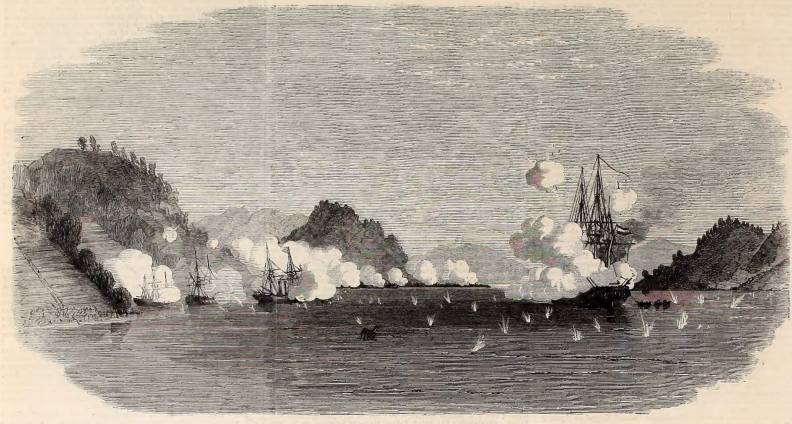
> Th' old Dragon underground
> In straighter limits bound,
> Not half so far casts his usurped sway,
> And, wroth to see his kingdom fail,
> *Swindges the scaly horror of his folded tail.*

The action of the pent-up "Dragon underground" "swindging the scaly horror of his folded tail" in vain attempts to regain his liberty is precisely analogous to that of the great beast awakening from slumber, "shaking itself, and trying to rise." It is not likely that Mr. Dickens had any remembrance of the Miltonic image when he so forcibly described his experience of the shock; and Milton was certainly not thinking of an earthquake, but rather of the Principle of Evil, when he drew his image of the imprisoned dragon. The coincidence only proves the truth of the proverb that "*Les beaux esprits se rencontrent.*"

Next to the marvels of the subterranean, the marvels of the empyrean. M. Nadar, the caricaturist-photographer's monster balloon, "Le Géant," which was entirely to revolutionise the science of aerostation, has really made an ascent from the Champ de Mars, at Paris. "Le Géant" is, after all, only to be considered as the forerunner to the "screw balloons," by means of which every man, according to M. Nadar, is to become his own aeronaut, and so emulate the celebrated Icarus and the fowls of the air.

The "Géant" was to be a double balloon—one sphere of inflated silk within the other; nay, a triple one, for there was to be a "compensating balloon" attached to receive the gas as it escaped, and which it was deemed expedient to economise. It might, perhaps, have been more appropriately termed the "Cerberus," as containing "three gentlemen"—or balloons—in one. It was a two-storied balloon, and contained a photographer's studio and a printing-office. A live Princess and a live Prince, several *sommités* of the Parisian press, MM. Godard, the aeronauts, and M. Nadar himself ascended in this portentous machine. But, as happened in the well-known case of the King of France who, with thirty thousand men, marched up a hill and then marched down again, so the adventurous Nadar, after ascending *tant bien que mal* from the Champ de Mars, descended much more rapidly, and not quite so pleasantly, as he intended. A few contusions and an injured knee were the only casualties to be deplored; but the reason alleged for the "Géant's" abrupt declension is sufficient to show how lamentably hazardous all these aerial expeditions are. The valve lines are said to have broken, or else the valve itself became ungovernable. The balloon is said to have "turned right over," so that the inmates of the car were momentarily "antipodean," but the machine fortunately righted itself. It is a mercy these foolish people were not all smashed to atoms. Paris, however, is mad after ballooning. "L'aërostatomanie" has superseded "potichomanie" and "décalcomanie;" and M. Nadar, with a renovated "Géant"—a giant refreshed—threatens another ascent on an early day. He disclaims, however, any pretension to solve the question of aerial navigation. The philosophy of the matter is, we are afraid, summed up in the dictum of the veteran ostler, who was discussing the comparative safety of stage coaches and railway trains. "If a coach upsets," said this sage, "*there you are*; but if a train smashes, *where are you?*" Where, indeed!

Another new magazine promised to the public before Christmas, and edited by a lady! The conductors of the *St. James's*, the *Englishwoman's Domestic*, and the *Victoria Magazines*, all subject, we believe, to the mild sway of feminine sceptres, must look to their laurels. In another month or six weeks we are to expect, we are told, the *Mayfair Magazine*, to be conducted by Miss Mary E. Braddon, the authoress of "Lady Audley's Secret," "Aurora Floyd," "Eleanor's Victory," "John Marchmont's Legacy," &c. Miss Braddon comes into the field armed at all points, like a Paladin of old; for we understand that the *Mayfair Magazine* is to be copiously illustrated—not, we trust, in the wearisome Dundreary and would-be comic style—and is to include "all the talents" in its list of contributors. We wish Miss Braddon success, and we sincerely hope her magazine may improve the "morals of Mayfair."



A crowded meeting, composed almost exclusively of mechanics and labourers, was held on Tuesday evening, at the Albert Institution, Gravel-lane, Southwark, in aid of the most commendable movement for establishing working-men's clubs and institutes among the working classes. The meeting was addressed by divers eloquent and impressive speakers, including the Rev. Mr. Solly, the Rev. Mr. Brown, Vicar of the parish; Mr. Washington Wilks, Dr. Shea, and other gentlemen; and the best test of the success of the meeting was in the number of working men who, at the conclusion of the proceedings, enrolled their names as members of the club and institute which it is intended to organise in the Blackfriars district.

Vattel, on the "Droit des Gens," is not very light reading; yet by the exercise of strong volition, indomitable pertinacity, and indomitable patience he may be got through. The works of Grotius and Puffendorff are not "comic songs," as Mr. Robson was wont apologetically to remark of "Vilikens and his Dinah." Nor are the letters of "Phocion" in the *Times* perhaps eminently calculated to solace the ennui of a rainy day, or to serve as a "Book for the Beach." But of all the hard reading we ever encountered—of all the determined, adamantine, inexorable, inflexible works we ever perused—a bulky pamphlet by Mr. William Whiting, of Boston, which has just been sent to us, surpasses anything with which we have ever met. This alarming production is entitled "The War Powers of the President and the Legislative Powers of Congress, in connection with Rebellion, Treason, and Slavery." There never was such a sanguinolent tome. It is all about the powers to punish high treason and rebels, bills of attainder, confiscation, hanging, drawing, and quartering, forfeitures, corruption of blood, and the "constitutional rights of the Government to appropriate private property to public use." To judge from the conclusions of this tremendous publicist, a reign of terror is imminent in America. The "War Powers of the President" ought to be bound up with Coleridge's lyric of "Fire, Famine, and Slaughter;" while, by way of epigraph on the flyleaf, we might suggest a paraphrastic quotation from Mrs. Glasse—not "first catch your hare," but "first crush your rebellion."

The Engraving of the Fancy Dress Ball given by the Mayor of Liverpool to the Officers of the Channel Fleet, which appeared in our last Number, was from a sketch by Mr. William Woods, of Everton.

The state of affairs in Syria is still unsatisfactory. Bands of Druses, escaped from Hauran, have appeared near Damascus, and intercept the caravans of provisions and merchandise.

SKETCHES FROM JAPAN BY OUR SPECIAL ARTIST.

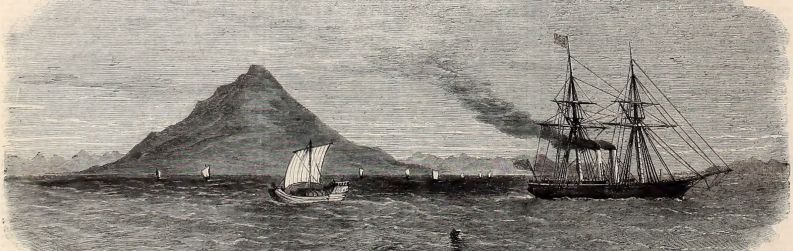
ATTACK ON THE DUTCH WAR-STEAMER MEDUSA, OPPOSITE SIMONOSEKI.

YOKOHAMA, July 28.

SINCE my last letter the Prince of Nagato has been indulging in a little fighting on his own account. His territory is in the inland sea and round Simonoseki. The Pembroke, an American steamer, was the first fired into, and was hit in two places; then a French packet-boat was attacked, and subsequently the Dutch man-of-war Medusa. The Medusa had a regular battle; three shells burst in her, she was hit some twenty times, and had four men killed and five wounded. She returned the fire with vigour, and was one hour and a half exposed to the batteries and ships. There were six batteries, one steamer (the Lancefield), one brig (the Lanrick), and a barque opposed to her. The Medusa could not do very much, of course; so, after a gallant engagement, she retired and came up here. The American war-steamer, the Wyoming, directly news came of the attack on the Pembroke, got up steam and went down to Simonoseki. She ran between the Lancefield and Lanrick, giving each a broadside as she went through, and then she devoted her attention to the batteries. She managed to knock over some guns, and observed that the two ships were in a sinking condition. The Lancefield had a shell in her boilers, which caused them to explode. The Wyoming, finding she could not do much against the batteries, many of which were among the trees, retired to Yokohama. Subsequently the French Admiral went down in the Semiramis, taking with him the Tancrede; but he could not get near enough to the original batteries. However, finding one opposite him, he immediately proceeded to shell it; and, having silenced it, he landed some two hundred men, took it, and burnt two villages. In the mean time, an army of several thousand Japanese troops was approaching from Simonoseki, intending to cut off the French force; but they could not face the storm of shot and shell from the Semiramis, and they therefore retired. The Coquette, H.B.M.S. despatch-vessel, has gone down to the same place; but we have had no tidings of her. Meanwhile, nothing serious has been done against these batteries; and the Prince of Nagato has seen every ship sent against him retire after a few hours' fight.

The British fleet has been going to Satsuma's territory for the last few weeks to have a look at Kagoima, and then to Osaka, but there is no appearance of a start yet. If the Coquette is fired at, which is extremely probable, the British flag will have to be vindicated.

THE ANNAMITE AMBASSADORS IN PARIS.



(From our own Correspondent.)

THE late outbreak in some of the provinces of Cochin-China led to an expedition of the Franco-Spanish forces, which resulted in the establishment of a new European colony in the empire of Annam, and also in the capture of Gocong, a small province lying between Cambodia and the River Soirap, and conveniently situated on the sea-border.

On the successful termination of the expedition a treaty of peace was imposed and signed by the French and Spanish Plenipotentiaries; but it would appear that the Annamites found the conditions so stringent and so injurious to their material interests that they decided upon sending to Europe an Embassy charged with the arduous mission of obtaining a modification of the terms of the treaty and the restoration of the three provinces of Lower Cochin-China occupied by the French troops. To aid the Ambassadors in the accomplishment of this difficult task they were provided with autograph letters from their Emperor, Tu Duc, to the Queen of Spain and the Emperor Napoleon.

The Annamite Embassy to Europe is composed of three persons: Pham-Thank-Giang the Ambassador-in-Chief, Vice-Grand Censor of the Empire of Annam, who occupies the centre of our Illustration; Pham-Phu-Thu, the second in rank, principal secretary to the Minister of the Interior, on the left hand; and Ngny-Khac-Dan, Master of the Ceremonies of the Annamite Palace and Mandarin of Justice at Turon. On account of that strong feeling of want of confidence characteristic of all Orientals, the two secondary dignities have been appointed to watch over the sayings and doings of their chief, on whom the entire responsibility of the Embassy is thus made to devolve. The Ambassadors are accompanied by a certain number of attendants, amongst whom the bearers of the pipe, betel-box, and feather-fans are the most peculiar. One of the fan-bearers is shown in our Illustration, which has been drawn from photographs taken in Paris by Disderi.

On their arrival in France the Cochin-Chinese Ambassadors were received with great marks of honour at Toulon, where a military reception was given them. They reached the French capital on the 14th of September; and while awaiting the return of the Emperor

ENTRANCE TO KAGOSIMA BAY, SATSUMA'S STRONGHOLD.

Napoleon from Biarritz they have been entertained in Paris in the best style, and have become, through the dearth of other subjects of interest, the real lions of the metropolis, where they have visited most of the places of amusement, not even forgetting the "spectres" of the Salle Robin, at which they appeared to be greatly astonished. They have also been already officially received by the Minister of the Interior, and during their visit to his Excellency they were provided with small white sticks on which to fix their attention, as, according to Annamite custom, it is not respectful to look at a Minister.

The costume in which we represent the Annamite Ambassadors is their ordinary one, which has not a very attractive appearance, its colour being dark violet. This sombre aspect, combined with a peculiar deviation from the code of European propriety as regards pocket-handkerchiefs, has caused a belief that the Annamites are a dirty people; but, with the trifling exception alluded to, they do not merit so grave a reproach, and, when dressed in their gala costume for extraordinary occasions, they vie with any other Oriental Ambassadors. To judge from their manner of drinking champagne and eating French pastry *con gusto*, they may be placed on a par, in this respect at least, with some of the most distinguished Europeans.

The Annamite Ambassadors reside at an hotel in the Rue Lord Byron, recently occupied by the Siamese Embassy.

The month's emigration from Liverpool during September has just been made up by the Government emigration officers. From this it appears that in the course of the month twenty-six ships, sailing under the provisions of the Passenger Act, sailed for the United States, carrying 8423 passengers; for Canada, three ships, with 333 passengers; for Queensland, one ship, with 89 passengers; and for Victoria, four ships, with 1489 passengers: in all, 10,325 passengers. Of vessels not sailing under the Act, eight ships, carrying 560 passengers, sailed for the United States; for Canada, three ships, with 582 passengers; for Queensland, one ship, with 16 passengers; for Victoria, one ship, with 18 passengers; and for other parts, five ships, with 108 passengers: making a total of 1279 passengers for the month. The grand total of passengers for the quarter ending the 30th of September was 33,395, being an increase of 16,517 over the numbers for the corresponding quarter of last year.

DEPARTURE OF THE KING OF THE GREEKS FROM COPENHAGEN.—SEE PAGE 368.

MEMBERS OUT OF PARLIAMENT.

THE lesser stars which have been shining with their factitious brilliancy before provincial constituencies, have been rather put into eclipse in the last few days by the appearances and re-appearances of some the planets of the Parliamentary system. When Mr. Henley and General Peel, and Mr. Bentinck are addressing mankind through the medium of their constituents, and when Mr. Roebuck is lecturing in a Nonconformist chapel, we do not care to know what Sir Lawrence Palk, or Sir Kekewich, or Sir Harry Verney, or Sir Hugh Hubbard have to say; and especially when Mr. Walter is discoursing in Berkshire, the auditoress of the Royal county cannot be supposed to fix much attention on Mr. Bingham, even though he holds the honourary dignity of chairman of an agricultural meeting, at which the subject of the talk is presumed to be purely agricultural topics. Nevertheless, there is temptation to rescue from the oblivion of last week one or two of the more or less notable sayings and doings of men who, as members, are trying to realise the fable of the ambitious frog, but happily without coming to the last fatal catastrophe.

Foremost, and primarily we have to devote a great deal of paragraph to the fact that Mr. Cox has again been trembled in Londonderry. He was returned for that county by virtue of a certain new principle of nonorganisation at an election, has a second time succumbed before the spirit of Irish anti-landlordism. It is little to the credit of gentleman who has got through a terrible apprenticeship of ridicule in the House, and has reached to the distinction of being able to get a hearing, there when he speaks on matters upon which he knows something, as he has wisely done during his second membership, to be put down by an unreasoning assembly, which seems resolved that the very first promises of good were being brought to them from Cockaigne. Although probably skilled in governing the Irish portion of the county it is clear Mr. Cox's power fails him when he has to deal with Irish society in Israel.

It may be a singular notion, but it is one which we have often felt and elsewhere, that, despite of the large share which Mr. Bright fills in the public eye, he has adapted to be a far more perfect Parliamentary man than his colleague, Mr. Scholefield. Struggling with, and, on principle, of course subduing, his natural combativeness, Mr. Bright is of the peace party *par amy*, whereas Birmingham has, sometimes, made the appearance of muskets is most lively; and there have been horrid stories about that, rather than bad wine in them. Mr. Scholefield, on the contrary, though humbles will not decline to supply Kaffirs or Russians, or any other belligerents with whom Britain may be at war, to participate with the riches, of course, of their stock. As Mr. Scholefield is of Birmingham native and by residence, he may be supposed to diverge from his colleague on the peace-at-any-price question, and to be willing to more fitly represent the constituency. But as a member of Parliament he has stood well. He is an excellent Dissenting gentleman, possessed a skilful legislator, in the sense of concocting and conducting bills; and he is a remarkably fair and agreeable though very inferior speaker. There is a dash of gentlemanly fastidiousness about him; and always gives an idea that he could make a figure in politics and Parliament if he chose to take the trouble. But he does not. It must be admirably adapted for the performance of such a duty as that which he has lately been performing before his constituents, by writing an address at the opening of the session of a local institute in a town of such importance as that which he represents.

In the course of the manufacture, we will hardly venture to say amusement, was caused by the publication of a letter addressed by the latter to General Peel. The letter, it is said, was communicated was caused by the letter itself, but by the reason of its production. The fact was, that the gallant General having to attend to his agricultural audience in Huntingdonshire, and being at a loss for matter, probably by the force of the habit of all members during the Session, recurred for one to the adversary in the House of Commons. Perhaps, perhaps, under the influence of his Parliamentary position, responded, and would, in a very practical manner, to the agricultural engagement, which the General paraded with capital effect as his country nesting. A day or two after, the General was again in the chair at a rural assembly, and did not make so good a display by half. But then, this time he was backed by Lord Robert Montagu, who was sure to make up all deficiency, if it was possible to do so, by the production of the results of some studies of the week before, which is a way that some trying people have, especially in Parliament. Lord Robert Montagu and which is certainly not untrod by the *débonnaire* Lord Robert. There is no doubt that this noble scion of an illustrious line works hard in his vocation of a member of the House of Commons, as no yet, he has distinguished himself only by scintillations—sparks struck out like—for by no means unpleasing, though rather wearying blaze. He had improved a good deal last Session, and was evidently striving to get rid of a touch of Cockney pronunciation which long marred his method seeming to be to speak louder and faster than was formerly his wont. He is in palpable training, to his own satisfaction at least, for under-secretaryship.

Mr. Bentinck, of West Norfolk (it is necessary to be thus specific because there is another Mr. Bentinck, who is generally attaching to hop into notoriety in the house), is apparently on a tour in his county. Last week we found to notice a report of his address to a meeting in attention by his delivery of an exhaustive—in more senses than one—oration at King's Lynn. There was no public topic on which he did not debate, and which he did not exhaust, from the state of agriculture to the Pope, and exhibited all the qualities of perverse contradictoriness for which he is celebrated; and, amongst the rest, the American question. He professed himself "most," to which we will do our little to procure that honourable publicity which its author so little deserves, "at a loss" he said it down that "humanity and civilisation are not compatible with democratic institutions."

It is with regret that we find Mr. Henley stating to another Oxfordshire meeting before which he has appeared that he was so physically unable to attend as he only able to attend the House. He again talked, too, of his advancing years in a way which, to those who know him, verged on the pathetic. In these days of commonplace sensation, he could ill be spared in the House of Commons. In his speech he showed no want of vigour in pressing and illustrating his position that, in some degree peculiar to himself, he became means to make an impression when he argued that agriculture in its present improved condition owes nothing to free trade; for no instance in whether the farmers, who are said to be growing more knowing than their landlords, will readily accept that dogma.

A quiet, sensible, argumentative address from Mr. Roebuck is worth speaking of, on the principle of negation. A lecture which showed with calmness and reason that the country was a good thing was relieved by only one characteristic flash—when Mr. Roebuck defined the Reform to be a measure not to give power to those who are up to a level with those who are down, but to lift those who are down to a place beside those who are up. Was this doctrine ever broached, we wonder, in those confidential Wednesday or Thursday and Paris, which the incarnation of Radicalism and of Englishmen has had the privilege to hold for Parisians, and especially for plebicistical, to coin a word for the nonce?

What a fortune place Bingham (a fresh-water fishing-village on the banks of the Thames somewhere in Middlesex, we believe) must have been last week, to have brought into conjunction the Chief Baron of the Exchequer and the only real representative of the maritime interests of England in Parliament. Need we name Mr. Lindsay?

Of members out of Parliament, there are three just now who are not for very excellent cause in the country. Mr. Serjeant Pigott, Sir Roundell Palmer, and Mr. Collier, while undergoing the process of ejection, are no doubt experiencing sensations which, however joyous, must, we imagine, be the case of the two former, at least, be tinged with a shade of regret at their owing their promotion to the circumstances of Sir Alan Alderton having been very nearly pushed out of the attorney-generalship.

The less of the ship Scinde, from Cochin to London, is reported. The loss is above on the underwriters, to the amount of £120,000.

Enormous flocks of plover have made their appearance in Prince Edward Island, and they are being made an article of export to Boston, U.S. They are packed in ice in barrels.

The insurrection in San Domingo appears to be spreading. Strong reinforcements of troops have been sent from Havannah, as the insurgents were said to be bearing heavily on the Spanish forces.

METROPOLITAN NEWS.

James Margoss, said to be the last of the veterans who fought under Admiral Rodney upon the 12th of April, 1782, died a few days ago.

Emanuel Charles Louis Godey, known as Prince Emanuel Charles de Godoy, appeared at the Bankruptcy Court last week. He is the "Prince of Bedford-row," commonly called the "Prince of Peace," well known during the Peninsular War.

The proprietors of the Great Eastern met yesterday week to consider the course they ought to take in the present desperate position of their property. The directors had no definite "policy" to submit to the shareholders, who were unable to see their way to any definite course to pursue. After a good deal of discussion, in the course of which various propositions were made and rejected, the meeting resolved to appoint a committee to inquire into the state of the company's affairs, who are to report to another meeting to be convened on the 30th inst.

The movement for the establishment of working-men's clubs progresses rapidly. In all directions new clubs are being established, and wherever they have been founded they have worked most successfully. On Tuesday evening a meeting was held at the Assembly-rooms, Church-st, Southwark was held as the Albert Institute, Gravel-lane. Mr. G. A. Sala presided, and meeting was addressed by Lieutenant Colonel Wilkes, Messrs. Wilkes and other gentlemen also spoke in support of the movement. Resolutions in accordance with the objects of the institution were passed.

Last week the births of 1935 children—1037 boys and 898 girls—were registered in London. In the ten corresponding weeks of the years 1840-49 the average number corrected was 1,658. In the week that ended last Saturday 1,935 births were registered, being 277 above the average number of deaths in ten corresponding weeks (1840-49), with the addition for deaths from cholera in the former period. The births exhibit a remarkable increase of population, becomes 1159. There were twenty-two fatal cases of small-pox in the week, showing a further decline on those of preceding weeks. Scarlatina still prevails much, and shows a tendency to increase; the deaths from it rose to 154 last week, being 40 above the average.

The new central art-schools in connection with the Kensington Museum will be thrown open to the students on Monday next for the winter session. The new buildings consist of a range of temporary iron and brick series there will be separate rooms assigned for drawing, painting, and modelling. The whole arrangement is perfect for both students and visitors. The whole series of buildings forms the north and west sides of the inner quadrangle of the Kensington Museum, and will be the first completed part of the Select Committee of the House of Commons in 1850. The total number of the students 87,380, towards which the Government has contributed £1,000 for students 87,380, towards whose instruction the State contributes £38,350, being an average of 8s. 9½d. for each student per annum.

At the meeting of the Metropolitan Board of Works yesterday week took the plans of the engineer for the construction of the north side of the Thames from Waterloo Bridge to the east end of the Temple Gardens was sanctioned, and the engineer was directed to take immediate steps to obtain estimates for the work. The western portion of the work had previously been tendered for. The plans include the formation of a new line of embankment, from which it appeared that the outfall is now connected with some portions of the different sewers which discharge themselves into the river. It appeared that the middle level, especially towards the east, may be said to be complete, and the western portion of the works, from the Adelphi to the northern or lower level, which, of course, is dependent on the embankment scheme.

COUNTRY NEWS.

The Queen has appointed the Earl of Hopetoun to be Lieutenant and Sheriff Principal of the shire of Linlithgow, in room of the late Earl of Rosebery, deceased.

Mr. Trobene, a Conservative, was on Thursday elected to represent Leominster in Parliament. The numbers at the close of the poll were: Treberne, 2245; Peel, 2096.

Yesterday week the foundation-stone of a new Wesleyan chapel was laid at Ramsgate, in connection with a visit of the Rev. Jabez Bunting.

A meeting was held in the City Courthouse, Limerick, last Saturday, for the purpose of devising means to give immediate and energetic effect to the Irish Fishery Act passed by the Legislature in the late Session.

The Lord Lieutenant arrived at Dublin Castle on Tuesday, at the last surviving member of the famous Westminster Whig Committee, in the Congregational Schoolroom in that place, on Thursday week, to a very numerous audience.

The twelfth anniversary of the Church of England School-Society was celebrated on Wednesday week by a dinner at Freemasons' Tavern, Lord Ashley in the chair. There were also present Lord Ebrington, Sir Thomas Wilde, Mr. Hawtrey, the Rev. J. F. Norris, one of her Majesty's inspectors of schools, and others.

On Saturday the Government Inspector gave his certificate for the opening of the Ashford, Canterbury, and Whitstable Railway to St. Margate and Ramsgate. The line runs along the Kentish coast from Whitstable to Herne Bay, Reculver, Margate, Broadstairs, and Ramsgate. The distance to the latter place is shortened by twenty-seven miles.

A little boy, aged seven, has been missing from home, from having eaten a number of the berries of the deadly nightshade. Four other boys who had eaten the berries were also taken dangerously ill, and it is to be feared that they will recover.—A little girl, living at Worcester, died on Saturday from the effects of eating the deadly nightshade, which became mixed with Indian corn.

The Liverpool police last week apprehended a man named James Anderson, who had a number of medals and insignia belonging to the K.C.B. in his possession. They have since discovered that the articles were the property of Sir Edward Charles Richard J. R. Lees, Bart., K.C.B., and Knight of Hanover, and have restored them to their owner.

A little boy, named Isaac Bentley, was drowned on a bank holiday in Bolton-clerk—inclosing a £500 note in each letter. In his letter to the Chancellor of the Exchequer he says that he has been induced to undertake on a tour of pleasure, first in Wales and afterwards in America. Such a proposition, he says, is not to be entertained by any man of honourable sentiments.

The north-eastern line of the new fortifications for Plymouth will, according to the *Western Morning News*, be commenced shortly. Indeed, operations have already been commenced with a view to the laying out of the citadels, to the Tyrn at Crabtree, are in progress; and it is expected that the masonry work at the Devonport end will be finished very soon. The whole line there will be a strong and large fort, which will to connect by roads, walls, and intervening works with the citadel on the Tyrn. The Crabtree fortification and that will have works to connect it with the third large fort, which it is proposed to erect at Laira.

The tenth annual conference and anniversary of the Southern Counties Asylum for Idiots was celebrated on Wednesday at Knowle, Devizes, on Tuesday.—William Ewart, Esq., M.P., in the chair. There were present the Bishop of Salisbury, Lord Methuen, Mr. Disney Leathes, Mr. Wyndham Portal, and a number of county gentlemen. Papers on educational subjects were read by Mr. Langdon, inspector of schools, Mr. Hodgson, Mr. Buckmaster, Mr. Fyfe, Mr. Carnegie, and Mr. Thompson. In the evening there was a public meeting in connection with the asylum, when the reports of the several schools and a discussion on the papers which had been read at the morning meeting. The Bishop of Salisbury presided.

On Sunday the brig Sir Colin Campbell, of Whitby, was steamtoiling for Rye Harbour, with a signal of distress flying, about three p.m. It was observed by the crew of the Hastings lifeboat, which was then lying off the pier at the time. The life-boat of the National Life-boat Institution started at once, and proceeded to the assistance of the disabled, and provided with a tow-rope. When about two lengths from the brig the life-boat met the crew in their lifeboat, and the captain not liking to cross the bar in his own boat, owing to the high surf, the crew, six in number, were taken into the life-boat and safely landed in Rye Harbour. After bringing the crew of the brig ashore the life-boat returned to the vessel, and, with the crews of two gallays, assisted in getting her, and the next tide, the weather moderating, the vessel was got off the bar and brought into harbour.

The annual distribution of prizes and certificates to the successful candidates at the examinations of the Museum of Irish Industry, Dublin, for the year 1849-50, took place on Thursday evening in the theatre of the museum, which was crowded by a respectable audience. The Lord Lieutenant honored the occasion with his presence, and on the platform was a large number of ladies and gentlemen. When the prizes had been distributed Sir R. Kane thanked Lord Carlisle for his kindness in attending and taking part in the proceedings. The noble lord, in rising to address the assembly, was greeted with loud and hearty cheers. Alluding to the discussions in Parliament relative to the museum, and the expediency of amalgamating it with the Royal Dublin Society, he said that his opinion had always been given in favour of this institution, the officers of which were able and eminent men, doing well and conscientiously the work set before them.

MR. GLAISHER'S FIFTEENTH BALLOON ASCENT.

Mr. Glaisher has published an account of his recent ascent from Wolverhampton in Mr. Coxwell's balloon, the fifteenth for scientific purposes. The report is considered of importance in showing that the general readers will also peruse it with interest on account of the curiously minute and graphic way in which he has noted down the changes that took into the bosom of which he ascended, and they will admire the courage, coolness, and presence of mind manifested in the midst of the most imminent peril to the earth, in the midst of the storm of wind which blew as he descended, and which bore him at a terrific rate into the clouds.

Mr. Glaisher says his ascents have usually been made in the summer months, but that on this occasion it should be made in October. He ascended on the 31st of March last (the time of the spring equinox), and the object was to observe the variation of the magnetic force. Coxwell, who refused to have observations at the time of the autumnal equinox, for the following reasons:—

"The balloon (says Mr. Glaisher) left at 7h. 45m. in two minutes we were 500 ft. above the earth, at 8h. 0m. 1,000 ft. in 15m. 2,000 ft. in 20m. miles at 8h. 30m., about 74 miles from 8h. 45m., near 95 miles from 9h. 0m., 107 miles from 9h. 15m., and the highest point—viz., 29,000 ft.—from 9h. 30m. Descending we were 24 miles high from 9h. 33m. to 9h. 37m., 14 miles at 9h. 40m., 9 miles at 9h. 45m., 5 miles at 9h. 50m., 3 miles at 9h. 55m., 2,000 ft. only at 10h. 13m., 1,000 ft. at 10h. 23m., and on the ground at 10h. 30m.

"On leaving the sky was cloudy, with the wind south-west, varying to west-south-west. On looking down there was a general mist; Stafford was visible in very straight lines in the north-east, and Shrewsbury in the south. At the height of one mile, although we had passed through no clouds, the earth was hidden from view by a thick mist, which, however, left the sun full and visible. Above this there were a few faint streams of light. On passing above the mist we were in a dense cloud, which was of a bright and dense clouds still above. The view here was much above my former expectations. Immediately around every variety of colour in the places most harmoniously grouped; but the very hasty glances and but few moments I could spare from my instruments would be able to do justice to so grand a scene. In rare places white enmuli clouds appeared resting on the ground, like a field of cumuli as seen from the earth, and presenting somewhat the appearance of a simultaneous discharge of heavy ordnance. In one place I counted seven of these, but there was a great deal more to be observed upon us, but between the first and second layer the sun was shining, and the illuminated earth took a beautiful green tint. Some above mentioned clouds were curved, resting on a base of cumulus. On some clouds there was a beautiful blue light, as if illuminated by the rays of the sun reflected from water. The shadows of high clouds upon low mist were very fine. Mist was seen in single vertical columns, like the smoke from towns and factories, and the height of a mile, but with very little horizontal motion. On descending, the shadow of the balloon on the mist was seen surrounded by a circular bow. At this time, while passing over the fields, we distinct a very large number of sheep, cattle, and horses, and the sound of a dog's bark very. Not a single rook, although we afterwards learned they were numerous."

It will be remembered that the descent was very rough one, the balloon being torn. Mr. Glaisher thus describes it:—

"The balloon descended with its mouth in mixture, and rose slowly; when at the height of one mile we had to part with sand to keep us on that level, and afterwards more to keep us from descending. At 9h. 33m. the barometer was 27·6gr., no beginning to form all over the balloon, and as we rose slowly there were frequent discharges of gas from the balloon, causing a loud noise and the utmost watchfulness. When the temperature was 25·6eg., Mr. Coxwell agitated the barometer in the car, and it fell to 25·4deg., and the temperature of the gas was 29·6eg. As soon as the gas became clear we observed the temperature in the interior of the balloon 30deg., but fortunately found it sound everywhere. When the sun shone on the balloon an ascending power was felt, and when it was hidden a descending, the elevation of five or six miles; but directly afterwards we saw the coast from the Wash to Hastings, and the whole extension of the Wash, by which we found we were moving, and whence, at an estimated distance, we were then ten miles. A considerable swell was on the sea, but no white horses.

"The valve was opened, but the balloon rose, and it required a very free use of it to get it to descend. Before reaching the ballast, and when above the wind changed, blowing towards the north, passed north of Grantham, and then moved with great velocity in a south-east direction. At this time the trees greatly agitated, and it was evident that the descent would be a rough one. We were now approaching the earth, and the ballast carried for some bumps. When at the elevation of 150 ft., passing very quickly, we had to throw out ballast, as the balloon descended with great velocity where we wished. An open country was before us; the grappel failed to hold, and the car struck the earth, and rebounded, and we thought all safe again; the grappel passed through the light earth without preventing us from moving, and the car struck the earth a second time, when it was our bounded about 20 yards, and then descended. The balloon stood the seating about wonderfully, and no apparent injury was done to it, except a few rents. The grappel at length caught, and we had a long run up from the place where she struck on the ground. The two ladies got out like wings. As the car struck the ground the second time I thought the great rent passed up to the valve, when I expected all would drop down; but the car rose to a minimum height of 20 yards, with the line and grappel at feet high in the air, whilst the whole balloon opened out in one immense sheet, and, likelike, kept us suspended over the ground, so that we were in a much more considerable length of time; it then gradually fell to the ground, and we got out, and the balloon, which had carried us before, now rose much injured. I opened my packages to see, as I expected, the debris of all the instruments, but to my astonishment found everything safe, and in a much greater part remaining uninjured. As to ourselves, we had, of course, a few bruises, but none at all dangerous. The inconvenience we had to endure were, perhaps, as small as could be expected in morning ascents made about the time of the equinox."

Mr. Glaisher furnishes his usual observations on the changes of temperature, which, he says, are very remarkable, and also on the magnetic effect of the sun's rays, and the vending of the blackened bulb thermometer, with its bulb in the sun's rays, which he intends to name, respectively, as he says:—

Sunray paper, by Mr. Lowe, of different proportions, were abundantly spread about the rigging, and were not coloured at all throughout the journey. Some powders, by Mr. Lowe, of different colours, such as red lead and vermilion, mixed three months ago, were slightly tinged when first opened, and were more so after the descent. The powders of which I then increased and continued to increase till noticed at 9h. 57m., when it was as dark as 4 on a scale of 10.

Dost Mahomed died on the 29th of May last, and the news of his death reached Bombay by the steamer Punjaub on the 1st of June, but it was not known in India until the 1st of July.

The Tyrol, which is celebrating its jubilee to commemorate the five-hundredth anniversary of the union of the Tyrol with Austria commenced at Innspruck. A division in the morning the procession of riflemen and sharpshooters of all kinds, with their banners, took place. In the afternoon was the solemn church service with the corps troops wearing the costumes and bearing the banners of shooters from all parts of the Tyrol. The Archduke Johann, veteran of 1809, and Governor of the Tyrol, with the civil and military authorities, &c. Among the more remarkable objects which were carried in the procession were the banner of Andreas Hofer, and the sabre given in silver, given by the Austrian army to the Tyrol, and which will be the first gift in the shooting-match. Deputations from all parts of the Tyrol have arrived at Innspruck, and also from the archduchy of Austria, from Salzburg, and from Bavaria. The Archduke Johann has received visits from the district of Ampezzo, where Italian is spoken, entered Innspruck preceded by a fanfare of trumpets.

THE NATURE AND PROPERTIES OF MILK is the subject of a long article, by Professor Voelcker, in the new number of the *Journal of the Royal Agricultural Society of England*. We give a few extracts from this valuable part. Water being 1000; the specific gravity of good cow's milk is 1029; skimmed milk 1035; good milk of 1850 by Dr. Lethby 1034; and Voelcker's 1030. Under the microscope milk appears as a transparent fluid, in which float innumerable atoms, or, as they are commonly called, milk globules, globules which consist of the shells of curd or casein, including the fatty matters. The curd or casein, however, is not contained in the globules, but in the solution of cane sugar, butter, milk sugar, and mineral matters—100 parts of casein, according to Peterson, contain 53 carbon, 7 hydrogen, 15·5 nitrogen, 23·5 oxygen, 0·714 phosphorus, 0·357 sulphur. The composition of milk is precisely the same in all parts of the world. Cow's milk is composed of water, 86; butyrine, 4; caseine, 4; sugar, 5; salts, 1. The latter is composed of carbon, 46; hydrogen 6·85; oxygen, 39·34. The mineral matters of milk comprise the phosphates of potassium, sodium, calcium, and magnesia; the chlorides of potassium and sodium; and free soda. By churning cream, the fatty matters of the milk globules are broken and their contents made into butter; of which, when pure, palmitin, with a little stearine, constitutes about 68 per cent. The peculiar flavour and colour of butter are due to the presence of about 2 per cent of odoriferous oils—butyrin, caperin, and caprylin. The more perfectly the fragments of the casein shells are removed from the butter the better it will keep, since their presence occasions the formation of certain volatile, unconstituted fatty acids, which spoil the flavour of butter and render it rancid and unwholesome. Dr. Voelcker dwells at some length on the best dairy arrangements, &c. With respect to the adulteration of milk, he expresses his disbelief in the list of ingredients stated to be thus employed (such as gum, starch, flour, &c.), and he considers the manufacture of the adulteration with water, so generally used for this purpose, he describes various substances, &c.

NATIONAL SPORTS.

Wednesday's racing opened with a walk over for Mr. Ten Broeck; and the succeeding race, the Fifteenth Triennial Produce Stakes, wherein Tornado, a moderate filly, defeated the Ranger (who was third) at weight for sex by three lengths, was also carried off by the popular American. In the St. Leger Stakes Mr. Savile's horse, however, had it all his own way with such animals as Early Purl and Sandford; but the performance could scarcely be said to add freshness to the Grand Prize of Paris laurels. At the meeting of the Jockey Club on Wednesday that autocratic body had an accession of fresh blood in the persons of the Duke of St. Albans, Lord Rendlesham, the Earl of Durham, Viscount Newport, Lord George Manners, and Captain Douglas Lane. The Marquis of Hastings is up for the ballot at the next general meeting, which takes place in the Second October Meeting.

The Queen's Guineas stood first on the card for Thursday. Isoline and Harlequin were the only two mentioned in the betting, being almost equal favourites. The result justified the opinion of the Ring, as the Goodwood Cup victress was just able to get home, after a most severe and punishing race. It seems to be the fate of this crack mare to be subjected to the application of whip and spur, as witness her race with Millionaire for her Majesty's Plate at Goodwood. The success of Ely in the Sixteenth Triennial Produce Stakes was a regular poser to those who believed themselves in the secret of his recent previous running. Even his owner and the stable could not make it out, in proof of which they had next to nothing on the colt. After the race he was backed at 25 to 1 (taken freely) for the Derby. The Handicap Sweepstakes for two-year-olds which followed produced sixteen runners, and Land of the West, a West Australian, landed a whole argosy of stable money. The Rutland Stakes destroyed the hopes of the backers of Claremont for the Derby, unless, indeed, it turn out that the colt was off, as otherwise such an animal as Acolyte could not run away with the race as she did. Friday's racing has scarcely ever any interest attaching to it to keep the bulk of visitors at Newmarket. The sweepstakes of 30 sovs. each, over the T.Y.C., again showed the form of the French-bred Fille de l'Air, as she beat a respectable field without ever being extended. The October Handicap produced a field of twenty-one. The Monk was hardly mentioned in the betting until the very last, and so completely did he have the race in hand after descending the hill that he came in and won with ease, beating Mr. Sutton's Man-at-Arms by a length and a half. Upon the whole, the Newmarket First October Meeting of 1863 was as successful as any of its predecessors.

The Edinburgh and Lothians' Raceclub Meeting took place over the Musselburgh course last week. The Lothian Handicap, on Wednesday, was carried off by Mr. Merry's Knave repeating his victory in the Queen's Guineas on Thursday. Oldminster was intended by his owner to have contested the latter prize, but, being booked for Inveresk, the railway company sent him to *Inverness* instead.

COVENTRY RACES AND STEEPLECHASES.—Tuesday.

Coventry Handicap.—Tourist, 1. Rockley, 2. Fontenoy, 3.
Military Sweepstakes of 50 sovs.—Grey Friar, 1. Badger, 2. Maniac, 3.
Handicap Hurdle Race of 25 sovs.—Jacob, 1. Portland, 2.
Hunters' Hurdle Race.—Miss Amy, 1. Master Oliver, 2. The Widow, 3.
Godiva Steeplechase.—Harriet Watts, 1. It's All over, 2. Nike, 3.

BEDFORD RACES.—Wednesday.

Preparation Stakes.—Middlewatch, 1. Baron of Avon, 2. Reserve, 3.
Two-year-old Stakes.—Soumise, 1. Faith, 2. Vandervelde, 3.
Town Stakes.—Atlas, 1. Baliverne, 2. Pounce, 3.
Bedfordshire Stakes.—Gibraltar, 1. Lord of Linne, 2. Tourist, 3.
Consolation Stakes.—Rubini, 1. Zeloo, 2. Supple, 3.

THURSDAY.

Hunters' Stakes.—Rockley, 1. Pounce, 2. Devotee, 3.
Scurry Handicap.—Miss Julia, 1. Xurullo, 2.
Selling Stakes.—Prescription, 1. Polonaise, 2. Salvioni, 3.
Stratton Park Stakes.—Equinox, 1. Margery, 2. Zeloo, 3.
Queen's Plate.—Gibraltar, 1. Blondin, 2.

ROYAL CALEDONIAN HUNT AND PERTH MEETING.—Wednesday.

Caledonian Handicap.—Joey Jones, 1. Donne Canne, 2. Picco, 3.
Plate of 40 sovs.—Unfashionable Beauty, 1. Sarah Ann, 2. Alice, 3.
Caledonian St. Leger.—Alice walked over.
Welter Stakes.—Sarah Ann, 1. Sherwood, 2. Fernando, 3.

LATEST BETTING AT TATTERSALL'S ON THURSDAY.

Cesarewitch.—7 to 1 agst Lioness (t), 8 to 1 agst Drummer Boy (t), 8 to 1 agst Limosina (t), 15 to 1 agst Umpire (t), 20 to 1 agst Emblem (t), 25 to 1 agst Buckenham (t), 25 to 1 agst Fantail (t), 30 to 1 agst Romanoff (t), 30 to 1 agst Hurricane (t), 33 to 1 agst Sandford (t).

Cambridgeshire.—12 to 1 agst Catch-'em-Alive (t), 12 to 1 agst Limosina (t), 33 to 1 agst Cairncastle (t).

The Cedars of Lebanon.—The cedars grow on a rocky knoll lying in the embrace of a great semicircular basin in the mountain side. They stand alone, as best befits them, without any other tree near. About 400 of them remain, but only a few of these heard the sound of Herman and his axe-bearing host. If these few had been more accessible, I believe the modern Hermans would soon have demolished them. They all stand within a very small circuit, and the seven oldest are called "the Apostles." These seven alone are believed to be real ancients—i.e., to date from a time before "the Kings of Israel, mighty wise and strong." They stand in the centre of the whole group, surrounded and guarded by their descendants and kinsfolk. The natives almost worship these trees, and ascribe to them a sentient existence. They hold an annual festival beneath their branches, which, being now near at hand, we have been strongly persuaded by the chief of a neighbouring village to stay and witness. All the world and his wife comes up to it; and the feast, though nominally a religious one, is said to lead to a good deal of irregularity. So it is now, as of old, when the Prophet accused the people of "asking counsel of stocks," "they sacrifice upon the tops of the mountains, and burn incense upon the hills, under oaks, and poplars, and elms, because the shadow thereof is good." It is, however, a glorious place for solemn worship—truly a temple not made with hands—in the bosom of the great hills and beneath the shade of trees pregnant with solemn associations of the past. For, as Bryant says—

The groves were God's first temples. Ere man learned
To hew the shaft, or lay the architrave,
And spread the roof above them—ere he framed
The lofty vault to gather and roll back
The sound of anthems; then, in darkling wood,
Amid the cool and silence, he knelt down
And offered to the Mightiest solemn thanks
And supplications.

From the blazing sun of mid-day you dive into the deep shadow of these noble trees, as into a river of cool water. The huge boles, some of them measuring between forty and fifty feet in circumference, send forth to a great distance their fantastically-twisted branches, laden with mighty cones. The lofty tops shoot high up towards heaven, and when in their august presence we imagine the whole mountain covered, as it once was, by such giants, we can well comprehend how the cedars of Lebanon should be so often used in Scripture as emblems of strength, and majesty, and glory.—*Good Words.*

The Focal Adjustment of the Eye has been made the subject of a series of experiments by Mr. Barnard Proctor, of Newcastle. The results appear in the *Philosophical Magazine* for October. The following apparatus was employed:—Upon a pair of parallel wooden rods a stage was made to slide; the stage consisted of two flat pieces of wood, at right angles to each other; the vertical one carrying a test-object, and the horizontal one a taper. The light, being on the stage with the test-object, gave it a constant illumination, as they both move together. The eye being placed at one end of the rods, the object was between it and the light. The object consisted of a slip of glass coated with a thin film of silver or other material, upon which fine lines may be scratched so as to transmit light; on this surface is drawn a cross, consisting of fine double lines, the width between the double lines being varied according to the observer and the nature of the experiment in hand. The focus was considered to be accurate when the fine double lines were perceived to be double; and the adjustment was considered imperfect when the cross appeared to consist of misty lines, or a multiplicity of lines. The test-object for ascertaining the revolving power of the eye consisted of two lines diverging at a very acute angle, and supplied with an index, showing how many thousandths of an inch space there were between the lines at any part of their length. This object being made to slide behind the perforation in the upright portion of the stage, commencing at the end where the space is greatest, it was pushed towards the narrow end till the lines just ceased to be distinguishable as two. The number of thousandths was then read off as an indication of the resolving power of the eye. With this apparatus the power of various eyes was tried, and found to vary very much, which differences are noted in a tabular form. Although the adjustment of the eye is only partly under command of the will, yet the power over it was found to increase by practice, several of the observers being able easily to obtain a focus at the end of a few experiments, which they could not do readily at the commencement; and they also gained a facility in deciding when the test-object was in perfect focus or the best attainable focus. To different observers the appearance of a line out of focus varied, being either a faint band with clear edges, a line with misty edges, or a band of two or more lines. A line in focus appeared to one observer like multiple lines; beyond focus, like a line with softened edges. For further interesting details we must refer our readers to the article itself.

THE DISTRESS IN LANCASHIRE.

The usual weekly meeting of the executive committee was held on Monday at the Townhall, Manchester, the Earl of Derby presiding. The hon. secretary reported that £562 0s. 4d. had been received during the week, and that the balance in the bank was £203,072. One parcel of clothing (specially appropriated) had also been received. It was resolved to make an appeal to the public for donations of clothing, which will be greatly needed during the ensuing winter by the factory operatives, who will be employed on works undertaken under the Act of last Session. The returns collected by the Central Relief Committee continue to show an improvement in the condition of the cotton-manufacturing districts. In the last week of September, 267,982 operatives were working full time, and 160,835 working short time, whilst 104,198 were wholly unemployed. Comparing these figures with the tables furnished at the close of the month of August we find that the number out of work has decreased by 14,702, while the number on full time has increased by 25,536. Mr. Farnall presented his report, which stated that there was a decrease in the number of persons receiving parochial relief in twenty-seven unions in the cotton-manufacturing districts, as compared with the number so relieved in the previous week, of 1221. The Poor-law Board has already received applications for grants under the Public Works Act amounting in the whole to £1,000,000.

The fortnightly meeting of the London committee was held yesterday week, under the presidency of the Lord Mayor. The total receipts, including interest, were reported to be £511,495, of which sum £445,172 had been already remitted to the affected districts for distribution. During the past fortnight £79 had been received, of which £63 was from our colonies. Grants were made for remittance—to Ashton-under-Lyne, £1000; Stockport, £200; Hurst, £100; and smaller sums to other places: making together £2089.

The Emperor of Russia has arrived at the château of Orienda, on the southern coast of the Crimea. His Majesty will not return to St. Petersburg, it is thought, for several weeks.

The Public Schools are agitating for laws to be laid down for matches at football. It appears that Eton, Harrow, Westminster, Rugby, and indeed every public school has peculiar laws for the game, so that it is impossible to play a satisfactory match between any two of them.

Letters from Port-au-Prince announce that President Geffrard opened the Session of the new Parliament of the Haytian Republic on the 9th ult. by a speech in which, after expressing his regret that the systematic opposition of the last Parliament had rendered a dissolution absolutely necessary, he declared his conviction that the present Parliament, forgetting all personal questions, would zealously aid him and his Government in promoting the welfare of the country. He stated that the foreign relations of the Republic continued on the most friendly footing, that perfect tranquillity prevailed at home, that the Ministers would shortly bring forward the Budget for 1864, and also introduce several important bills necessary to consolidate the credit and insure the prosperity of their country. To these matters he called their earnest attention, and trusted that Providence would favour their efforts to promote the public welfare.

Moselle Wines.—There are no red wines grown on the Moselle. They all come under the designation of white, which is applied in common to every variety of the delicate straw-tinted wines. It is here, at Trarbach, that the moselle mousseux is to be procured in the highest perfection. The manufacture of sparkling wines is of modern date in Germany, the first experiment of that kind having been made not more than forty years ago, at Esslingen and Heilbronn, from the inferior Neckar grape. It has since expanded into a considerable trade, and is now carried on extensively at Hockheim, Mayence, and Coblentz. In 1861 the sale of sparkling hock and Moselle was estimated at one million bottles, which, although only about a tenth of the sale of champagne, may be regarded as a decided evidence of the rapid advance they have made in public favour. But he who desires to have the genuine sparkling wine on his table must take a little trouble to secure it. When the best class of grape is selected for the purpose, a wine is produced equal to the highest range of champagne; but the German manufacturers sometimes resort to the same process for the sake of passing off their inferior wines under the palatable disguise of sweetness and effervescence. It is well known also that large quantities of the poorest German wines are imported into France for the purpose of being converted into champagne; a piece of roguery which is balanced on the German side by the sale of German wines as veritable champagne, with French labels, brands, and bottles. A still worse imposition is practised in France, where a spurious sparkling moselle is manufactured, and sold in German bottles, bearing the names of fictitious German firms. To escape these frauds you must obtain your wine through firms on the Continent of established reputation, or, still better, from the growers, if you can find out who they are. The names of the growers are, in fact, the brands of the genuine wine, and I am sorry my information on this point is scanty. As it is difficult to obtain the best qualities of any of these wines in small quantities, the safest course is for a few private persons to unite and purchase a whole piece direct from the vineyard, by which they will be sure not only of getting the pure wine, but of getting it at the most moderate price.—*Victoria Magazine.*

MONETARY TRANSACTIONS OF THE WEEK.

(*From our City Correspondent.*)

Considerable heaviness has prevailed in the market for Home Stocks, arising chiefly from the resolution of the German Diet to invade Holstein. The purchases on account of the public have been unusually limited, and a fall of fully ½ per cent has taken place in the value of Consols. Exchequer Bills, however, have been steady in price.

There has been a very active demand for money both at the Bank of England and in the open market. Repayments have been made to the India Council of £2,000,000 lent by them some time since on Government Securities, and which amount has been disbursed among the holders of the Debentures falling due this week. In Lombard-street the best bills are now done as follows:—

Thirty days' bills,	4 per cent.	Four months'	4½ per cent.
Sixty days'	4¼ "	Six months'	4¾ 5 "
Three months'	4½ "		

On the Continent capital has been in improved request, and the quotations are well supported. The rates in the leading cities are:—

	Bank rate, per cent.	Open market, per cent.		Bank rate.	Open market.
Paris	4	3¾	Amsterdam	3	3
Vienna	5	5	Turin	5	5
Berlin	4	3½	Brussels	4	3½
Frankfort	3	2¾	Hamburg	—	3¼
			St. Petersburg	6	8

A Brazilian loan of £3,300,000, in a Four-and-a-Half per Cent Stock, at 88, has been announced. It is required chiefly to pay off the 5 per cent loans due in January and April next.

The Council for India have disposed of £400,000 in bills on the various presidencies. The applications within the limits—1s. 11½d. per rupee on Calcutta and Madras, and 1s. 11¾d. on Bombay—amounted to £1,210,000.

At the half-yearly meeting of the Chartered Bank of India, Australia, and China a dividend at the rate of 10 per cent was declared.

The Land Mortgage Bank of India has been started under the auspices of the General Credit Company. The capital is £2,000,000, and the sole object of the company is to make advances upon land in the East. The scrip has touched 3¼ premium.

Nearly £700,000 in bullion has arrived from various quarters, and several parcels of gold have been disposed of to the Bank of England. Over £50,000 has been withdrawn for Turkey.

The Anglo-Austrian Bank, with a capital of £2,000,000, is announced. Another bank entitled the East London Bank, has been started.

Formal proceedings have been taken in the Court of Bankruptcy to wind up the Great Ship Company.

The Silver Market is steady. Bars have sold at 61½d. per ounce.

The Foreign Exchanges show very little alteration, compared with last week.

American Securities have met a dull market, and prices have given way. Virginia Six per Cents have marked 39; Atlantic and Great Western, 76; Erie Seven per Cents, 70; and Illinois 100-dollar Shares, 17½ discount.

Consols were somewhat drooping on Monday, with a very inactive market. They were done at 93½ ⅝ for Money, and 93¼ ⅜ for the November Account; Reduced and New Three per Cents left off at 91⅞ 92; Bank Stock, for Account, 239 to 237; India Bonds, 18s. to 22s. prem.; Exchequer Bills, par to 3s. prem. On Tuesday Consols marked 93¼ ⅜; Reduced and New Three per Cents, 91⅞ 92; India Stock, 226; Ditto Five per Cents, 108⅛ ⅞; Ditto Five per Cent Rupee Paper, 107½; Ditto Five-and-a-Half per Cent, 117½ to 116¾; Exchequer Bills, par to 3s. prem. On the following day Consols were 93 to ⅛ for Money, and 93¼ ⅜ for Time; Reduced and New Three per Cents, 91⅝ ¾; Long Annuities, 14⅝; India Five per Cents, 108⅞ ¼; Ditto Bonds, 18s. to 22s. prem.; Exchequer Bills, par to 3s. prem.; India Stock was 224; and the Rupee Paper, 107½ and 116¾. On Thursday the market was flat. Consols, for Money, sold at 93⅛; for November, 93⅛ ¼; Reduced and New Three per Cents, 91½ ⅝; and Exchequer Bills, par; India Five per Cent Stock realised 108⅝ ⅞.

There has been less firmness in the market for Mexican and Greek Stocks, and prices have given way. Most other Foreign Securities have ruled inactive. Brazilian Four-and-a-Half per Cents have marked 94; Chilian Four-and-a-Half per Cents, 87¾; Equador, 16½; Greek, 37½; Ditto, Coupons, 17¾; Italian Railway, 81½; Mexican Three per Cents, 43¾; New Granada, 16 ex div.; Ditto, Land Warrants, 8; Portuguese Three per Cents, 49½; Russian Three per Cents, 59; Ditto, Five per Cents, 1862, 93¼; Sardinian Five per Cents, 89½; Spanish Three per Cents, 54¾; Ditto, Passive, 35⅜; Ditto, Certificates, 14; Turkish Old Six per Cents, 95; Ditto, Small, 72; Ditto, 1862, 71; Venezuela Three per Cents, 26⅛; Ditto, Six per Cents, 61⅝; and Italian Five per Cents, 72½.

A large business has been transacted in Joint-Stock Bank Shares, and in several instances the quotations have improved:—Agra and United Service have realised 117; Alliance, 20½; Bank of Otago, 11½; Bank of Queensland, 15⅛; Bank of Wales, 9; Bank of New Zealand, 12¾; Brazilian and Portuguese, 8½; British and American Exchange, 15; Chartered of British Columbia, 12¼; Chartered of India, Australia, and China, 39; Consolidated, 10¾; Continental, 10; English, Belgian, and Netherlands, 3; English, Scottish, and Australian Chartered, 24; Hindustan, China, and Japan, 29¼; Imperial, 23¼; Imperial Ottoman, 19½; London and Brazilian, 50; London Chartered of Australia, 30½; London and Colonial 9¼; London and County, 54½; London and Middlesex, 10; London and Northern, 12½; London and South-Western, 9½; London and Westminster, 79¾; National of Liverpool, 16¼; Provincial of Ireland, 93; Scinde, Punjaub, and Delhi, 6⅞; Standard of British South Africa, New, 18½; Union of England and France, 10¾; and Union of London, 39½.

Colonial Government Securities have been in fair average request. The leading quotations are as follow:—Canada Six per Cents, 1877-84, 105; Ditto Five per Cents, 94; Cape Six per Cents 114; Mauritius Six per Cents, 1878, 109¾; New South Wales Five per Cents, 102½; Nova Scotia Six per Cents, 104½; South Australian Six per Cents, 112½; and Victoria Six per Cents, 111½ ex div.

The Miscellaneous Market has ruled firm. British Iron have sold at 5; Crystal Palace, 40½; Ditto Debentures, 117; Electric Telegraph, 105; General Credit and Finance of London, 5⅛; Hudson's Bay, 9¼; International Financial Society, 10½; Joint Stock Discount, 6⅞, ex New; London Financial Association, 14½; Madras Irrigation and Canal, 3¾; Natal Land, 5½; National Discount, 9⅜; Nerbudda Coal and Iron, New, 3; North British Australasian, ⅞; Quebrada Land, &c., 2⅜; Rio de Janeiro City Improvements, 27⅝; and South African Investment, 6⅞.

The dealings in the Railway Share Market have been to a fair average extent, and no change of importance has taken place in the quotations. The following are Thursday's official closing prices:—

Ordinary Shares and Stocks.—Bristol and Exeter, 85; Caledonian 119¾; Great Eastern, 51½; Ditto, A Stock, 49¼; Ditto, East Anglian Stock, 6½; Great Northern, 126½; Great Western, 65¾; Lancashire and Yorkshire, 111⅜; London, Chatham, and Dover, 45½; London and North-Western, 102⅝; Metropolitan, 130½; Ditto, New, 7⅞; Midland, 128½; North British, 55⅜; Ditto, York, 89; North London, 119½; Scottish North-Eastern, Aberdeen Stock, 44½; South-Eastern, 96⅞; Stockton and Darlington, 25⅜.

Preference Shares.—Great Eastern, Six per Cent, 130½; Great Northern, Five per Cent 107½; Great Western, Four per Cent, 91; Ditto, West Midland, Oxford, 139; Midland, Bristol and Birmingham, 138½; North-Eastern, G. N. E. Purchase, 100.

Lines Leased at Fixed Rentals.—London, Tilbury, and Southend, 100; Midland, Bradford, 98.

British Possessions.—Cape Town and Dock, 103½ ex int.; East Indian 108; Grand Trunk of Canada, 1st Preference, 76½; Ditto, 2nd Pref., 70; Great Indian Peninsula, 108½; Great Southern of India, 107½; Great Western of Canada, 10⅞; Madras Five per Cents, 105½; Scinde, 107½; Delhi, 108¼.

Foreign.—Antwerp and Rotterdam, 9; Bahia and San Francisco, 20¾; Ottoman, 12¼; Recife and San Francisco, 18¼; Sambre and Meuse, 10½; San Paulo, 22¾; South Austrian and Lombardo-Venetian, 22¾; Turin and Savona, 3; Ditto, 16¼.

The return of the Bank of England for the week ending October 7, shows the following results, when compared with the preceding statement:—

An increase of circulation of	£231,650	An increase of other Securities of	£ 73,413
An increase of public deposits of	239,571	A decrease of bullion of	421,818
A decrease of other deposits of	823,818	An increase of rest of	3,100
A decrease of Govt. Securities of	257	A decrease of reserve of	673,323

The total circulation is £22,545,407. Public deposits amount to £9,510,057; and private deposits to £12,893,642. Securities are £33,829,764; and the stock of bullion is £14,856,037.

THE MARKETS.

Corn Exchange, Oct. 5.—The supply of English wheat on offer here to-day was very moderate, and most kinds were disposed of somewhat freely, at full prices. Fine foreign wheats were quite as dear as last week; but inferior qualities met a dull inquiry, at barely late rates. In floating cargoes of grain very little was passing. There was a fair sale for both English and foreign barley, at the late decline in value. Malt, however, was very inactive, on former terms. Good round oats moved off steadily, other kinds slowly, at last week's currency. Both beans and peas commanded more attention, at full prices. The flour trade was steady.

Oct. 7.—Most kinds of produce changed hands slowly to-day; nevertheless, Monday's prices were supported.

English.—Wheat, Essex and Kent, red, new, 40s. to 45s.; ditto, white, 41s. to 47s.; Norfolk and Suffolk, red, 40s. to 45s.; rye, 32s. to 34s.; grinding barley, 26s. to 28s.; distilling ditto, 29s. to 32s.; malting ditto, 28s. to 38s.; Lincoln and Norfolk malt, 60s. to 66s.; brown ditto, 50s. to 57s.; Kingston and Ware, 60s. to 66s.; Chevalier, 66s. to 68s.; Yorkshire and Lincolnshire feed oats, 18s. to 27s.; potato ditto, 22s. to 26s.; Youghal and Cork, black, 16s. to 22s.; ditto, white, 16s. to 23s.; tick beans, 30s. to 33s.; grey peas, 34s. to 36s.; maple, 38s. to 40s.; white, 37s. to 38s.; boilers, 38s. to 39s. per quarter. Town-made flour, 40s. to 43s.; town households, 34s. to 36s.; country marks, 27s. to 30s. per 280lb. American, 19s. to 25s. per barrel; French, 36s. to 39s. per sack.

Seeds.—Winter tares are dull, and the turn lower. All other seeds rule inactive, but not cheaper. Cakes support former terms.

Linseed, English, crushing, 64s. to 69s.; Calcutta, 64s. to 65s.; hempseed, 44s. to 45s. per quarter; coriander, 16s. to 19s. per cwt.; brown mustard seed, 10s. to 14s.; white ditto, 11s. to 12s.; tares, 5s. 6d. to 6s. per bushel; English rapeseed, 60s. to 64s. per quarter. Linseed cakes, English, £9 10s. to £10 5s.; ditto, foreign, £9 10s. to £10 15s.; rape cakes, £6 to £6 12s. per ton; canary, 36s. to 50s. per quarter; red clover seed, 39s. to 48s.; white ditto, 54s. to 58s. per cwt.

Bread.—The prices of wheaten bread in the metropolis are from 7d. to 7½d.; of household ditto, 5d. to 6½d. per 4lb. loaf.

Imperial Weekly Averages.—Wheat, 42s. 2d.; barley, 35s. 4d.; oats, 19s. 8d.; rye, 31s.; beans, 37s. 11d.; peas, 36s. 7d.

The Six Weeks' Averages.—Wheat, 44s. 1d.; barley, 34s. 11d.; oats, 21s. 2d.; rye, 32s. 8d.; beans, 39s.; peas, 36s. 7d.

English Grain Sold last Week.—Wheat, 119,055; barley, 70,405; oats, 14,311; rye, 429; beans, 3998; peas, 1515 quarters.

Tea.—The public sales held this week have gone off slowly, and, in some instances, the quotations have had a drooping tendency. Privately, the market is rather heavy.

Sugar.—A large business has been passing in raw qualities, at 6d. to 1s. per cwt. more money. Barbadoes has realised 32s. 6d. to 39s. 6d.; and Jamaica, 32s. 6d. to 35s. 6d. Refined goods are rather dearer. Common brown lumps are now worth 44s. 6d. per cwt. The stock of sugar amounts to 109,624 tons, against 87,153 tons last year.

Coffee.—No change has taken place in prices; but the market generally is flat. The stock is 11,029 tons, against 7759 tons in 1862.

Rice.—The market is very flat, at about previous currencies. Stock, 41,321 tons, against 59,601 tons.

Provisions.—There is a fair average business doing in most kinds of butter, at very full prices. The best Dutch is worth 104s. to 106s. per cwt. Bacon sells freely, at extreme quotations. Other provisions rule about stationary.

Tallow.—P.Y.C., on the spot, is selling at 45s. per cwt., with a steady demand. The stock consists of 43,758 casks, against 39,815 ditto last year. Rough fat is 2s. 3½d. per 8lb.

Oils.—Linseed oil is steady, at £42 15s. per ton on the spot. Brown rape is selling at £42; and refined, £45 per ton. Olive is worth £52 to £60; cocoanut, £45 to £47; and fine palm, £37 10s. French turpentine, 69s. per cwt. English refined petroleum, 2s. 2½d.; and American, 2s. 4d. per gallon.

Spirits.—There is a fair demand for rum, at full quotations. Proof East India, 1s. 5d.; proof Leewards, 1s. 5d. to 1s. 6d.; and very fine Jamaica, 4s. to 4s. 6d. per gallon. Brandy is offering at from 3s. to 11s. 4d.; Hambro' spirit, grain, 1s. 4d. to 1s. 5d.; English ditto, 1s. 8d. to 1s. 10d.; ditto, rice, 1s. 4d. to 1s. 5d.; and English gin, for export, proof, 2s. 9d. to 3s. per gallon.

Hay and Straw.—Meadow hay, £3 to £4 15s.; clover, £4 to £6; and straw, £1 8s. to £1 14s. per load.

Coals.—Best house coals, 20s. to 21s.; seconds, 18s. 6d. to 19s. 3d.; Hartley's, 16s. 3d. to 17s.; and manufacturers', 13s. 3d. to 15s. 3d. per ton.

Hops.—New qualities are in good supply and steady request, at from 100s. to 160s. per cwt.

Wool.—English wool is in request, at extreme quotations; but foreign and colonial qualities are very dull.

Potatoes.—The supplies are large, and the trade is steady, at from 60s. to 100s. per ton.

Metropolitan Cattle Market (Thursday, Oct. 8.)—The supply of beasts on offer here to-day was rather limited, and the general quality of the stock was very middling. Prime Scots, Herefords, and shorthorns were in request, at prices quite equal to Monday, the top figure being 5s. per 8 lb.; otherwise the beef trade was in a sluggish state, on former terms. The show of sheep was only moderate. Downs and halfbreds moved off steadily, at extreme rates; but inferior sheep were a slow inquiry. A few very superior Downs realised 5s. 4d. per 8 lb. Calves were in fair average supply and sluggish request, at late rates—namely, from 3s. 4d. to 4s. 4d. per 8 lb. The pork trade was heavy, and the currency had a drooping tendency. Milch cows were very dull. Per 8 lb. to sink the offal:—Coarse and inferior beasts, 3s. 2d. to 3s. 6d.; second quality ditto, 3s. 8d to 4s. 2d.; prime large oxen, 4s. 4d. to 4s. 8d.; prime Scots, &c., 4s. 10d. to 5s.; coarse and inferior sheep, 3s. 6d. to 4s.; second quality ditto, 4s. 2d. to 4s. 6d.; prime coarse-woolled sheep, 4s. 8d. to 4s. 10d.; prime Southdown ditto, 5s. to 5s. 2d.; large coarse calves, 3s. 4d. to 4s.; prime small ditto, 4s. 2d. to 4s. 4d.; large hogs, 3s. 8d. to 4s.; neat small porkers, 4s. 2d. to 4s. 6d.; suckling calves, 12s. to 20s.; and quarter-old store pigs, 20s. to 27s. each. Total supply:—Beasts, 990; cows, 130; sheep, 5230; calves, 302; pigs, 447. Foreign: Beasts, 340; sheep, 1650; calves, 242.

Newgate and Leadenhall.—The supplies of meat are moderately extensive, and the demand is inactive, as follows:—Beef, from 2s. 8d. to 4s. 2d.; mutton, 3s. 4d. to 4s. 6d.; veal, 3s. 10d. to 4s. 4d.; and pork, 3s. 6d. to 4s. 4d. per 8lb. by the carcass. Robert Herbert.

THE LONDON GAZETTE.

Friday, October 2.

BANKRUPTS.

G. BIGHAM, Glasgow, warehouseman.—R. and J. TAYLOR, Aberdeen, merchants.

OPENING OF A NEW BRIDGE AT LONDONDERRY.

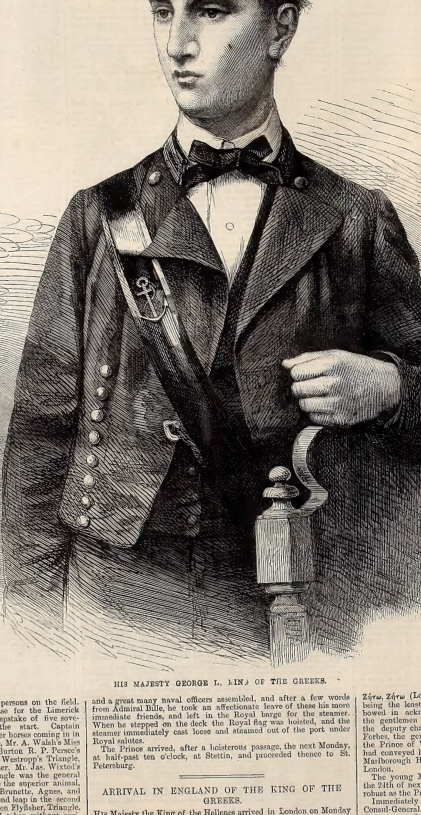
His Excellency the Lord Lieutenant of Ireland, having taken an extensive tour through the wild scenery of the Donegal mountains, arrived in Derry on the evening of the 24th ult. Great preparations had been made for his reception. Crowds awaited his arrival, which was hailed with the greatest enthusiasm. He was received at the railway station by the Mayor of Derry, Mr. Alexander Lindsay. Thence he was conducted to the Townhall, passing under a beautiful triumphal arch which had been erected at the Ferry Quay-gate, and

followed by an immense crowd of citizens, who filled the diamond, or square, in which the Townhall is situated, cheering heartily while he was receiving the address of the Corporation and the burgesses of the city and county. In the address the Mayor, Aldermen, and burgesses of the city of Londonderry, in common council assembled, tendered to his Excellency their "most hearty welcome and sincere congratulations on his first and very auspicious visit to her Majesty's ancient and loyal city of Derry. His Worship then presented to the Lord Lieutenant the freedom of the city of Derry. The parchment was inclosed in a handsome oak case ornamented with gold-plated brass mouldings, and lined inside with fluted blue velvet. The oak of which this box is constructed was part of the roof of Londonderry Cathedral, which stood the siege of 1688. On the top is a gilt shield, which, when opened, is beautifully ornamental letters, the inscription. Lord Carlisle began, in beautifully ornamental letters, the inscription. Lord Carlisle replied in suitable terms to this address, and thanked the citizens of Londonderry for the high honour conferred upon him.

On the following day his Excellency opened the new bridge. This bridge spans the Foyle, immediately opposite the town, and is of iron, 1200 ft. long and 32 ft. broad within the rails. It is divided into two platforms, the lower one for the use of those who will cross the river here and join the line from Derry to Coleraine and Belfast. It is a magnificent structure, of which the Derry people may well be proud. After the ceremony of opening the bridge the Lord Lieutenant visited some public institutions, and in the evening he was entertained at a banquet in the Guildhouse.

We give an Engraving of Derry, after the noble picture by Mr. T. H. Connor, of Belfast, recently exhibited in Corporation Hall, Londonderry. The view is taken from the Fountain-hill, Waterside, and commands not only the city, the country, and the mountain heights beyond, as shown in our Engraving, but also an extensive range of scenery up and down the river and the bay, presenting altogether the finest and most picturesque view of Derry which has ever been painted. His Excellency the Lord Lieutenant inspected it, and expressed himself in highly commendatory terms respecting its design and its execution. It represents both the old and the new bridge over the river, as fully seen from the artist's standpoint, and, in this respect, it will hereafter possess a considerable amount of historic interest. The picture, which has been purchased by Dr. Corry, of Belfast, is eight feet by four feet. An excellent lithograph (printed by Messrs. Monkhouse and Stead, of York) has been taken from the oil-painting.

LIMERICK NATIONAL STEEPLE-CHASE.



THE Limerick races came off recently, and were a decided success. Mr. James Barry judiciously superintended the arrangements, and he was ably assisted by Mr. E. Sheehy, Mr. Slattery, and the committee, which consisted of the following gentlemen:—The Mayor of Limerick, Sir Richard de Burgo, Bart.; Mr. Thomas Boyse, High Sheriff of the City of Limerick; Colonel Dickson, M.P.; Captain Westropp; Mr. David V. Roche, M.P.H.; Mr. Edward Croker, of the Grange; Captain Boyd, 17th Regiment; Mr. James Spaight; Mr. John Vereker; Mr. James Barry; Captain Cardrow, 9th Regiment; Mr. George J. Hore; and Captain Parnell. Mr. J. R. Hunter was the judge, and Mr. Charles Fraser undertook the duties of secretary. There were nearly 50,000 persons on the field. The principal event of the day was a steeplechase for the Limerick Trudement's Plate of £200, added to a sweepstake of five sovereigns each. We give an Engraving of the start. Captain Williams's Flyfisher obtained the prize, the other horses coming in in the following order—Captain Machell's Agnes, Mr. A. Walsh's Miss Arthur, Mr. Wm. Gubbins's Brunette, Mr. Burton R. P. Persee's Topthorn, Mr. Woodward's Vernea, Captain Westropp's Triangle, Mr. Moore's Fairy King, Mr. Barry's The Dunter, Mr. Jas. Wrixton's Mountain Boy, Mr. J. Doyle's Red Rose. Triangle was the general favourite till the result proved Flyfisher to be the superior animal, he having kept the lead, closely followed by Brunette, Agnes, and Miss Arthur. Brunette broke down at the second leap in the second round. The race was admirably contested between Flyfisher, Triangle, Agnes, and Miss Arthur. The leaps were all taken without accident, and Flyfisher passed the winning-post five lengths ahead of Agnes, who came in second, Miss Arthur making a good third.

DEPARTURE OF THE KING OF THE GREEKS FROM COPENHAGEN.

(From our own Correspondent.)

On Thursday, Sept. 17, the city of Copenhagen was again the scene of the departure of one of its Royal Princes for a new country, where his destiny has called him to play a prominent part. The young King of the Hellenes, Prince Wilhelm of Denmark, now George I., left the same palace gates and the same paternal roof as he stepped on the deck the Royal flag was hoisted, and the steamer immediately cast loose and steamed out of the port under Royal salutes.

The Prince arrived, after a boisterous passage, the next Monday, at half-past ten o'clock, at Stettin, and proceeded thence to St. Petersburg.

HIS MAJESTY GEORGE I., KING OF THE GREEKS.

ARRIVAL IN ENGLAND OF THE KING OF THE GREEKS.

His Majesty the King of the Hellenes arrived in London on Monday night by the London, Chatham, and Dover Railway, accompanied by a limited suite.

King George left Denmark on the 17th ult., accompanied by Count Sponneck, and proceeded to St. Petersburg, where he arrived on the 20th, and remained six days. During his visit he went to Constadt, where, under the guidance of General Todleben, he examined the whole of the defensive works at that fortress. The young King was received with great cordiality by the Emperor, and was highly delighted with his visit.

On leaving St. Petersburg, his Majesty proceeded to Rumpenheim, on a visit to his relatives residing there, and, after a stay of a few days, continued his journey to Brussels, where he arrived on Saturday morning last, and immediately proceeded to the Hotel de Belle Vue, where apartments had been engaged for his accommodation. Several gentlemen of the King's suite, amongst whom were Baron de Guldencrone, Professor A. L. Koepen, Dr. Fillemen (secretary), Captain Funck, and Captain Leth, preceded his Majesty to Brussels, and received him on his arrival. Many distinguished Greeks also arrived at Brussels to present their homages to their new Sovereign, and were at once graciously and cordially received. Amongst these gentlemen may be mentioned M. Christopoulos, formerly Minister. During Saturday there was an interchange of visits between his Hellenic Majesty and the Belgian Royal family, and in the evening there was a grand banquet at the palace. Besides the King of the Belgians and the King of the Greeks, with the gentlemen composing his suite, there were present—the Duke and Duchess of Brabant, the Count of Flanders, the Archduke Joseph of Austria (brother to the Duchess of Brabant), Baron Hugel (the Austrian Minister), the Minister of Denmark, and several other gentlemen holding official positions. His Majesty visited many of the principal manufacturing establishments in Brussels during Saturday, and remained in that city till Monday morning, when, at six o'clock, he travelled by railway to Calais.

King George left the French port about half-past one on board the London, Chatham, and Dover Company's new vessel, the Sampshire, which steamed across to Dover in one hour and twenty-six minutes. His Majesty was attended across the Channel by Lieutenant Morgan, R.N., the naval superintendent of the company, and was received, on his arrival at Dover, by the Greek Consul General, M. Ionides; General Sutton, commanding the garrison; Captain Trincott, R.N., Admiralty Superintendent, &c.; and, after partaking of lunch at the Lord Warden Hotel, proceeded by special train on the London, Chatham, and Dover Railway to Victoria station. The arrangements at the station at Dover were under the superintendence of Mr. Cox, the station-master, who had charge of the train to London. His Majesty arrived at Victoria station punctually at six o'clock—the special train performing the journey in two hours and ten minutes.

A telegram, received in London on Monday morning, announced that the young King would arrive at six o'clock. This intelligence was soon circulated through the Greek community resident in London, and had the effect of attracting to Victoria station a great number of ladies and gentlemen who were anxious to witness the arrival of their Sovereign. Amongst those present were Mr. Pandia Ralli, Mr. St. Zizianes, Mr. M. Rodocanachi, Mr. Ziffo, Mr. Carvaly, Mr. James Wyld, M.P., one of the vice-presidents of the Philhellenic committee, and Mr. Stefanos Xeno, the hon. secretary, &c.

The Prince of Wales, attended by Captain Grey, arrived at Victoria station at a few minutes before six o'clock. On alighting from the carriage his Royal Highness was immediately recognised by the ladies and gentlemen present, and was loudly and heartily cheered. In a few minutes after the arrival of the Prince of Wales the Royal train conveying the King of the Greeks drew up at the platform, and as soon as his Majesty made his appearance he was received most enthusiastically, loud shouts of Ζήτω, Ζήτω (Long life!) resounding from all sides, the ladies not being the least demonstrative in their behaviour, and waving their bowed in acknowledgment, and we then introduced to some of the gentlemen present. The King was received by Lord Harris, the deputy chairman of the railway company, and by J. S. Forbes, the general manager. Without any delay his Majesty and the Prince of Wales took their seats in the Royal carriage which had conveyed his Royal Highness to the station, and proceeded to Marlborough House, where he will be a guest during his stay in London.

The young Monarch, who will not attain his eighteenth year till the 24th of next December, looked somewhat pale, and he was not so robust as the Prince of Wales.

Immediately after his Majesty's arrival, M. Alex. Ionides, the Greek Consul-General, telegraphed to Athens, announcing to the Provisionary Government the safe arrival of his Majesty at the English stage of his journey.

His Majesty will visit the Queen at Balmoral, and will leave England next week for Paris. After a short stay in that capital he will proceed to Toulon, where he will embark for Athens on board the Russian frigate Oleg, which has been specially fitted up and decorated for the conveyance of King George to his dominions.

The Royal family and distinguished visitors to this country have lately availed themselves of the London, Chatham, and Dover route to Victoria station, which is in close proximity to Buckingham

Palace and the west end of London, and, moreover, possesses the advantage of direct communication with Windsor by the Great Western Railway from the station without change of carriage.

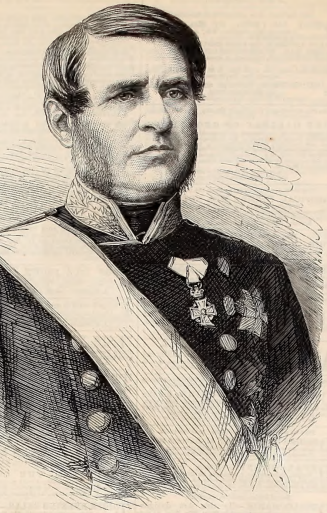
FROM THE COURT NEWSMAN.

His Majesty the King of Greece arrived at Marlborough House at ten minutes past six o'clock on Monday evening on a visit to the Prince and Princess of Wales.

The King was met, upon his arrival at Victoria station, by the Prince of Wales, attended by Captain Grey.

His Royal Highness accompanied his Majesty to Marlborough House, where the King was received by his sister, the Princess of Wales.

The Danish Minister attended at Marlborough House to pay his respects.



His Royal Highness the Duke of Cambridge also visited the King.

The King is attended by Count Sponneck, Baron De Guldencrone, Professor A. L. Kreppen, Captain Leth, Captain Rauck, and Dr. Philemon. These gentlemen proceeded from the railway station to the Palace Hotel at Buckingham-gate.

Mr. Stefanos Xenos writes from the Philhellenic committee-rooms, Charing-cross, as follows:—"I am authorised to state that King George, when he arrives in Athens, will take up his residence in the palace built by the ex-King Otho. His Majesty thinks that, as the elect of the Greek people, he cannot but accede to their wishes as regards his future residence."

COUNT SPONNECK.

THIS gentleman has left the service of Denmark to accompany the young King of Greece to the different Courts which he is now visiting, particularly the three protecting Powers of Greece, and to Athens. He was born, in 1815, at the ancient town of Ringkjobing, in Jutland, where his father held a high civic office. He studied at the Academy of Sora, in Sealand, and afterwards at the University of Copenhagen, where he took the degree of laws in the course of 1836. He took an early interest in financial studies, and published some works on customs and finance. He entered Government service in a financial department, in which he rose quickly. In 1848 he was sent as Royal Commissioner to the last meeting of the Danish States, and became a member of the Constituent Assembly, and, at the fall of the March Ministry, he attained the object of his early ambition, the Ministry of Finance. Denmark was at that time involved in the first war with Germany about the Duchies, and it required a firm hand to direct the finances of the country so as to keep its established good credit unimpaired, in which he perfectly succeeded. At the same time many salutary reforms were introduced in all departments under the ministry of finance, including postal and customs service, for which the laws were prepared and brought before the "Regsdag" or Parliament of Denmark. In the latter part of 1854 questions relating to the never-ceasing difficulties with Frankfort caused the overthrow of the Ministry and the formation of the present Ministry "Hall," and Count Sponneck has never since been offered a seat in the Cabinet. He was, however, in December, 1854, made Director General of Customs, which office he held until he accepted the offer to accompany the young King to Greece. His talents, antecedents, and indefatigable habits fit him eminently for playing a great part at Athens.

COUNT SPONNECK, IN ATTENDANCE ON THE KING OF THE GREEKS.

HARVEST HOME AT SWALLOWFIELD.

ON Wednesday week Swallowfield Park, near Reading, the seat of Sir Charles Russell, Bart., was the scene of one of these festivities.

At eleven in the morning, to the merry ringing of the bells and the joyous strains of a band, the parishioners of Swallowfield assembled and marched in procession to the parish church to return public thanks for the recent abundant harvest. The church was filled to overflowing. Divine service was performed by the Rev. J. Kitcat, Incumbent of the parish. The sermon was preached by the Rev. Charles Kingsley, who took for his text the five last verses of the 145th Psalm. The church was appropriately decorated for the service. In the chancel was a cross of variegated flowers and wheat-ears, surmounted by four sheaves of wheat, and with the motto underneath, "Offer unto God thanksgiving." The altar was most tastefully strewn with flowers and barley, and in front of it was a cross formed of wheat-ears. An arch of evergreens, flowers, and corn was thrown across the middle aisle, and in front of the gallery was the motto, "The earth is the Lord's and the fulness thereof." The font was also adorned in a tasteful manner with flowers and evergreens.

After service the procession was again formed, and was headed by a waggon-load of wheat, drawn by four gaily decorated horses. The waggon had been hung with garlands, and with the devices "God Speed the Plough," "Peace and Plenty," "God giveth all," and "The last load home." In front of the waggon walked a number of hand bellringers and a brass band. Banners with appropriate devices accompanied the procession, and it was joined by nearly the whole of the farmers and labourers of the parish. Lady Russell, Lady Doveton, Sir Charles Russell, Colonel and Mrs. Lloyd-Lindsay, the Revds. Charles Kingsley and G. Holme, Mr. and Mrs. C. Russell, G. L. Russell, Esq., and others walking at the head. In this order they proceeded from the church to the park, where a marquee had been erected. The National Anthem was then sung.

Dinner was served in a spacious marquee, and about 340 of the labourers and their wives and daughters sat down to a substantial repast. The farmers of the neighbourhood acted as carvers, and were interspersed amongst the workmen at the several tables. Many of the ladies of the neighbourhood and the daughters of the principal farmers waited upon their humble guests. Sir C. Russell, Bart., V.C., presided over the gathering; and was supported on the right by Colonel Lloyd-Lindsay, V.C., and on his left by the Rev. C. Kingsley. The tent was prettily decorated with flowers, and at one end was placed a pretty device, representing a crown, made of wheat-ears, and surrounded by flowers tastefully arranged.

Grace before and after meat was sung by the church choir. After dinner the proceedings were graced by the presence of Lady Caroline Russell, Lady Doveton, the Hon. Mrs. Lloyd-Lindsay, Lady and the Misses Russell, and other ladies.

After the usual loyal toasts, the party left the tent, and, joined by numbers who had come to assist in the festivities, indulged in games and rural sports until night brought to a close the day's rejoicings. It is worthy of remark that there was not a single case of drunkenness during the day.

HARVEST HOME AT SWALLOWFIELD, NEAR READING.

**** The charge for the insertion of Births, Marriages, and Deaths is Five Shillings for each announcement.*

BIRTHS.

On Aug. 10, at Uilenhage, Cape Colony, the wife of John E. Dyer, Esq., M.R.C.S. Eng., of a son.

BENSON'S CHURCH, TURRET, and STABLE CLOCKS.—Clergymen, Architects, Committees, &c., can be furnished with Estimates and Specifications for every description of Horological Machine, especially Cathedral and public Clocks, chiming tunes on any number of bells. A short pamphlet on Church and Turret Clocks post-free on receipt of one stamp.—J. W. BENSON, maker of the Great Clock for the Exhibition, 1862, 33 and 34, Ludgate-hill, E.C.

BENSON'S WATCHES, adapted for every class, climate, and country, wholesale and retail. Chronometer, Duplex, Lever, Horizontal, Vertical, Repeating, Centre Seconds, Keyless, Astronomical, Reversible, and Chronograph Watches, from 200 guineas to 3 guineas each. An Illustrated Pamphlet and price-list of every description of Watch post-free for two stamps.—J. W. Benson, Manufactory, 33 and 34, Ludgate-hill; Branch Establishments, 46, 47, and 63, Cornhill.

KEYZOR and BENDON'S TWO-GUINEA BINOCULAR FIELD, RIFLE, or OPERA GLASS.—The extraordinary power of this instrument renders it adapted to define objects distinctly at ten miles' distance. Suitable for the theatre, racecourse, target practice, sportsmen, tourists, and general outdoor observation. Illustrated Price-lists of Optical Instruments for two stamps.—50, High Holborn, London.

UNIVERSAL MICROSCOPE. Price £5 5s.
SMITH, BECK, and BECK,
31, Cornhill, E.C. (late 6, Coleman-street).
Catalogues sent on receipt of six postage-stamps.

STEWARD'S BINOCULAR, FIELD, and LANDSCAPE GLASSES are unequalled for their power and brilliant definition. Price 3½ and 6 guineas; in Aluminium, one third the weight, 10 and 14 guineas. Highly recommended for India or any climate. Address 406, Strand, London. Catalogues post-free.

"RECONNOIT'RER" GLASS, 9s. 6d.! This Tourists' Favourite weighs 8 oz., is achromatic, and so strong that ships, houses, trees, &c., ten miles off; Jupiter's Moons, &c., are distinctly seen by it; and when used as a landscape glass is valuable on a twenty-five mile radius. "I think the Reconnoiterer very good."—The Marquis of Carmarthen. "I never before met an article that so completely answered its maker's recommendation."—F. H. Fawkes, Esq., Farnley, Otley. "Regarding the glasses supplied by Messrs. Salom, I am well pleased with them."—From a report by the Head Gamekeeper of the Marquis of Breadalbane. "The economy of price is not secured at the cost of efficiency. We have carefully tried it at an 800-yard rifle-range against all the glasses possessed by the members of the corps, and found it fully equal to any, although they had cost more than four times its price."—The Field. Post-free, 10s. 10d. The Hythe Glass, showing bullet marks at 1200 yards, 31s. 6d. These Glasses are only to be had direct from SALOM and CO., 98, Princes-street, Edinburgh, who have no agents.

SPECTACLES "PERFECTLY ADAPTED" by the only safe process—that of the VISOMETER, an instrument for exactly determining the strength of each eye, and which has received the encomiums of the leaders in science, including Sir David Brewster, Sir P. Crampton, &c. Correspondence conducted with parties desirous of being properly suited with spectacles or eyeglass free of all charge.—SALOM and CO., Opticians, 98, Princes-street, Edinburgh. No agents nor branches in or out of London.

TEN-GUINEA "DISSOLVING" SET includes a pair very best Compound Achromatic 10-ft. disc Lanterns, large Chromatropes, Panoramas, Paintings, Photographs, Comic and Lever Slips, Moving Waters, &c. Free to any part of London or any station in Great Britain, for £10 10s. An immense bargain. Only from SALOM and CO., 98, Princes-street, Edinburgh. No agents.

FIVE-GUINEA "MAGIC" SET includes 1 very best Compound Achromatic 10 ft. disc Lantern, Paintings, Photographs, Comic and Lever Slips, &c., free to any part of London or any railway station in Great Britain, for £5 5s. Only from SALOM and CO., 98, Princes-street, Edinburgh. No agents.

SALOM'S EDINBURGH "HYTHE" GLASS, although of such power as to show bullet marks at 1200 yards costs only 31s. 6d. It is a magnificent glass.—Salom and Co., 98, Princes-street, Edinburgh. No agents.

THE GLORIES of the HEAVENS seen distinctly by a New Telescope for £5, which will also distinguish the features of a man four miles, and time by a church clock ten miles. This instrument is guaranteed to be equal in the most important respects to telescopes costing £70.—S. and B. SOLOMONS, 39, Albemarle-street, Piccadilly. Persons are invited to apply for a diagram with full particulars, and testimonials sent free.

OPERA, Race, Field, and General Out-door Day and Night GLASSES, with an improvement which renders them much more portable and powerful, they being suited to the waistcoat pocket. It has always been a great drawback to the general use of field-glasses on account of their weight and large size; but as Messrs. S. have overcome this difficulty a more rapid sale is expected, which induces them to reduce the prices, which range from 20s.—S. and B. SOLOMONS, Opticians, 39, Albemarle-st., Piccadilly.

POCKET BAROMETER, COMPASS, and THERMOMETER, all in one, the size of a watch, for telling the weather, the heights of mountains, direction of winds, and temperature of the air. Guaranteed for 12 months. Price £4 15s., sent free. S. and B. SOLOMONS, Opticians, 39, Albemarle-st., Piccadilly.

ACHROMATIC MAGIC and DISSOLVING LANTERNS.—The advantage of achromatic lenses over the common lenses now in use is brilliancy and beautiful definition. No additional charge is made upon this improvement, as a large sale is anticipated. Catalogue sent free.—S. and B. SOLOMONS, Opticians to the Government, 39, Albemarle-street, Piccadilly.

SPECTACLES.—The Patent Newly-invented TINTED SPECTACLES are patronised by the majority of the nobility, including Viscount Palmerston. They give extraordinary relief by day and night to weak, dim, and defective vision.
S. and B. SOLOMONS, 39, Albemarle-street, Piccadilly.

DEAFNESS.—The SOUND MAGNIFIER and INVISIBLE VOICE CONDUCTOR, for Deafness. It fits into the ear not perceptible, removes singing noises in the head, and enables deaf persons to hear distinctly at church and at public assemblies.—S. and B. SOLOMONS 39, Albemarle-street, Piccadilly.

IT is well known that the frightful glass eye, motionless, dirty, and corrosive, is superseded by a little chef-d'œuvre of enamel, solid, light, comfortable, endued with the most expressive power of motion. A person can, without any trouble, place his own ARTIFICIAL EYE upon the organ without its requiring any operation. Its Inventor, M. BOISSONNEAU, Oculist to the Army and Civil Hospitals, will be in London (LILLYMAN'S HOTEL, 7, LOWER BROOK-STREET) on the 25th and 26th OCTOBER, 1863. Persons at a distance can send him the colour of the eye, and a photograph not coloured, to his sole address, 11, Rue de Monceau, Paris.

LE SOMMIER ÉLASTIQUE PORTATIF. The foundation for all mattress bedding should be elastic, and the usual spring mattress is too heavy and cumbersome for general use. HEAL and SON'S new Patent LE SOMMIER ÉLASTIQUE PORTATIF is made in three separate parts, and is therefore light and portable; it is also cheap and durable, and as it has no stuffing on the top it cannot harbour moth.

SECONDHAND FURNITURE.—A very favourable opportunity now occurs to secure TWO SETS of valuable FURNITURE, for drawing-room and dining-room, at a great reduction from its cost. The drawing-room is in handsome walnut, consists of all the necessary articles, including a magnificent walnut cottage piano, of extraordinary richness and brilliancy of tone, almost new; the dining-room set is in mahogany, and covered in morocco. Both in capital order. To effect an immediate sale, the price fixed is only 62 guineas and 33 guineas respectively, or 40 guineas without piano. Either will be separated. For further particulars, and to view, apply to Mr. READ, 12, Sloane-street, Belgravia.

FURNITURE, CARPETS, and BEDDING, Carriage-free, 30 per cent cheaper than any other house. See our Illustrated Catalogue containing 380 Designs, with prices and estimates, forwarded gratis. This book is unique for its practical utility.—LEWIN CRAWCOUR and CO., 73 and 75, Brompton-road, Knightsbridge, London. Established 1810.

THE LORD DUNDREARY EQUILIBRIUM CHAIR. Extremely comfortable, good, and very cheap. "There's the idea!"—A. SEDLEY and CO., 210, Regent-street, London, W., Patentees of Equilibrium Chairs.

SEDLEY'S Patent EQUILIBRIUM CHAIRS are the most comfortable and cheapest yet offered to the public. Capital for India, packing up in less space than any other chair. Also, first-class Furniture, Carpets, &c., at very moderate prices. 210, Regent-street, London, W.

FIRST-CLASS BEDROOM FURNITURE. A. HEDGES and BUTLER, 155, Regent-street, London, W., and 30, King's-road, Brighton, invite attention to their varied stock of choice OLD PORT, consisting of

Port of the celebrated vintage 1820	£6 0 0 per dozen.
Port of the vintage 1834	5 8 0 ,,
Port of the vintage 1840	4 4 0 ,,
Port of the vintage 1847	3 12 0 ,,

Port for ordinary use, 30s., 36s., 42s., 48s., and 60s. per dozen.

"VIN ROUGE," 24s. per dozen.—Natural Wine of France.—Port in character, rich in quality, free from spirit, and highly nutritious. Recommended with confidence. In Cases, inclusive of bottles and railway carriage, 27s. per dozen. To be obtained only of HENRY BRETT and CO., Holborn-bars, and 30, Regent-street.

CHEAP AND GOOD WINES. Offley's and Cockburn's Port, 40s.; Sherries, from 18s.; and Clarets, from 14s. To be obtained pure and cheap of the IMPERIAL WINE COMPANY, which imports the choicest Wines and sells to the public at reasonable prices.
Cellars—Marylebone Court House, W.; Stores and Offices, 314, Oxford-street, W.; Export and Bottling Vaults—15, John-street, Crutchedfriars, E.C., London.

KINAHAN'S LL WHISKY v. COGNAC BRANDY.—This celebrated Old Irish Whisky rivals the finest French Brandy. It is pure, mild, mellow, delicious, and very wholesome. Sold in bottles, 3s. 8d., at the retail houses in London; by the agents in the principal towns in England; or wholesale at 8, Great Windmill-street, Haymarket.—Observe the red seal, pink label, and cork branded "Kinahan's LL Whisky."

EPPS'S COCOA.
DISTINGUISHED AS A
FRAGRANT, GRATEFUL,
AND
INVIGORATING BREAKFAST BEVERAGE.
Originated for the use specially of those under homœopathic treatment, it has, through its agreeableness, become generally accepted.
Agents in Paris, Messrs. Roberts and Co., 23, Place Vendome; Boulogne-sur-Mer, Mr. Abraham, 33, Rue Napoleon; Copenhagen, Mr. H. P. Söyer; Florence, Mr. H. Roberts, 17, Via Fornabuoni; Smyrna, Mr. J. J. A. Werry.

J. S. FRY and SONS, Makers to the Queen and Prince of Wales.

FRY'S CHOCOLATE and COCOA.
The Superior Quality of J. S. Fry and Sons' articles has been attested by uniform public approbation during a century.

FRY'S CHOCOLATE, IN STICKS
and DROPS, for EATING.
Also in Fancy Boxes in great variety.
DELICIOUS, ECONOMICAL, AND NUTRITIOUS.

PRICE'S CHILD'S NIGHT LIGHTS are perfectly safe, and burn their time. The quality of these Night Lights can now be relied on.

SHERWOOD BED LIGHTS, Sixpence and Eighteenpence a Box. These candles are made to supply a want very generally expressed—a cheap, really good chamber candle. They will be found inferior only to "Price's Candles, which will not drop grease when carried," which are sold in Boxes, One Shilling and Three Shillings each.

GLYCERINE, which very simple tests show to be impure, is being sold on the statement that it is "in every respect equal to Price's." Most medical men prescribe PRICE'S GLYCERINE. Where purity is of importance, patients can ensure it by desiring to have their Glycerine in 1lb., 8oz., 4oz., or 2oz. bottles, with capsules over the stopper, marked "Price's Patent."—Belmont, Vauxhall.

CLEANLINESS.—W. G. NIXEY'S BLACK-LEAD is the Cheapest and Best.
Sold everywhere.
CAUTION.—There are several imitations.

used in the Royal Laundry,
and awarded the Prize Medal, 1862.

COALS.—COCKERELL'S COALS, price 26s., cash. Central Office, No. 13, Cornhill, E.C.

DINNEFORD'S FLUID MAGNESIA is an excellent remedy for Acidity of the Stomach, Heartburn, Headache, Gout, and Indigestion, and as a mild aperient for delicate constitutions.—172, New Bond-street, London; and all Chemists.

MORSON'S PEPSINE WINE is a perfectly palatable form for administering this popular remedy for weak digestion. Manufactured by T. Morson and Son, 19 and 46, Southampton-row, Russell-square, W.C., in Bottles at 3s., 5s., and 10s. each.

DR. DE JONGH'S
(Knight of the Order of Leopold of Belgium)
LIGHT-BROWN COD-LIVER OIL,
prescribed by the most eminent Medical Men throughout the world as the safest, speediest, and most effectual remedy for
CONSUMPTION, CHRONIC BRONCHITIS, ASTHMA, COUGHS, RHEUMATISM, GOUT, GENERAL DEBILITY, DISEASES OF THE SKIN, RICKETS, INFANTILE WASTING, AND ALL SCROFULOUS AFFECTIONS,
is incomparably superior to every other variety.

SELECT MEDICAL OPINIONS.
Sir HENRY MARSH, Bart., M.D.,
Physician in Ordinary to the Queen in Ireland.
"I consider Dr. DE JONGH'S Light-brown Cod-liver Oil to be a very pure Oil, not likely to create disgust, and a therapeutic agent of great value."

DR. GRANVILLE, F.R.S.,
Author of the "Spas of Germany."
"Dr. Granville has found that Dr. DE JONGH'S Light-brown Cod-liver Oil produces the desired effect in a shorter time than other kinds, and that it does not cause the nausea and indigestion too often consequent on the administration of the Pale Oil."

EDWIN CANTON, Esq., F.R.C.S.,
President of the Medical Society of London, &c., &c.
"For several years past I have been in the habit of prescribing Dr. DE JONGH'S Light-brown Cod-liver Oil, and find it to be much more efficacious than other varieties of the same medicine which I have also employed with a view to test their relative superiority."

DR. DE JONGH'S LIGHT-BROWN COD-LIVER OIL is sold only in Imperial half-pints, 2s. 6d.; pints, 4s. 9d.; quarts, 9s.; capsuled and labelled with his stamp and signature, WITHOUT WHICH NONE CAN POSSIBLY BE GENUINE, by respectable Chemists and Druggists.
SOLE CONSIGNEES,
ANSAR HARFORD and CO., 77, STRAND, LONDON, W.C.

ALL afflicted with WEAK EYES may obtain instant relief by using Dr. WARNER'S EYE WATER; it removes all inflammation arising from cold, dust, or constitutional causes.—Sold in bottles, 2s. 9d., 4s. 6d., by Sanger, Oxford-st.; Prout, Strand; Barclay, Farringdon-street; Hooper, London-bridge.

ARTIFICIAL TEETH, exquisitely enamelled to nature, detection impossible, purest materials and best work, on Mr. ESKELL'S patented and painless plan of self-adhesion. His Treatise free for seven stamps.—8, Grosvenor-st., Bond-st., W.; and at 39, Bennetts-hill, Birmingham. Consultations free.

TEETH.—Messrs. GABRIEL'S INVENTION, OSTEO-EIDON (by her Majesty's Letters patent). Artificial Teeth, from one tooth to a complete set, without pain or extracting stumps, at half the usual charges, by Messrs. Gabriel, Dentists.
London: 27, Harley-street, W., and 34, Ludgate-hill, City (over Benson's); 134, Duke-street, Liverpool; 65, New-street, Birmingham. References to patients. Gabriel's "Treatise on the Teeth" gratis, or free by post. Diploma 1815. Consultation free.

POLAND and SON,
FUR MANUFACTURERS, 90, OXFORD-STREET, W.
The Oldest Established in London.
Fur Seal Jackets; Velvet and Cloth Cloaks, lined and trimmed with Fur; Carriage Wrappers, and every novelty in Fur, at a moderate price.

ONDINA, or WAVED JUPONS, do away with the unsightly results of the ordinary hoops; and so perfect are the wavelike bands that a lady may ascend a steep stair, lean against a table, throw herself into an armchair, pass to her stall at the Opera, or occupy a fourth seat in a carriage, without inconvenience to herself or others, or provoking rude remarks of the observers, thus modifying in an important degree all those peculiarities tending to destroy the modesty of English women; and, lastly, it allows the dress to fall into graceful folds. Price 21s. Illustrations free. E. PHILPOTT, 37, Piccadilly.

BONNETS.—MARKS and GAVELL returned from Paris with their Elegant Guinea Bonnets in Silk Velvet, French Straws, &c.—Observe, Showrooms only—no Shop. 61, Regent-street, four doors from Swan and Edgar.

SECONDHAND PIANOFORTES. CHAPPELL and CO. have a large choice of SECONDHAND PIANOFORTES for Sale, by BROADWOOD, COLLARD, and ERARD, the best Pianofortes ever manufactured, in Cottage, Semi-Cottage, Cabinet, and Grand Pianofortes, at Moderate Charges.—Chappell and Co., 50, New Bond-street.

PIANOFORTES at CHAPPELL'S.—The largest Stock in London, by Broadwood, Collard, Erard, &c., for Sale or Hire.—50, New Bond-street.

CHAPPELL'S FOREIGN PIANINO (the only Pianino to which the Prize Medal was awarded).—A very compact Cottage Pianoforte, 6 feet high, with the touch, tone, and check action of a Grand, but in small space, requiring no tuning. Surpassed in every way by the Pianinos of Messrs. Chappell, which have received the Prize Medal for seven years in succession.

Price, in mahogany, rosewood, or walnut, 35 and 36 guineas. A great variety on View.

Chappell and Co., 50, New Bond-street.

CHAPPELL and CO.'S ENGLISH MODEL COTTAGE PIANOFORTE.—To enhance preference for the productions of English manufacture, CHAPPELL and CO. have added to their Stock the most perfectly satisfactory instrument of a moderate price. The action is of the same simple description as the above-named Foreign Pianoforte, and possesses all the qualities where the more complicated actions are objectionable to many of the best players and professors. Every Pianoforte is warranted, and kept in order for three years. Price, in rosewood or walnut, 40 guineas.

Chappell and Co., 50, New Bond-street.

CHAPPELL'S FOREIGN MODEL PIANOFORTE, price 50 guineas in rosewood; or in walnut, 52 guineas. The Instrument is from the manufactory of the most eminent maker of Seven Octaves. It is strengthened by every possible means to endure any amount of climate or wear, and to stand perfectly in any situation. The workmanship is of the best description; the tone is remarkably full, rich, and sympathetic, and the touch is of the first quality. The touch is elastic, and the action is the same as in the best Grand Pianofortes, in all respects comparable, has hitherto been made in England at the same price. Every Instrument is warranted, and (if desired) exchanged within six months of the purchase.

Chappell and Co., 50, New Bond-street.

BROADWOOD, COLLARD, and ERARD, The best Pianofortes of every description, including all the recent Improvements, for SALE or HIRE, on the Three-Years System, and hired with option of purchase at the new Showrooms of CHAPPELL and CO., 50, New Bond-street.

ALEXANDRE'S DRAWING-ROOM MODEL HARMONIUM, the best that can be made, price 50 guineas. Also, Two Manuals and 32 pedals, with Percussion Clarionet Stops of Pianoforte and Harmonium upon application to CHAPPELL and CO., 50, New Bond-street.

SIX-GUINEA HARMONIUM by ALEXANDRE, with five octaves, two footboards, and in oak case. Instruments by this maker are pronounced to be of equal charge hereafter to those of Alexandre.

CHAPPELL and CO., 50, New Bond-street.

SECONDHAND HARMONIUMS, by ALEXANDRE, CRAMER, and others, for SALE or HIRE.—CHAPPELL and CO., 50, New Bond-street.

ALEXANDRE'S PRIZE EXHIBITION MODEL HARMONIUM, for the CHURCH, 165 guineas, 4 rows of Vibrators, 32 pedals, and Two Manuals. Also, Two Manuals and 32 pedals. A large selection may be always seen at CHAPPELL and CO.'S, 50, New Bond-street.

BOOSEYS' MINIATURE PIANOFORTE, Seven octaves, 17 guineas, rosewood. Female Model.—We have had occasion to examine a new description of Pianoforte manufactured by Messrs. Boosey, which, for its compactness and portability, is a degree which has not previously been ever attempted. When heard in a room of moderate size, the tone of this little Piano is remarkably sweet and powerful. In the voice of the treble it possesses a rich, brilliant tone, quite strong enough to fill the largest drawing-room; while in the accompaniment it is extremely delicate, yet firm and durable. No piano so small a price has ever before been made with so many of the qualities of a good piano, and it is, as it were, the Model of a well made piano for the million, ready to do an extreme climate.—Boosey and Sons, 24, Holles-street, London.

CRAMER'S NEW 7-OCTAVE SEMI-OBLIQUE PIANOFORTE. Price 45 guineas in Rosewood, and 50 guineas in Walnut.

The peculiarity of this Pianoforte is the position of the strings, which, by the adoption of the semi-oblique principle, admits of a greater length of strings than in the usual upright Pianoforte, thereby securing a more perfect quality of tone. The tone may be formed by the powerful finger of the most accomplished player, or the comparatively light hand of a beginner in the one case there is no harshness, and in the other no clattering or want of sufficient power to produce tone.

The touch is of the very best description, being somewhat similar in its principle of construction to that of the metallic plate Grand, but with the advantage of being lighter to the hand and more elastic, like the full grand.

Cramer and Co. introduce these Instruments for any reasonable length of time, and will exchange them if not approved without charge for purchase and at a very trifling cost.

Pianoforte Depôt, 201, Regent-street (the largest in Europe).

CRAMER'S ENGLISH PIANETTE, 6 feet high, 6 octaves, in rosewood case, with metallic bracket, small instrument. It has all the qualities of the best Pianofortes—check action, repetition, and the full compass of tone. Cramer and Co. have great confidence in recommending this small piano. In practising on this Pianoforte the degree of power produced by the most vigorous touch is under the full command of the player, and the tone is sweet and full in the treble, powerful and rich in the bass, and sufficiently sonorous in the middle. It is, in short, 93 guineas.

Cramer and Co. particularly requested to observe that this instrument has not the common or single string check action of cheap Pianofortes, but that Cramer and Co. are the only manufacturers of it in England.—201, Regent-street.

INDIAN PIANOFORTE.—CRAMER, BEALE, and WOOD manufacture for India a superior COTTAGE PIANOFORTE, with check action, repetition, and all the qualities and other appliances necessary to resist the effect of extreme climates. Strengthened by every possible means, and the whole of the Instrument as well as the Case has been secured throughout by screws and bolts, and the Pianoforte is packed in a manner to ensure safety. Cramer, Beale, and Wood have every confidence in recommending their excellent quality of tone and durability.

Cramer, Beale, and Wood's Indian Harmoniums to 3, packed in cases lined with zinc, as may be seen, for 50 guineas. Size of case, 3 feet 6 inches high, 3 feet 6 inches wide, 2 feet 6 inches deep.

Cramer, Beale, and Wood, 201, Regent-street, London.

CRAMER'S ARTIST'S CONCERTINA, 67 octaves, by Richard Lachenal. In rosewood, 50 guineas; of finest rosewood, with ebony and ivory, 60 guineas. Every Concertina is guaranteed. The whole of the instruments are manufactured by Lachenal, Full Compass, with all the latest improvements, warranted for Ten Climates, and to last for Ten Years. Sent Free to any Country with Case, Book and Key, &c.

Cramer, Beale, and Wood, 201, Regent-street.

MUSICAL BOX DÉPÔT, 48, Cheapside and 56, London.—Messrs. KEITH, PROWSE, and CO., importers, have just received a large assortment of Musical Boxes, from the most renowned makers, some of which are entirely new, and contain many recent novelties, the effects of which upon the ear are exceedingly pleasing. Messrs. K., P., and Co. have also just received a fine gallery of guitars each air. Direct remittances will receive prompt attention.

MAPPIN, WEBB, and COMPANY, 71 and 72, Cornhill.

MAPPIN, WEBB, and COMPANY, 77 and 78, Oxford-street.

MAPPIN, WEBB, and COMPANY, Manufacturers, the Royal Cutlery Works, Sheffield.

MAPPIN, WEBB, and CO.'S Balance Every Table Knives, 10s. 6d. per dozen; Balance Chess Knives, 9s. per dozen; Carver and Fork, 2s. 6d. per pair.

MAPPIN, WEBB, and CO.'S Electro-plated Spoons and Forks, at Manufacturers' prices.

MAPPIN, WEBB, and CO.'S Electro-Silver Vases. The largest in England.

MAPPIN, WEBB, and COMPANY'S Large and Costly Illustrated Catalogues free on application.

THE LATE W. TOOKE, ESQ.

AMONG the deaths of the month just passed we have to record that of Mr. William Tooke, F.R.S., President of the Society of Arts, London. This gentleman, whose name has so long been associated with literature, was the youngest son of the Rev. William Tooke, F.R.S., minister of the English church at St. Petersburg, and author of the "History of Russia" and "Life of Catherine II." His elder brother, Thomas Tooke, Esq., F.R.S., Member of the Institute of France, was the author of "The History of Prices," and well known in the commercial world as the originator of "The Merchant's Petition in favour of Free Trade," a noble document, every principle of which it then set forth having since been made the groundwork of legislation. Mr. Tooke, the subject of this memoir, was born at St. Petersburg in 1777, and was, consequently, in his eighty-sixth year. Law was his profession, and literature and the society of literary men his pleasure and delight. He represented the borough of Truro from 1830 to 1837, during Lord Melbourne's administration.

Mr. Tooke was indefatigable both in and out of Parliament in his endeavours to abolish the cruel and inhuman practice of cleaning chimney-flues by infants of tender years of both sexes, and ultimately succeeded by the passing of an Act (on July 25, 1851) for the better regulation of chimney-sweepers and their apprentices, and for the safer construction of chimneys and flues. Mr. Tooke was also one of the most active promoters and treasurer of the Society for the Diffusion of Useful Knowledge. There is a letter addressed to him by Lord Brougham, when the idea of the society was first broached, commencing thus:—"When anything good and useful is in agitation one naturally turns to you. There is a plan of great importance in contemplation, and which, after much time spent in maturing it, I think may now be propounded, and I should be most happy to discuss the heads of it with you." The establishment of the society did take place, and no doubt gave a great impulse to the literature of the period, and subsequently produced results which it is difficult in these days fully or justly to appreciate. It had, however, a short-lived existence, which virtually terminated in 1848; but it had done its work. In society Mr. Tooke was always a welcome guest. He had an excellent memory, and his recollection of men and things for the last sixty years and more gave a value to his conversation, to which many can testify. Mr. Tooke published an edition of Churchill's "Poetical Works" in 1804, which was reedited by him in 1844, with a life of the poet. More recently he published a work called "The Monarchy of France," and several other miscellaneous publications.

THE LATE WM. TOOKE, ESQ., F.R.S.

ST. AIDAN'S COLLEGE.

THIS theological college, of which we give an Engraving, taken from a photograph, was founded, in the year 1846, by the Rev. Dr. Bayles. For the first nine years the students resided in rented buildings.

In the year 1854 the first stone of the present building was laid by the Marquis of Blandford, now the Duke of Marlborough, and in 1856 the building was sufficiently completed to permit the reception of students.

Great improvements in the grounds around the college and in its internal condition have been just completed. The building is a beautiful Elizabethan structure, designed and erected under the superintendence of Messrs. Wyatt and Cole. It contains seventy-nine rooms for students, each one so arranged as to make a bedroom and sitting-room. There are a good college library, a refectory, class-rooms, and the other useful offices. Immediately over the central entrance is the college chapel. The portion of the building which projects at the east side is the Principal's house. The western façade contains dormitories. In the front of the college there are 20,000 yards of land; about 3000 of which are on the same level as the college; and then a rapid descent of twenty-seven feet, laid out in ornamental terraces, conducts by rustic steps to the lower level, where about 16,000 yards of land are covered with fir-trees.

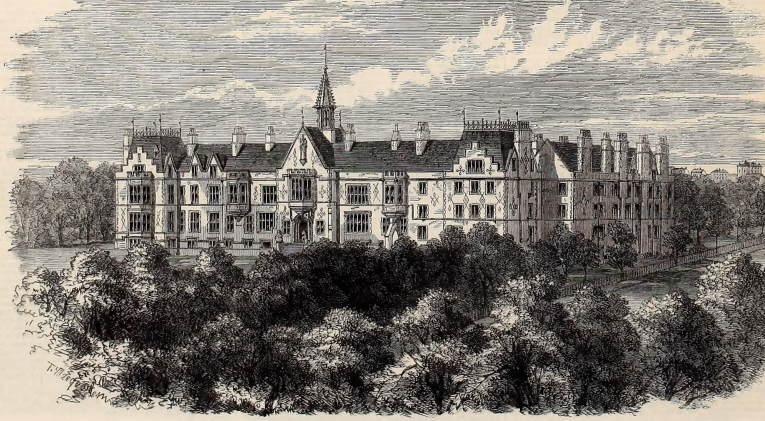
The Archbishop of Canterbury is patron; the Duke of Marlborough and the Earl of Harrowby are trustees; and there is a council, consisting of twenty-five noblemen, clergymen, and gentlemen.

The college has sent out about three hundred clergymen, who have been more than ordinarily successful. According to the report recently presented to the council it appears that every second student has obtained a benefice.

PORT JACKSON.

(From a Correspondent.)

"LAND, HO!" from the mast-head.



"Where away?"

"About a point on the port bow, Sir."

"Australia, my friends!" says our gallant captain; and immediately there is a rush. Eager faces appear, anxious inquiries resound on all sides, and the most infirm clamber to the deck with astonishing agility. Nor is this to be wondered at, for we are passengers from England to Australia, and the long sea voyage of three months has made the most careless amongst us anxious to get even a passing glance at terra firma, but more particularly at that "land of promise" in which our future hopes and golden expectations are centered. Our glasses are pointed in the direction indicated, and in due time we distinguish a long line of coast stretching apparently north and south, and presenting an unbroken appearance.

"Port!" cries our captain.

"Port it is, Sir;" and our good ship, obeying her helm, swings

ST. AIDAN'S THEOLOGICAL COLLEGE, BIRKENHEAD.

round with her head towards the distant land. A nice eight-knot breeze carries us along with bellying canvas; and, as we near the coast, it rises higher and higher until we can clearly discern its prominent features and admire its magnificently wild appearance. Fantastic conical emmences and immense walls of stone rise out of the sea and stand in fine relief against the dense foliage which stretches away on the distant horizon; and curious fortress-like rocks, capped with dwarfish trees, meet the eye at every point. This is New South Wales!

And, as we run along the coast some miles, one mountain, larger than the rest, with an immense lump on its back and perfectly devoid of foliage, attracts our attention—this is the "Dromedary."

Further on the hilly range recedes a few miles, and the landscape is more diversified and extensive; and after passing rocky promontories, which stretch out into the sea, and leaving behind us numerous picturesque headlands, we are delighted with a view of waving fields of corn and rich flowering meadows, the fragrance of which is borne on the breeze to the deck of the vessel. This is the beautiful and warm country, and yonder is the lofty Mount Keera. Lastly, we come to a most romantic wall, rearing above us to the height of a mile, stretching a great distance along, having about halfway in its entire length a perpendicular opening less than a mile wide, and guarded by gigantic headlands of lower but more rugged height, which look like enormous piers to a huge gateway. The wind is blowing strongly from the land, and, as the sea is funnelled against the precipitous, headdense volumes of spray and white vapour ascend to the summit of the highest cliff, almost concealing the lighthouse which stands near the entrance to Port Jackson—the harbour of Sydney, the capital of the colony, and our destination.

Lashed by the waves of the vast Pacific, which fret and foam at their bases and thunder through their hollow caverns, these immense headlands frown over our ship as she enters among the most boisterous-looking rocks as the pilot points out the spot known as "the Gap" on the south head, where the harbour is entered for ships attempting to enter at night, and gave up her living cargo to the yawning waves. Filled with these sombre ideas, and carrying in our minds's eye the vastness of space, and solitude of the coast just passed, we are little prepared for the scene of enchantment that greets us as we enter; nor is the pen capable of doing justice to the beauties which Nature has lavished on this favoured spot. Stretching before us, we cannot at first tell how far, lies an immense lake about three miles wide, smooth as a millpond, and as blue as the azure of heaven's deep vault, here and there its surface dotted with little islands, cushioned in softest green grass and trees, while we are delighted with views of innumerable bays, or inlets, stretching right and left—here presenting wild-white, sandy beaches, and there rocky shores clothed with vine-trellised cottages; and others, girt with water-worn rocks, surmounted by the beautiful and varied foliage of orange-trees, palm-trees, and other graves. Everywhere, in the distance, with handsome villas and smiling gardens' terrace rises above terrace on the surrounding hills; and the pleasure-boats, steamers, passenger-steamers, and ships of the heaviest tonnage and about or lie at anchor in all directions. As we glide up this magnificent lake, we are some miles from "the Heads," and the tall church-spires and handsome buildings of "the city of Sydney" rise before us.

SYDNEY IN 1863.

SUCH miles from the Heads, or entrance to the harbour, built on the hips and flanks of some of the highest hills, stands the city of Sydney, the capital of New South Wales, and the head-quarters of the Governor-in-Chief of the Australian colonies.

As our ship anchors alongside the wharf we get an extensive view of numerous stone warehouses, scarcely a crane being busy, and drays loading and unloading opposite each; four-wheeled cabs and "patent safety" driving about in all directions, together with people dressed as ourselves, and speaking our own language, make us almost fancy we are at home, and not sixteen thousand miles from it. Hotel and boarding-house keepers are quite ready to seize our luggage, but no pushing or driving inquiries torment us as to which we will select; and the "Carry me" system, so annoying at home, is altogether wanting. We jump into a two-horse hackney carriage for the "Royal Hotel;" and as we drive through the streets splendid shops and handsome edifices, built of stone or brick, excite the admiration of anything we have seen in London, next our view; and we cannot help noting that even the public-house is not lacking in dress and manner. Arrived at our hotel, we find it all that can be desired, and but a small part of a number of such large establishments which are daily forthcoming. The city. Pitt-street, King-street, Princes-street, George-street, Hyde Park, and Surrey hills, by their names, weken us as recollections of the mother-country, and we are impatient to see that they do credit to the originals. A noble park, called the Domain, situated at the back of Government House, and about ten minutes' walk from the General Post Office, overlooks the harbour, and attracts "the fashion" of an evening; and the Botanical Gardens, which are just beside it, cannot be surpassed by those of the kind in the world. The military band plays in these gardens every Wednesday evening; and the gay uniforms, which are to be seen about and listening to selections from the operas, enjoy a view of ships going in or out of harbour, and can hear the sailors' cheer as those on board. From almost every point of the city we look down on the bay, and see its still waters, alive with steamers, passing and repassing, Admiralty and other boats, with their flags tastefully displayed, and a whole swarm of smaller craft plying hither and thither. Some of the best of the shops in the streets, we see dashing equipages driven in all fashions. Tandem, unicorn, four-in-hand, outriggers, pair, and single horse conveyances pass one another in rapid succession; while mounted horsemen, horse-vaulters, and drags, loaded and unloaded, at times choke up the thoroughfares. Gentlemen and street boys alike take an attention, and the various "bus conductors crying "Glebe," "Newtown," "Paddington," "Waverley," "Redfern hill," "Botany bay," "Woollahmooloo," "Randwick," and a host of other places proclaim the numerous suburbs of the "suburban" retreats. Commercial speculation, though only in its infancy, is yet making but considerable, but we may glean from the fact that over one thousand full-rigged ships enter and leave the harbour yearly, exclusive of those for consumption into and produce away from the port. Markets—which in point of architectural beauty and convenience, Sydney may justly claim the Government derive a large annual revenue—are held twice which in the city, and almost everything that can be produced is procurable at them. Poultry, eggs, meat, game, fish, and every description; melons, potatoes, pumpkins, peas, apples, peaches, apricots, plums, nectarines, grapes, oranges, figs, pineapples, bananas, gooseberries, strawberries, currants, and every variety of vegetable that can be produced in the "mother country" can be got in the Sydney markets in their respective seasons, of a most superior quality and at reasonable prices. Almost all the mechanical arts are practised, and manufactories, breweries, and distilleries swarm on all sides. Gold is displayed in the jewellers' shops as great profusion as ever Cortez or Pizarro could desire. Wool is brought to town in such quantities that, if not visited the city, one would scarcely be able to find house room. Meat of the best description is sold for 1d. per pound, and the navies of the world can ride their ships alongside the "city wharves," and within a stone's throw of the residence of the Governor.

An eminent Parsee merchant firm in the city of London has presented a cheque for the Royal National Life-boat Institution, to enable it to form a life-boat station on the Malabar coast and to maintain the same for a year. That work is now under dissolution; and, in order to show their gratitude for the many great services rendered to them and their countrymen by the Royal National Life-boat Institution, they have presented the munificent amount to one of England's noblest benevolent institutions.

From a return to an order of the House of Commons on the private business of the last Session, just published, it appears that the eight permanent Chairmen of Committees on "Railway and Canal Bill" are as follows:—Mr. Glassford, fifty-one days; Mr. Adair, forty-one days; Mr. Mills, forty days; Mr. Scholefield, thirty-eight days; Mr. Wood, thirty-four days; Lord Stanley, twenty-one days; Mr. Howes, twenty days; and Mr. Denison, fourteen days. The office of chairman is pretty honorary, though of great labour and responsibility. The Select Committee on "Private Bill Legislation" was re-appointed early in February last, and the Committee published their report on the 24th of July. It is, we believe, considered to be a most valuable document, and more than likely to lead to legislation in the next session of Parliament.

THE MAGAZINES.

THE conductors of the *Cornhill* have this month been less successful than usual in catering for their readers. The gem of the number is decidedly the first chapter of this month's instalment of the "Small House at Allington," where the miseries poor Crosbie's treachery and snobbishness have brought upon him are set forth with a sarcastic verve worthy of Mr. Thackeray himself. The other two articles we have been, we fancy Mr. Trollope will yet prove too good-natured a dcem him to expiate them by marrying with the De Guest family. The next chapter brings us back to that useless and disagreeable excrescence on the story—the Lupex episode; and the third, though it has a title of its own, is a mere bit of "padding," like "Nimrod" in "Out of the World," than Mr. Trollope's. This latter story, embodied in this number, confirms our apprehension that it would prove a tale of domestic woe, but is redeemed by considerable powers of observation and description from the dreariness incidental to this unpleasant class of literature. The "Memoirs of Vidocq" is a most interesting story, affecting in its naturalness and simplicity. We like sculpture in Mr. Lewes's, *Agrippina, a Roman Matron*. Agrippina of the miseries he endured in the days when he sought to command the applause of Imperial Rome. The paper is lively, clever, and a very neat exhibition of the hopeless helplessness of the literary man, not from any absence of histrionic ability, but from the mechanical necessity which actors have to appeal to the least intellectual and most esthetic feeling. At the same time, it supplies plenty of indirect proof that the writer labours more prompted by an inward impulse than the delusion that he was "drawing cheques on the Bank of Fame," finding, we are pleased to see, no favour in his eyes. We are indebted to a lady for a spirited sketch of "Life in the Backwoods," the part of the house appropriated to the fair sex; and to an advertisement for a new kind of manufacture for the idea of "Eisteddfod, and the participating bards "Cleodyfrydh, Mytyr Mon, Tywysginiaeth, Cyndelew, Gwalchmai, Ab Ithel, and Hwfa Mon" going through the writer seems rather sceptical as to the genuineness of the patriotic enthusiasm developed on the occasion.

Fraser is more serious and didactic than usual, and perhaps, on the whole, the most readable of all the magazines. The "Competition Wallah," by Mr. Kingsley, is the best thing we have seen from him reasonably expected considering the writer's youth and inexperience of the country about which he writes with so much confidence. Mr. Froude's "Lectures on Calvinism" are always rich with animal spirits and the faculty of picturesque delineation, and "Sartor Resartus" is not without interest. "Mr. Amos and Mr. Rankin" is another descriptive paper, more ambitious of effect, and very good in its way. "Notes on the Month" (a misnomer, by physics, not political economy) contains some curious information. "Fraser's Last Leaves" is a puff, and Miss Rossetti's poetry for once, exceedingly pretty. Mr. Froude's article on "Spain" is the usual loose, vague sort of thing that of a novel, but of a very accurate exhibition of the influence of Italian politics on those of Spain. We have a strong impression that this fiction will shortly give place to another from the pen of Mr. Henry Kingsley, whose announcement, if Mr. Kingsley will but avoid the mistake of making his story too diffuse, will be hailed decend to bestow greater pains upon its construction than he seems to have bestowed on this one. The "Lay Sermon" (we should like "Dead Men whom I have Known," by Professor Masson, will also form one of the most valuable of the new numbers.

Fraser is also very good this month. Of two political articles on "American and Colonial Questions" the first is distinguished by a much more moderate tone than is usual to prevail on the Federal questions on this subject; the second is really statesman-like. There is a valuable paper on "The Ocean Telegraph," and a "Visit to Iceland" by Mr. Metcalfe, in connection with the Atlantic Cable." The writer recommends that all attempts should be made from Galway. We think the essay on the second part of Goethe's "Faust" is worthy of being the most remarkable contribution to the magazine literature of the month. We cannot, however, agree with the writer. Among the from German sources, in which case considerable judgment must have been exercised by the translator, the translation is alone in literature and, considered as the work of a very aged poet, must be pronounced far more wonderful than the original could possibly have been expected. We cannot, however, agree with this critic's estimate of the second part of the first part, and must always regret that Goethe did not commence to believe his own instinct, and not to attempt the impossible task of reviving archæological and scientific pursuits, and the diminution of original creative power which led him to have recourse to allegory. Certain portions are undoubtedly admirable, and the whole is a curious worthy of study than is usually supposed in England. Two pleasant papers of travel complete the number, one on a visit to the Cistercian Abbey tour in Moselle-land; the other a record of African experience by a gentleman who has been for many years in the Cape. The latter of king of beasts is described as "like poor, stingy, ill-flavoured veal."

The *Train* also has a paper on the Moselle country, as pleasantly, though not quite so brightly, written as that in *Fraser*. The Reviewer Journal is continued. The only other paper of much interest is an account of Bishop Colenso's Critical Works. The latter is somewhat marred by a voluminous work written to prove that the classical mythology is one entirely of Scandinavian origin. Mr. Bowman takes the Scandinavian philosopher too nearly at the valuation of his own merits; nevertheless his name merits to be rescued from oblivion, and here article is very entertaining. The *Train* does not hold with Mr. Disraeli but a Swede ever paid any serious attention to Rudbeck's ethnological theories, or even to those of Mr. Disraeli's, at any time "revolutionised the historic faith of Europe."

Blackwood is a capital number sale—"Tony Foster." The scene is laid in Ireland and the story seems to promise well. "The Adventures of Caliingford" are ably continued, and "Cæxtoniana" are wound up to the best of their usual powers. "Sir Edward Bulwer" (Sir Edward Bulwer suggests, that a kindly feeling for auld lang syne may induce some such change in the Baronetcy) contains valid disquisitions on their shelves; but this will hardly be with a view of taking them down from them. There is a very interesting historical account of Harvey School; a discriminating criticism of Charles Sheridan's character, and a well-mentioned without respect and the pious wish that he had been better spared a memory of his failings; and an article on Irish politics written from the Conservative point of view. The author is fairly moderate, but he is dedicated dynasties in great measure to the imbecility of their Ministers and their want of tact, and does not see that this inability to enlist energy or talent in their support was the surest indication that they were themselves to blame.

The *Dublin University* has two fictions of a description once sufficiently common, but now unfashionable. The first is more peculiar to itself—the ideal story which aims at producing a poetical effect rather than one which can regard to probability—the literary counterpart of the landscapes of Turner or Danby. The second is one of the best illustrations of the unfashionable variety of fiction, and to having found a Master and a Mrs. Lyall very successful in the painful accuracy of the novelist of real life. "The Cross before the Name" continues interesting. Mr. Boyle's "Wylder's Hand" is getting confused, and the reader tires of waiting for a catastrophe which never comes. The rest of the articles are not noticeable.

Any one wishing to make a pleasant German boiled his brother to pulp and ground his bones to powder may derive full satisfaction from a story in *Temple Bar*. The writer is evidently a person who would think, go much further, and, though the magazine is chiefly a repository of the light and the sketchy, it contains nothing else nearly so highly spiced. Mr. Sala's and Mr. Yates's contributions are both excellent in their way, and we should have said the same of "My Two Companions" if it had not been—at least, so far as regards the denouement—an audacious plagiarism from the French. *Chamber's Journal* contains a very pleasant paper on Sir Richard Steele's friend, the late Baron von Stockmar. The *St. James's Magazine* is remarkably good this month, having several excellent stories and papers of a miscellaneous character, and two songs by a new poet, Mr. Newton Nevill, which certainly go far to evince the possession of real lyrical faculty. *London Society*, *The Border Magazine*, and *The Sixpenny Magazine* are all sufficiently pleasant and readable; *The Churchman's Monthly*, on the other hand, excels more in the solid than in the lighter department.

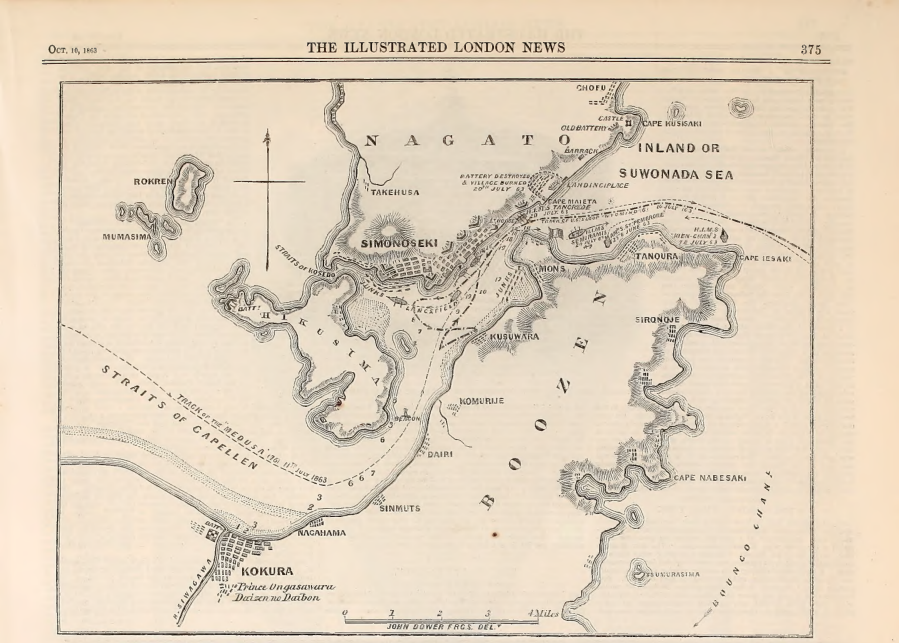
COLUMN FOR THE CURIOUS.

THE Guildhall, or "Townhall," of the city of London, where the principal Corporation business is transacted and its magnificent hospitality exercised, has now stood for upwards of three centuries and a half. Thither the Aldermen removed from their "old little cottage in Aldermanbury-street," the cost of building the "fair and goodly house" being defrayed by benevolences, fines, and sumptuaries; and "divers persons" contributed; and Sir John Shaw, who was Lord Mayor in fourteen Fields, gave in the Great Hall the first Mayor's feast. In the Great Fire of 1666 the hall was burnt to the walls, which are of stone, and the roof and timbers stood in the midst, bright and shining coal, as if it had been a palace of gold or a great building of burnished brass. But the Great Fire the hall was repaired nearly as we now see it. In 1789 the enriched southern front was taken down (except the porch) and the present heterogeneous façade substituted by Dance. In 1822 was removed the statue of Chaplain, on the east, the fine statues from which were given to Banks, the sculptor of Mr. Hope's house, *Infradoes*, in Duchess-street. The Great Hall is internally decorated in coarse imitation of the taste of Winchester College, by Mr. Horace Jones. For the present fast and square panelled ceiling was laid in place of the ancient open roof, by Wyatt's directions. About the hall the offices connected with it have from time to time been constructed or altered. The crypt is the only intact portion of the ancient edifice. In the chambers and offices all sorts of styles and decorations of all periods prevail—some Gothic and painted ceiling; and marble sculpture and mean wall-decoration; the Council Chamber, in which, the law courts, the most recent additions, are so badly constructed as to be overheated and overcrowded by judges and juries. The area of the premises must be very considerably less than Guildhall was originally, and of plan has been disregarded; the whole establishment is costly but inconvenient, and not for the dignity and the name of many striking and picturesque events in our history, Guildhall would be a most unsatisfactory assembling place. However, its improvement, or re-arrangement of the premises, has long been a question in the City; and a plan was modelled several years since. We are glad to see that it has been resolved to abandon the entire scheme. The Guildhall will, it is likely to reconstruct or alter the existing buildings, so as better to adapt them to the business and hospitality of the City, and also obviate the necessity of incurring large expenses for special entertainments. The Lord Mayor's Show to see this measure well carried into effect. At a moment when beacons and buildings are being built for public purposes and used in every large town in the empire it is a scandal to the city of London that its Guildhall should be unsuitable for the purpose. We hear that the same relation to the Townhall of its period that a West-end mansion of the present day bears to that of Westminster Abbey.

It is hoped that advantage will be taken of the removal of Messrs. Roberts, Lubbock, and Co.'s banking-house at the eastern entrance of the Bank of England, in Lothbury, to widen that street, at its junction in the new street from Blackfriars, at a place where no fewer than five great thoroughfares meet. The corner is now a very bad one to turn round. The difficulty is a question of cost between the City Commissioners of Sewers and the Metropolitan Board of Works. The account of this matter states the vocate in the case to be the Board, which is responsible for Messrs. Roberts and Co.; the writer having overlooked the stately edifice already built for the Union Bank, in Lombard-street by Mr. P. C. Hardwick, at the estimated cost of £30,000.

At Pevensey Castle, Sussex, in Worcestershire, in digging round the foundations, have been unearthed the remains of a tesselated pavement, one the floor of the north wing of the church; and in St. Edgar's Church, in the same county, a Guildhall site, which the preservation—men with bows and arrows, lions, deer, &c., being found in the chancel. The whole is to be taken up and replaced in the interior of the church.

Agents of the Royal Archæological Society have been actively engaged of late in opening several mediæval graves at Ash, near Deal, in the Isle of Thanet, near the Isle, a little eastward of the present parochial burying-ground. Many skeletons, with their heads laid from time to time been discovered, and at length a thorough exploration of the site has been undertaken. Upwards of about 4 ft. coins and rings, and other ornaments, have also been discovered. In colon time human bones, and fragments of pottery, &c., as it is not only on the bend of the mainland, midway between Richborough and Reculver. The Romans have been the principal ferry for passengers between Thanet and Canterbury. That able antiquary, Mr. Roach Smith, has illustrated the ancient history of this locality very carefully. He has also been one of the most active of operators at Sarre, so that the subject is in very competent hands.



The historical remains of Bow and Blue Boar, in Holborn, is forthwith to be taken down: here Charles I.'s letter was intercepted by Roundhead and Petition. We see also that the proposition to open a thoroughfare from Holborn to Theobald's-road, through Red Lion Turnstile, has been negatived by the Metropolitan Board of Works on account of the cost of property, and the more pressing urgency of other works; but we agree with Mr. Alderman Lawrence that the Mayor elect should not be content to rest so great as to outweigh the benefits. It is certainly extraordinary that in such a spot as London such roads should have no public thoroughfare for carriages. Yet, here of old lived many eminent persons, and which, some writers assert, Inigo Jones's work. It was also a place of execution: the gallows was set up here as late as 1760, and the building, Great Turnstile, carry us back to "*the fields*," they being placed both for the convenience of the passengers and to prevent the straying of cattle, the fields being at that period used for pasturage. Queen Anne Turnstile is old as the Bill of Rights (1688). The well-planted area or garden has often been threatened to be built on, and we hope that it will not only just escaped such a fate; and, as if to commemorate this incident, we have, at the south end of the fields, one of the most picturesque drinking-fountains in the metropolis.

The Parisians are adding to the number of their "open places." A large space, at the end of the "Boulevard Malesherbe," is about to be taking down several houses in the narrow street called Argenteuil, near the Louvre. In the latter neighbourhood, some years since, there identified the house in which Corneille died, Oct. 1, 1684, when a black marble table, recording the event, was placed in the courtyard, Dangeau, having heard of the death of Corneille, took his notebook from his pocket and wrote the following words:—"The people, and his poetry. He was a good man in writing plays."

Steeple-climbing is entitled to slight record, when its object is not merely an exhibition feat. On Tuesday week James Matthews made the ascent of the beautiful spire of Salisbury cathedral for the purpose of painting the vane and weathercock at the height of 365 feet (double the height of the London Monument) from the ground. He ascended by means of a temporary small iron ladder, fixed only from the spire above the weather-door, which latter is reached by a single ladder, and then only by means of a temporary one above the other. During the painting the courageous fellow sentinel himself on the spire with a leathern belt buckled round his waist.

Croydon Michaelmas fair is one of the old sweets, with its characteristic dainties of roast geese, roast pork, and walnuts. The latter may be the oldest celebrity, and some speculative archæologist may trace this to our Roman colonisation times. Walnut-wood was much valued by the Romans, and the nuts were also eaten. A Roman road has been traced through the neighbourhood, to have been the direction of Novimagus; and in the absence of the history of the introduction of the walnut-tree into England, we may refer it to Roman use. It, moreover, thrives well in the southern counties; but the Highlyer, Devon in Norfolk and Suffolk, is said to yield the best nuts of any of the English varieties. *Sack and sadness* were formerly a sort of state treat. Sheriff Hoare, 1746-1, in his manuscript journal, tells us that on the 28th of September, after he had his brother Sheriff had taken charge of the City goals, they "were invited, according to custom, to an adjoining tavern, and there partook of an entertainment of sack and walnuts, provided by the aforesaid keepers of the prisons." At the end of his year of office he also says:—"After being regaled with *sack and sadness*, I returned to my own house in my private capacity, to my great consolation and comfort." It is stated that until the walnuts were formerly provided wooden hammers to crack them.

The Royal yacht Alberta, which has been built expressly for her Majesty's convenience in the islanding of Cowes, and the private residence at Osborne, Isle of Wight, was launched last Saturday at Pembroke.

SIMONOSEKI BAY, JAPAN.

SIMONOSEKI BAY, JAPAN.

Our Special Artist in Japan has forwarded to us some sketches—two of which are engraved on page 364, accompanied by some descriptive details—relating to the attacks recently made on Dutch, American, and French vessels by the Prince of Nagato at Simonoseki, and the prompt action thereon of the respective naval authorities. Through the courtesy of Frederick Brine, Esq., Captain Royal Engineers, at Yokohama, we are enabled to give the accompanying Map, showing the positions of the American screw-steamer Pembroke (Captain Cooper) and H.I.M. paddle despatch-boat Kien-chan (Lieutenant-Commander Lafon), when fired into on the morning of June 26 and July 8; the tracks of the Dutch corvette Medusa (Commander Caseubroot, A.D.C.) and the United States sloop Wyoming (Captain M'Dougal) on the 11th and 16th of July; and the position of the French frigate Semiramis and sloop Tancrède, under Rear-Admiral Jaurès, on the 20th of July last.

MUSIC.

The Royal English Opera, Covent-garden, will open, on Monday next, with a new opera by Mr. Vincent Wallace, entitled "The Desert Flower." There have been diligent rehearsals daily this week, and there is reason to expect that the performance will be highly effective. The cast includes Miss Louisa Pyne, Miss Susan Pyne, Mr. Harrison, Mr. Weiss, and Mr. Corri. The scene is laid in North America, and the subject is said to be taken from one of Cooper's tales of Indian life.

There is to be a short opera season at Her Majesty's Theatre, to begin towards the end of this month. The stars of Mr. Mapleson's company—Tiberini, Giuglini, Trebelli, &c.—will appear.

It is reported that there will also be English Opera at Her Majesty's Theatre in the course of the approaching season, for which Mr. Sims Reeve is said to be engaged.

"We understand," says *La France Musicale*, "that the director of Covent Garden has, for some time, strongly urged Meyerbeer to produce his new opera in London. We do not know if the clever impresario will triumph over the objections of the illustrious composer, but it is certain that upon no other stage in Europe would the composer of the 'Prophète' find artists so worthy to interpret the impurissus of his genius. Adeline Patti and Lucca, two stars of the first magnitude; Tamberlik and Naudin, two tenors unrivalled; a wonderful chorus, and an orchestra conducted by Costa, in whom Meyerbeer has long and confidence, offer conditions that may well be accepted. Let, then, our grand opera take heed lest this 'Africaine,' after which it has sighed for years, should cross over to London without stopping at Paris." The opera thus alluded to by our Parisian contemporary, "L'Africaine," was completed by the illustrious composer more than fifteen years ago, and has been withheld by him ever since, because, with his characteristic and faithless caution, he has not found a prima donna to whom he could intrust the character of his heroine. When Titiens lately appeared at the Grand Opera in the "Huguenots," Meyerbeer came all the way from Germany expressly to see and hear her, and was so highly delighted with her, that it is considered probable that she will be the person to whom he will, after all, confide this last creation of his genius. At all events, it seems probable that Meyerbeer's long-expected work will be produced, either in Paris or London, in the course of next season.

Mdme. Jenny Lind-Goldschmidt and her husband were present a few days ago at a "harvest-home" festival in the village of Little Houghton, in Northamptonshire. After the sermon, preached by the Rev. Mr. Stopford, in the parish church, Mr. Otto Goldschmidt took his seat at the organ, and his wife, standing by him, sang to his accompaniment a harvest hymn from his lately published book of hymns and chorales, beginning "Come, Christians, praise your Maker's goodness." The rustic congregation were taken by surprise, as it was only when the service was about to begin that she mentioned to the Vicar her wish to sing to them. When she began they all rose from their seats and stood till the close of the hymn, entranced by the melody that filled the church.

THE THEATRES.

New Adelphi.—It will be in the recollection of our readers that, some ten or twelve years ago, "the Bateman Children" were produced on the English stage. The banishment of the precocious, whose admiration was equal to their wonder as the display of such precocious talent. Returning to America, the eldest sister, it seems, has continued to cultivate the art of acting, and to have applied to it the energy of her growing intelligence, with marked success. For the better distinguishing herself as an actress, she has had Mosenthal's drama of "Deborah" translated for her, and considerably modified in its action and plot, under the title of "Leah." The part of the heroine was performed during the last season by Mme. Ristori, who sustained and interpreted the character with all that force and dignity which pertains to the style of the great Italian actress. In attempting such a rôle after such an actress, Miss Bateman shows a laudable ambition, and Mr. Webster considerable enterprise in inaugurating therewith his new season. We have said that the translator has modified the action of the play; but he has not disturbed its exceeding simplicity, or rendered it in the slightest degree more fit for the development required by a five-act drama. The scene is laid in Styria, at a time when the Jews were subject to persecution in the German empire, and Leah is introduced to the audience as a Jewess, nearly hunted to death by the prejudiced villagers. This incident, being well placed on the stage, with various and picturesque groupings, and the statuesque attitude of the heroine, boldly defiant of the threatening and infuriated crowd, brought the first act to a successful termination. Leah, having excited compassion in the pastor and magistrate of the hamlet, Father Hermann and Herr Lorenz (Mr. Phillips and Mr. Stuart), and also in a young maiden, named Madeline (Miss H. Simms), might have prospered well enough in her mission, which was to find food and shelter for a blind old man and a child belonging to the Hebrew troupe, but for the intermeddling of the *Bertolf* (Mr. A. Stirling), who, being an apostate Jew, is afraid that the poor outcasts near the village may recognise him and so ruin the position which he had occupied for so many years. It has also happened that Rudolf, the magistrate's son (Mr. Billington), has met Leah, and fallen in love with her, and thus incurred the censure of his father. Bertolf works on this, and proposes to disenchant the youth by showing the mercenary character of the Jewish race; and accordingly undertakes to induce Leah and her people to depart in consideration of a sum of money. Bertolf proceeds on his nefarious errand, and, meeting with Rudolf's companion, gives her the money and sends word to Rudolf that "the Jewess has accepted the money." Meanwhile, Bertolf's voice has been recognised by the blind man as that of Nathan, the apostate Jew; whereupon Bertolf seizes the old Hebrew, whom he strangles, and, as a handkerchief falls, which is supposed to have killed him. The unconscious victim of this infamous machination, Leah, is repudiated by her lover, whose marriage with Madeline she witnesses, and utters a tremendous curse on the family. Years after she returns, destitute and wayworn; and, overhearing that her enemy is still respected, and that Rudolf has visited the Emperor to get the custom abolished by which her race had been so long sufferers, she blesses their child and dies of exhaustion, having first, however, denounced Bertolf as a Jew and a murderer. The chief drawback to Miss Bateman's acting is the monotony of her voice. Warning in flexibility of tone, the expression of emotion is due rather to the words than to their utterance. But she delivers the text with judgment, and accompanies it with well-studied action. She is already a ripe actress, and manifests an amount of intelligence and feeling which is full of promise. Her merits were warmly recognised by the audience, and the piece throughout was well mounted and shrewdly appointed with scenery and costume, which enabled it to be performed with the fullest effect. If it should not enjoy a long run it will be due to the nature of the subject, and not to its treatment, whether in regard to the drama itself or to the manner in which the drama is acted.

City of London.—This house reopened on Saturday, under the management of Mr. Nelson Lee alone, who intimates that in future an ambitious effort will regulate the conduct of the theatre. As an earnest of such an intention, the house has been re-decorated and the stage provided with new scenery. The season opens with Mr. Falconer's drama of "Peep o' Day," which has been placed on the boards with great care and provided with all the appointments needful to its prolonged success. It was also announced that the diorama of "The Lakes of Killarney" would follow the play; but as this had not arrived by boat at the time expected from Dublin, Mr. Lee apologised for the disappointment. All, however, was taken in good part, and the performances of the evening met with decided approbation.

Standard.—On Saturday Mr. Creswick commenced a starring engagement, and was greeted by a full house. The Surrey drama, entitled "Ambition," is highly popular with the audience; the part of Ethelwold, as sustained by Mr. Creswick, has its striking points, and commands the applause of the pit. The season has begun favourably at the East-end, where the serious drama flourishes, and commends itself to the earnest minds of the working population.

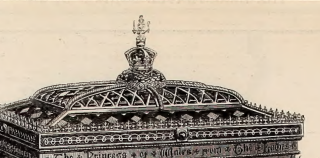
A San Francisco paper states that President Lincoln was once a Roman Catholic. According to this authority, he was received, with his family, into the Catholic Church in the year 1850, at La Salle, Illinois. The Rev. Father Raho, now pastor of a congregation at Los Angeles, California, administered to him the sacrament of baptism.

The Society of Arts have deferred for the present holding an exhibition of the works sent in to compete for the art-workmanship prize offered by the society, as the very extensive repairs now going on in the building have rendered it impossible that the articles could be displayed in a suitable manner.

The Aborigines Protection Society have memorialised Earl Russell in reference to the atrocities committed by Peruvians on the Polynesian Islanders. They ask that her Majesty's Government shall address a remonstrance to the Peruvian Government on the subject. Earl Russell, in reply, says that the Government are doing all they can in the matter.

A Parliamentary return just issued shows that the expense incurred at the central office, by taking the Census for England and Wales in 1861, was £80,720; in 1851 it was £65,112; and in 1841 it was £56,237. Both the cost per 1000 of the population was in 1861, £4 16s. 8d.; in 1851, £3 4s.; and in 1841, £3 2s. The grant made by Parliament for the Census of 1861 was £105,000, of which £8240 remains a balance in hand.

The Government emigrant-ship Ida, 1157 tons, belonging to Mr. William Berry, London, sailed on Sunday from Plymouth for Sydney, New South Wales, with 383 Government emigrants, comprising 43 married people, 145 single men, 122 single women, 36 children between one and twelve years of age, and five infants, under the care of Dr. J. O'Donnell, surgeon superintendent, assisted by Miss H. L. Bragg, matron.



The Committee of Council on Education purposes, with the sanction of the Treasury, establishing ten scholarships, to be held by the two most eminent female students of the schools of art throughout the country. The endowments for the youngest scholarships have been provided for by the fees taken at the exhibition of the wedding presents of the Prince and Princess of Wales at the South Kensington Museum in May last.

The *Gazette* of yesterday week contained the official announcement of the appointment of Serjeant Pigott to the Bench, of Sir Roundell Palmer to be Attorney-General, and of Mr. Collier to be Solicitor-General; and on Saturday they were sworn into their respective offices before the Lord Chancellor at his private house, Hackwood Park, Basingstoke. The new Judge, whose full designation (as he will of course be forthwith knighted) will be Sir Gilbey Pigott, K.L., is Baron of the Court of the Exchequer, in the fourth son of the late Paynton Pigott-Stanhope-Conant, Esq., of Arbret Lodge, Hants, and brother of the late Rev. Francis Pigott, M.A. for Reading, and Lieutenant-Governor of the Isle of Man. He was born in 1810, and was called to the Bar by the Inner Temple in 1836. He became M.P. for Reading, and became a Serjeant-at-Law in 1856, subsequently obtaining a Patent of Precedence. He was elected for Reading, the seat having become vacant by the death of Mr. Pearson, and was warmly leader of that circuit. He succeeded to Serjeant Pigott's representation of Reading in Parliament in 1859. Mr. Baron Pigott is a scion of the old Shropshire family of Pigott. His own seat is Sherifall Hill, Hants.

PRESENTATION BY THE LADIES OF EDINBURGH OF A BRIDAL GIFT TO THE PRINCESS OF WALES.

The casket subscribed for by the ladies of Edinburgh, as a bridal gift to the Princess of Wales, was presented to her Royal Highness yesterday week, in the Throne-room of Holyrood Palace, by Mrs. Graham Lawson, daughter-in-law of the Lord Provost, assisted by the ladies of the subscription committee.

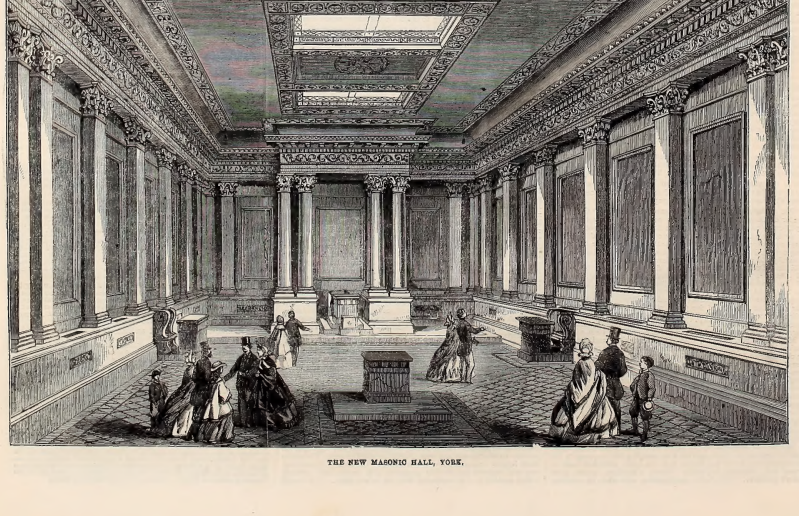
The casket, which has been designed and manufactured by Messrs. Mackay, Cunningham, and Co., of Edinburgh, her Majesty's goldsmiths for Scotland, is essentially national, being an admirably-arranged and well-mounted assortment of the precious stones of Scotland. Speaking more technically, we may describe this handsome gift as a casket in gold richly inlaid with upwards of a thousand Scottish pebbles, representing every variety found in the country. In the front centre the national shield of Scotland is fixed, enamelled in colours heraldically displayed, while within an arch of bloodstones supported by two pillars, is a large panel inlaid with pebbles in relief, and having a Scottish pearl at each corner. In the centre of the arch are the crest and motto of his Royal Highness the Prince of Wales, the legend being in blue enamel on a ribbon, above which and between two rich gold cords runs the following inscription:—"H.R.H. Albert Edward, Prince of Wales, from the Ladies of Edinburgh, 1863.—Charles Lawson, Lord Provost." Above these letters there is a border of bloodstone with a Runic scroll in relief, as also four bosses of Scottish gems—namely, cairngorm amethyst, aquamarine, and garnet, surmounted by a beautifully-pierced rail composed of Scotch thistles. The top consists of four panels of national pebbles in mosaic work, above which, on a richly-cut white cairngorum, surrounded by pebbles in high relief, is a jewelled crown with pearl arches surmounted by the Scottish lion in a characteristic attitude, while on pillared niches at each corner unicorns sejants in dead gold support the shields pertaining to the Scottish titles of his Royal Highness the Prince of Wales. On each end there is placed a fine specimen of cairngorm in a richly-pierced setting, with pebbles in relief, similar to the front, and on the back the Edinburgh arms is placed on the centre of the panel; on the front, back, and sides are small triangular panels of Campsie pebbles, with gold scroll in relief. The casket—which is thoroughly national and not at all gaudy, the different stones being harmoniously grouped, the prevailing tone of colour being a very dark red—is richly ornamented with Runic, Celtic, and Gothic engraving. It is in every respect a credit to the art-workmanship of the Scottish capital.

CASKET PRESENTED TO THE PRINCESS OF WALES BY THE LADIES OF EDINBURGH.

THE MASONIC HALL, YORK.

The old Masonic Hall in York having been removed, in order to effect the Blake-street improvements, the members of the craft determined upon the erection of a new hall, which has just been completed and opened with Masonic ceremonial. "The new Masonic Hall," says the *York Herald*, "though possessing some claim to architectural merit in its exterior, was never intended for mere outside show. A serviceable building, with proper interior accommodation, was the prime consideration, and well has that been obtained. Few persons merely glancing at the building from Blake-street would imagine that it was the cover to a classic hall, 40 ft. long by 30 ft. wide, with walls divided into panelled compartments by lofty pilasters, surmounted by Corinthian capitals, with proper bases and large and fully-ornamented friezes and arched mouldings, from which, on a coved cornice, the horizontal ceiling rests. The ceiling is divided into three compartments, two of which admit light through stained glass, whilst the centre is appropriately filled with stained glass, and the centre with Masonic symbolism. The hall is entered by means of folding-doors, over which is an organ-loft, supported by square columns. One end has two sets of projecting columns slightly raised from the other sides by a platform. A throne stands between these columns. There is a spacious vestibule, on each side of which there is a preparing and a reception room, and on the right a semicircular staircase leading to a room for the assembling of the members. This room is about 30 ft. long, with a fireplace at each end. It also has an entrance to the organ-loft, and looks down into the body of the hall. The doorway is supported by Corinthian pilasters. The front is of stone, and the windows are of plate-glass. The north side is of divisional compartments of brick upon a stoned dado and quoined cornice. The other sides, facing private property, are plain. The architect was Mr. J. E. Oates, a brother of the order."

THE "GIANT" BALLOON.



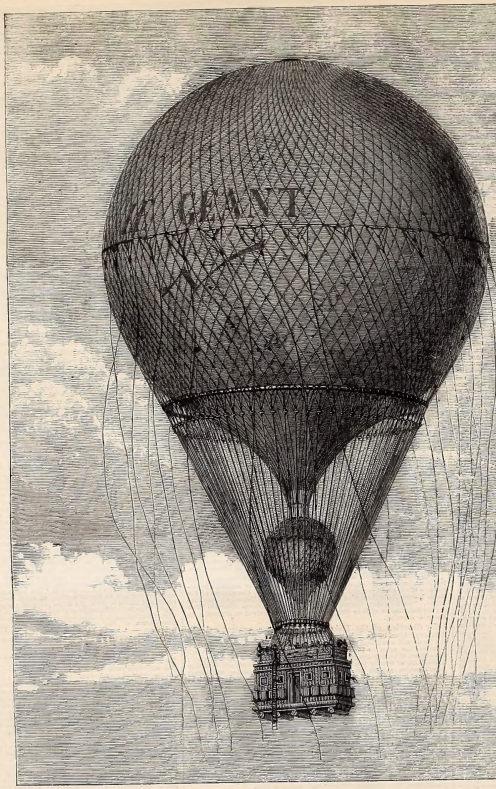
(From our Paris Correspondent.)

The long-talked-of balloon of the "Société Générale d'Aérostation et d'Autolocomotion Aérienne" made its début on Sunday last, at Paris, in the plain of the Champ de Mars, the immense space of which was guarded by dragoons at the street openings, and by infantry at the other portions, slightly protected by a thin wooden paling. The startling announcements which had been made respecting the immense size of this balloon, and the accommodation to be found in the small house destined to replace the ordinary car, succeeded in attracting such a multitude of persons to the Champ de Mars as had been rarely seen assembled there. A visit to the workshops in which the balloon was constructed enabled us to verify the exactitude of the assertions in the broadsides, which informed the public that "Le Géant" was 90 metres (nearly 100 yards) in circumference, and 190 feet in height. A notion of its size relatively to other balloons may be formed from the fact that the "Giant" required 6098 cubic metres of gas to inflate it, or 3308 metres more than that employed in 1837 for the inflation of Dekourt's monster balloon, the largest on record up to that time.

The "Giant," as projected, and as represented in our Engraving, is composed of three parts:—Firstly, of a balloon consisting of two thicknesses of white silk of identical quality, sewn entirely by hand and double-stitched (the labour required for the fabrication of this immense varnished silk bag employed upwards of 200 women during a month); secondly, of a small receiving-balloon, called the "compensator," placed beneath and connected with the larger one, to receive the excess of gas caused by the dilatation of the "Giant" in the higher atmospheres, and thus prevent its waste, and enable the aeronauts to preserve the means of prolonging their voyage; and, thirdly, of the car, or what replaces the car of former balloons, but is, in reality, a small oblong house, consisting of a ground floor and a gallery, the entire dimensions being about 8 ft. in height by 13 ft. in length. The rumour that had circulated respecting the billiard-room to be found in the *nacelle* was merely an amusing invention of the comic Parisian press. The only wonder is how so much accommodation has been provided in this slight basket-work construction, which is cleverly disposed in such a manner as to comprise a small printing-office, a photographic department, a refreshment room, a lavatory, a compartment for the captain's bed and the "luggage" of the travellers, and another compartment at the opposite extremity with three beds. The entire car is provided with an inflated indiarubber lining, so as to render submersion impossible.

The "Giant," for the construction of which 20,000 yards of white silk, at six shillings a yard, was required, has been produced under the active superintendence of M. Nadar, of the Boulevard des Capucines, who asserts that he has discovered, or will discover, the means of travelling in the air by the employment of the screw-propeller. The "Giant" has only been created as a means for gaining sufficient money by its exhibition and voyages to enable him to carry out his confidently-expressed ideas with respect to his new system of Aerostation; and, in order to keep public attention fixed on this important subject, the energetic Nadar has also founded a new monthly journal, entitled *L'Aéronaute*, the first number of which was published on the appearance of "Le Géant" in the Champ de Mars on Sunday last.

On the occasion of the first ascent of this giant balloon the Captain N. [sdar] was assisted by two celebrated French aeronauts, the brothers Godard, at whose suggestion the second portion of the balloon (the compensator) was prepared; but for want of the necessary time, as night was approaching, not employed for the first ascent. For this reason some disappointment was expressed, as it was evident that without the compensator the duration of the voyage would

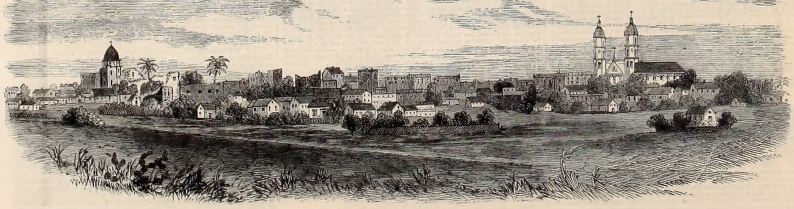


THE NEW MASONIC HALL, YORK.

not be prolonged beyond the ordinary limits; and the voyageurs, who had paid a thousand francs on the anticipation of a trip either to China or to St. Petersburg, as M. Nadar had insinuated, would have to console themselves by a reperusal of the announcement that "la durée du voyage n'est pas limitée."

Peculiarly, the first appearance of the giant balloon was a decided success. Thirteen persons made the ascent; amongst them were a lady (the Princesse de la Tour d'Auvergne) and a negro. But the great source of profit arose from the prices paid for admission to the Champ de Mars, for which the enormous amount of 650,000 francs worth of tickets were printed, and to be had beforehand at the Bureau de Tabac. If only one fourth of these tickets, at one and two francs each, were sold—and that is a very modest estimate, judging from the immense concourse of people within the inclosure—the administration of the Société d'Autolocomotion-aérostation must have cleared six thousand pounds towards their expenses.

During the three hours occupied by the inflation, two military bands entertained the spectators by performing selections from the most popular operatic music. At three o'clock the Giant looked like an immense unripe orange in the midst of the vast sandy plains of the Champ de Mars, and about this time the car, or *nacelle*, was brought on to the ground on a van drawn by four white horses, conducted by postilions, and paraded to satisfy the curiosity of the visitors, amongst whom might be seen the Annamite Ambassadors and their suite, and a squadron of gay Spahis on their spirited horses. The outside of the construction presented a droll appearance, with its exposition of fowling-pieces, speaking-trumpet, grappling-irons, hatchets, hares, geese, pheasants, vegetables, &c., the condiments being gaily ornamented with ribbons. At length the car was brought alongside the great inflation, the ballast and provisions were put on board, the travellers took up their positions on the platform of the gallery, and, after some preliminary manœuvres, the gallant Captain Nadar gave the word, "Lâcher tout!" in stentorian tone, and "Le Géant," taking a north-easterly direction, ascended majestically amidst the acclamations of at least half a million of people.



The "Géant" descended in the marshes of Barcy, at two leagues from Meaux. The shock on touching the ground was somewhat violent, and damaged the *nacelle*. A few of the passengers were slightly bruised, otherwise there is no accident to deplore. A second ascent, with the compensator, is announced to take place on the 18th of October.

NADAR'S GIANT BALLOON AT PARIS.

MATAMORAS.

We give an Engraving (from a sketch by Mr. Hermann Hildebrandt) of Matamoras, to which considerable interest attaches in relation to the war in America. Matamoros, or Matamoras, is a river-port town in Mexico, on the south bank of the Rio Bravo del Norte, about forty miles from the Gulf of Mexico. Its port on the Gulf consists of two harbours—the Brazo de Santiago and the Boca del Rio, about nine miles apart, and both obstructed by bars impassable during strong winds. It exports specie, hides, wool, and horses; and its ordinary imports are manufactured goods, chiefly from Great Britain and the United States. Matamoras contains about 10,000 inhabitants. It lies at a little distance from the river, on rather a sandy soil, and is built with regularity. The houses are highly coloured, but, with the exception of a few stores, have generally a poor appearance. The climate is good, and there is little or no fever in the place. On the Texas side of the river, about two miles from Matamoras, lies Brownsville, which is built entirely of wood. It has, however, a neat and bright appearance. There is a large garrison of Confederate soldiers at Brownsville. Owing to the warlike times, passports are asked for on each side of the river.

VIEW OF MATAMORAS, MEXICO, FROM THE SOUTH.

An officer in the Italian army writes to the *Gazzetta del Popolo* that the 306 pieces of cannon which figured in the manœuvres at Somma and at the review at Milan do not comprise the whole of the field of the Italian kingdom, but that there is also the 8th Regiment, which is in the southern provinces, and half of the 17th, which remains in Tuscany; that is to say, 21 batteries, or 126 guns, which have to be added to the 306 assembled for the manœuvres.

OBITUARY OF EMINENT PERSONS.

SIR ARTHUR NICOLSON.

Sir Arthur Nicolson, Bart., of Nicolson and Leswade, was served heir male to that baronetcy in 1826, on the death, without issue, of Sir James Nicolson, the sixth Baronet. He married Miss Jack, daughter of the Rev. William Jack, D.D., Principal of King's College, Aberdeen, and died at Norwood on the 16th ult. Much obscurity seems to hang over this Nova Scotia baronetcy of Nicolson, of Nicolson and Leswade, which was created in favour of John Nicolson and his heirs male generally, the 2nd of July, 1629. The descent from him, with the marriages and issue, is nowhere clearly given, and little was publicly known of the Baronet just deceased; nor does it appear if there be any one now to inherit the title. This baronetcy must be distinguished from another, almost of equal antiquity, possessed by the present distinguished naval officer, Captain Sir Frederick William Erskine Nicolson, Bart., C.B., senior officer at Woolwich and Superintendent of her Majesty's dockyard there.

LORD SINCLAIR.

The Right Hon. Charles St. Clair, twelfth Baron Sinclair, in the Peerage of Scotland, was the elder son of Andrew St. Clair, of Hermandston *de jure*, eleventh Baron Sinclair, by his wife, Elizabeth, daughter of John Rutherford, Esq., of Edzarstoun, Roxburghshire, and granddaughter of Sir John Rutherford. He was born in Edinburgh on the 20th of July, 1768, and succeeded his father when eight years of age. He was educated at Harrow, and entered the British Army as an Ensign in the 1st, or Royal Scots, in 1784, just at the commencement of the five years of peace which preceded our great contest with revolutionary France. He retired from the service in 1802, being then Lieutenant-Colonel of the 15th Regiment. He was subsequently appointed to the lieutenant-colonelcy of the Berwickshire Militia. His Lordship brought before the House of Lords the long-standing claim of his family to the dormant barony of Sinclair, and had that claim established by the House in his favour on the 25th of April, 1782. He has since been a member of the House of Lords for nearly sixty years as one of the Representative Peers for Scotland. Though not taking a prominent part in politics, he has always shown himself to be a firm Conservative. His Lordship married, first, on the 13th of February, 1802, Mary Agnes, only daughter of James Chisholme, Esq., of Chisholme, by whom (who died on the 16th of July, 1814) he had, to survive infancy, three sons—James, his successor; Matthew, who died young; and the Hon. Charles St. Clair, Commander R.N., of St. Ella's Lodge, Eyemouth; and a daughter Susan, who was married to F. D. Massy-Dawson, Esq., cousin of Lord Massy, and died Sept. 17, 1856. Lord Sinclair married, secondly, Sept. 18, 1816, Isabella Mary, youngest daughter of Alexander Chatto, Esq., of Main-House, in the county of Roxburgh, by whom (who survives him) he leaves two daughters—Eleanor; and Jane Elizabeth, married, Sept. 6, 1853, to the Rev. William Leyland Feilden, third son of Joseph Feilden, Esq., of Witton Park, in the county of Lancaster. Lord Sinclair, who had attained the patriarchal age of ninety-five years, and was the eldest Peer in the House of Lords, died at Pilmuir, Torquay, on the 30th ult. He is succeeded by his eldest son, James, Master of Sinclair, now thirteenth Baron Sinclair, late a Captain in the Grenadier Guards, who was born July 3, 1803, and married, Sept. 14, 1830, Jane, eldest daughter of Archibald Little, Esq., of Shabden Park, Surrey, and has a family of four sons and one daughter, of whom the eldest son, Charles William, now Master of Sinclair, is a Major in the Army. The illustrious family of St. Clair, or Sinclair, of Roslyn, derives in the female line from those ancient Earls who were Sovereigns of the Orkney and Shetland Isles, and were twice allied to the Kings of Norway and twice to the Kings of Scotland; and through those Earls the representatives of the St. Clairs of Roslyn share, with the Royal family of England, the coheirship of the ancient line of Scottish Kings. The barony of Sinclair (created 1449, renewed 1677) was first held by these St. Clairs of Roslyn, and from them, pursuant to the remainder in the second patent granted by Charles II., it passed to the no less ancient house of St. Clair of Hermandston, it being inherited *de jure*, in 1762, by Charles St. Clair, of Hermandston, whose grandson, the Peer just deceased, had, as above stated, his right to the historic and time-honoured barony of Sinclair confirmed by the House of Lords eighty-one years ago, and his own possession of the barony, whether *de jure* or *de facto*, has been only thirteen years short of a century.

SIR WILLIAM BELLAIRS.

Sir William Bellairs, of Mulbarton Lodge, Norfolk, who died on the 2nd inst., was a scion of the very old family of De Beler, or Bellairs, of Kirkby Bellairs. He was the fourth son of Abel Walford Bellairs, Esq., of Uffington, in the county of Lincoln, and Billesdon, in the county of Leicester, by his wife, Susanna, daughter of Miles Lowley, Esq., of Oakham. He was born in 1793, and was formerly an officer in the 15th Hussars, and a contemporary of Sir Robert Wilson, Sir Josias Cloëté, Sir Colquhoun Grant, Sir William Byam, Sir Joseph Thackwell, and Sir Lovell Lovell, all of whom served side by side in the days when the regiment won for itself the title of "The Fighting Fifteenth." Bellairs shared in the glories of Vittoria, the Pyrenees, Pampeluna, Orthes, Tarbes, Toulouse, and many other actions of minor importance. He was also in the campaign of 1815, and had a horse killed under him at Quatre Bras, and two severely wounded at Waterloo. He received two medals, one for the Peninsula, and one for Waterloo. He was knighted in 1848. He was Exon of the Yeomen of the Queen's Guard from 1837 to 1849. Sir William married, in 1822, Cassandra, daughter and heiress of Edmund Hooke, Esq., of Mulbarton Lodge, and had issue three sons, all officers of rank in the British Army.

ALDERMAN HUMPHERY.

The Right Worshipful John Humphery, Alderman of the city of London and Governor of the Irish Society, who died on the 28th ult., at his suburban house, North Side, Clapham-common, was the son of John Humphery, Esq., and the nephew of David Humphery, Esq., which latter he succeeded in his extensive business as a wharfinger, and was the owner of the large property known as Hibernia Wharf, at London-bridge. The uncle, Mr. David Humphery, was formerly occupier of Hay's Wharf, in Tooley-street, which was destroyed by the great fire at London-bridge, which occurred about two years ago. John Humphery, the subject of this notice, was, in 1832, chosen a Sheriff of London and Middlesex; and he was the same year elected, on Liberal principles, M.P. for Southwark, and continued until his retirement from Parliament, in 1852, to represent that borough as a stanch and consistent Reformer. He became Alderman of Aldgate ward in 1835, and Lord Mayor of London in 1842-3, when he filled the office so as to give very general satisfaction. Mr. Alderman Humphery married, in 1836, Mary, second daughter of James Dyson, Esq., of Bedford. The Alderman, who had been Master of the Tallow-chandlers' and Clothworkers' Companies, was, at the time of his decease, Governor of the Irish Society, director and treasurer of the Argus Life Office, and director of the Paris and Strasbourg Railway, and was a Commissioner of Lieutenancy. Alderman Humphery was, both in public and private life, very much and deservedly esteemed and regarded.

THE ABBE CARTON.

The Rev. Abbé Carton, Canon of Bruges and Knight of the Order of Leopold, has just died at Bruges, after a short illness, in the famous asylum there for the deaf, dumb, and blind, of which he was the founder and director. He was born, in 1802, at Pitthern, in West Flanders; and, after taking Priest's orders, concentrated all his energies on providing for the deaf, dumb, and blind children, whose pitiable state attracted, from his early years, his warmest sympathies. Encouraged by the support of the late Monseigneur Bousseu, Bishop of Bruges, the Abbé Carton instituted the Sisterhood of the "Enfans de Marie," which community has been wonderfully successful in educating children labouring under the above afflictions. Visitors to that very picturesque, historic, and interesting city of Bruges were not a little struck, among its many curiosities, with the marvellous pantomimic performances of the deaf and dumb children, while the blind boys accompanied the acting with their singing. For the last twenty years the Abbé Carton has been the beloved and venerated director of this admirable institution. He was a man of great ability, and, in spite of his arduous duties, found time to write several works of scientific and literary merit. He was a member of the Royal Academy of Brussels and of many other learned societies.

NAVAL AND MILITARY INTELLIGENCE.

WAR OFFICE.

2nd Life Guards: General the Marquis of Tweeddale to be Colonel.

18th Hussars: Cornet J. Watkins to be Cornet.

Grenadier Guards: Ensign and Lieut. W. Duberly to be Lieutenant and Captain; Ensign J. H. F. H. Hudson to be Ensign and Lieutenant.

10th Foot: Lieut. W. Malcolm to be Instructor of Musketry. 12th: Ensign H. T. Cooper to be Lieutenant; H. P. Hobson to be Ensign. 15th: J. G. D. Moore to be Ensign. 18th: Capt. J. Purcell and Lieut. E. Hall to be Captains; Ensign C. Dawson to be Lieutenant; Ensign D. R. Macqueen to be Ensign. 21st: Ensign G. H. Burrows to be Lieutenant; Ensign J. Croker to be Ensign. 27th: Cadet D. M. Taylor to be Ensign. 30th: Lieut. E. St. G. Smyth to be Adjutant. 37th: Ensign T. N. Holton to be Lieutenant; Cadet J. B. Watts and F. Flowers to be Ensigns. 42nd: Major-Gen. D. A. Cameron to be Colonel. 51st: Cadet H. Talbot to be Ensign. 60th: W. Tilden and R. Willis to be Ensigns. 71st: Ensign C. W. B. M'Kenzie to be Ensign. 73rd: Lieut. T. M. Warren to be Captain; Ensign W. Gordon to be Lieutenant; Ensign R. J. F. Edgcumbe to be Ensign. 77th; Lieut. M. A. Waters to be Captain; Ensign E. N. Mosley to be Lieutenant; Cadet W. A. Spence to be Ensign. 87th: Paymaster R. Scott to be Paymaster. 89th: Paymaster A. Anderson to be Paymaster.

Rifle Brigade: The Hon. H. Marsham to be Ensign.

BREVET.—Major-Gen. Sir R. P. Douglas, Bart., to have the local rank of Lieutenant-General while serving in the command of the troops at the Cape of Good Hope; Capt. and Lieut.-Col. G. W. A. Higginson to be Colonel; Paymasters G. N. Loet and E. Gibbs to have the honorary rank of Captains. The following promotions to take place consequent on the death of General H. Beauchamp, Earl Beauchamp, Colonel of the 2nd Life Guards, on the 8th of September:—Lieut.-Gen. Sir G. P. Wymer to be General; Brevet Col. M. Smith to be Major-General; Brevet Lieut.-Col. J. Miller to be Colonel; Major P. Robertson to be Lieutenant-Colonel; Capt. J. R. Mann to be Major. The undermentioned promotions to take place in her Majesty's Indian Military Forces consequent on the death of General Sir J. L. Caldwell, G.C.B., Royal (Madras) Engineers, on the 28th of Jun , and Major-General J. A. Barstow, Bengal Infantry, on the 9th of June:—Lieut.-Gen. S. Swinhoe to be General; Major-Gen. H. Sargent to be Lieutenant-General; Cols. H. James and W. Lang to be Major-Generals. The undermentioned officers, who have retired upon full pay, to have a step of honorary rank, as follows:—Major A. H. M. Chesney, to be Lieutenant-Colonel; Major B. Revell, to be Lieutenant-Colonel; Deputy Inspector-General of Hospitals A. Wilson, to be Inspector-General of Hospitals; Surgeon-Major R. C. Guise, to be Deputy Inspector-General of Hospitals.

ADMIRALTY.

The following promotions, dated the 24th ult., have this day taken place consequent on the death, on the 23rd ult., of Admiral of the Red Sir Henry Hope, K.C.B.:—

Admiral of the White Sir P. Hornby, G.C.B., to be Admiral of the Red.

Admiral of the Blue Sir A. Fanshawe, K.C.B., to be Admiral of the White.

Vice-Admiral G. F. Rich, on the Reserved List, to be Admiral on the same list.

Vice-Admiral of the Red Sir W. J. H. Johnstone, K.C.B., to be Admiral of the Blue.

Vice-Admiral of the White H. Eden to be Vice-Admiral of the Red.

Vice-Admiral of the Blue C. R. D. Bethune, C.B., to be Vice-Admiral of the White.

Rear-Admirals Sir G. Back and W. Hillyar, on the Reserved List, to be Vice-Admirals on the same list.

Rear-Admiral of the Red H. J. Codrington, C.B., to be Vice-Admiral of the Blue.

Rear-Admiral of the White R. L. Warren to be Rear-Admiral of the Red.

Rear-Admiral of the Blue E. P. Halstead to be Rear-Admiral of the White.

Captain A. Lowe to be Rear-Admiral of the Blue.

Retired Vice-Admiral T. B. Clowes to have the rank and title of Retired Admiral; and Retired Rear-Admiral J. Burney to have the rank and title of Retired Vice-Admiral, under the Order in Council of the 7th of May, 1858.

By direction of Field Marshal the Duke of Cambridge a battery of Royal Artillery, with its guns, is to be considered equivalent to a regiment with its colours, and is in all cases to be saluted accordingly.

The new Act to appoint navy prize agents to all her Majesty's ships has come into force. The captains are to nominate the agents, and every vessel of war is to be represented.

The Duke of Somerset has conferred the good-service pension, rendered vacant by Rear-Admiral Warden's promotion, upon Captain Sir Robert John Le Mesurier, C.B., of Arctic fame.

Mr. Neilson Hancock, LL.D., of the Irish Bar, and Mr. H. R. Vaughan Johnson, of the English Bar, are secretaries of the commission to inquire into the constitution, &c., of the Court of Admiralty in Ireland.

Colonel Hawkins has taken the command of the Royal Engineer Department at Woolwich, in succession to Colonel Ford, appointed to the command of the corps in Canada.

An amended scale of rates and allowances to be paid to civil surgeons placed in charge of troops at foreign stations, or who may have embarked in charge of troops, has been issued by the Secretary of State for War, and all previous orders on the subject are cancelled.

On Saturday his Royal Highness the Duke of Cambridge inspected the troops stationed in Portsmouth garrison on Southsea-common. Owing to the inclemency of the weather, the troops stationed in Gosport and the neighbouring forts were relieved from attending.

The whole of the Woolwich division of Marine Light Infantry, with the exception of Captain Fraser's company, which was in the marshes for target-practice, assembled on the common in heavy marching order at nine o'clock yesterday week, under the command of Colonel Mitchell, for the half-yearly inspection of the corps by Major-General Sir R. J. Dacres, K.C.B., commandant. At the termination of the proceedings General Dacres stated that he was much gratified to find that the entire division was in an efficient state.

The Channel Fleet left Dublin Bay on Thursday week. Just before anchor was weighed, the petty officers and seamen of the Defence presented a silver claret jug and an address to Mr. Graves, Commodore of the Royal Mersey Yacht Club, who was the guest of Admiral Dacres, on board the Edgar. The men thus marked their sense of the kindness shown to them during their recent visit to the Mersey. The fleet arrived at Plymouth on Saturday morning.

By direction of the Duke of Cambridge a general order to the Army, signed by the Adjutant-General, has been promulgated, specifying the terms and conditions under which grants of land may be obtained by officers of the Army in the settlement of British Columbia. In future, all field-officers of twenty-five years' service will be granted 600 acres of land; field-officers of twenty years' service, 500 acres; and field-officers of fifteen years' service, as well as captains of twenty years' service, 400 acres; captains of fifteen years' service and subalterns of twenty years' service will be granted 300 acres; and subalterns of seven years' service 200 acres.

THE VOLUNTEER MOVEMENT.

The fourth annual prize meeting of the 9th (West) Middlesex commenced on Thursday, the 1st inst., and was continued on Friday and Saturday. The West Middlesex challenge cup, value £50, was won by Sergeant Every. There were several other prizes competed for.——Last Saturday the third annual prize meeting of the 33rd Middlesex, at the Tottenham range, was brought to a conclusion. The battalion and range prizes were shot for. For the first prize Sergeant G. Brookes, of the 12th Middlesex (Barnet) Rifles, and Lieutenant Dennison, of the 40th Middlesex Rifles, each made 29 marks. Upon shooting off the tie they both made bull's-eyes. The tie was again shot off, resulting in Sergeant Brookes winning the first prize and Lieutenant Dennison taking the second prize. Private Hammerton, 12th Middlesex (Barnet), took the third prize.

In Essex a match took place on Thursday week at the Colchester butts between sides of ten each selected from the Colchester and Tendring Hundred Companies. The scores made were as follows:—Colchester, 282; Tendring Hundred, 269.——The 1st Essex Engineer Corps has had a competion for a number of prizes given by Mr. G. M. W. Peacocke, M.P. The successful competitors were, in the first-class sappers—H. Jenkins, Colour-Sergeant Beale, and Sergeant Pollard; in the second-class sappers, J. Nunn, Ludgater, Mott, and Patten, Corporal Juniper, and Sappers Whittaker and Marsh; and in the third class, Corporal Huxter and Sappers S. Staines and Martin.——The 1st Essex Battery of Artillery (Harwich) was inspected on Wednesday week by Colonel Knox, R.A., commanding the Royal Artillery in the eastern district. The members of the battery marched to the circular redoubt and practised with 68-lb. shot and 8-inch shell at a target moored 2200 yards out to sea. At the conclusion of the practice Colonel Knox congratulated Captain Daniels upon commanding so smart a body of men.

On Saturday the members of the 1st Kent Battalion of Rifle Volunteers assembled at the drill-shed, Blackheath, for the purpose of witnessing the distribution of prizes to the successful competitors during the past season. There was a very large attendance of the residents of the neighbourhood, and the prizes were presented by Mrs. Angerstein, the wife of Mr. W. Angerstein, M.P. for Greenwich.——The annual inspection of the four corps of Kent volunteer artillery belonging to the 10th Administrative Brigade, stationed in the Chatham district, under the command of Lieutenant-Colonel Gladdish, has been brought to a most satisfactory conclusion. By the direction of the Field Marshal Commanding-in-Chief, Lieutenant Colonel Talbot, commanding the first division of the Dépôt Brigade, Royal Artillery, was selected to report to his Royal Highness on the state and efficiency of each corps, which the inspecting officer found to be in a most satisfactory condition.——On Saturday a return match took place, at the range of the 32nd Kent (Eltham), between eight members of that company and eight of the 3rd Kent (Lee). It resulted in favour of the 32nd, who headed their opponents by 42 marks, thus a second time having the honour of defeating the 3rd Kent, who number in their ranks some of the crack shots in the 1st Kent Administrative Battalion.

The first annual prize meeting of the 5th Hants terminated most successfully on Wednesday last. The shooting continued for two days at the long range at Baffin's, near Portsmouth, and a variety of valuable prizes were competed for by members of the corps. The shooting was generally good, and that for the all-comers' prize created some excitement, as Lieutenant Bonney, of the 53rd Regiment of Foot, and Private Westbrook, of the Droxford Light Horse, kept so close to each other that they agreed to share the stakes. At the finish Lieutenant Bonney headed his rival by one, and again the former made a bull's-eye at 600 yards, while the latter made a centre.

Yesterday week the 10th Berks Rifle Volunteers held their annual prize meeting at Sunning-hill. A silver challenge cup, value £11 11s., presented by Major G. D. Scott, was won by Colour-Sergeant J. Barr Brown. A second prize of £3 3s., presented by Quartermaster Cave, was won by Sergeant D. Miller. A prize, value £5 5s., presented by Captain Van de Weyer, was also won by Colour-Sergeant Brown. A field-glass, presented by Lieutenant Johnson, was won by Sergeant Miller.

The annual inspection of the Dorset Rifle Volunteers took place at Maiden Castle, near Dorchester, on Wednesday week, before Colonel M'Murdo, C.B. The battalion mustered nearly six hundred of all ranks, and was commanded by Lieutenant-Colonel Mansel. A variety of battalion movements were executed, and a retirement of the battalion in line for a long distance elicited an expression of approval from the Inspector-General. An unusual and rather trying light infantry movement was performed at the special request of Colonel M'Murdo, at which he also expressed his approval. At the conclusion the battalion was formed into square, from the interior of which Colonel M'Murdo addressed a few words of encouragement and approval to the volunteers, congratulating Colonel Mansel on the efficiency of the battalion, after which he distributed the prizes won at the recent prize meeting of the County Rifle Association.

An interesting contest took place at Wells, Somerset, on Monday. The Captain of the Wells company, Mr. E. Lovell, the Clerk of the Peace for the county, offered last year a 50-guinea challenge cup for competition by members of the third battalion who had completed a certain number of drills, the cup to be won two years in succession before it becomes permanent property. To this prize Lieutenant-Colonel Luttrell added a splendid rifle, valued at £25, as a prize for another competition at different ranges. The result of the contest of last year was that the cup was won by Private Mekendon, of Wells; while the rifle, which was not a challenge one, was carried off by Mr. Gilmore, of Frome. On Monday between thirty and forty members assembled, and, after an exciting contest, Private Jabez Eames, of Frome, and Corporal Weeks, of Wells, tied with 34 marks each, and on shooting off Mr. Eames won. Mr. Gilmore was next. The challenge cup is thus held for one year at least by the Frome corps. The contest for the rifle terminated in the victory of Sergeant Brown, of Weston-super-Mare; and Sergeant Turner, of Frome, was again second.

The annual carbine contest by the five western batteries of the Duke of Cornwall's Artillery Volunteers took place on Wednesday week at St. Ives. The St. Ives corps scored 439, three points more than the competitors from Marazion. Other prizes, total value about £30, were also shot for.——On Friday, the 2nd Duke of Cornwall's Rifle Volunteers competed for various money prizes. Private J. Harris won the principal prize.

On Monday week a grand display of the volunteers of the counties of Anglesey and Carnarvon was made at Holyhead, and a friendly engagement took place between them and the seamen and marines of her Majesty's ship Majestic, 80 guns, supported by the cannon of their ship. An immense concourse of people assembled from all parts of the northern counties, and on the grand stand were, among others, the Bishops of Oxford and Bangor, Colonel the Hon. E. G. D. Pennant, M.P.; Sir R. W. Bulkeley, M.P., &c. The force consisted of a brigade of artillery and another of infantry, the whole commanded by Major the Hon. W. O. Stanley, M.P. The companies forming the artillery brigade were the 1st and 2nd Anglesey (Holyhead), the 3rd Anglesey (Beaumaris), and the Carnarvon company. The infantry brigade consisted of the Bangor and Carnarvon Rifles and two companies from the Penrhyn quarries.

The third annual rifle prize meeting of the Chester Artillery Volunteers took place on Wednesday and Thursday, last week, at Sealand Range.

Last week the Yarmouth Artillery Volunteers were engaged in competing at heavy-gun practice for two prizes of five guineas each, offered respectively by the Mayor of the borough (Mr. R. Steward) and the officers of the battalion. The prizes were divided into two classes, of ten each, among the twenty competitors who made the highest scores; he who made the greatest number of points also to receive a silver medal, and be regarded as the champion shot of the corps for the year. The target was placed about 1500 yards from the north battery, and was 12 ft. square, and the practice was with 68-pounders, three shots each competitor, under the superintendence of Captain Gilbertson, of the Norfolk Artillery Militia. After some excellent practice, the championship was won by Corporal Baker; and the other successful competitors in the first class were Gunners Manship, Riches, Bartram, Shrimpling, Rainer, Watson, Davey, Wetherell, and Sergeant Howard; in the second class, Sergeants Cocks and Robinson, Corporal Beevor, Bombardiers Greenwood, Nutman, and Self, Gunners Stringer, Thompson, R. Cory, and Howse.

The annual competition for prizes of the members of the 5th Suffolk took place on Saturday, on a meadow attached to the Glavering Hall estate, the residence of the Lieutenant commanding, Mr. Andrew Arcedeckne. The first prize was won by Sergeant Coleman, and the second by Private Crowe. The next prize was a silver cup, given by Lieutenant Arcedeckne. In this contest there were five scores of 14 points. On shooting off the ties, Private Motum made a centre and carried off the prize. The third prize was a cup, given by Ensign Muriel, for non-commissioned officers only. It was won by Corporal Thurlow. The next prize was also a cup, given by Captain Rous, which fell to the lot of Private Walker. At the conclusion of the shooting, the corps sat down to a dinner at the White Hart Hotel, provided through the liberality of Lieutenant Arcedeckne, the Rev. James Williams, and Quartermaster C. Welton.——On Monday the members of the Ipswich corps and the Watton Battery of Artillery were entertained by Mr. J. C. Cobbold, M.P., in his picturesque grounds at Holy Wells. The fête attracted a very large attendance. Various evolutions having been performed, dinner was set out on a liberal scale in a large tent in the grounds below the mansion. The principal speaker of the evening was Lord Ranelagh, whose name was associated with the toast of "The Volunteers."——The Woodbridge corps has just held its annual meeting, on which occasion Mr. J. P. Fitzgerald, an old and liberal friend of the corps, presented the company with a handsome bugle. The ladies' challenge cup was presented in the course of the after-dinner proceedings to Lance-Corporal Simpson, who also won it in 1862; the presentation of the coveted distinction was gracefully made by Mrs. Schreiber.——A match has taken place between sides of eight each, selected from the Hadleigh and Stour Valley corps; the scores made were as follow:—Hadleigh, 179; Stour Valley, 157.

The whole volunteer force of Lincolnshire was reviewed on Thursday week near Boston by Lord Aveland, Lord Lieutenant of the county. The assembled force was about 1200 strong. Major Moore, Royal Lincoln Militia, acted as Aide-de-Camp to Lord Aveland. Lieutenant-Colonel Amcotts took the general command; Lieutenant-Colonel Willson being at the head of the first battalion, Major Hopkins of the second, and Major Hutton of the Artillery Brigade. Captain Mulhall acted as Brigade Major, assisted by Adjutant Humphries, and Major Golding and Captain Longstaff, Adjutants of the first and second battalions. A programme of the usual character was gone through in a creditable manner, although a drenching rain fell during a part of the time, and marred to some extent the pleasure both of the volunteers and the spectators. At the conclusion of the review Lord Aveland expressed the general satisfaction which the proceedings had afforded him, and invited the whole force assembled to partake of dinner.——The return match between eight members of the Gainsborough and eight of the Retford Rifle Corps came off on Monday at Gainsborough, and terminated in favour of Gainsborough, Retford scoring 205 and Gainsborough 271. The first match was won by the same corps.——On the 26th ult. money prizes of the value of £10, given by Ensign Fox, were competed for at Gainsborough by the recruits of this year. The successful competitors were Privates Farnell, Mears, Tane, Kew, and Harrison.—— The annual inspection of the Robin Hood Rifle Corps took place on Monday at Bulwell-common. The regiment numbers 960 members, and the muster on this occasion was 704. At the close of the manœuvres the Government inspector, Lieutenant-Colonel Harman, addressed the corps in a highly complimentary speech, remarking that he had never inspected a regiment which had acquitted itself with so much steadiness in the field.——Captain Hay, acting as umpire for Lord Vernon in the match between the Robin Hoods and the Australians, recorded in our last Issue, was formerly the Adjutant of the 15th Regiment, not the 47th, as was stated.

The Oxfordshire battalion was inspected on Wednesday week by Lieutenant-Colonel Ibbetson. The battalion, 300 strong, which was under the command of Colonel North, M.P., was put through a variety of field movements, at the conclusion of which Colonel Ibbetson expressed himself satisfied with the steadiness and efficiency of the men, and attributed any shortcoming which he had witnessed to the want of battalion drill, without which it was impossible to obtain perfection. He complimented the two Oxford companies upon keeping up their prestige. He assured Colonel North that he should have much pleasure in reporting favourably of the appearance and efficiency of the battalion, and on the creditable state of the accoutrements, generally speaking.

A competition has taken place among the best shots of the Cambridgeshire Administrative Battalion for prizes of £12, £8, and £5, given by the Major, Lord Royston; and £4, given by the Adjutant, Captain Busby; a fifth prize being made up out of the entrance-fees levied. The first prize was won by Lieutenant Liveing, the second by Corporal Clark, the third by Captain Clay, the fourth by Private Hodson, and the fifth by Drum-Major Ling.——The Isle of Ely Administrative Battalion met for drill last week at March.

The volunteers in the different county companies in Leicestershire have commenced their prize-shooting. On Monday the Loughborough company met for this purpose. A silver challenge cup, value £10 10s., with company's medal, was won by Lieutenant Dobell.

The members of the Handsworth (1st Staffordshire) company of rifles assembled at their range, Old Ford, on Monday, for the first shooting-match of the season. There was a valuable list of prizes.

The Worcestershire rifle corps were busy last week. On Wednesday and Thursday the shooting for the prizes given by Colonel Scobell for competition by the second battalion of Worcestershire Rifle Volunteers came off at the butts of the Droitwich and Hanbury company. The first prize, a silver cup, value £10, was won by Ensign Onley, of the Malvern corps; second prize by Private Thomas Bourne, of Droitwich; and the third prize was also won by the same man.——On Thursday the Pershore company, sixty in number, were inspected by Lord Lyttelton, Lord Lieutenant of the county, when, after going through a sharp drill, they were highly complimented on their efficiency by his Lordship. They afterwards dined together.

In Yorkshire the 6th North York (Scarborough) Volunteers held their annual prize meeting last week. Throughout the shooting was particularly good. The first contest was for M. Jancowski's prize. The winner was Sergeant W. Dove. The silver cup, given by the tradesmen of Scarborough, was won by Sergeant W. Dove. For the borough members' prize of £10 there was a tie between Corporal Rawling and Private Gutherlass, the latter winning in shooting off. The next contest was for £10; Lieutenant Nesfield and Sergeant A. Mackereth tied, the former winning. The next contest was for a money prize, Private L. Bracewell winning the first. For the

officers' prize—a valuable rifle—Sergeant Dove and Private S. Darling tied, and, after two more ties, the former gained the victory. Lord Londesborough's prize of £10 was won by Private Baxter. The meeting concluded with the contest for another valuable rifle, given by the officers. The winner was Corporal Rawling.——The Hull Volunteers, in their last contest of the season, shot for Lord Londesborough's prize of £10. The result of the contest was a tie between Sergeants Kirk and Bennett. This was to be determined by one shot at 900 yards, when, after five rounds, Kirk made a bull's-eye (in a very strong wind) and won.——The fourth annual rifle prize-shooting by the Halifax Rifle Volunteers occupied all last week. The prizes shot for amounted to more than £200. There were fifty-two competitors, including volunteers from Wigan, Liverpool, Huddersfield, Worcester, Wakefield, Ripon, Middlesex, Leicester, Rotherham, Southport York, Leeds, Bradford, and Keighley. The result of the shooting was as follows:—J. W. Thomas, Halifax, 58 points; T. C. Dawson, Halifax, 56; J. Halsale, Wigan, 56; W. J. Blanch, Liverpool, 56; D. Fraser, Huddersfield, 55; Sergeant Smeeton, Halifax, 55; Sergeant Kemp, Manchester, 53; S. T. Purchas, Worcester, 52; F. Haigh, Huddersfield, 52; T. Whitton, Wakefield, 51; Sergeant Marriott, Halifax, 51; Corporal Pearce, Ripon, 51. This is the third year that Mr. Thomas has won the all-comers' prize.——The 39th West Riding Volunteers had a meeting on Saturday at Bingley, when a series of prizes were shot for. Private Sugden won the first prize; Private Walbank the second; Sergeant Walker the third.——On the same day a spirited contest took place at Grimbald Crag range between six of the 17th West Riding (Knaresborough) Volunteers and six of the 5th West York Militia. The militia proved victorious by nine hits and points; total militia score, 207.——On Saturday last the Leeds corps competed for the Mayor's prize, a silver cup, value £5. Private Ascough was the winner.——The Wakefield rifle meeting, which commenced on Monday, concluded on Tuesday. Captain Commandant Mackie's prize (value £10) was won by Private Clapham; Mrs. Charlesworth's prize (value £10) by Private Anderson. There were several minor prizes shot for.

The Alnwick (Percy) Artillery Volunteers shot for the prizes given for carbine practice by the Duke of Northumberland on the sands at Alnmouth, on Monday. There was a capital muster of the corps. The first prizes were won by Gunner T. M'Leish, Gunner W. Graham, and Corporal Thompson; second prizes by Gunner Morr, Gunner Wheallans, and Sir Grant C. Bradley.——The Sunderland Artillery Volunteers also held their prize-shooting meeting at Fulwell on Monday. The first prize of the first battery was won by Gunner Cooper, and the second by Gunner Inelly, after shooting off a tie with Corporal Grey. For the second battery the first prize was won by Corporal Swainston, and the second by Gunner Wilson. A silver cup, presented by Lieutenant Ritson, was won by Gunner Lawrence, and the second prize by Gunner Cooper.

WILLS AND BEQUESTS.

The will of the Most Honourable Constantine Henry Phipps, Marquis of Normanby, K.G., G.C.B., G.C.H., P.C., F.S.A., of Mulgrave Castle, Yorkshire, and Hamilton Lodge, Queen's-gate, London, was proved in her Majesty's Court of Probate on the 23rd ult. by his relict, the Marchioness of of Normanby, power being reserved to the Hon. Adolphus Liddell, one of the executors, the Hon. Edmund Phipps (the brother-in-law), also an executor, having died previous to the testator. The personal property was sworn under £25,000. His Lordship descends from Sir Constantine Phipps, Lord Chancellor of Ireland in 1710, and has held the following appointments:—Governor of Jamaica, 1832; Lord Privy Seal, 1834; Lord Lieutenant of Ireland, 1835-9; Secretary for the Colonies, 1839; and for the Home Department, 1839-41; Ambassador at Paris, 1846-51; Minister at Florence, 1852-8. His Lordship died at the age of sixty-six, having executed his will in 1857, by which he confirms the settlement of the jointure on the Marchioness, his relict, to whom he leaves (with the exception of a legacy to his executor) the whole of his property, real and personal, over which he had the power of disposition. He also by will confirms the settlement made on the marriage of his son and only child, George Augustus Constantine, heretofore Earl of Musgrave, now Marquis of Normanby.

The will of Admiral Sir John Louis, Bart., of the British Navy, late of Eaton-place, was proved in London by his son-in-law, Rear-Admiral Robert Spencer Robinson, Comptroller of the Navy, power being reserved to Sir Edward Strachey, Bart., the executors and trustees nominated in the will, which was executed Feb. 5, 1863, a month prior to his decease. The gallant Admiral died possessed of both real and personal property, and has devised to his daughter his mansion, Cadwell House, near Torquay, with the land adjacent thereto, and has also bequeathed to her all his personal estate for her own absolute use and benefit.

The will of William McNab, Esq., of Ware, Hertfordshire, surgeon, was proved in London under £30,000 personal property—the executors and trustees appointed being his wife, Mrs. Harriet McNab; his brother, Daniel Robert McNab, Esq., of Epping, surgeon; Joseph Thomas Humphrey, Esq., of New-square, Lincoln's-inn, Barrister-at-law; and George Murray Humphrey, Esq., M.D., of Cambridge. The testator executed his will in 1860; two codicils in February and March, 1862; and a third codicil in January, 1863. He bequeaths to his wife a life-interest in the bulk of his property, bequeathing to his daughter a liberal annuity and the right of presentation to the advowson of Great Amwell; and, upon the decease of his relict, he leaves the whole of his property to his said daughter Harriet, wife of the Rev. Richard Parrott, B.A., Domestic Chaplain to the Earl of Lisburne.

The Mauritius Government paid £22,756 towards the immigration into that island of nearly 10,000 Indian coolies during last year.

Carlo Armellini, formerly one of the Roman Triumvirate in conjunction with Mazzini and Saffi, died a few days since in Brussels at the age of eighty-seven.

The *Opinion Nationale* asserts that several Germans of high rank, on learning that General Mouravieff had been decorated with the order of St. Andrew, immediately sent back to the Czar the insignia of the Russian orders to which they themselves belonged.

A letter, of which the following is a translation, has been received, and has been duly answered by the Provost of Dundee. It has been stated that a park of fifty acres, specially designed for the working classes of Paris, is about to be laid out by the French Government:—"London, Sept. 22, 1863.—Sir,—The French Government would feel interest in obtaining precise information about the Baxter Park—as to its foundation, future destination, means of recreation that will be put at the disposition of its visitors, and conditions on which it has been created, as also to the manner in which the expenses of keeping it up are provided. Pardon me, Sir, having recourse to your kindness, but I thought, in your quality of president of the council of administration, that you would be the best able to give me information in this matter. Accept, Sir, with my anticipatory thanks, this assurance of my most distinguished consideration, le Chargé d'Affaires de France, CADORE."

The following letter has been recently received by Mr. Linnæus Banks, Hon. Secretary to the Shakspeare Committee:—"Paris, Sept. 24, 1863. Sir,—Different circumstances of a painful nature have prevented my sooner answering the letter you did me the honour of addressing to me in June last, relating to the tercentenary of Shakspeare's birth. I can but feel extremely flattered that the Provisional Shakspeare Committee should have thought of me, and shall be deeply honoured to see my name enlisted amongst those who wish to pay homage to the greatest genius of England, and, perhaps, of modern Europe. Pray inform me, therefore, of what I am to do in order to respond to the views of the committee besides giving the use of my name. I have the honour to remain, Sir, with sincere regard and sympathy, your obliged and obedient servant, LE COMTE DE MONTALEMBERT."

A Scotch gentleman, Mr. Henry Christie (says a letter from Paris), has lately returned from a scientific tour in Africa, for which he started from Constantine in April last, in company with M. L. Feraud, interpreter of the French army in Africa. The object of Mr. Christie's search—which object has taken him already into many lands—is Celtic remains. He has now been very fortunate, finding a cemetery about twenty-five miles south-east of Constantine entirely filled with tombs. In three days 1000 of these "cromlechs" were examined; seventeen were opened and the contents investigated. Bones of men, women, horses, and birds; buckles, brass and iron rings, and many vases were discovered. In two tombs the skeletons were yet perfect; they were reclining on the left side, the knees nearly touching the chin, and the hands crossed over the breast. But the most important discovery, as fixing a date—though the date has terribly disappointed the antiquaries—was that of the body of a man and horse "in one burial blent," with which were some specimens of engraved silex and a bronze medal of Faustine, a Princess who departed this life A.D. 141. All these excavations were carried out at the expense of Mr. Christie, who has presented the results of his labours to the Museum of Constantine. Another "necropolis" has been discovered at Aurès.

"The Commission on the Isthmus of Suez Canal," says a letter from Cairo, "has arrived here, after visiting the works, and has been received by the Viceroy in his palace. The body was headed by the Duke d'Albuféra. The strangers, on their arrival at the palace, were introduced into the grand reception-room, where M. de Lesseps presented them to Ismael Pacha. The company then passed into a small private chamber, where, according to the Oriental custom, coffee and pipes were handed round. The Viceroy then addressed the commission, and in dignified language expressed his desire to complete the great work of the cutting of the Isthmus, and recapitulated the acts which since his accession to power he had accomplished in favour of that design. He added that, in the interest of the undertaking, he would before all endeavour to establish a frank and explicit situation; that he was anxious to regularise the state of things created by his predecessors, and that he counted on receiving from M. de Lesseps and the board of directors the requisite assistance. The Duke d'Albuféra, in reply to the Viceroy, declared that before his departure from Paris he had been received by the Emperor, who assured him of his sympathies for the great undertaking. 'The French Government,' added his Majesty, 'would consider as an honour the fact of having, by its influence, contributed to the construction of the Isthmus of Suez.' The Viceroy terminated the official interview by replying that he was happy to find that he shared the ideas of the Sovereign of the French. The conversation then became general, lasting for some time; and the members of the commission at length left the palace, highly gratified at their reception."

CHESS.

TO CORRESPONDENTS.

I. G., Jedburgh.—We have not yet had time to play over the last specimens of Border play; but they shall have attention in their turn.

A LOOKER-ON.—The selection of games played at the Great Chess Meeting last year are very acceptable. Some we have already seen in the foreign Chess periodicals, but there are many quite new to us.

W. T. P., Camden-town.—The last shall be examined; the other, we apprehend, must have been condemned.

PUZZLED.—You are quite right. See the notices to Chess correspondents in our Number for June 6 this year.

H. W. D., DEREVON; R. S., of Malines; TYRO, M. MOORHOUSE, NEREUS, and others.—Mr. Grimshaw's problem, No. 1023, can be solved in three moves, by—1. R to Q 4th (ch), 2. Q to Q R 8th (ch), 3. B to Q 2nd, mate.

WEE PAWN.—You must be good enough to furnish us with the number of the problem or the date of its publication.

I. O. MILLS.—It shall have attention. In your next we should recommend the adoption of the ordinary notation; it prevents mistakes.

I. H., Sheffield.—The player you address has no connection with the ILLUSTRATED LONDON NEWS.

G. A., Folkstone.—Your solutions are both defective. As regards No. 1021, if Black play 1. K to Q 3rd (not 6th, that being impossible), White answers with 2. Q to K 4th, mating, evidently, next move.

ŒDIPUS.—The key-moves to Mr. P. T. Duffy's pretty enigma, No. 1348, are—1. B to Q Kt 4th, 2. Kt to Q 6th. The next two moves are obvious.

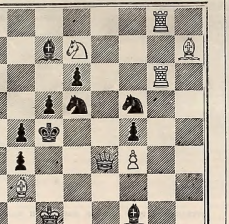
M. J., Paris.—Where the fault lies we cannot pretend to say; but certainly the delivery of *La Régence* in London is not so regular as, for the interest of its proprietors and the entertainment of the subscribers, could be desired. The last number received was that of June, so that there are now four numbers in arrear.

F. R. A.—1. No. The *Daily Evening Bulletin*, of Philadelphia, has kept up its two columns of chess matter, week by week, during the whole war, with as much spirit as before. 2. The second edition of Professor Allen's "Life of Philidor" has not yet been issued.

SOLUTIONS OF PROBLEM No. 1022, by Wee Pawn, Derevon, R. M., Sergius, Tyro, Nereus W. W. P., H. W. B., Felix, A Bath Archer; C. W., of Sunbury; H. C. C.; I. H., Sheffield; Box and Cox, Percy, C. M., Dryasdust, Try-again, T. M. P., Charley, Pip, Conrad, A German, Twysden, D. D., Vicar; R. S., of Malines; Q. E. D., Ellen, A. B. C., Puzzled, R. and G., Fergus, Wilfred, Clericus, Major, 1863, Oliver, Histrion, C. H. S., Manfred, Cosmopolitan, E. K., Trio, Romola, Stella, C. B., A Swede; R., of Paris; Old Subscriber, Stanley, T. P. C., Peregrine, Von H., Tom Noddy, A Bohemian, Pendennis, H. W., I. B. Clarke, Johannes, Rex, A Forester, Melpomene, T. V., Presis, G. M. D., Anne Laurie, Kilkenny, G. R., Victoria, F. C. S., Gamma, H. A. R., Philo S., G. M. G., Andrew, Garryowen, A Pole; B., of Ghent; Dover, F. R. S., Query, Bookworm, A Learner, H. K., Viator, Magnus, I. Gorthin, Jedburgh, are correct. All others are wrong.

SOLUTION OF THE TWO-MOVE PROBLEM in our Number for Sept. 26, by Annette, R. B., Nemo, W. P. W., G. S., Wee Pawn, Felix, T. M., Box and Cox, Sergius, P. W. B., Q. E. D., Carfax, M. P., S. W., N. S.; S. P. Q. B., of Bruges; I. W. F., Tomaso, Pip, Lionel, Quidnunc, Try-again, Davus, Omega, Lucy, C. M., Kimbolton, Ernest, B. R., L. B., F. C. S., J. N., F. W., T. Rudge, W. K., are correct. All others are wrong.

SOLUTION OF PROBLEM No. 1023.



WHITE.	BLACK.	WHITE.	BLACK.
1. Q takes Kt	R from Q R sq tks Q	2. R takes Q R P	Anything
		3. Kt or R mates	

(If the other Rook takes Queen, then follow—2. R to Q Kt 6th, and 3. Kt mates.)

PROBLEM No. 1024.

By Mr. H. E. KIDSON.

BLACK.

WHITE.

White, playing first, to mate in three moves.

BLINDFOLD CHESS PLAY.

Mr. PAULSEN plays the Chevalier ST. BON without seeing the chessboard, contending against nine other antagonists at the same time and under the same disadvantage. The ten games were played at the great Chess Meeting in London last year.

King's Bishop's Game.

WHITE (Mr. Paulsen.)	BLACK (Chev. St. Bon.)
1. P to K 4th	P to K 4th
2. B to Q B 4th	P to K B 4th

(This counter-attack was first given in Greco's Treatise, as far back as the year 1620. It is highly ingenious; but, if properly met, it tends rather to the advantage of the first player.)

3. P to Q 3rd	

(The authorities concur in recommending the opening player not to take the Gambit Pawn. Some, however, think that 3. P to Q 4th, or, 3. Kt to K B 3rd, is preferable to 3. P to Q 3rd.)

3.	B to Q B 4th

(His best play, perhaps, is 3. Kt to K B 3rd, though, even then, White gets the better game. See the *Chessplayers' Handbook*, p. 227.)

4. B takes Kt	R takes B
5. Q to K R 5th (ch)	K to B sq
6. Kt to K B 3rd	Q to K B 3rd
7. Kt to K Kt 5th	R to K R sq
8. Kt tks K R P (ch)	R takes Kt
9. Q takes R	P takes K P
10. Castles	P to Q 4th
11. Kt to Q B 3rd	B to K 3rd
12. Q to K R 8th (ch)	K to K 2nd
13. P takes P	P to Q B 3rd
14. P takes P	P takes P
15. B to K 3rd	

(The game was virtually lost by Black after his first half dozen moves, and we record it mainly for the sake of the very pretty ending. If Black now play, P to Q 5th, the reply is Kt to K 4th, after which the result is not far to seek.)

15.	B to Q 3rd
16. Q R to Q sq	Q to K B 2nd
17. P to Q Kt 4th	B takes P

(The object of White in offering the Pawn was so apparent that it surprising an accomplished player like the Chevalier St. Bon should have seized the bait.)

18. Kt to K 4th	Q to K B sq
19. Q to K R 4th (ch)	K to Q 2nd
20. P to K B 4th	Kt to Q B 3rd
21. P takes P	Q to K R sq
22. Q to K Kt 3rd	

And Black resigned.

A beautiful *Partie*, one of ten games played at the Meeting mentioned above by Mr. Blackburne, without board or men, against ten opponents simultaneously:—

(Centre Gambit.)

WHITE (Mr. Blackburne.)	BLACK (Mr. Howard.)
1. P to K 4th	P to K 4th
2. P to Q 4th	P takes P
3. Kt to K B 3rd	Kt to Q B 3rd
4. B to Q B 4th	B to Q B 4th
5. P to Q B 3rd	Kt to K B 3rd
6. P to K 5th	Kt to K Kt 5th
7. Castles	Castles
8. P takes Q P	P to Q 4th
9. B to Q Kt 3rd	B to Q Kt 3rd
10. Kt to Q B 3rd	Kt to K 2nd
11. P to K R 3rd	Kt to K R 3rd

(Now, the error of Black in playing this Kt at move 6 becomes painfully conspicuous.)

12. B takes Kt	P takes B
13. Q to Q 2nd	K to Kt 2nd
14. Kt to K 2nd	

(So bad is Black's position that his opponent has ample time to accumulate his forces for a crushing attack.)

14.	P to K B 3rd
15. Kt to K Kt 3rd	Q to K sq
16. Q R to K sq	B to K 3rd
17. R to K 3rd	

(Here Mr. Blackburne faltered a little in his assault, a thing not to be wondered at, considering the appalling disadvantages under which he was fighting.)

17.	P to K B 4th
18. Kt to K 2nd	P to K B 5th
19. R to Q B 3rd	B to Q R 4th
20. Kt takes K B P	Q to K B 2nd
21. Kt takes B (ch)	Q takes B
22. B to Q B 2nd	Kt to K Kt 3rd
23. P to Q Kt 4th	

(This is very clever. Black, it will be seen, has no longer the opportunity of winning the Rook for his Bishop now.)

23.	B to Q Kt 3rd
24. Kt to K R 2nd	P to K R 4th
25. K to R sq	

(An indispensable provision before advancing the K B Pawn.)

25.	R to K B 5th
26. R to Q 3rd	P to Q B 3rd
27. P to K Kt 3rd	R to K B 2nd
28. P to K B 4th	K to R sq
29. Q R to K B 3rd	Q takes K R P
30. P to K Kt 4th	

(Capitally played.)

30.	Q to K R 5th
31. P to K Kt 5th	

(Again well played.)

31.	Kt takes K B P
32. R takes Kt	Q takes K Kt P
33. Q to Q 3rd	R to K Kt sq
34. R to K Kt 4th	P takes R

(But why not have played R takes R (ch)? Surely that would have changed the aspect of the game.)

35. R takes R	Q to K Kt 3rd
36. R takes K R P (ch)	

and Black resigns.

CHESS ENIGMA.

No. 1357.—By the Editor of *Sissa*.

White: K at Q R sq, B at Q Kt 2nd, Kt at K B 6th, Ps at K R 3rd and K B 7th.

Black: K at K R sq, B at K R 3rd, Ps at K Kt 3rd and 4th, and K B 4th.

White to play, and mate in four moves.

SCIENTIFIC NEWS.

PLANETS FOR OCTOBER.—Mercury will be favourably situated for observation in the morning at the latter end of the month, as it passes its inferior conjunction on the 11th, and arrives at its greatest westerly elongation on the 26th; it remains in the constellation Virgo. Venus also remains in this constellation; she rises in the east about six o'clock in the morning at the beginning, and at the end of the month at about half-past three. She is a brilliant object, and as she increases in altitude will be most brilliant object, and favourably situated for observation with a transit instrument. Mars, Jupiter, and Saturn are all too near the Sun to be well observed. Uranus and Neptune are better placed, and may be readily observed; the latter may be easily distinguished from a fixed star with a telescope of moderate size. These notes are taken from the *Astronomical Register*, published monthly, price 6d., by J. D. Potter, Poultry. As this publication is intended as a means of communication between astronomers, and will mainly depend on them for its support, we feel bound to urgently recommend it to such of our friends as are interested in the science.

THE KING CRAB (POLYPHEMUS).—In the *Annals of Natural History* Dr. E. J. Gray communicates some remarks on the uses of the elongated spinelike tail of this genus of crustacea. In the shallow tank at the Liverpool Museum are some living specimens, where Dr. Gray was shown one use these crabs make of the appendage. When turned over on their backs, he saw them bend down the tail until they can reach some point of resistance, and then employ it to elevate the body and regain their normal position. He states that they never have been seen to use this tail for the purpose which has often been assigned to it—that is, for leaping from place to place by bending it under the body like the toy called a "spring-jack" or "leaping-frog."

CHEMICAL HEAT AND VOLTAIC HEAT.—M. Raoult has recently submitted his researches on this subject to the French Academy of Sciences, his object having been to obtain the measure of the heat produced by an electric current in the entire circuit in which the pile is comprised—considered a very difficult problem. The result of his calculations (which are inserted in the *Comptes Rendus*) is, that in the elements of Daniell's battery the heat produced by the current is very nearly equal to the heat evolved by the chemical action. In other batteries the amount of heat produced is remarkably different. Thus, A, in an element of zinc; sulphate of zinc—copper, sulphate of copper, the chemical heat is estimated at 23,564 calorics; the voltaic, 23,602. B. Zinc, acetate of zinc—lead, acetate of lead; chemical heat, 15,691; voltaic, 12,438. C. Copper, nitrate of copper—silver, nitrate of silver; chemical heat, 16,402; voltaic, 7789. Thus, while in element A the current reproduces the whole of the chemical heat, the current in the element C does not even reproduce half. What is the cause of an action so different in two elements of similar constitution? Here is a problem well worthy of philosophic attention.

THE SHOOTING STARS OF AUGUST.—In our Number for Sept. 12 last, p. 275, will be found a note of M. Coulvier-Gravier's observations of these phenomena. Dr. Heis, of Munster, has recently sent to the Academy of Sciences at Paris the results of the observations of twenty of his pupils. We give the total and mean horary numbers of the following days:—Aug. 8, total, 151; horary number, 50; Aug. 9, 159, 53; Aug. 10, 600, 141; Aug. 11, 212, 71; Aug. 12, 168, 56; Aug. 13, 121, 40; Aug. 14, 47, 24. Dr. Heis states that on Aug. 10 the number of shooting stars seen was so great that the smaller ones could hardly be reckoned. The observers were so placed that they could freely survey the whole of the horizon, a compartment of which was allotted to each observer, means being taken that no star should be twice noted. The brilliancy and length of the train of these stars were very remarkable. The most of them had their point of divergence with constellation Perseus. We must refer our readers to the *Comptes Rendus* (1863, No. 11) for some remarks of M. Faye on his subject in relation to the annual motion of our globe.

FORMATION OF THE FATTY MATTER IN OLIVES.—M. De Luca has reported to the Academy of Sciences at Paris the results of his elaborate researches on this subject to which we adverted about two years ago. From the figures given in his table of observations, ranging from June to December, it appears that the weight of the olive increases with the progress of vegetation until the month of November; but that the stone is the first to be developed, the growth of which takes place in the early part of vegetation during the months of July and August, after which it remains stationary; there being, in fact, in successive months no sensible variation of its weight. The pulp, on the contrary, increases in weight continually until the complete maturity of the fruit. The quantity of water found in olives diminishes progressively at their maturity. Thus it is about 60 or 70 per cent in the first phases of vegetation, while it is only about 25 per cent at the last period of the growth and maturity of the fruit. The sulphuret of carbon takes from olives several substances of a different nature; among which are colouring matters, especially chlorophyll, which gradually diminishes as the fruit approaches maturity. The fatty matter, on the contrary, which is found only in small quantity at the beginning of vegetation, increases as the plant grows, and is at its maximum when the olives are ripe and have completely lost all trace of their greenish tint. It is also remarkable that when the stone ceases to increase in weight the fatty matter in the fruit accumulates in greater proportion.

AURORA BOREALIS.—M. Montigny has given an account of an aurora, witnessed by him at Antwerp some time back, to a meeting of the Royal Academy of Belgium. On his arrival at the quay, about six o'clock p.m., he remarked in the western horizon a nebulosity resembling that produced by the moon when behind a foggy cloud, and situated about five degrees in height and more than thirty-five degrees in elongation from the splendour of the aurora on the western side. Suddenly the whitest nebulosity expanded itself vertically in the form of a ray, raised itself slowly towards the zenith, which it passed over, falling in the form of an arc in the eastern part of the horizon. This ray, the edges of which were well defined, was equal in size to the Milky Way, which it resembled in colour, being, however, much more brilliant. The ray soon vanished, but its splendour departed gradually, the source of it in the west first disappearing. The nebulosity in which the ray originated, and which departed with it, shortly after reappeared, and elongated itself likewise in a ray towards the zenith, resembling the first ray in its formation, size, and disappearance. Kæmtz, with regard to these phenomena, says:—"When the aurora is very brilliant there are seen sometimes one or several arcs, more elevated towards the zenith, and concentric with the luminous arc which limits the obscure segment. During extreme cold weather white arcs are also observed at considerable heights. Philosophers regard them as images of the aurora, the light of which is reflected towards the observer by minute frozen particles of moisture."

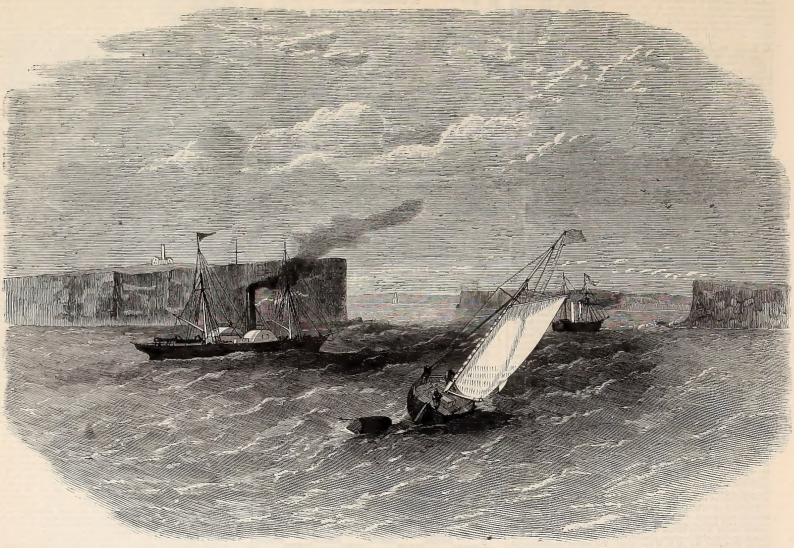
The Wave of Life has arrived from Melbourne, with £162,000 in gold.

In June last there were 58,441 thriving cinchona plants on the Neilgherry hills in India. Chemical experiments have been made on the bark, which prove that the cinchona is now naturalised in India, and is superior to the cinchona introduced into Java by the Dutch.

A Parliamentary return relating to the China Indemnity, states that 6,450,457 taels have been paid by the Chinese Government, under the Treaty of Pekin, dated the 24th of October, 1860; and that 4,549,543 taels remained unpaid on the 31st of December last.

The Italian Government have contracted with Mr. W. T. Henley for the manufacture and laying of a submarine cable sixty-two miles in length, from Otranto to Avlona, which will give a route by way of Italy for messages to Constantinople, and thence by the new line, viâ the Persian Gulf, to India.

According to the Picton *Standard* a tree has recently been cut down in California, the circumference of which was 90 ft., and its height 325 ft. The bark was in some places 4 ft. thick. The tree contained 250,000 ft. of solid timber. Its age was 3100 years. The wood was sound and solid.



The native species of wild cat infests the forests of Germany this year in such numbers that sportsmen, in many districts, complain that there is hardly a hare to be shot. This ferocious little member of the feline race has even committed considerable havoc among the young deer in some parts of the country. The consequence is that regular cathunts have been found necessary to thin their numbers.

The Queen has appointed the following gentlemen, now Attachés at the undermentioned places, to be Third Secretaries in her Majesty's Diplomatic Service:—The Hon. Edmund John Monson, Hanover; Edmund Constantine Henry Phipps, Stuttgardt; Robert Henry Hildyard, Esq., Paris; Charles Calvert Eden, Esq., Lisbon; George F. B. Jenner, Esq., Athens.

A severe shock of earthquake was felt at Tunis on the evening of the 14th ult., which was followed by several shocks during the night. This phenomenon spread great alarm among the inhabitants, who left their houses and encamped in the open air. Several buildings were destroyed by the earthquake, but fortunately no injury was done to human life.

The Swedish Diet has just adopted a resolution which will be a real advantage for the commerce of other countries. Hitherto, and only since 1858, a foreigner wishing to carry on any trade or manufacture in Sweden was obliged to obtain an authorisation to establish his residence in the kingdom, and after three years to abandon his original nationality and become a Swedish citizen. The Diet, finding that such a state of things prevented foreign merchants and captains from coming to the country, have abolished all the restrictive laws relating to the establishment of foreigners in Sweden, leaving it to the Government to regulate the matter by an ordinance, which will have the force of law.

A remarkable natural curiosity has just been made accessible to tourists in Switzerland. A stupendous stalactite cavern had long been known to exist in the Valais, near St. Maurice, where it is called the Grotto-aux-Fées, but from the difficulty in reaching the spot it had been rarely visited. A road to it has now been constructed, and this grotto has become one of the principal points of interest to travellers in the country. The Grotto-aux-Fées has already been penetrated to a distance of nearly two miles, and has not yet been entirely explored. The roof is one mass of stalactites, assuming the most capricious forms, while the ground presents the appearance of the dried bed of a torrent studded in various places with large stalagmites.

ENTRANCE TO PORT JACKSON, NEW SOUTH WALES.—SEE PAGE 372.

SYDNEY, THE CAPITAL OF NEW SOUTH WALES.—SEE PAGE 374.

LONDON: Printed and Published at the Office, 198, Strand, in the Parish of St. Clement Danes in the County of Middlesex, by GEORGE C. LEIGHTON, 198, Strand, aforesaid.—SATURDAY, OCTOBER 10, 1863.

THE ILLUSTRATED LONDON NEWS.

No. 1227.—VOL. XLIII. SATURDAY, OCTOBER 17, 1863. WITH A SUPPLEMENT, FIVEPENCE

THE QUEEN.

In the reign of her present Majesty monarchical institutions have received a peculiar illustration. Under the theory of a limited monarchy the Sovereign may well be considered, and might even become, an abstraction. The effect of personal character, as evidenced in the influence exercised by the first Personage in this realm, has always been mollified, and in some cases nullified, by the checks imposed by the Constitution on kingly power. Political activity on the part of English monarchs within the last three-quarters of a century has only generated antagonism, and while it lasted the king has degenerated into the leader of a party; and the "King's friends," as contradistinguished from the "friends of the people," have ere now been regularly ranged against each other in the arena of political strife. It has been the happy fortune of Queen Victoria to have changed all this. In her case the Sovereign is in the eyes of her people a reality in her representative monarchical character; and while it cannot be said of her Majesty that she takes no personal part in the administration of public affairs, she can be claimed as the acknowledged partisan head of no political party; and in every sense, and in the largest and most comprehensive sense, the friends of the people are the friends of the Queen. A Monarch thus associated with all the interests and the feelings of a people, in a manner, becomes a necessity of her time. Without her visible presence as its ostensible superintendent, the machine of the State, although it may continue its workings, loses much of its grace; and the unity of the constituent parts of our Constitution, which has probably been never so nearly realised as now, is in a degree depreciated. It was, therefore, with no ordinary feelings of pleasure that the country learned that her Majesty had indicated an intention of being present on a public occasion, and thus taking the first step towards emerging from the retirement of the last two years, and the resumption of those outward and visible duties of her station which she performs so greatly to the satisfaction of her people.

It is no doubt well known that the sorrow with which her Majesty has been visited, while affecting her feelings in a degree commensurate to the greatness of her bereavement, has not been permitted to overwhelm her. In the midst of grief such as perhaps few women have experienced, the Queen did not shrink from the exercise of those functions pertaining to her position which could be carried on in private, and she only shrank from partaking in the pageantry of Sovereignty, in itself what may be called a socio-regal duty, until such time as grief had been chastened into tender remembrance. It appears that that period has arrived, and that the Queen has now entered upon her second life. In nothing could the just feeling—may we be permitted to say the innate good taste which characterises our Sovereign—have been better evidenced than in the choice she has made of the occasion for her formal reappearance in public life. A Queen who was less a woman, possessing less of the best attributes and impulses of her sex, might have been expected to have selected such an act of State as the opening of Parliament in person, and thus first have presented herself to the eyes of her people in her sole character of Sovereign. But her Majesty well understood the feelings of her subjects when she determined to come openly amongst them once more at a ceremony which had for its object the perpetuation of the memory of the late Prince Consort. It is hardly possible to conceive an incident more trying and yet more consonant with the state of feeling by which it may be supposed the Queen is now influenced. It is, as it were, at once her first public tribute to the memory of him who has gone and a manifestation of an intention to lay aside that conventional mourning in deference to a sense of public duty which, however long preserved, could represent but feebly the heart-sorrow which neither time nor circumstance can efface. Taken aright, it is an appeal to those domestic sympathies which have so long existed between the Queen and her people. Every one will appreciate the impulse which has caused her Majesty to blend her personal feelings with the performance of a public act, and it is certain that none of the numerous memorials of the late Prince Consort which are spread over the country will be surrounded by such hallowed associations as that statue at Aberdeen, the inauguration of which drew her Majesty for the first time from the sad shades of widowhood. That event will mark a remarkable epoch in the reign of Queen Victoria—namely, the moment of her restoration to the general social life of her kingdom and her coming forth from the solemn isolation of grief to mingle again with a people which has so tenderly respected the privacy of her sorrow. Nor was the appeal in vain which her Majesty pointedly made to those into the midst of whom she was about to come to aid her by their forbearance and their undemonstrative sympathy in the performance of an act which was calculated to sound to their veriest depths emotions which can hardly yet be still, if they

SCENE FROM THE DRAMA OF "LEAH," AT THE NEW ADELPHI THEATRE: LEAH CURSING THE LORRENZ FAMILY.—SEE PAGE 384

are somewhat subdued. If she did not come amongst them as one who mourned, she yet asked to be treated as one who had not ceased, and never could cease, to feel the loss she had sustained.

In considering the appropriateness of this first public appearance of her Majesty, it must not be forgotten that the ceremonial which she served herself to attend was the result of an act of homage to the late Prince Consort by those who were, in a certain sense, the neighbours of the Royal family. The children and denizens of Balmoral are attached to the locality, and that cordiality is therefore peculiarly associated with that portion of the lives of her Majesty and the Prince Consort which the Queen has just stated publicly to have been, and as it were solemnly recorded as, the happiest they ever knew. It was there that, setting aside the surroundings of Royalty, they enjoyed that country-house condition which is peculiar to this country, and there the chief personages of the realm were familiar to all classes in the simple character of friends and benefactors. Again, it was in the city of Aberdeen that the Prince Consort made one of those unexpected appearances in public occasions which were always judiciously selected, and their occasion made weighty and memorable by the opinions and counsel which fell from his lips. It was there that, as President for the time being of the British Association for the Advancement of Art and Science, the Prince delivered an address which marked him as one of the first practical thinkers of the age, and which was justly considered as an exhibition of the highest intellectual and moral attainment. It is probable that no place has needed a material memorial to preserve the name of the late Prince Consort than Aberdeen, where personal knowledge helped to keep up traditions of his worth likely to be handed down to successive generations; but nothing could have been more creditable to its inhabitants than the earnest desire which pervaded all ranks to give to the city a more permanent expression to the reverence and affection which he had inspired amongst them. The very best appreciation of their feelings and sympathies which could be shown towards them they have received in the presence of the Queen at the inauguration of the statue of the Prince.

In every respect the proceedings were conducted in the manner best calculated to evince genuine emotion. With just so much display of the pomp which surrounds Royalty as was necessary to the occasion, her Majesty proceeded through the assemblage of her friends and neighbours in all classes, all observing that respectful silence which had been asked from them, and maintaining a gravity which was perfectly consistent and, indeed, fitting to a moment which was one of solemnity peculiarly its own. The day was marked by the inhabitants of Aberdeen as a holyday, in the precise and original meaning of that word; and it will long be remembered as that on which the most revered Sovereign who ever sat on the throne of this realm was once more personally associated with a part of her people, and received from them—representing, as it were, all her subjects—their warm though unelaborate tokens of loyalty and devotion.

INAUGURATION OF THE PRINCE CONSORT MEMORIAL AT ABERDEEN.

The ceremony of inaugurating the memorial statue of his Royal Highness the late Prince Consort at Aberdeen took place on Tuesday in presence of her Majesty and various members of the Royal family. The occasion excited great interest, as being the first on which her Majesty has appeared in public since her widowhood.

The statue, which was subscribed for by the city and county of Aberdeen, is of bronze, by Marochetti. It is placed upon a polished granite pedestal, and represents the Prince standing and wearing a Field Marshal's uniform, with the robe of the Thistle over it; in one hand he holds a roll, and in the other the baton of office.

Her Majesty arrived by special train from Balmoral at 1.30 p.m., and was received by the Duke of Richmond, K.G., Lord President, at the city and University officials. Prince Alfred arrived from Edinburgh by a previous train. Accompanying her Majesty were the Princess Arthur and Leopold, Princesses Helena and Louise, the Prince and Princess of Prussia, and the Prince and Princess of Hesse, per St. Grey was the Minister of State in attendance. The procession of carriages was formed to the centre of the city, where the statue stands. Previous to the unmovering of the statue, Mr. Alexander, Provost of the city, presented an address to her Majesty from the committee of subscribers to the statue, in which they referred to the honour conferred upon every part of the kingdom by the annual presence of the illustrious Prince in the county, and to the fact that the city's free gift in 1859 was originally forwarded by the exertion of his great talents as president of the British Association at its meeting there.

The Queen, through Sir G. Grey, returned a reply to the address, as follows :—

Your loyal and affectionate address has deeply touched me, and I thank you for it from my heart. It is with feelings I should vainly seek words to express that I determined to attend here to-day to witness the unveiling of the statue which will remain to future times the love and regard which exist in this county and city for my great and beloved husband; but I could not reconcile it to myself to remain at Balmoral while such a tribute was being paid to the memory which is making an erection to secure you permanently the deep and heartfelt sense I entertain of your kindness and affection, and at the same time be precluding the public the unbounded expression of sympathy and love which I love that till my heart for him whose loss must throw a lasting gloom over all my future life. Never can I forget the circumstances to which you so feelingly allude, that it was in this city he delivered the memorable address to the British Association only four years ago, and that in this county we had for so many years been in the habit of spending some of the happiest days of our lives.

After the address and reply the Queen conferred the honour of knighthood upon the Lord Provost, thenceforth Sir Alexander Anderson.

Prayer was then offered up by the Principal of the Aberdeen University, and the statue was uncovered in full view of her Majesty, who, along with the members of the Royal family, stood on a balcony opposite. The guard for a moment presented arms on the striking likeness of the deceased Prince, and then retired. Her Majesty left for Balmoral soon after three.

It rained heavily during the whole day. There was no display of flags except on the shipping. Dense crowds thronged the streets, but there was no cheering.

Among the papers laid before the Coburg-Gotha Landtag, which has just assembled, is an act (says a Berlin correspondent) bearing the signature of the Prince of Wales. By this instrument his Royal Highness renounces the crown of the duchies for himself and male descendants, so long as his brothers and their male descendants exist in a direct line. The document is accompanied by another from the hand of King Leopold, confirming it, as the guardian of Prince Alfred and his brothers. The renunciation seems to be entirely in accordance with the provisions of a Gotha law, for which the assent of the late Prince Consort had been expressly obtained.

FOREIGN AND COLONIAL NEWS.

FRANCE.

The Emperor, who looks remarkably well after his holidays, shows himself much in public just now. He drove yesterday week through the most populated parts of the city, visiting the Halles and many of the new improvements which are always going forward. He was everywhere well received. On Sunday he made a progress on foot in the Bois de Boulogne, to see the running for the Grand Prix de Boulogne, and on Monday for the Derby. The Imperial yacht has been sailing about the Mediterranean and paying visits to the King of Portugal and the Queen of Spain.

The King of Greece arrived at Paris on Wednesday night.

The Senate and the Corps Législatif will assemble on the 5th of November.

M. Billault died at Paris on Tuesday morning, in his fifty-eighth year. He was the most eminent Orleanist left remaining in the country or Chambers. Wednesday's *Moniteur* says :—"The death of M. Billault causes a sorrowful emotion throughout France. His services in the administration of the State, as well as to the Empire, whom he served with equal devotedness, talent, and eloquence. His obsequies will be celebrated at the cost of the Treasury.

Marshal D'Ornano also died on Tuesday. He was the last surviving General of the Empire. The Paris papers, and especially the Orleanist journals, pay the Emperor took an affecting last farewell of the gallant old officer on Monday.

Considerable changes are announced in the French diplomatic service. Baron Gros, the Ambassador in London, who had long wished to retire into private life, is ordered at last to take a letter full of compliment from the Emperor himself. The Prince De la Tour d'Auvergne, at present French Ambassador in Rome, is appointed to the British Court, and the Baron de Malaret, at present at Turin, succeeds to the Roman Embassy; and the Baron De Malaret is transferred from Brussels to Turin.

The *Mémorial Diplomatique* affirms that the Emperor Napoleon has expressed to the Archduke Ferdinand Maximilian a reply to the Mexican deputation; that measures will be taken in Mexico to ensure a national vote in favour of monarchy; and that the Archduke will probably leave for Mexico in February or March next.

SPAIN.

The Empress of the French arrived at Seville on Wednesday week. On Saturday she left Seville for Madrid, and on the 14th was in Madrid on Wednesday, whither she has been invited by the Queen. The Queen will give a grand ball in honour of the Empress.

Spain is at present in a condition of great political excitement. At the capital the elections are completed, and have resulted in favour of the Government.

The Minister of Finance has tendered his resignation, for reasons unconnected with politics. Senor Lesciela has been appointed Minister of Finance.

The Budget for 1864 of the Department of War, Marine, and the Colonies will be, it is said, short an eighty-five millions of reals.

A terrible accident has occurred on the Barcelona line of railway. A train from Barcelona reached a bridge over a river before the bridge gave way and the locomotive and seven carriages were flung into the water. Several were killed, and many severely injured.

ITALY.

Prince Humbert, the heir apparent, arrived at Naples on Wednesday. Salutes were fired by the ships and forts. He will take up his residence in the palace of Capo di Monte, the work of supplying it with plate in that city—the want of a Court.

Prince Amadeus, Duke of Aosta and Prince Savoy-Carignan, with a squadron of the Italian fleet, have arrived at Lisbon on a visit to the Court.

The Hon. Mr. Elliot, the new English Ambassador, arrived at Turin yesterday week, and had an interview with the Minister of Foreign Affairs. On Sunday he had an audience of the King, and presented his credentials.

The King of Bavaria has arrived at Rome, and taken up his residence at the Villa Malta.

General de Montebello, the French Commander-in-Chief, has left Rome for Paris, where the Duchess is seriously ill.

According to a Rome letter, the Pope has had a grand *auto da fé* made on an immense pile in the gardens of the Vatican of all the documents which might seem to compromise the dogma of the temporal power.

AUSTRIA.

The Emperor Francis Joseph returned to Vienna on Tuesday.

In Wednesday's sitting of the Upper House a resolution was passed unanimously for the erection of a monument to the late Archduke.

A debate in the Transylvanian Diet at Hermannstadt resulted, on Friday, in the adoption of a resolution to send deputies to the Vienna Reichsrath, in order to treat for the re-union of Transylvania with Austria. Cheers for the King of Hungary and the Constitution of the empire.

GERMANY.

Another step towards the incorporation of Holstein was taken on Thursday week. In that day's sitting of the Diet the four Governments called upon by the federal decree of the last inst. to carry out the "execution" in Holstein announced that they had begun the order in the event of its becoming necessary.

Oldenburg has declared its intention to declare the stipulations in the treaty of 1851-2 to have lapsed, should the execution be opposed by Denmark.

The *Cologne Gazette* and other German papers allege that a despatch has been recently received from Earl Russell, of which they profess to give the substance, in which the latter, in a friendly and conciliatory, but hereby seriously urging that the dispute between Denmark and Germany be referred to the arbitration of the Five Powers, though not interested in the quarrel itself, are anxious to preserve the peace of Europe and the independence of Denmark. Lord Russell likewise, as some of these papers assert, intimates to the Danish Government, in no unfriendly manner, that the Treaty of 1852 is not to be remarked in an ordinance dated March 30, did not conform to its previously-contracted obligations, and that he could not, in the circumstances, be a federal execution; while the Confederation, on the other hand, would not be justified in assuming that Holstein, by the terms of the Act, done without affecting adversely the integrity and independence of the Danish monarchy.

DENMARK AND SWEDEN.

The Copenhagen *Fœdrelandet* of Wednesday says :—"A treaty of alliance with Sweden has now been concluded, and will be signed in a few days."

On the other hand, a despatch from Berlin asserts that Sweden will not sign the treaty. The reason is said to be that the Swedish Chamber of Deputies refused the signature would be productive of no benefit to the Scandinavian cause. Moreover, the conclusion of the railway loan of thirty-five millions just determined upon. It is further stated that the French and Russian Ambassadors at Copenhagen have impressed upon the Danish Government the necessity of preserving peace. Nevertheless, it does not seem likely that the Danish Government will readily submit to a federal occupation of Holstein.

On the 7th inst. there was a State dinner given at Stockholm, at which Prince Oscar, Sweden, proposing a toast to the King, said, in reference to the political situation of the country, "I believe I am able to declare that every one, like myself, is ready to sacrifice his life for the honour, independence, and rights of Sweden. But I am convinced that his desired peace; but that, if it could not be maintained, he would find a support in the fidelity of his people."

PRUSSIA.

The King of Prussia has left Baden-Baden for Cologne. Herr von Bismarck has gone to Berlin. The King of the Belgians paid a visit to the King at Baden, with the intention, it is surmised, of giving his Majesty some reasonable advice.

A deputation from the parish of Steingrund, in Silesia, has presented an address to the King. His Majesty said, in reply, that the parish should elect men who would support the Ministers in the execution of the task he had confided to them. His Majesty further said that an inimical bearing towards the Government was incompatible with fidelity to the Sovereign. The work with the carrying out of which the King has intrusted his Ministers is the maintenance of the privileges and constitution of the Monarchy. Concessions to "Then tranquillity would be re-established in the country, and the

RUSSIA.

execution of my intentions to forward the progressive development of legislation on a constitutional basis would be assured."

Great preparations are being made throughout Prussia to celebrate the fiftieth anniversary of the battle of Leipsic upon the 18th. A Royal decree has been surrounded by special services on the occasion in all the churches.

THE POLISH INSURRECTION.

The National Government has brought the insurgent chief, Sokolowski, before a court-martial. The prisoner was found guilty of abuse of authority, and sentenced to be shot.

In consequence of information received by the police, a search was made on Sunday at the Grabowski Palace, in the Mets Strasse, Warsaw. It is said that cannon, cartridges, and ammunition were found on the premises. The proprietor and male inmates were arrested, and the palace has been surrounded by soldiers.

New bands are daily making their appearance. In the palatinate of Cracow there are four well-appointed detachments under Chmielnicki, Jekra, Jemore, and Lelewel. The National gendarmerie is at the head being organised by Narbutt, brother of the late famous chief of that name in Lithuania. A band of 200 men had possession for a moment in the palatinate of Kalisch for the insurrectionary army.

A workman employed at the Government Foundry at Cracow (a British subject), at Warsaw, has been shot by the Russians in the factory yard for making grenades. All the workmen of the factory were compelled by law to be witnesses of the fate of their companion. It is understood that Alger met his fate with determination, and rejected an offer of pardon upon condition of denouncing the accomplices made upon the place of execution. He leaves a wife and two children. The foreign vice-consul at Warsaw, General Berg, and was to remain so until Mr. Evans should have paid a fine of 15,000 roubles, but the British Consul-General protested against the fine, and it was therefore remitted.

Some of the persons who were arrested in the Zamoyski houses have been released; but the chief of them, however, remain still in the citadel. Zamoyski's son, the merchant, Krupecki, and the superintendents of both houses are detained in the citadel as State prisoners. Mr. Hall, Messrs. Silver, Fox, and Wyndham, all Polish nobles, and Wrobliwski's wife, have been shot in Warsaw; the latter on suspicion of having acted as a spy in the interest of the insurgents.

An Englishman named Apel, or Appel, has got into mischief in Poland. After the battle of the 6th in which Lelewel was defeated, his detachment dispersed. Mr. Apel (according to Russian accounts) ascended a tree, and while among the branches was fired at by a Cossack. The Cossack missed his mark, the loving branches was had no doubt heard the story of the American season, and he would not trouble him. Mr. Apel came down of his own accord, and came down, and having rewarded the Cossack for his bad firing, Mr. Apel was taken prisoner and conducted to the town of Lublin, where he was invited to dinner by the General Commandant, placed in cell of the Emperor, and according to the Lublin correspondent of the *Czas*) (*Times* organ) "he was treated with his release and a passport provided to an impression that he was the *Times* correspondent, but the *Times* entirely disavows him. He has been given up to his Consul at Warsaw.

GREECE.

The National Assembly and the people generally have received the resolution of the Ionian Parliament in favour of union with Greece with great enthusiasm.

The English Ambassador is stated to have threatened a joint occupation of Athens by England, France, and Russia, if the troops who took part in the insurrection of June last are allowed to remain in the capital.

The Paris *Pays* states that fresh disorders have occurred in the Greek provinces. A great display of force was necessary at Nauplia in order to prevent a sanguinary collision.

TURKEY.

The Budget has passed the Grand Council. The *Levant Herald* announces that there is a surplus of £188,794.

It is said that the Turkish fleet is to buy the steam-rams which are being built in the Mersey, and that Earl Russell is favourable to this solution of the difficulty.

According to a telegram from Alexandria, dated Wednesday week, the Nile has not risen any higher, and has not caused any fresh destruction of property.

The Porte has addressed a note to the Viceroy of Egypt, reiterating the arguments in Ali Pacha's note relative to the Suez Canal.

The Sultan has given orders to construct at Mashia a camp on the model of that of Chalons, to manœuvre there 10,000 men in the spring.

A letter from Mount Lebanon, dated the 19th ult., relates that a party of Druses, headed by Said Bey, a nephew of Yusuf Bey, had crossed the frontier, and falling in with two Jesuit missionaries who were on their way from Zahle to Deir-el-Kamur, stopped them and plundered them of their money, watches, and clothes, and left their shirts and drawers barefooted and bareheaded, to find their way to the nearest village. The Jesuit missionaries were Mr. Bonnetti, an Italian, who is Superior of the Order in Syria, the other was an English person, a son of Sir Stratford Canning's Padre.

The Kurds in the neighbourhood of Damascus have attacked the Turkish troops, a hundred of whose number were killed. The chief of the Zaptiés, who came to the assistance of the troops, lost sixty men.

AMERICA.

We have news from New York to the 6th inst. by the City of Washington.

From the point on which at present mostly concentrates, Chattanooga, the intelligence is scanty. There is great discrepancy in the telegraphic despatches with regard to Rosecrans's position and prospects; but the latest news is to the effect that considerable skirmishing was taking place in the General's rear, the Confederates endeavouring to cut off the communications between him and Chattanooga; that a large number of troops had reached Rosecrans, who had established his line of defence between Chattanooga and Bragg was fortifying Missionary Ridge. It is also affirmed that Rosecrans had reinforced himself with two whole corps from Meade's army. The Southern journals report that the Confederates occupy Knoxville, and that Burnside was retiring to Cumberland Gap. Longstreet's force is considerable though Gen. War. General Bragg stated that, in the battle of the 20th ult., he captured 7000 prisoners, thirty-six guns, and twenty-four stand of colours. The Baltimore correspondent of the *Herald*, under date of the 22nd ult., states that Confederate prisoners describe Atlanta, in Georgia, as the largest depôt of manufactory of arms and ammunition in the Confederacy, and that every preparation has been made to successfully defend it.

Nothing was very certainly known respecting the force or position of the hostile armies in Virginia. It was, however, admitted that the Federals had not crossed the Rapidan, though they were said to hold the fords of that stream and the highly important Orange and Alexandria, and were also reported to have marched some 10,000 men at Mount Jackson for a "raid" into the Shenandoah Valley.

No progress was reported in the Federal operations against Charleston.

A very warm reception had been given by the people and municipality of New York to the officers of the Russian squadron; and, in speeches at various entertainments, hopes were expressed that, if the United States engaged in a foreign war, American and Russian would fight side by side. At a dinner given to the Russian Admiral Lisovski, Mr. Seward, in a letter which had been made a speech in which, referring to Russia, he expressed a hope that present circumstances would end peacefully. The Russians, however, were ready for any sacrifice, and, as Moscow was burned, so they would not shrink from burning St. Petersburg if necessary. If foreign nations were for peace, the Russians would receive it on honourable terms, and bless God for peace. A speaker, named Wallingford, observed that Russia, in sending a fleet to New York, wished to have it where, at a given signal, it could sweep English and French commerce from the seas. Some other silly speeches were made.

The New York Harbour Committee report the harbour to be in a perfect state of defence. Vessels passing Sandy Hook would be exposed to the fire of 400 guns of heavy heaviest calibre.

According to the *New York Evening Post*, the recent con-criptions

had not produced more than 50,000 to 75,000 effective recruits; and President Lincoln had already resolved to order, before the end of the year, a fresh conscription of 600.000 men, under some new regulations, which would render it certain that at least 200,000 effective soldiers would be produced by it. The *New York Tribune*, however, denies that there will be any further draught.

The famous blockade-breaker Juno has at last fallen into the meshes of the Federal blockade. She was captured on the 22nd of September, off Wilmington, North Carolina, after a chase of four hours, during which the United States' cruiser Connecticut fired thirty rounds of shell and solid shot. The Juno threw overboard part of her cargo of cotton. She is an iron vessel of upwards of 1130 tons burden, side-wheel, built at Bristol, and is about ten years old. The cargo consisted of 200 bales of cotton, three tons of tobacco, and a quantity of turpentine; and is valued, together with the vessel, at 100,000 dols. The Juno, at the time of her capture, was bound to Bermuda. The Confederate steamer Ella and Annie arrived at Hamilton, Bermuda, on the 7th ult., with a large cargo of cotton, tobacco, and turpentine. The following is a list of Confederate vessels keeping up communication between Wilmington and other Confederate ports and Bermuda:—Robert E. Lee, A. D. Vance, Eugenie, Phantom, Gladiator, Hansa, Harriet Picknay, Nashville, Beauregard, Lady Davis, Banshee, Venus, Ella and Annie, Phœbe, Miriam, and Minho. The Boston District Court had restored the ship Banshee. The steamers Phantom and Arabia have been destroyed off Wilmington. It is reported that the steamers Advance and Elizabeth have been captured. Advices from Nassau to the 26th report that seven steamers from Wilmington and three from Charleston had arrived lately. One of the latter left Charleston eleven days after the surrender of Forts Wagner and Gregg, proving that the port is not closed

INDIA.

A telegram from Bombay, dated the 27th ult., reports disturbances upon the north-west frontier, but, it adds, nothing of a serious character has taken place.

JAPAN.

By the arrival of the Hecla at Liverpool from New York we receive intelligence of an alleged repulse of the British fleet sent to attack the fortresses of the Prince of Satsuma. The news is contained in a San Francisco despatch, dated Sept. 28, and quotes "Japanese accounts" as the basis of the statement. As the British fleet entered the inner harbour, says the report, an armed Japanese decoy-boat drew towards the shore, was pursued, attacked, and speedily sunk. Masked batteries then opened on the fleet from the shore, riddling the advance vessels before they could get out of range. The Japanese claim to have disabled the greater portion of the fleet, and stated that the rest retired from the contest.

AUSTRALIA.

(From our own Correspondent.)

We have received intelligence from Melbourne, Adelaide, and Sydney to Aug. 26, and from Brisbane to Aug. 25:—

VICTORIA.

When Parliament met on the 4th inst., after the Ministerial elections, it was evident that the new Government had it all their own way—the Ministerial side of the house being crowded, while the occupants of the Opposition benches were "few and far between." The Government is undoubtedly the strongest and ablest that has been in office for several years; and, backed as it is by such a large following, the country has now a right to look for something really statesmanlike in our legislation. Several measures of local importance have been passed; and the new Land Bill has been read a second time, and is now being discussed in Committee. This bill only proposes to amend the errors of the Act of last Session. It, however, goes further than that, as it recognises the principle of deferred payments. It is proposed to have 4,000,000 acres always available for selection, and any one selecting an allotment may do so on the condition that £5 an acre be paid on possession being taken. Possession and cultivation are both made imperative, otherwise the selector forfeits his deposit money. A period of three years is allowed for the payment of the balance of the purchase money, and, at the expiration of that time, the Crown grant is issued, provided all the conditions have been complied with.

Colonel Pitt arrived here the other day, commissioned by the Auckland Government to engage volunteers for active service in the New Zealand war. His tempting offer is daily pay (and clothing and rations), at the following rates:—Captains, 14s. 7d.; lieutenants, 9s. 6d.; ensigns, 8s. 3d.; sergeants, 3s. 6d.; corporals, 3s.; privates, 2s. 6d. Each volunteer, after three years' service and compliance with certain residential terms, is to receive a certificate entitling him to one town allotment and one farm section. The farm sections are to be thus allotted:—For a field officer, 400 acres; captain, 300; surgeon, 250; subaltern, 200; sergeant, 80; corporal, 60; private, 50. Pensions for the wounded and the widows of the killed are also provided for. There has been quite a rush to the offices of Colonel Pitt, and the probability is that he will take away from this colony from 800 to 1000 young men able and willing to serve in this emergency.

Sir Henry Barkly is making arrangements to leave about the middle of September, when the arrival of his successor, Sir Charles Darling, may be expected. Now that Sir Henry is about to leave us universal regret is felt at his departure, and every effort will be made to testify to the high estimation in which he has been held by the people of Victoria. The banquet to be given in the city, on the 3rd proximo, will be a grand affair, as will also be the demonstration at Ballarat, at both of which his Excellency has promised to be present. Both Houses of Parliament and the City Council will vote addresses to him, and the Government will place in the supplementary estimates a sum for his portrait or bust for the Parliamentary library.

The Mayor's grand fancy-dress ball, which is to take place in the exhibition building to-morrow evening, is for the present the chief theme of thought and speech. It will exceed in novelty and grandeur anything of the kind ever witnessed in this part of the world. There will be upwards of 2500 persons present, and none will be admitted unless attired in fancy costume.

SOUTH AUSTRALIA.

There is little news of importance to report from this colony.

An Act has been recently passed by the Legislature legalising marriage with a deceased wife's sister.

Several new copper mines have been discovered, and the intelligence from those now being worked continues to be satisfactory.

An expedition is fitting out for the exploration of Stuart's country in the north-west.

His Excellency the Governor lately fell from his horse, and received some slight injuries, from the effects of which he has recovered.

NEW SOUTH WALES.

Volunteering for the New Zealand war is going on here with considerable spirit, and the Government is lending every practicable assistance to the movement. A few of the Imperial troops will be also allowed to go, but some will be retained, as the social condition of several of the districts of the interior is so disorganised, in some places, in fact, travellers are at the mercy of the bushrangers, whose outrages are as numerous and daring as ever.

The Madras Royal mail steamer takes away 157,000 sovereigns and 10,000 ounces of gold.

QUEENSLAND.

The country journals are filled with statements as to the discovery of gold fields; but, although one or two districts have been proclaimed as gold fields, they have scarcely yielded sufficient to entitle them to the designation.

Captain Towns, a wealthy and enterprising colonist, has imported a cargo of South Sea Islanders for the purpose of working his cotton plantations near Brisbane. Many profess to be much scandalised at this proceeding; but it must be borne in mind if Queensland or any other of the Australian colonies are to successfully grow cotton it must be done by coolie or similar labour; experience having proved that the British labourer is unsuited for such work, not to speak of the drawback which his large wages would exercise over the development of the enterprise. It is reported that kidnapping has been resorted to in the case of some of Captain Towns's importation; but this is incorrect, as an agreement was voluntarily signed by all.

NEW ZEALAND.

Matters in New Zealand have reached such a crisis that instant and united action on the part of all the Australian colonies must be taken to subdue the rebellion. A war of extermination seems now inevitable, and in this work—so universal is the disaffection—the British need not expect either sympathy or support from any of the Maori race. The latest news discloses the fact that the rising is universal, and that it is the result of a long-cherished and comprehensive plan. About 8000 natives are in arms, and they have somehow become possessed of four heavy guns. They are plundering and murdering the settlers in the outlying districts, and on the 6th of August, upwards of a thousand strong, they attacked the Avon steamer on the Waikato river. They received such a warm reception from the Avon's Armstrong guns that they will probably hesitate before attempting so bold a venture a second time. They have established a formidable position on the Waikato; but the British authorities are acting with vigour and discretion, and, until they are reinforced with troops and volunteers from the other colonies, will have no difficulty in maintaining their ground. An attack on Auckland is apprehended, and the city is being defended. Several skirmishes have taken place, in which General Cameron evinced great bravery and judgment.

METROPOLITAN NEWS.

The National Portrait Gallery, 29, Great George-street, Westminster, will be closed for repairs and alterations during November.

Mr. Andrew Lusk has been elected Alderman for the ward of Aldgate, in the room of the late Alderman Humphery.

Parliament was formally prorogued on Wednesday for a further period of six weeks—to the 1st of December next. The Lord Chancellor appeared in his robes on the occasion, but the House of Commons was represented only by a couple of clerks.

The Sacred Harmonic Society commenced its rehearsals for the season, at Exeter Hall, on Friday evening. The concert season will commence on Friday, Nov. 13, with Mr. Costa's oratorio, "Eli." The principal vocalists at present engaged are Mdme. Rudersdorff, Mdme. Sainton-Dolby, Mr. Sims Reeves, and Mr. Winn.

The National Choral Society announce the commencement of their new season on Wednesday, Nov. 25, when Handel's oratorio, "Judas Maccabæus," will be performed, with a band and chorus of 700. Mr. Sims Reeves has been engaged for the ten subscription concerts to be given by this society during the forthcoming season. Mr. Santley will also sing in "Judas Maccabæus." Conductor, Mr. G. W. Martin.

The claims and the wrongs of Poland were discussed on Monday evening at a crowded meeting, held at the Cambridge Hall, Newman-street, Oxford-street. Mr. Edmond Beales presided, and eloquently enforced the claims of the Poles for British sympathy. Subsequently an able address on the subject was delivered by Dr. Perfitt, and resolutions in accordance with the object of the meeting were passed.

The vestry of the parish of St. Mary, Islington, have determined upon forming Islington green into an ornamental flower-park. A plan from a design by Mr. Hibberd has been accepted, which in a short time will be carried into effect. It is proposed to have a central avenue of plane-trees, with a gravel walk in the centre, and seats for the accommodation of the visitors. Each side will be laid out in grass plots and evergreen trees.

In accordance with an order issued by the Chief Commissioner of the Metropolitan Police directing the superintendents of each division to make a report of what their men on duty on the morning of the 6th inst. saw or heard of the earthquake, if anything, numerous reports have been returned. Out of about 700 policemen who were on duty on the morning in question only one felt any movement of the earth, which goes to show that those persons in a recumbent position were much more sensitive to the earth's vibration.

On Monday operations were commenced by the London and Brighton Company for the accommodation of their increasing traffic at London Bridge, the station-room at present existing there being found totally inadequate for the purpose. The widening of the main line leading into the terminus at London Bridge, together with the viaduct, about 100 ft. wide and 2000 ft. in length, leading up to the terminus, was commenced by a large body of workmen, and others were engaged in demolishing the buildings bought by the railway company.

The distribution of prizes and certificates awarded by the Society of Arts to the members of the London Mechanics' Institution took place on Wednesday in the theatre, Southampton-buildings, Chancery-lane. Mr. Harry Chester, Vice-President of the Society of Arts, who occupied the chair, congratulated the meeting on the continued success of the institution, which, he said, was the parent of all the other mechanics' institutions in England, and on the satisfactory result, as regarded its members, of the last examination by the Society of Arts, stating that the number of certificates and prizes obtained in that examination was much larger than on any previous occasion.

Last week the births of 1873 children—962 boys and 911 girls—were registered in London. In the ten corresponding weeks of the years 1853-62 the average number (corrected) was 1818.——The total number of deaths registered in London last week was 1258. The average number in the corresponding weeks of the ten years 1853-62, after the omission of deaths from epidemic cholera in the forty-first of 1854 and a correction for increase of population, becomes 1126. Thirty-one deaths from smallpox were returned, and 146 from scarlatina. A man died at the age of 96 years; a woman, aged 77 years, died of elephantiasis; and a boy five years old from swallowing a cherry-stone.

Five hundred French excursionists from Calais and Boulogne visited the Crystal Palace on Monday, when a variety of amusements were provided. Blondin's low-rope performance was loudly applauded, and frequent repetitions of the Ghost illusion appeared to afford much gratification to the excursionists. In the afternoon the Prince of Wales, accompanied by the King of the Greeks and Prince Christian of Denmark, with a numerous suite, visited the palace, and witnessed a portion of Blondin's performance. On their Royal Highnesses and his Majesty taking their seats upon the Handel orchestra, they were at once recognised and cheered vociferously by the assembled thousands, the band of the company at the same time playing the National Anthem. On their departure the band of the Coldstream Guards performed the Danish national air. The palace was lighted up in the evening.

The adjourned general meeting of shareholders of the Great Ship Company was held on Monday at the London Tavern, when the committee of inquiry brought up a long report, of which the chief feature was that the shareholders should raise an additional sum of £50,000 to relieve the ship from immediate pressure and fit her out for a voyage to India. The report was adopted. On the other hand, the chairman of the board of directors stated that the ship was no longer in the hands of the shareholders, the trustees on behalf of the bondholders having taken possession, with instructions to sell on the 1st of January, in the event of no arrangement being come to in the meantime. Another meeting is appointed for the 3rd of November next, with the object of getting new directors and doing such other things as may be necessary for the maintenance of the company. A resolution was also agreed to inviting the directors to co-operate with the committee to raise the necessary funds to carry out the recommendation of the report; but the chairman of the board, considering he had not been properly treated by the committee, declined to co-operate in any way, stating his belief that it was useless for him to do so, as the ship was, in effect, out of their hands.

San Domingo continues in a disturbed condition. Santiago de Caballeros had been burnt.

We hear from Munich that the debates of the Conference on the question of the Zollverein have terminated. At the final sitting, which took place on Sunday, the protocol was signed.

The *Journal de Chartres* mentions the death of a widow named Girard, at Seize, near that place, at the patriarchal age of 110; she possessed all her faculties to the last.

Wurtemberg has celebrated, with the usual solemnities, the eighty-third birthday of its Sovereign. The aged King was present at the representation at the Court Theatre, and visited an agricultural exhibition at Cannstatt, in an open carriage.

Important news comes from Belize, to the effect that the President of Guatemala, aided by Nicaraguans, had invaded and captured Comayague and Tegucigalpa, in Honduras, committing atrocities and banishing the British Consul from Spanish Honduras, and that the British Consul at Truxillo had sent for assistance.

The King of the Belgians, whose health is perfectly restored, has arrived at Baden on his way to Italy. His Majesty paid a visit to the King and Queen of Prussia. King Leopold intends to pass some time at his villa on the Lake of Como. His Majesty travels under the name of Count d'Ardenne. It is rumoured that the King will pay a visit to England.

Sir Roderick Murchison has received a letter from Dr. Livingstone, dated Murchison Cataracts (on the Shire), April 25, announcing the death of Mr. Richard Thornton, a distinguished young geologist, on April 21, of diarrhœa and dysentery. After alluding to the depopulation of the valley, and the probability of his being obliged to take to pieces the steamer, and screw her together, with the view of a sale, Dr. Livingstone thus concludes:—"Dr. Kirk and Mr. Charles Livingstone now go home. The scene of desolation around us reacts on my health badly." Sir Roderick Murchison earnestly hopes that the great South African explorer may now come home to his motherless children and numerous friends, and not expose his valuable life to further risks.

COUNTRY NEWS.

The final accounts of the Worcester Festival show a balance of £427 in favour of the stewards, in addition to the £1121 collected at the cathedral.

Dr. George Bellamy, who served with Nelson in some of his great actions, died at Plymouth on Sunday. He was born Nov. 15, 1773.

It was decided at a meeting held at Manchester on Tuesday—the Mayor in the chair—to form a "Manchester Association for the Abolition of Capital Punishment."

Sir George Grey is in communication with the Mayor of Guildford on the subject of the prevention of disturbances within the borough on the 5th of November next.

On Monday the Mayor of Manchester (Abel Heywood, Esq.) laid the foundation-stone of a new retort-house, which is about to be erected under the direction of Mr. Lynde, city surveyor, at the gasworks in Gaythorn.

Mr. Samuel Morley has laid the foundation-stone of a new church designed for the use of the Independents and Baptists, at St. Ives, Huntingdonshire. The sum of £3000 was given by Mr. P. Brown towards its erection; also £500 by Mr. Bateman Brown, and £500 more by Mr. T. Coote.

Mr. Mackenzie, of Fawley Court, in redemption of his promise to indemnify the British Orphan Asylum to the extent of its expenditure upon new buildings and grounds at Slough, has drawn a cheque for £14,000 in favour of the directors.

The death of the Archbishop of Dublin formed the chief topic of discourse in all the Protestant churches in Dublin on Sunday. Every church was draped in mourning, and the bells of Christ Church, St. Patrick's, the College Chapel, &c., tolled muffled peals throughout the day.

A fatal accident has happened to Mr. John Newton, of the Robin Hood Rifles. On the return march of the regiment from a review, his bayonet jumped from the sheath as its owner was springing over one of the hillocks on the road, and he fell upon it, the point of the bayonet penetrating his side, through the walls of the heart to the spine.

Great excitement has been caused in Aberdeen by the sudden disappearance of Mr. George Thomson, one of the leading merchants in that city, a defaulter to a large extent, and charged with forgery. Mr. Thomson held a high character in the city. His liabilities are stated to range from £70,000 to £100,000, including forgeries to the amount of £5000 or £6000.

The Halifax Chamber of Commerce has resolved to memorialise the Government in favour of Captain Sprye's proposal for a Government survey of the country between Rangoon and Kiang-Hung, by way of the Upper Camboja, with the view of extending trade and opening up the western portion of China.

The Duke of Devonshire, who has been spending some time among his Irish tenants, visited Bandon on Tuesday week. The *Cork Examiner* says that triumphal arches, banners, and decorations in evergreens, with appropriate mottoes and devices, met the eye in every street and on nearly every house. His Grace, who met with a most enthusiastic reception, formally opened the Townhall.

A railway accident occurred at the Port Glasgow station of the Caledonian line last Friday morning. The early Irish mail passenger-train was just about starting from that station when an engine-tender ran into it. One man was killed, and others were so seriously injured that little hopes are entertained of their recovery. The signalman at the station, and the driver, stoker, and breaksman of the engine-tender have been committed for trial.

The autumnal meetings of the Congregational Union of England and Wales commenced in Liverpool, on Monday evening, by a devotional service in the Newington Chapel, Renshaw-street, when an appropriate address was preached to a crowded congregation by the Rev. John Graham, of Craven Chapel, London, from the 10th chapter of St. John's Gospel, 10th verse. On Tuesday the meetings for transacting the business of the Union opened in Great George-street Chapel, the Rev. Enoch Mellor, M.A. (chairman of the Union), presiding.

A meeting of the subscribers to a memorial in Perth to the late Prince Consort was held in the Townhall last Saturday, for the purpose of determining finally as to the application of the amount of subscriptions. The Lord Provost was called to the chair. The committee had recommended the erection of a hall for literary and scientific purposes, and Mr. Craigie moved that the recommendation of the committee should be adopted. Ex-Provost Imrie moved, as an amendment, that the memorial take the shape of a statue, to be executed by Mr. Brodie, sculptor, Edinburgh, and erected on the North Inch. The amendment was carried by a majority of 30 to 9, and a committee was appointed to see the work carried out.

Mr. John Peel, a Conservative, has beaten the Hon. H. Cowper, the Government candidate, at Tamworth, by a substantial majority. The polling took place on Monday, with the following result:—Mr. Peel, 224; Mr. Cowper, 167. There are six elections still pending—for West Worcestershire, Tewkesbury, Barnstaple, Reading, Richmond, and Plymouth. As regards West Worcestershire, there will be no opposition to the Conservative candidate, and so far there is no indication that the Liberals of Tewkesbury are prepared to contest the seat which Mr. Lygon has vacated in order to take his brother's place in the representation of Worcestershire. At Barnstaple Mr. Lloyd, an advanced Liberal, opposes Mr. Bremridge, who has been brought forward by the Conservatives. With regard to the three remaining seats, it is probable that Lord Palmerston's supporters will have it all their own way.

The Social Science Congress at Edinburgh has been holding its sittings throughout the week. The meetings of the various departments have been for the most part well attended; and several of the papers read, with the consequent discussions, have been of a highly-interesting character. Prince Alfred has been an attentive listener at many of the sectional meetings. His Royal Highness was always warmly received. Yesterday se'nnight the Prince attended a "working-men's meeting," at which Lord Brougham presided, and received an enthusiastic welcome from the 3000 or 4000 artizans who crowded Dunedin Hall. The meeting was addressed on social questions by Lord Brougham, M. Garnier Pages, Mr. Fawcett, Rev. Mr. Channing, of America, and others. The third and last of the conversaziones in connection with the congress—a very brilliant one—was given on Monday night, in the National Gallery and the exhibition rooms of the Royal Scottish Academy. The presidential dinner took place in the Music-hall on Tuesday evening. The company amounted to about 400 ladies and gentlemen. The chair was occupied by the President (Lord Brougham).

An extraordinary act of discourtesy has been committed by the Earl of Leitrim. The Lord Lieutenant recently made an excursion among the hills of Connemara, and proposed spending a night at an hotel on the Earl of Leitrim's property. The landlord of this house, however, received a missive from the Earl, containing the imperative injunction, "Let every room be occupied immediately and continue to be occupied, and, when so occupied, you will refuse admittance to Lord Carlisle and his party." His Excellency appears to have been informed of this, and the Viceregal party passed the hotel without putting the landlord to the unpleasant duty of closing his doors against them. The explanation of this extraordinary conduct, according to the Irish papers, is that the Earl of Leitrim, who was fired at some time ago, fancies that the authorities have not properly exerted themselves for the protection of life in that part of Ireland. This silly insult has been noticed, we learn, in the only way in which it could properly be noticed—by superseding the Earl of Leitrim in the Commission of the Peace for Donegal, Leitrim, and Galway.

The twentieth annual congress of the British Archæological Association commenced in Leeds on Monday. It extends over the whole week, and will conclude on Monday next. The association was established in 1843, its principal object being "the encouragement and prosecution of researches into the arts and monuments of the early and middle ages," and its annual meetings are held in different parts of the country. The congress this year is held under the presidency of Lord Houghton, who has been connected with the society since its organisation. During the week the members have taken part in excursions to various places in the West Riding possessing objects of archæological interest; and in the evenings, after their return to Leeds, papers have been read, and discussions upon them taken place, at the Philosophic Hall. The proceedings commenced on Monday afternoon, when the president delivered the inaugural address; and in the evening the Mayor and Corporation entertained the society at a conversazione in the Victoria Hall. At three o'clock Lord Houghton and the council of the society were received by the Mayor and Corporation in the reception-rooms at the Townhall. They then adjourned to the Victoria Hall, where a fashionable assembly was gathered.

The Earl of Derby, on Saturday last, distributed the prizes and certificates awarded to the pupils of the Liverpool Collegiate Institution by the conductors of the Oxford middle-class examinations. Twenty-three years ago the noble Earl laid the foundation-stone of the collegiate institution—a school established with the view of improving upon the old system of what is colloquially called "middle-class education"—and the ceremony of Saturday suggested to his Lordship's mind a comparison between English education as it is and English education as it was a quarter of a century ago. The noble Earl traced the progress of public education in this country for the last twenty-three years, and spoke at length upon the great advantages which had been conferred upon it by the new University system of local examinations, which had, as it were, incorporated the schools of the kingdom with those seats of learning. He also dwelt upon the great importance of combining religious with secular instruction, pointing out that no amount of intellectual acquirement would tend to the ultimate success in life of the youth of the country unless founded upon the firm basis of religion and morality. The noble Earl also defined with great accuracy and ability the position of the middle classes with reference to our educational establishments, and spoke in high terms of praise of the Collegiate Institution of Liverpool, which afforded the means of educating both higher and middle classes. The address of the noble Earl was listened to with the greatest attention by an audience of more than 2000 persons, and greeted by continued cheering.

"WAITING FOR FATHER."

THE little picture engraved below (a "finished study" for which was in the last Exhibition of the Society of British Artists) tells its simply story too plainly to need description. The glimpse of sea and distant cliffs, and the jersey jacket hung to dry show that the scene is a fishing-station on the coast; while the basket of provisions and the can of broth or tea held by the little girl, together with her loving, expectant expression, indicate that the child's father is a fisherman, who, with the tide, will make for the shore for his customary meal. To the reader's imagination we will leave the pleasant circumstances suggested in this simple incident: the humble joy of the expected return, even now, when the sea and sky are serene and bright, with the contrast when the return is looked for with agonised apprehension by wife as well as child—all, to use the eloquent words of Mr. Ruskin, "the joy and beauty of the sea the while so mingled with the sense of unfathomable danger, and the human effort and sorrow going on from age to age—waves rolling for ever, and winds moaning for ever, and faithful hearts trusting and sickening for ever, and brave lives lashed away about the rattling beach, like weeds, for ever; and still at the helm of every lonely boat, through starless night and hopeless dawn, His hand who spread the fisher's net over the dust of the Sidonian palaces, and gave into the fisher's hand the keys of the kingdom of Heaven."

LEAH'S DESOLATION.

THE tragedy of "Leah" has made its mark on the time and secured a place on the boards. The energy of Miss Bateman is undoubted, and her intelligence enables her to surmount the difficulties of an inflexible organ, and give to her performance the semblance of passion. Our Illustration this week presents her in the height of her despair, after the marriage of her lover with her Christian rival, when, with a broken heart, she pronounces the dreadful malediction, on the Lorens family, and leaves the fatal spot where she had suffered more than a common persecution. Apart from its character as illustrative of Jewish feeling in the utterance of the curse, this scene has a domestic interest which, on the stage, is always certain to be effective; and, in combination with a strong situation and high feeling, it is not to be wondered at that such an interest should make a deep impression on the house. The author of this drama has shown great skill throughout, in blending the elements of a very simple plot—simple almost to barrenness with those of national character, and placing his persons in such decided contrasts as to ensure the most striking results. It is due, however, to the performers to add that the piece is much aided by their efforts to give importance to parts which are rather sketched than filled in. To Mr. Stewart, Mr. Billington, and Miss Henrietta Sims much credit is due for the talent with which they have sustained situations which depended especially on the manner in which they were acted.

"MANFRED" AT DRURY LANE THEATRE.

IT is nearly fifty years since Lord Byron's tragedy of "Manfred" was written, and called forth the different and conflicting opinions of the critics of his day. In these opinions, as well as in the poem, there was a considerable amount of obscurity, due as much, perhaps, to the time as to individuals. Byron misunderstood himself and his age, and both were still more misunderstood by their reviewers and historians. The impulses and influences that were set in motion by the French Revolution swayed and governed some spirits with such impetuosity that they were driven forward with an unreasoning velocity, and neither knew nor recked of the goal to which they were travelling. Of these was Byron, who was made the sport of the whirlwind, and compelled to voyage a stormy circle in which there was motion but no progress. In the breaking up of old conventions, we fear that he saw only the destruction of moral systems and social manners, and not, like Shelley, the painful transition to a future cycle of glorious regeneration and permanent reform. Byron's mind, unlike that of Shakespeare, saw not "the soul of goodness in things evil," but in all that the world had held as good suspected the lurking spirit of evil. He despised himself and his kind—

> How beautiful is all this visible world!
> How glorious is its action and itself!
> But we, who name ourselves its sovereigns, we,
> Half dust, half deity, alike unfit
> To sink or soar, with our mix'd essence make
> A conflict of its elements, and breathe
> The breath of degradation and of pride,
> Contending with low wants and lofty will,
> Till our mortality predominates,
> And men are—what they name not to themselves,
> And trust not to each other.

Such was the poet's fixed creed, and to which he gave expression by the mouth of Manfred. They who criticised the creed and the poem saw plainly enough the immorality as well as the cynicism of the doctrine; but all were not aware that the doctrine itself, including the poem and its author, were symbols of the universal reaction against that misgovernment and misbelief which in high places opposed the progress of improvement, whether in speculation or practice, whether in private or public. The poem of "Manfred," and some other of Byron's productions also, were valued as protests against existing abuses rather than censured for any opinions that they might themselves contain, and how better were readily contoned for the sake of the force and vigour with which they witnessed against the evils which now mankind had long felt to be intolerable. Such a poem in a dramatic form was, so far as the theme was concerned, well adapted to the stage of the time the spirit of which it breathed. But Lord Byron, who had gathered some bitter experience of the stage as a member of the Drury-Lane committee, shuddered at the thought of adapting his poem to its conditions, and laboured to render it as ineligible for the boards as he could. He thought, indeed, that he had made it quite impracticable for the stage. In this he was certainly mistaken, for there was one element in it which naturally attracted the attention of managers—that of spectacle. It was, however, nearly twenty years before it found its way to the footlights, when it was produced by Mr. Bunn, at Covent Garden, and an actor of the name of Devrell achieved considerable popularity by sustaining the character of the misanthropic hero. And now, having rested for thirty years more, it is revived at Drury Lane, and once again makes its appeal to a London audience.

During the interval the world has grown wiser than either the poet were inconveniently prolonged; they even rendered their object nervous, and Mr. Phelps began in a tremulous key which created fear lest his memory or courage should falter before his confidence was perfectly restored. The opening soliloquy, however, was judiciously delivered on the whole, though to its general style an early exception was made that it was declaimed rather than spoken—a fatal mistake where so many verses had to be delivered. Part of this, too, might have been pronounced sitting with advantage, and thus might have been spared much of that walking to and fro the stage, which became the subject of painful remark. The next scene did credit to Mr. Telbin's pencil, representing a precipice and glaciers night the summit of the Jungfrau, and the opportunity which it gave for scenic setting, both to Mr. Phelps and to Mr. Rayner, who supported the part of the chamois-hunter, was felt as a veritable relief. The latter gentleman, indeed, performed his task exceedingly well, and his clear pronunciation of the text and natural manner were especially pleasing. The curtain fell on the first act to the unanimous applause of the house, and Mr. Phelps and Mr. Telbin responded to the summons of the audience, and appeared at the end, bowing their acknowledgments with which they were met. The second act did not open so well as might have been expected. The scene appears to suffer from the declamatory monotone to which Mr. Phelps had set it, and the exuberant action of his right arm became excessively troublesome to those who were naturally annoyed by its perpetual activity. There is much passion in this scene, properly interpreted; but it was not brought out nor had an opportunity of appearing in the midst of the heavy intonation which made one verses just like the preceding, and, by depriving the parts of distinctiveness, rendered the whole unintelligible. The next scene (and which forms the subject of our Illustration this week) is named in the bills "The Steinbach, a Waterfall in one of the Lower Valleys among the Alps." Of this our readers will be able to form their own conception from the picture with which we present them. It is a grand set, and, when the machinery works with less noise, will better fulfil the purpose of its invention. Here Manfred has his interview with the Witch of the Alps, admirably personated by Miss Heath. This young lady should, however, be mindful of the text. The little she has to say should be correctly said. When Manfred, describing the object of his passion, exclaims, "I loved her, and destroyed her!" the witch asks, "With thy hand?" and Manfred replies, "Not with my hand, but heart," Miss Heath spoilt this by slipping in a little needless and intrusive monosyllable—thus, "With thy own hand?" We fear that she had not read the poem, and consequently did not understand the purport of the question. On the other hand, Mr. Phelps showed a perfect intelligence of the text, and even rose occasionally into passion; but it would have admitted of more transition had it been less declamatory. He was much better in the Hall of Arimanes, where he appears among the nether spirits as a man strong in the power of will and knowledge. This—the grandest scene in the play—has been painted by Messrs. Danson and Sons, and is an effective copy of Martin's "Pandemonium," the Prince of Evil being enthroned on a globe of fire. As a panoramic spectacle it is one of the most magnificent displays ever witnessed, and gives a notion of vastness and sublimity not to be exceeded. One touch of human feeling, too, was met with in this terrible assembly—the fruit of the poet's genius and the actress's art. Miss Rose Leclercq was the phantom of Astarte, and when Manfred exclaimed, "One word for mercy! say thou lovest me!" replied Manfred!" with so tender and touching an intonation that it went to the hearts of all who heard it. In such a play these small parts are of the greatest importance, and Miss Leclercq has done quite right in studying the true meaning and force of the few expressive exclamations which she has to utter.

"WAITING FOR FATHER," BY R. COLLINSON.

The third act offers more scope for human action, and much fine poetry. We regret that some of the latter was excised, such as the description of the Coliseum, and the apostrophe to Rome, which Byron valued himself so highly. The interviews between Manfred and the Abbot are both eminently dramatic; and Mr. Phelps, who acted the latter, felt them to be so, and spoke some of the speeches in a manner that won deserved plaudits. In the last scene, where Manfred confronts Manfred and is defied, we should have thought that Professor Pepper's patent might advantageously have been used, and the whole of the poet's intention carried out by a battalion of the spirits, who rise to daunt the hero and fail in the attempt. A better and more novel conclusion could have been given to the scene than by these means than the somewhat stale contrivance now adopted—the apotheosis of Astarte. But we must take the spectacle as we have it, and be satisfied with what is really done. Altogether, a most gorgeous result has been produced. Its cost in money, labour, and thought has been great, and it merits a large reward. We should have remarked that the choral parts are accompanied by the music of Sir Henry Bishop, which has been fortunately recovered, and which was written by him for this drama when originally produced. We may regret that it was not more carefully executed and more completely conceived by the composer, who, we fear, did his work ever-hastily and not with a due consideration of its importance. For this the present management is not responsible. They have adopted the best obtainable materials, and made the best use of them.

PORT LYTTELTON.

(From a Correspondent.)

THIS land-locked port of Lyttelton—called occasionally Port Cooper and sometimes Port Victoria—is the main, or rather the only, entrance to the Province of Canterbury. The surrounding hills, which are entirely volcanic, vary in height from 3500 ft. to 6000 ft., and bear, on close inspection, very palpable marks of calcination. The port itself is interesting only from the fact of its being the door of the settlement. It is a mean, insignificant little place, inhabited by persons whom business, and not choice, chains to the spot. There are about 2000 inhabitants living there altogether; and it has its own police, gaol, hospital, and three places of worship—all, of course, on a very miniature scale.

The most interesting point in connection with Lyttelton is the cutting of the railway tunnel through the solid rock, upon which the Artist was standing while drawing the panorama now before our readers.

The first stone of the tunnel front in the Heathcote Valley was laid by Mrs. Moorhouse, on the 29th of September, 1862. More than a thousand yards of this tunnelling is now completed. It is 15 ft. wide and 18 ft. in height from the rails. There are about 200 men employed on the works, and it is hoped that the roads will be ready for the rails in about three weeks, the entire distance being about 2181 yards.

A very wise advantage has been taken of using up the materials blasted out of the rock, by making of the débris a deep water jetty from the mouth of the tunnel into the harbour. This will, of course, provide increased accommodation for the shipping in Lyttelton. Mr. Richardson, of the firm of Holmes and Co., is now expected back from England with machinery for completing the boring of the tunnel, &c., and the ironwork for the drawbridge over the river Heathcote, which runs, however, on the other side of the port hills.

The streets in Lyttelton are pretty fairly metalled, and there is a telegraph laid on between Lyttelton and Christchurch, running across the hills, which has been working now nearly a year, without intermission, and in the most satisfactory manner. The buildings are all of wood, and the English church is very pretty, and displays some idea of architectural elegance—a great deal more than can be said of the churches of Christchurch, where the bell-tower of St. Michael's is nothing better than a lych-gate on stilts some 60 ft. high.

Water is occasionally very scarce in Lyttelton, as much as 3s. being paid for a small keg. People who cannot walk across the port hill (and it is a very steep ascent of some 1600 ft. high) can drive round the Sumner-road to Christchurch, and occasionally can get out to sea in a tiny steamer that plies between the Port and the River Heathcote.

There is a Maori village not far from the town, a little to the right; but the inhabitants are few in number and harmless in manners. All the wood about Lyttelton has been destroyed long ago, and the greater part of the flax burnt by the fires that rage during nearly every summer; so the place is barren enough.

The export of wool alone last year was over 10,000 bales; and there are some fifty vessels, of tonnage varying from 10 to 187 tons, registered in or trading from the port of Lyttelton and other ports in the province of Canterbury.

PANORAMIC VIEW OF PORT LYTTELTON, CANTERBURY, NEW ZEALAND, FROM THE BRIDLE-PATH TO CHRISTCHURCH.

INAUGURATION OF A VOLUNTEER FIRE BRIGADE AT MACCLESFIELD.

A VOLUNTEER fire brigade, which had been for several months in course of formation, was on Wednesday week inaugurated at Macclesfield by a procession through the town, the naming of the fire-engine at the park, and a dinner at the Townhall, followed by a ball held in the Assembly Room. The occurrence of several rather serious fires in the town last winter raised the question whether it would not be possible to give greater efficiency to the means of extinguishing fires which the town already possessed in two fire-engines that have seen good service, worked by the constables of the borough aided by a *posse* of specials. The offer of a fire-engine by the Liverpool and London Insurance Company induced the Corporation to forego their intention of remodelling the old fire brigade—which had been in contemplation—in the hope that the attempt made to form a volunteer fire brigade would be successful. The committee having this scheme in hand received several subscriptions from some of the principal fire-offices having agencies in this town, and relying on yet further amounts, determined to put their plans into practical shape. Accordingly, uniforms and equipments for fifty men have been purchased, with all the necessary apparatus belonging to a fire-engine, at an outlay of £600.

The Mayor having consented to name the engine, the brigade met at the Insurance buildings, market-place, on Wednesday week, at two o'clock, and formed in procession, the Rifle Corps band leading the way, followed by the Captain Commandant of the Volunteer Fire Brigade (Mr. T. Burgess) on horseback, the fire-engine (a smart, substantially-constructed, and well-finished engine, of moderate size), mounted by officers and members of the brigade, and drawn by four greys driven by postillions; Mr. Rose, the maker, on horseback; and the rank and file of the brigade, carrying their axes, turn-keys, and other implements. The uniform of the brigade is dark blue, with scarlet facings and black belts, and each man wears a helmet. They presented a good appearance, the neat uniform of the "officers" being especially admired. On arriving at the park the procession was met by the Mayor and several gentlemen of the Town Council and others, and the engine having been drawn up in front of the platform, the members of the brigade formed in line on each side of it, and the ceremony of naming was proceeded with. Mr. Duncalf presented to his Worship an address signed by the chairman and vice-chairman of the fire brigade. His Worship, having made a suitable reply, broke a bottle of wine on the wheels of the engine, calling it "the Alexandra." The procession then left the park.

Our Engraving, which shows the procession leaving the market-place, is from a sketch by Mr. J. F. A. Lynch, of Macclesfield.

THE VIADUCT AND BRIDGES OF THE CHARING-CROSS RAILWAY AT LONDON BRIDGE.

THE great inconvenience and loss of time resulting from the old arrangements which placed nearly every railway terminus in the very outskirts of the metropolis have recently produced a very general desire to carry each line of railway into the very heart and centre of London. It is really a wonder that people so long tolerated the nuisance of blocked streets, and subjected themselves to the loss of time and money which the old system caused. A man doing business in the City, for instance, has frequently occupied as long in reaching London Bridge railway terminus, through the densely-thronged thoroughfares to London Bridge, as would enable him to travel half way to Brighton.

Of the companies formed and the plans proposed to obviate the delays

referred to we have from time to time given various particulars. The Charing-cross Railway Company is one of the most important and extensive of all those which have recently been incorporated. Its purpose is to carry a line from the South-Eastern Railway station at London Bridge along the Surrey side of the Thames to the site of old Hungerford Bridge, and at that spot to cross the river and to have a terminus in old Hungerford Market. This line, therefore, acts as a kind of "metropolitan extension railway" for the South Eastern Company, and it will not only provide accommodation, as we have shown, for travellers to the western part of London, but will afford, also, the much-desired means of direct communication with the city of London itself; for it will have a branch which will be carried over the Thames a few hundred yards westward of London Bridge, and will discharge passengers upon the other side of the river. The terminus of this branch will be in Cannon-street.

Our Engraving shows that part of the new line which is very near its junction with the old South-Eastern railway station. The Charing-cross Railway Company's new line is connected with the South-Eastern upon the side next to Tooley-street, in the Borough, and commences almost immediately with a viaduct which is carried over the site of the old London-bridge Arcade, now demolished; then, by means of a two-box girder bridge, over the road which serves as the approach to the stations of the South-Eastern, North Kent, and London, Brighton, and South Coast companies; and afterwards over the great thoroughfare, Wellington-street, Borough, by means of another iron girder bridge, called the Wellington-street Bridge. Our View shows the situation of these bridges and the viaduct. The "approach bridge" is composed of a long and a short iron girder, the former 207 ft. in length, the latter only 176 ft., the difference in extent being caused by the curve which the line is here meant to take. It is supported by brick abutments. The viaduct is 12 ft. in height and 126 ft. long, and some of its lower compartments are already tenanted by persons in trade, who use them for offices. Of the general nature of the structure nothing need further be said than that its strength and fitness are its sole recommendations. Nothing uglier, nothing more objectionable in an artistic point of view, could possibly have been designed. It is a pity that there should exist such an utter disregard among our railway authorities (who really seem bent upon rebuilding half London) for everything which is not strictly utilitarian. A few hundred pounds, and how many are wasted annually in civic feasts and ceremonials, would have given us a bridge which would have been an ornament to this approach to London. As it is, we must learn to avert our gaze from the structure and to forget its ugliness, which serves, however, to set off the architecture of the fine church of St. Saviour, whose tower may be seen standing high above it in the background of our Engraving.

CALENDAR FOR THE WEEK ENDING OCT. 24.

SUNDAY, Oct. 18.—Twentieth Sunday after Trinity. St. Luke the Evangelist. Sir John Hawkins sails from Plymouth for New Guinea to buy Slaves, 1564. The last "State lottery" drawn, 1826.

DELICATE CHILDREN.—A Lady residing in a very healthy locality, at a short distance from Oxford, wishes to receive into her family TWO or THREE CHILDREN to bring up and educate with her own. They would receive the most careful, mental, and physical training, and their health and happiness would be promoted by every possible means. Their education, with strict reference always to their age and strength, would be systematically carried on under her immediate direction. Children requiring special care, from delicate health, or whose parents are abroad, would here meet with peculiar advantages.—Address A. B. C., care of A. Mac Laren, Esq., The Gymnasium, Oxford.

ROYAL ENGLISH OPERA, COVENT-GARDEN.—Under the management of Miss LOUISA PYNE and Mr. W. HARRISON.—Triumphant success of Wallace's new Romantic Opera, THE DESERT FLOWER.—On MONDAY, 19th, and during the Week, THE DESERT FLOWER—Miss Louisa Pyne, Miss Susan Pyne, Messrs. W. H. Weiss, H. Corri, A. Cook, and W. Harrison. Conductor, Mr. A. Mellon. Commence at Eight; terminate by Eleven. Box Office open daily from Ten till Five.

THEATRE ROYAL, DRURY LANE.—Managers, Messrs. Edmund Falconer and F. B. Chatterton. Great and continued success of the production of Lord Byron's MANFRED, generally acknowledged by the Press and the Public to be one of the most complete and legitimate triumphs of a combination of the highest artistic capabilities presented on the stage for many years. On MONDAY, and during the Week, the performances will commence with the comedietta, by John Oxenford, Esq., of GONE TO TEXAS. Principal characters by Mr. Walter Lacy, Mr. Neville, Mr. Spencer, and Miss Murray. After which, commencing at a quarter before Eight o'clock, Lord Byron's Choral Tragedy of MANFRED. Mortals:—Manfred, Mr. Phelps; Abbot of St. Maurice, Mr. Ryder; a Chamois Hunter, Mr. A. Rayner; Manuel (an aged Retainer), Mr. Neville; Herman (a young Domestic in the Castle of Manfred), Mr. G. Weston; Retainers, Messrs. Bedford, Weaver, Kirk, Wilson, Smith, and Edwards. Immortals:—Arimanes (Ruler of the Evil Agencies), Mr. Warde; Ariel (Spirit of the Ether), Miss Emma Heywood; Hesper (Spirit of the Stars), Miss Louisa Ritter; Undine (Spirit of the Waters), Miss Poole; Miserima (Spirit of Memory), Miss Cicely Nott; Auster (Spirit of the Storm), Mr. Swift; Astaroth (Spirit of the Earth), Mr. Meagreson; Nubes (Spirit of the Shadow of Night), Mr. Ryde; Titanos (Spirit of the Mountains), Mr. G. Spencer; Nemesis (Goddess of Vengeance), Mrs. Edmund Falconer; Clotho, Lachesis, and Atropos (the Three Destinies), Miss Emma Atkinson, Miss O. Weston, and Miss Murray; The Phantom of Astarte, Miss Rose Leclercq; the Witch of the Alps, Miss Heath (her first appearance at this theatre); Evil Agencies and Spirit Spectres of the Weird World, Messrs. T. Matthews, J. Morris, and J. Cormack; Miss Seymour, Miss Hardeur, Mrs. Melville, Mrs. Warlow, and the Ladies and Gentlemen of the Choir and the Ballet. Order and character of the Scenery:—Act I.—Scene 1. Studio and Gothic Gallery in Manfred's Castle. Scene 2. A Precipice and Glaciers nigh the summit of the Jungfrau. Act II.—Scene 1. The Chalet of the Chamois Hunter and Alpine Pass. Scene 2. The Steinbach, a Waterfall, in one of the Lower Valleys among the Alps and over-hanging Cliffs, the Haunt of the Witch of the Alps.

The sunbow's rays still arch the torrent with the many hues of Heaven,
And roll the sheeted silver's waving column o'er the crag's perpendicular.

Scene 3. The Snow-capped Summit of the Jungfrau, by Moonlight. Scene 4. The Hall of Arimanes in the Nether World, painted by Mr. Danson and Son. Act III.—Scene 1. Terrace and Exterior of Castle. Scene 2. The Turret Studio, the Magian's Midnight Haunt, Shook and Illumined by a Thunderstorm, and finally Destroyed by Flashing Bolt and Crashing Avalanche. Last Scene. A Snow Alpine Waste or Wilderness. Programme of the Songs and Choruses:—Act I.—Scene 1. Mystical Responses of Viewless Spirits to the Magian's Invocation. First solo, "Mortal to thy bidding bow'd," Miss Emma Heywood. Second solo, "In the blue depth of the waters," Miss Poole. Third solo, "I am the rider of the wind," Mr. Swift. Septet, Misses Poole, Heywood, Cicely Nott; and Mr. Swift and chorus. The imprecation solo, "When the moon is on the wave," Miss Cicely Nott. Solo, "Though thy slumber may be deep," Miss Poole. Chorus by the whole choir. Act II.—Scene 3. Solo and chorus, "The Captive Usurper," Miss Cicely Nott and chorus. Song, "The ship sailed on, the ship sailed fast," Miss Emma Heywood. Scene 4. Grand Choral Hymn of the Evil Agencies, "Hail to our master, Prince of Earth and Air!" solo verses by Mr. Swift. Chorus by full choir. Jubilant chorus and accompanying Dance, by full choir and the ballet. Act III.—Last Scene. Grand dual chorus of Good and Evil Spirits by the principal singers and full choir. The general action of the tragedy arranged by Mr. Phelps. The incidental dances designed and directed by Mr. Cormack. Costumes from designs by E. W. Keene, Esq., and from Flaxman's Illustrations of Classical and Mythological Conceptions. Machinery by J. Tucker and assistants. Gas illuminations by Mr. J. Hinckley. Spectral illusions by Mr. Cox, under the direction of Mr. Telbin. The whole of the entirely new scenery designed and principally painted by Mr. W. Telbin, assisted by his son, Mr. H. Telbin. The Hall of Arimanes painted by Mr. Danson and Sons. The increased orchestra and present arrangement of the music (originally composed by Sir Henry Bishop) under the direction of Mr. Barnard. The choir under the direction of Mr. Charles Feale. To conclude with the Musical Farce of A ROLAND FOR AN OLIVER. Messrs. Walter Lacy, Addison, G. Belmore; Misses Heath, R. Leclercq, and Murray. Stage Manager, Mr. Phelps.

Private boxes, 10s. 6d., 21s., £1 11s. 6d., £2 2s., £3 3s., and £4 4s.; stalls, 6s.; dress circle, 4s.; first circle, 3s.; boxes, 2s.; pit, 2s.; lower gallery, 1s.; upper gallery, 6d. No half-price. Box-office open from Ten till Five. Doors open at Half-past Six; commence at Seven.

THEATRE ROYAL, HAYMARKET.—Last Week of Mr. and Mrs. ALFRED WIGAN.—On MONDAY, Wednesday, and Friday, THE RIVALS—Miss Snowdon, Mrs. Malaprop; with THE BENGAL TIGER—Mr. and Mrs. Alfred Wigan. Tuesday, Thursday, and Saturday, last three nights of the Countess of Gifford's Comedy of FINESSE and CHARLES THE TWELFTH.
On Monday, Oct. 26, Mr. and Mrs. CHARLES MATHEWS.

NEW THEATRE ROYAL, ADELPHI.—Sole Proprietor and Manager, Mr. B. WEBSTER.—On MONDAY, and during the Week, at Seven, THE TRAGEDY QUEEN—Mrs. Stirling; at Eight, LEAH—Messrs. A. Stirling, R. Phillips, A. Wood, and Billington; Miss Bateman, and Miss H. Simms; and CATCHING AN HEIRESS—Miss Woolgar.

PRINCESS' THEATRE.—HERRMANN.—IMMENSE SUCCESS.—"The tricks and feats of Herr Herrmann are nearly all of the most astonishing and incomprehensible kind. His sleight-of-hand feats are really marvellous; and the ease, finish, and accuracy of his tricks are such as have never before been witnessed in this country."—Morning Herald and Standard, Sept. 29. HERRMANN in his celebrated MONEY TRICK EVERY EVENING. "A new system of making plenty of money." Commence at Eight.

JULLIEN'S CONCERTS, HER MAJESTY'S THEATRE,
COMMENCE ON SATURDAY, NOV. 7.

CRYSTAL PALACE.—Week ending OCT. 24. Open, Monday at 9; other days at 10. Admission, Saturday, Half-a-Crown; other days, One Shilling. Children under Twelve, Half price.
The Great Poultry Show—Monday to Thursday. One Thousand and Two Pens are entered for this Show.
The Ghost daily, in various novel characters.
Orchestral Band and Great Organ Performances, commencing at 12.30 daily.
Desanges' Victoria Cross Gallery and Great Picture Gallery.

Class 3, Five-Shilling Numbered Stall.—Single Subscription, Two Guineas; Ditto, Family Subscription, for three, Five Guineas.
Class 4, Three-Shilling Reserved Seat (unnumbered).—Single Subscription, One Guinea; Ditto, Family Subscription, for three, Two Guineas and a Half.
Subscribers' Tickets transferable. Subscriptions received daily, from Ten till Six, at the Offices, 14, 15, Exeter Hall (first floor); where a Plan of the Hall may be seen, and Seats—for which immediate application is necessary—secured. Ladies and Gentlemen (competent amateurs) wishing to join the Choir, and competent instrumentalists (string only) wishing to join the Amateur Band, may obtain particulars at the Offices. G. W. Martin's Shilling Oratorios—"Messiah," "Creation," "Judas Maccabeus," "Israel in Egypt." Full score, piano accompaniment, post-free, 16 stamps.—Offices, 14, 15, Exeter Hall.

SCOTCH STEREOSCOPIC VIEWS.—Tourists will be pleased to inspect the STEREOSCOPIC COMPANY'S beautiful collection of Highland Scenery (by Wilson and other eminent Photographers), embracing all the places usually visited, as Loch Lomond, Loch Katrine, Glencoe, &c.; also of Staffa and Iona, and other islands of interest in the west of Scotland. Sold at One Shilling each by the London Stereoscopic and Photographic Company, 110, Regent-street, and 54, Cheapside.

M. RÉNÉ FAVARGER'S PIANO-CLASSES, 29, Somerset-street, Portman-square, W.; and at the Notting-hill College, 15, Stanley-place, Kensington Parkgardens, W.

EDUCATIONAL.—Mrs. BLAIR LEIGHTON, of 40, Lansdown-crescent, Kensington Park, has VACANCIES for TWO PUPILS at her Establishment, where every home comfort is insured, coupled with the most desirable system of imparting knowledge, aided by first-rate Professors.
For Reference and Prospectuses, with full particulars, apply to Messrs. Boosey and Sons, 28, Holles-street, Cavendish-square.

DULL EVENINGS MADE MERRY.—Bagatelle Boards of the best make, from 31s. 6d., complete. All the new Parlour Games. Illustrated Catalogues free on application.—ASSER and SHERWIN, 81, Strand, London.

WASHING, WRINGING, DRYING, and MANGLING MACHINERY and APPARATUS, for Families, Hotels, Institutions, &c. Adopted by her Majesty's Government. Indiarubber Wringers from £1; Washing-machines, £3 10s.; Mangles, £2 10s.—WILLIAMSON, 133, High Holborn.

BRADFORD'S WASHING-MACHINE.—In consequence of the extraordinary success of these Machines, to which an important improvement has just been added, many other machines, with a purposed resemblance, have during the last few years been introduced, upon terms offering strong inducements to dealers having no definite agency. Numerous cases having of late come to the Patentee's and his appointed Agents' knowledge of intending purchasers, desiring a Bradford's Patent, having been induced to purchase other machines, upon the strength of the dealers' assertion that they also sold Bradford's Patent, &c. &c., such assertion being simply untrue, necessitating this Caution, and the public announcement that Bradford's Patent can now only be had either from the undersigned or definitely appointed Agents. Intending purchasers are advised that Bradford's Patent Washing Machines are now delivered carriage-free to any railway station in the United Kingdom, and satisfaction guaranteed by a Month's Trial before Payment. Illustrated pamphlet of Washing-Machines, Indiarubber, and other Clothes Wringing-Machines, Mangles, Presses, &c., upon application to Thomas Bradford, Patentee and Manufacturer, Cathedral-steps, Manchester; 63, Fleet-street, London; and 23 Dawson-street, Dublin.

QUITE NEW.—Mr. and Mrs. GHOST (previous to their departure) have honoured the Artists of the London Stereoscopic Company with sittings for their CARTES DE VISITE, and these remarkably successful Portraits will, by permission, be published on MONDAY NEXT, the 19th inst. Price 1s.; Stereoscopic, 1s. 6d.; free by post for stamps.—54, Cheapside; and 110, Regent-street.

FOR FAMILY ARMS—the LINCOLN'S-INN HERALDIC OFFICE—send Name and County. Arms Painted, Impaled, and Quartered. Sketch, 3s. 6d., or stamps. The Pedigrees of Families, 21s.—H. SALT, Great Turnstile, Lincoln's Inn.

LINCOLN'S-INN HERALDIC OFFICE.—The established office of authority in England for furnishing Arms, Crests, &c., authentically. "The Lincoln's-inn Manual of Heraldry," 3s., or stamps.—H. SALT, Great Turnstile, Lincoln's-inn.

SIGNET CREST RINGS, 18-carat, Hall-marked, Solid fine Gold, 30s.; Ditto, handsome, for Arms and Crest, 50s.; Ditto, large, for Arms, Crest, and Motto, £3 15s.—H. SALT (observe), Heraldic Office, Great Turnstile, Lincoln's-inn.

LINCOLN'S-INN HERALDIC OFFICE.—Engraving by the Laws of Garter King-at-Arms. Crest on Seals or Rings, 8s. 6d.; Arms on ditto, 18s.; Solid Gold Signet Rings for Crests, 21s.; a Book-plate, Arms and Crest, with Name, 21s.

A beautiful collection of specimens handsomely mounted, kept for inspection. An Illustrated book sent post-free.—Dewdney, 172, Fenchurch-street, London.

Now Ready, price One Shilling, beautifully Printed in Colours.

THE ILLUSTRATED LONDON ALMANACK FOR 1864,

containing Fresh-Water Fish, from Paintings by H. L. Rolfe, with interesting descriptions, by James G. Bertram, printed in the highest style of the Chromatic Art by Leighton Brothers; Twelve Fine-Art Engravings; Astronomical Diagrams of Remarkable Phenomena, with Explanatory Notes; and Twelve Original Designs as Headings to the Calendar, by F. W. Keyl.
It contains also Lists of the Royal Family of Great Britain; the Queen's Household; her Majesty's Ministers; and Public Offices and Officers; Law and University Terms; Fixed and Movable Festivals; Anniversaries and Remarkable Events; Times of High Water at London and Liverpool; Tables of Stamps, Taxes, and Government Duties; the Christian, Jewish, and Mohammedan Calendars; Astronomical Symbols and Abbreviations; and a considerable amount of useful and interesting information, rendering the ILLUSTRATED LONDON ALMANACK an acceptable and elegant companion to the library, boudoir, or drawing-room; whilst, as regards price, it is the cheapest Almanack published.
The ILLUSTRATED LONDON ALMANACK is inclosed in an elegant cover printed in colours.
Published at the Office of the ILLUSTRATED LONDON NEWS, 198, Strand, and sold by all Booksellers and Newsagents.

THE ILLUSTRATED LONDON NEWS.

LONDON: SATURDAY, OCTOBER 17, 1863.

MRS. BRITANNIA has at length given notice of her intention to quit and deliver up possession of the premises she has so long occupied at Corfu and the vicinity. The so-called owners, whose title is by no means a marketable one, however, and will be much improved by present proceedings, have long been anxious to get rid of the active, kindly, but decidedly dominant and managing matron; but she is far too high-spirited a personage to be hinted out of a place, and when there was any attempt at annoyance she unhesitatingly called in the police. She begs it to be distinctly understood that she now goes out entirely of her own free will and accord, and, as her agent puts it, as a matter of "friendship and goodwill" to another person, a young gentleman about to establish himself in the neighbourhood, who wants larger premises than those which became vacant by the absconding of a Bavarian occupant.

But, inasmuch as the tenant who is about to depart was put into possession, not by those to whom she is about to yield it, but as a sort of trustee in behalf of the great European parish, she is by no means going out without making a variety of arrangements by which the future state of the premises may be effectually assured. That would not be Britannia's way of doing things. She will leave the marks of her occupancy, to be traced many a year after she has removed the last article of her furniture. In the first place, and as a matter of form—for she is a great stickler for regularity, and dockets all her papers—she requires from the Septinsular family a solemn request that she shall give up possession. This the rather ungrateful Septinsulars were so ready to make that their man of business, Dr. Stefano Padovan, at once regretted that it was not business-like to make answer at the moment. It will, of course, be handed in with a promptitude which is more active than polite; but hypocrisy would be out of place. Everything has been done for many years to show the tenant that it was wished to get rid of her, and any affectation of hesitation at saying so in black and white would be too Pecksniffian even for the Septinsulars. But this is a small portion of the preliminaries. The first thing in the way of real arrangement is the entering, by the owners, into a regular and irrevocable agreement to assign the premises at once to the new neighbour, a gentleman from Denmark, who is to have possession instantly, and to have all the rights and privileges of the outgoing tenant. All care is to be taken that not a single concession is to be made to the Septinsulars, who, indeed, have not shown themselves worthy of any. Not an outhouse, not a right of way, not an ancient light is to be kept back; and it will be the fault of the young gentleman himself if he do not avail himself of everything to be found on the premises. His friend has taken the utmost care to give him the amplest power and the most complete possession.

She does more; indeed, a great deal more. She has demanded, on his behalf, that, in consideration of her retirement, a sort of premium, and by no means a light one, shall be annually paid by the Septinsulars. This she has fixed at £10,000. If regularly paid, it will be of material assistance to a young beginner, and will enable him to carry out a variety of speculations in which every one desires that he shall succeed. He comes into business without experience, but with a very high character, and he will be advised by persons who know exactly what they are about and what he should do. This £10,000 a year, though not a very large sum in an extensive business, will be very serviceable, under the circumstances; and we trust that due care will be taken that it shall not get into arrear. For it was chiefly on account of embarrasments arising from non-punctual payments that his predecessor came to grief, and got into

habits and practices which destroyed his character and compelled him to commit an act of bankruptcy. Nothing, therefore 'can be more kind towards him than this care of his income; and it may be added that the Septimulans are perfectly able to pay a much larger sum, if willing to do so.

They are also required to recognise all bargains made by the retiring tenant in respect of matters to be done on the premises, or articles ordered. There can or should be no difficulty about this; for from long experience of business, and would make no bargain that was not calculated to be of advantage. In fact, nobody could go to market better; for, though she certainly never allowed money to stand in the way of her obtaining a good article, she never allowed herself to be served with a bad one, and it will be a long time before another manager is seen in that quarter. We suppose that there will be no hesitation upon this point.

Another, which is a mere matter of decorum, refers to the preservation of certain memorials of members of her family who have been living on the premises. Ordinary decency will prevent the slightest difficulty in this stipulation.

But there is another, the fifth and last, which may occasion a squabble, unless the eagerness of the Septimulans to see the premises clear of their occupant induces a general assent to everything. It is not in the nature of Britannia to let pleasure go to rack and ruin. On the contrary, she is ever ready to begin repairing, and improving, and embellishing. In this case also found the place in a very unprotected state, and burglars might have been in (as they had previously done on various occasions); and, in fact, there was no security for the inmates. She went to work with her usual energy, and had bolts and bars, and a new strong door, and a chain, and a blunderbuss, and an alarm-bell supplied: and assuredly her precautions have not been unavailing, for on one occasion a burglar came, where about 1815, no burglar has dared to set a foot in the place. These improvements, which are certainly fixtures, she not unreasonably requires the owners to take at a valuation which she has had made. She calls them "military contributions," and, inasmuch as she was originally told that the right should be paid for by the owners, whom she has good-naturedly allowed to get into tenants, it is right that when she gives up possession, which she might have held against all the attempts at ejectment of any Court in the world, she should be reimbursed expenses that have been incurred for the good of the property. This is a clear case of tenant-right. Nevertheless, as the amount comes to £30,289 5s. 7d. (Mr. Mantalini might have had something to say to the sevenpence), it is not in reason that the Septimulans, who have a noble dislike to paying debts, may make a clamour. Clearly, the tenant has possession, which is nine points of the law, and right, which is the tenth point, and she is not out yet, and, if to be attempted to do her out of her own she can just as easily hold on as not, and make it very awkward to her friend from Denmark in some other way. We shall not be much surprised if some of her European acquaintances, who have always accused her of looking a little sharply after money (though the sums they have had of her, for services badly rendered, ought to shut their mouths), should pretend to be friendly at this claim; but, as they invariably extort their debts to the very last franc, and, moreover, as it was in their interest and by their desire that she became tenant of the premises, that remonstrance, if made, will be most ungracious. At any rate, no attempt will be paid to it. For there is no question of sentimentality in the arrangement—she has never been welcome, and if she is civilly treated now it is only because it is hoped that she is going away. If any concession is made it will be to oblige the young gentleman from Denmark, but none ought to be required.

There are some other formalities to be performed, such as the surrender and cancelling of the lease by all parties, and a new agreement; but instructions cannot be given for these until the preliminary terms are conceded. The lawyers will then be called in. Meantime, Britannia, with her usual energy, is managing her own affairs, remains on the premises and looks after her interests. May the next occupant be half as valuable a tenant, and twice as well appreciated!

THE COURT.

The Queen continues at Balmoral in good health. It is expected that her Majesty will spend the month of November at Windsor, after her departure from the Highlands on Tuesday next, en route to Windsor.

On Tuesday the Queen, accompanied by the Crown Prince and Princess of Prussia, Prince and Princess Louis of Hesse, Princess Helena, Princess Louise, Prince Arthur, and Prince Leopold proceeded to Aberdeen, and was present at the ceremonial of the uncovering of the memorial statue of the late Prince Consort. Prince Alfred arrived from Edinburgh, and was also present at the ceremonial. Sir George Grey was in attendance upon her Majesty. The Queen arrived at Aberdeen, a special train having started, at half-past one o'clock, and was received by the Duke of Richmond, the Lord Provost, the Sheriff, and University officials. A procession of carriages was formed to the centre of the city, where the statue stands. Previous to the uncovering, Mr. Anderson, the Lord Provost, presented an address from the committee and subscribers to the statue. The Queen, through Sir George Grey, returned a feeling and most appropriate reply to the address, after which the Queen was pleased to confer the honour of knighthood upon the Lord Provost. Prayer was then offered up by the Rev. Dr. Cook, of the Aberdeen Free Church, the statue was uncovered in full view of her Majesty, who, with the members of the Royal family, stood on a balcony opposite. The Queen gazed for a moment upon the statue and then retired. Her Majesty left for Balmoral soon after three o'clock. During the Queen's visit to the city no demonstration was made, in accordance with her Majesty's wish, it being the first occasion on which the Queen has appeared in public since the death of the Prince Consort.

On Tuesday week the Queen, accompanied by the Crown Prince and Princess of Prussia and Princess Louise, drove round by the Lynn of Muick. On the same day Prince and Princess Louis of Hesse, Princess Helena, and Prince Arthur rode up the Glen of Muick and drove back from Alt-na-Guithasach.

On Wednesday week the Queen, accompanied by Princess Louis of Hesse and Princess Helena, drove to Alt-na-Guithasach, where a picnic partook of luncheon. Upon their return in the evening the coachman took the wrong road, and the carriage was turned upon its side, by which the Queen and the Princesses were thrown out; fortunately, her Majesty and their Royal Highnesses escaped with a few bruises, and took the remainder of the journey to the Castle upon hill ponies.

On Thursday week the Queen, accompanied by the Crown Princess of Prussia, Princess Louis of Hesse, and Princess Helena, walked and drove in the vicinity of the Castle. On the same day the Crown Princess of Prussia and Princess Louis of Hesse drove to Invercauld and honoured Mrs. Farquharson with a visit.

On Friday week the Queen, accompanied by Princess Helena, walked and drove out. On the same day Prince and Princess Louis of Hesse went northward. On this day also the Crown Prince and Princess of Prussia lunched with her Majesty, and Princess Helena, attended by Miss Churchill, dined with the Crown Prince and Princess at Abergeldie.

On Saturday last the Queen, accompanied by the Crown Princess of Prussia, drove to the falls of the Garrawalt. The Crown Princess lunched with her Majesty. His Grand Ducal Highness Prince William of Hesse arrived at the Castle on a visit to her Majesty in the evening.

On Sunday the Queen, Prince and Princess Louis of Hesse, Prince William of Hesse, and the members of the Royal family attended Divine service, performed in the castle by the Rev. N. Macleod, one of her Majesty's Chaplains. Princess Helena and the Crown Princess of Prussia attended Divine service in the parish church of Crathie.

On Monday week the Queen, accompanied by the Crown Princess of Prussia and Princess Helena, drove to Alt-na-Guithasach. On the same day Princess Louise, attended by Lady Churchill, rode out. The Right Hon. Sir G. Grey arrived at Balmoral, and remained with Gladstone in attendance upon the Queen.

The Queen, accompanied by Royal family, takes daily walks and drives in the vicinity of the castle.

THE KING OF THE GREEKS AND THE PRINCE AND PRINCESS OF WALES.

The King of the Greeks took his departure from Marlborough House on Wednesday, en route for Paris. His Majesty was accompanied to the railway station by Sir Matthew Wood, after which Cambridge was also present. The King was received at the station by Mr. Chaplin, M.P., a large deputation from the Great Western Railway was also present. His Majesty, attended by his suite, left London at a quarter past nine o'clock, and proceeded by the London, Chatham, and Dover Railway to Dover, where he was received by Lord Harris and Sir R. W. Carden. A guard of honour of the 78th Highlanders was in attendance. The King left Dover shortly after by the steam steamer (the Semphis), and arrived at Calais in the afternoon.

On Thursday week the Prince and Princess of Wales left Marlborough House, Pall-mall, accompanied by Prince and Princess Christian of Denmark, Prince Frederick, and Princess Dagmar of Denmark, in a special of the Brighton Railway, which started from the Victoria City-road, &c., to the Great Eastern Railway station, whence they proceeded by the same train to Croydon to the railway station at Sondringham. It is expected that their Royal Highnesses will remain at Sandringham for the next few days.

On Saturday last Prince and Princess Christian of Denmark accompanied by Prince Frederick and Princess Dagmar, and attended by Captain Hervey, arrived in London, and Cambridge and Chesterfield arrived in London from the Continent. Their Royal Highnesses were met at the Victoria Railway station by the King of the Greeks and the Prince and Princess of Wales, who accompanied their Royal Highnesses to Marlborough House, where they arrived at ten minutes past two o'clock. At three o'clock Cambridge received visits from the Greek merchants in London. Manchester, and Liverpool at Marlborough House. An address, accompanied by the Greek ensigns of sovereignty, were presented to his Majesty. An address was also presented to the Queen by a deputation from the Philhellenic Committee.

On Sunday the King of the Greeks, with his suite, attended the grand "Te Deum" in the Greek Church, London-wall. The Prince and Princess of Wales, Prince Arthur, Prince Leopold, Prince Frederick and Princess Dagmar attended Divine service in the Chapel Royal, St. James's. The Rev. Canon Duckworth and the Rev. Mr. Sadler officiated. Subsequently the King of the Greeks, the Prince and Princess of Wales, Prince Christian, and Princess Dagmar took a drive in Hyde Park. The Prince and Princess of Wales, Prince Arthur, Prince Christian, and Prince Frederick visited the Crystal Palace, Sydenham. In the evening the King of the Greeks, the Prince and Princess of Wales, Prince and Princess Christian, Prince Frederick, and Princess Dagmar, with the ladies and gentlemen in attendance upon their Royal Highnesses, honoured Her Majesty's Opera-house at Covent Garden Opera with their presence. On this day also the Duke of Cambridge paid a visit to Prince and Princess Christian at Marlborough House.

On Tuesday the King of the Greeks, the Prince of Wales, Prince Christian, and Princess Frederick, attended by their suite, went on a quarter past ten o'clock for Newmarket. The Princess of Wales, Princess Christian, and Princess Dagmar, attended by Miss Knox, Mr. Grey, honoured Messrs. Southwell, in Baker-street, with a visit, and sat for their photographs. Their Royal Highnesses subsequently took a drive in the Duke of Cambridge's state day at Marlborough House.

On Wednesday the Prince of Wales and Prince Frederick rode out, and the Princess of Wales, Princess Christian, and Princess Dagmar drove in the afternoon. Their Royal Highnesses and Prince and Princess Christian, Prince Frederick, and Princess Dagmar, with their suite, honoured the Haymarket Theatre with their presence. On this day Prince Christian and Prince Frederick dined at the residences of their respective residences. The Duke of Cambridge also paid a visit to Prince Christian at Marlborough House.

On Friday week the Mayor of Coventry and his daughter, Miss Soden, had the honour of an interview with the Princess of Wales at Marlborough House, and presented her Royal Highness a waves address from the Corporation of that city and a gold watch, the gift of the borough. The Mayor of Coventry, attended by Prince Congreve His Royal Highness was also present on this day at the dinner given by the Duke of Cambridge to the Princess of Wales, and also at the conversazione in the National Gallery in the evening.

Queen Amelie has arrived at Claremont from Tonbridge Wells. The venerable ex-Queen of the French is in good health.

His Majesty the King of the Belgians is expected to arrive in England shortly, as a visit of condolence to her Majesty. His Majesty, it is thought, will prolong his stay in this country for two months.

The Duke of Cambridge has received invitations to visit Sandringham, Gloucester House, Park-lane, the King of the Greeks, the Prince and Princess of Wales, the Prince and Princess Christian of Denmark, Prince Frederick and Princess Dagmar, and the gentlemen of the King's suite. A distinguished party had the honour of meeting his Majesty.

His Excellency the Russian Ambassador arrived at Chesham House yesterday week from Belgium. Baroness Brunnow remains at Brighton.

Her Royal Highness the Duchess of Cambridge and Princess Mary returned on Thursday to St. James's Palace from Paris.

The Duke of Buccleuch left Belgrave-square on Tuesday for Drumlanrig Castle. The Duchess left town on Wednesday for Dalkeith Palace, Edinburgh.

The Duke and Duchess of Wellington have returned to Apsley House from Brighton.

The Duke of Newcastle has left town for his seat, Clumber Park, Notts.

The Marquis and Marchioness of Lansdowne arrived at Lansdowne House on Saturday last from Bowood, Wilts.

The Marquis of Bristol and Lady Adelaia Hervey have left St. James's square for Ickworth Park, Bury St. Edmunds.

Viscount Palmerston left London on Wednesday for his seat, Broadlands, Hants.

Field Marshal Viscount Combermere and Viscountess Combermere are receiving a succession of visitors at Combermere Abbey, Cheshire.

The Chancellor of the Exchequer arrived in London on Tuesday from Scotland.

CHURCH AND UNIVERSITIES.

On the 9th inst. the new chapel for the Thetford Union-house, simple structure in the Early Decorated style of architecture, was opened for Divine service by licence from the Bishop of Norwich.

A festival, in which upwards of 1000 of the members of the West Riding Church choir took part, was held in the nave of York Minster on Tuesday. The Bishop of Ripon preached an the afternoon service.

On Thursday morning Dr. Travers Twiss, the Vicar-General of the Province of Canterbury, accompanied by the Registrar and other officials, attended at the Jerusalem Chamber, Westminster, and formally adjourned the Convocation of the Province of Canterbury until Dec 3.

The Bishop of Oxford, on Monday, delivered an address of considerable length to the supporters of the Society for the Propagation of the Gospel in the Manchester Town Hall. The hall was well filled. The Dean of Manchester presided.

On St. Matthew's Day a new church, dedicated to the Apostle, was consecrated by the Bishop of Aberdeen, attended by the Primus, at Edmondtown. The new church, which has been built nearly on the site of the former one, consists of nave, chancel, south porch, organ-chamber, and vestry.

The foundation-stone of a new church, to be called "St. Paul's," was laid at Beckenham on Wednesday, by Mr. Peter Rice. The cost appertaining to the erection of the church will be borne by Mr. Alexander Cator, owner of the ground and patron of the living. The prayers were offered by the Rev. F. Chalmers, Rector of Beckenham.

The annual meeting of the Church Congress was opened at Manchester on Tuesday. In the unavoidable absence of Mr. Hook (who had arrived in the afternoon, the Bishop of Manchester, as president of the congress, delivered his opening address in the Free Trade Hall, which was the real work of the session, the reading of papers and the discussion of questions being reserved for the sections. In the evening Mr. Bernard Hope delivered a lecture on ecclesiastical architecture. The congress continued its meetings on Wednesday and Thursday. Papers were read on the supply of candidates for holy orders, on the Free Church movement, the weekly Communion, and many other subjects.

The Bishop of Gloucester and Bristol was present on Sunday at the inauguration of a new church which has been erected in the parish of St. Michael and All Angels, Bishopston, Hootwell. Within the last few years in accordance with the wishes of the late Rector of the parishes of Hotwell and Stapleton, which, from the previous desecration of Bishop Monk, has received the name of Bishopston, the parish has been divided in accordance with the law, and was consecrated by the present Archbishop of York during his session of the Convocation of the Province of Canterbury in April last. The parish church, it was deemed essential to provide further accommodation, and a new aisle, containing of an area of 1000 superficial yards, has just been added.

A work of church restoration begun fourteen years ago was on Wednesday week brought to a successful and happy termination. By this and little else the fame of Bengeworth has in some other way, which, perhaps, the agricultural parish, the present Vicar, the Rev. A. J. Douglas, has reason to be somewhat ashamed of—namely, by the interesting remains of the church. Worcestershire, situated on the western slope of the Malvern Hills. The late gentle restorer of the church, the Rev. Lyttelton Lyttelton, was not perhaps the best possible selection of a fourteenth-century roof to be found in the ordained country, but the general restoration of the church, which has been taken in hand by the Archbishop of open seats for the poor. Reformation high wishes which originated with the late Vicar, and which, as the work progressed, received the warm support of the present Vicar, the Duke and Hall, the gift of the Vale family; and also two others, the former presented by Gibbs, Esq., of Tewkesbury, and the latter by Charles Bengough, Esq., of Bengeworth, present wide, and the erection of a new font, the gift of a beautiful porch on the first specimens of the kind in the county, have just been added to the church, and the whole has been recently completed, the church was opened on the 8th inst., with full choral service.

Testimonials have been recently presented to the following clergymen:—To the Rev. C. Bowden, late of St. John's, Manchester—a silver salver and inkstand, from the parishioners, on retiring from the parish.—To the Rev. Thomas Lee Lady Londesborough; and a purse and album, from the Sunday-scholars. To the Rev. J. S. Cotton, Curate of Shalfleet, Isle of Wight—a silver gasalier, communion service, altar-cross, cloth, and a Bible, from the school children, on leaving. To the Rev. C. G. Hutchins, Curate of Beaconsfield—a handsome inkstand, and other presents, from the teachers and children attending the Sunday and day schools.

PREFERMENTS AND APPOINTMENTS.—The Hon. and Rev. H. P. Cholmondeley, Rector of Malpas-cum-Bettisfield, Salop, to be Dean of the deanery of Stone. *Rectories*: The Rev. R. A. Cooper to Scampton, Lincolnshire; Rev. G. Evans to Newton Berry; Rev. L. G. Pilkington to Bushley Grafton, Leicestershire; Rev. T. W. Hardy to St. Stephen, Exeter; Rev. J. Hopkins to Bromyard, with the chapelry of Stanford Bishop, in the Public; Rev. T. H. Hollier to Preston, Somerset; Rev. T. Le Neveu to St. John's, Jersey; Rev. J. Lewis to Llanfair Clydogau, Cardiganshire; Rev. J. M. Crescit to Wintersweek, Yorkshire; Rev. H. Hiley, to Wighill; Rev. W. H. Hutchinson to Bolton Percy; Rev. J. Lee to Rise, near Wetwang; Rev. G. Sharpe to Ash, near Canterbury. *Incumbencies*: The Rev. D. A. Doudney to St. James's, Clapham-road; Rev. J. Gregg to St. Mark's, Preston; Rev. H. Graham to St. Mary, Plaistow, Bromley. *Chaplaincies*: The Rev. R. B. Mackenzie, Rector of Chepham to the Bishop of Gibraltar. *Perpetual Curacies*: The Rev. C. Bagster to King Stanfield, near Buxton; Rev. G. Cornish to Tunbridge Wells; Rev. D. Davies to St. John's, Bethnal-green; Rev. J. Hoare to Bradley; Rev. J. B. Smith to Market Stainton, Lincolnshire. *Curacies*: The Rev. J. Allen to Bishop Middleham; Rev. P. Arnold to Gregg's Bartow-in-Furness; Rev. T. Averell to Goleor, Yorkshire; Rev. W. Cooper to Bishop Middleham; Rev. F. Beaumont to Sandal; Rev. E. Chauncey to Rock; Rev. H. Bennett to Pickering, Yorkshire; Rev. R. Bullock to Burlington; Rev. J. Cooper to Gainford, Durham; Rev. A. Cutteridge to Bury, Sussex; Rev. J. F. Collins to Highworth, Wilts; Rev. D. D. Davies to St. James's, Halifax, Yorkshire; Rev. R. W. Dibdin to Bishop Middleham; Rev. J. Dixon to Bishop with Kerdiston, Norfolk; Rev. C. Grant to Thetford, Cumberland; Rev. J. Hamilton to Wetherby, Wetherby, Rev. T. Hedley to Bishop Middleham; Rev. T. J. M'Cowen to Westport, Wilts; Rev. J. J. Morates to St. Stephen's, Bowling; Rev. J. Morgan to Bishop Middleham; Rev. H. Norman to Witney, Oxon; Rev. N. Nunsberg to St. Anne, Halifax; Rev. H. Parsons to Park Corner, Blundell's; Rev. D. Lewis to Bishop Middleham; Rev. G. C. Robinson to Leeds; Rev. T. Russell to Shotteswell; Rev. J. A. Shaw to Bishopwearmouth; Rev. J. Smith to Bishop Middleham; Rev. G. Soles to Breden; Rev. F. Stainforth to North Stoke, Somerset; Rev. J. Stevenson to Sowerby, Yorkshire; Rev. J. P. Turpin to The Grove-house; Rev. A. Turner to St. John, Huddersfield; Rev. J. B. Waddington to Blackburn; Rev. F. Wagstaffe to Lever Bridge, Bolton; Rev. J. Wilkinson to Stow; Rev. J. Wilson to Stow; Rev. T. Woltencroft to Holcombe, Rev. T. Rev. W. Wood to Bishop Middleham.—*Guardian*.

THE UNIVERSITIES AND PUBLIC SCHOOLS.—In a Convocation held at Oxford on Thursday week a letter from the Chancellor of the University was read, appointing as Vice-Chancellor for the ensuing year the Rev. C. F. Lightfoot, D.D., Rector of Exeter College. The Vice-Chancellor having first made the customary declaration of his assent to the thirty-nine Articles, took the oath of office, and appointed as Pro-Vice-Chancellors the Rev. Dr. Pusey, Regius Professor of Hebrew; the Rev. Dr. Goulburn, Dean of Worcester College; the Rev. Dr. Scott, Master of Balliol College; the Rev. Dr. Williams, Principal of Hatfield Hall, Durham; the Rev. Dr. Jeune, Master, the Rev. W. Yates, M.A., Fellow of Brasenose College, was nominated a Master of the Schools for the ensuing year.

The decree of Lord Lyndhurst renders vacant the high stewardship of Cambridge University. The Duke of Devonshire is elected in his stead, after a spirited and severe contest with Lord Lyttelton. The list of gentlemen who have appeared as candidates for the honour upon the dissolution of Parliament of the University has been promulgated. It comprises 300 names. The Vice-Chancellor, in pursuance of the statute, has appointed Wednesday next, which has been rather than he will attend in the public school on Tuesday, the 20th inst., at nine o'clock, for the purpose of proceeding to the election of the new member in the room of Lord Stanley deceased. The remaining congregations this term will be held on Oct. 27, Nov. 3, and Nov. 10, all at two o'clock. Lord Lyttelton, Lord Derby's colleague, will lecture on Arabic during the term, at Trinity College, on Tuesdays and Fridays, at one o'clock.

The Michaelmas term at Eton for 1868-9 commenced on Monday by an introductory address delivered by the Rev. J. J. Taylor, the Principal of the college, in the presence of a large number of the members and their friends, at the University Hall, Garden-square.

King's College evening classes were reopened yesterday week by an address from the Rev. J. E. Roger, M.A., Tooke Professor of Political Economy.

The annual meeting of the Governors of Trinity College, Dublin, was held at the college on Saturday last, the Chancellor of the Exchequer, who arrived in Dublin during the morning, presiding. The meeting, which was at which were laid before the council showed that the college continues to enjoy a steady prosperity.

The Rev. W. Cureham, Lower Master of Harrow, died at Reigate on Tuesday, in the sixty-fourth year of his age.

CHARING-CROSS RAILWAY WORKS: MONSTER IRON GIRDER-BRIDGE AT THE LONDON-BRIDGE RAILWAY STATION.—SEE PAGE 385.

SCENE FROM "VALENTINE AND ORSON," AT THE ADELPHI THEATRE.—SEE PAGE 404.

MEMBERS OUT OF PARLIAMENT

It is quite probable that Newmarket would be as convenient a place as could be selected for one of the aristocrat's pour-on meetings at the House of Commons to meet and confer with the tenants. It does not, however, absolutely follow that that famous racing-town was specially and personally suitable to Lord George Manners, who presided at a gathering of Cambridgeshire agriculturists three score few days ago. It does not consist with any kindly feeling to impose to affirm this. We do know that Lord George is in the Life Guards, and therefore must be a good horseman; and he is brother to the Duke of Rutland, who is always ready to do battle in person on any one obstructing a fox-hunt which happens to pass over his fields; it is therefore probable that he is addicted to the chase, and followed town, with all the getting up, and the rapid, sharp exclusability of modern amusements *de facto*? Nevertheless, it is not impossible that he has no special call at any time to Newmarket, which for the nonce has extended its boundaries. It is a mysterious system and a splendid opportunity for breaking in young members of Parliament; for Lord George has but recently succeeded that worthy gentleman and prominent political character, Mr. Henry Chaplin, who managed to combine the most liberal dissenting tenets with the highest principles of Toryism as developed in the Corn Law question of Protection. As Mr. Ball entered Parliament in the fatal year when Mr. Disraeli sacrificed Protection on the altar of Free-trade—a sacrifice the distinguished Tenniers friend is not only able to play the part of chief mourner over the departed system at first, and subsequently to raise his hypothetical voice—even his cambric—as if it was in the singing—occasionally in a tribute to its virtues. In time, allusions to this new departure seldom, if ever, passed without the usual hiss and stage; and, Mr. Ball's vocation being entirely gone, he quietly returned the trust which had been committed to him by the electors of Cambridgeshire (under circumstances highly favourable to Mr. Stanley), and Lord George Manners reigned in their suffrages in his stead. Being in the Household Cavalry, and a member of the Carlton Club, Lord George is, doubtless, always a safe and attainable vote, and it is most likely that he will have occasion with the exercise of much tact and power to have another Lord John the duty of vindicating the right of the Monmouths to have their somewhat shrill voices heard in the exercise of the suffrage, while the Duke of Rutland is in the Cabinet office in the Lords. We would gladly introduce Mr. Acland to our readers, but the Devonshire gentleman is not to be found at all; or was in his power at the Newmarket meeting of agriculturists—not unlike—but we are in the unfortunate position of being unacquainted with his views, and are certain that we never heard the sound of his voice in the house, which is an insurmountable obstacle to our performing the duty of a panegyrist. The chronicler is in the dark—withstanding he is a son-in-law of the Earl of Harlwicke, of whose political predilections we have unfortunately no data. Adeane and Beach are both Cambridgeshire squires, and would probably attach church rates; so that in the triumvirate representation of Cambridgeshire he sits "bodkin" between two pronounced Tories, and can only be distinguished from his fathers-in-law.

The agricultural platform is naturally not the only one in which members of different political persuasions are to be got together, for at Tavistock the other day a "Beneficial Society" caused quite a junction of the Parliamentary representatives of Devon. Of course, there were the two members for the borough, who have only one Tory between common, and that is Mr. Russell, the Liberal Baronet; for Sir Francis Baring and Sir James Elphinstone are the very antipodes of each other in politics and in every personal characteristic. The former, always a steady supporter, apparently timid and somewhat slow Whig, has now taken his place amongst the lucubrative sybirites of the Treasury bench, and the latter, ever progressive and moderation from that fourth bench behind members on which the last impressive speech of the old Whigs will be found, and which other—politically, of course—in order to keep up their languid exhibition. His seat was close to that of the late Mr. Ellice; and he is, we think, the only man on whom the mantle of the late member for Inverness-shire will descend. Sir James Elphinstone, if he could wish to talk naturally, would be a most unique study of a sensation as a sailor on the stage. It was to this professional twang, so to speak, we suppose, that he owed his return for Portsmouth when he nearly pushed out Sir Francis Baring at the election of 1857; but Lord Monck, being the junior Whig, was forced to go to the wall. Perhaps one cannot have too much of a good thing, and might have done if he chose, win many a vote by going about that pocket-compass of a head dressed in a wonderful nautical cap, which he appeared in the house on the occasion of his seconding the Address, in 1859, for the Derbyite Ministry then in office, which might easily have been made to pass for a speech of the right hon. Lord Duncan was Camperdown, but which was, in fact, the livery of the navy of the East India Company, of which Sir James was a distinguished member. At Portsmouth, the other day, the two representatives Baronets agreed to offer a strong resistance to the Government policy in reference to American affairs; Sir James being all for direct interference for the South, and Sir Francis going in for Lord Russell's ideas of neutrality. On this occasion there happened to be a member, whose name we like to write, just as Mr. Borthell, in "The Rivals," would have found it, spelt with a capital, and with the distinctive appellations of Lady Caroline Wilhelmina Amelia Skeggs—there should seem to be a considerable accumulation of the good things of life associated with a Sir Jervoise-Clarke-Clarke-Jervoise. A palpable agglomeration of at least two family estates is here involved; but it happened to be the worthy Baronet's second Session for the first time in our recollection, and are happy to record that a new member—and he is a Hampshire member—is a good gentleman we do not desire to meet. Have many people who read cobster and envious public men heard much, if at all, of Mr. Bonham Carter, another Winchester Tory? Probably not, and any worthy member, and any official of the House, about him, and it will be found what a deal of talk is happening in the House to-night, and in the Parliamentary private business. It was only last Session, that for the first time in the experience of many members of the House Mr. Carter address the House; he has always been content with the silent honour and influence which belong to those members who vote for the House.

The appearance of Mr. Howes, one of the members for Norfolk, at an autumn meeting, gathering of the natives of that county, is a sign that few young members are more assiduous than he in attendance on the House, and he seems always as if he were bent on learning the business of the House, which is itself a science worthy of study. His late at North Walsham cause Mr. Charles Buxton, who made one of those suggestive speeches which characterise the Liberal party, which are characteristic of him as a man and a politician, and which in himself—perhaps hereditary—are cherished and cultivated that they are all his own. Himself an advanced Liberal, and representing a borough constituency, he argued forcibly that the agricultural body proper—that is, those other than the great landowners—should by possess a better political position than they do, and that there was no reason why the middle classes in the towns should have any part in political status and influence to the middle classes in towns. Mr. Buxton, as a member of Parliament, gives one the idea that he has a political belief, and that, like other beliefs, it cannot be matter of discuss; and he seems to try hard to impress this on a House of Commons which is not at all to his mind in anything—a House which is one of the finest and freest assembly in the world, and therefore can afford for the most part to blink prejudices, and to be open-minded, and to persuade themselves that veneer, which looks as well as solid mahogany, will last time. The philosophy and the strict morality of politics will appear to the great enthusiasm of members like Mr. Buxton.

In a more corner of a Journal we found the other day that Mr. Knatchbull-Hugessen, deputy whipper-in to her Majesty's Government, has been holding a caucus, as the American phrase goes, with the constituents at Sandwich; but all we can discover of his discourse is a dutiful official exhortation to everybody to trust everything to Lord Palmerston. In fact, he was upholding the same political faith which Sir Robert Peel has been so energetically proclaiming at Tamworth again this week, even to the extent of using such an expression of luminous as knocking down a dissentient from that council. It is surprising that the Irish Secretary, after his previous appearance before his borough, should have been allowed to go declaiming there again.

ECHOES OF THE WEEK.

The Social Science Congress at Edinburgh, however satisfactory its collective result may prove, seems to have been as yet, and in detail, less productive of discussions promising any tangible amount of public good than its predecessors. The recent meeting of the British Association so near to the north may have had some chilling influence over the intellectual energies debates of the session of Parliament which, it cannot be denied, have been somewhat jejeune, trite, and barren. More talkee, talkee," has been in the ascendant; and Lord Brougham's opening address—marvellous production as it was—narrowly escaped being marred by the discursive rambling over the field of foreign politics which is the favourite pasture of the old social science to be told of the struggles of nationalities on the Continent of Europe, or of the hateful features of the American civil war.

The most unpleasant features in connection with these and similar intellectual gatherings is that you are sure to be bored to death, and that you are not sure of obtaining the indispensable grain of salt. Dr. Guy, for example, a great authority in his way, is never at a loss for a theme to come forward and trot out their pet hobbies. The Balaam box is open to all who have something to say, and article evade, in the proxy which no newspaper or periodical would venture to insertion to assume a little factitious authority as "papers read by Mr. So-and-So before the congress." Hence a little crop against incertants gabbling because we are hearty advocates of the cause which the Social Science Association have so enormously aided, in the main, so successfully carried out. The British Association was once in quite as great peril of crumbling into the abyss of the commonplace until it was then were compelled to be sent in order to be kind; and, although stung to the quick, its members manfully accepted the benefit from the scathing satire on its proceedings penned by Mr. Charles Dickens in his "Mutley Papers" in the *Times*, and by the late Mr. G. A. Beckett in the leader-columns of the *Times*.

In the enjoyment of crime and punishment one lady, the admirable Miss Mary Carpenter, has been conspicuous to the public as all the world knows she is able to do, and one gentleman—a gentleman of the English school—has been conspicuous for his new idea in the rationale of crime and reformation. Miss Carpenter—although she avows a particular fly-fishing offered to organise a reformatory for convicted child criminal offenders in North Britain, if the ladies of Scotland will co-operate with her; and Lord Neaves, in a truly humane spirit, has responded to the call in a manner which has started the novel proposition that a judicial cultivation of the activity of each boy is made not subservient to the mere whim of the humbler orders. "Make people laugh," argues Lord Neaves, "and they won't want to steal;" "Make them laugh, and they will become honest." The experiment is, at least, worth trying, and most appropriately does it come from a land fertile in wise and humorous sayings, from a land which has produced, in the most among the entertainers of Mr. Thackeray who the name of Jamie Soutar, the English will be content to laugh. The only drawback to Lord Neaves's theory is that in laughter, as in everything else, there are innumerable degrees. Innocent mirth may be the result of dulness; by how many degrees the horse laughter, the "loud laugh," which, according to Goldsmith, is heretical, is the result of vice, of folly, of ignorance, of—but it is something, however, to find a Scottish Judge of the opinion of Beaconsfield—Benedictus, the philosopher, out of a serious meditation of what lives, felt a heavy load of care and sorrow to be lifted from his misery, madness, and folly. Democritus, on the other side, *burst out laughing*, that most English word, and the most English of all that can be carried by this ironical passion that the citizens of Abdera took him to be insane. Democritus was, nevertheless, the wisest of physician that he would exercise his skill upon him." Thus wrote old Burton, who, in his work on "Melancholy," has made more people laugh than ever did Democritus.

It is seldom that the impenetrable veil of mystery with which the working inventor loves to shroud his contrivances from the public eye is lifted. This week, however, has seen two very curious announcements in the *Times* on this usually barely-whispered topic. The first was by Mr. Bessemer, who, it will be seen, appears to be in the act of taken prisoner by the Russians in Poland, and is described by some as being engaged in a hopeless struggle with the Czar's government with that journal Printing-house-square indignantly disclaims. "We have heard of no such struggle," says Mr. Bessemer, "but a most pathetic paragraph to the effect that a monument has been erected in the church at Bobowpearmouth to the memory of Thomas William Allen, who was a distinguished member of the crew of the late Sir James Chinese War, and lost his life in consequence of the barbarous tortures which he underwent in the Bobowpearmouth gaol. He died after forty years of age. The inscription on the monument has been written by Mr. Tom Taylor, the schoolfellow and townsman of the deceased."

The repudiated Mr. Apell appears to have lived somewhat in clover on the strength of his supposed connection with Mr. Bessemer, and on him literally "up a tree," but refrained from shooting him: and the Russian Government, into whose hands the matter has now passed, asked him to dinner. The real correspondent of the *Times* in the unhappy "kingdom" is, as is pretty well known, Mr. Sutherland Edwards, who has left Poland, and is now in Paris. The latest lines have, we fear, not been cast in such pleasant places as Mr. Apell's. Mr. Edwards is at present living at the top of the Hôtel de l'Europe at Warsaw when, in consequence of the mendacious articles on the Polish insurrection which appeared in the columns of the street pell-mell, and the hotel itself converted into a barrack, he must be able to tell a very dolorous refrain to the song, *"Ah! quel nuit d'été!"* Mr. Edwards is not the first who has had to pay for a fall than to be the occupant of a truss of straw in a casemate of the citadel, which has been found to contain, in the days of the Czars, a siberia the next, or shot or hanged on the day following.

Mr. Reed will have his hands full with the many jobs that existence in that unfortunate city is presenting to the engineer, in fast becoming intolerable. Spies positively swarm; and you dare not stir out of doors without finding a lantern under the nose, and being arrested by gendarmes or bayoneted by sentries. If you wear a high-crowned hat, you are promptly suspected of Conservatism in favour with General Berg; but, on the other hand, you immediately become an object of suspicion to the National Government, and are marked out for the assassin, and couples one only such a relative rank as our Grosvenor-square holds towards Belgravia and Tyburnia. What a contrast to the Bohemian life of the *cafés chantants* and *bouillebaisse* and *aioli* in Paris, under the first Empire, were the founders of the fame of this sumptuous eating-house; but Honoré de Balzac used to say that the Café Anglais was the best in Paris. The sudden stroke of business on their part enabled them, according to Balzac, to purchase the reversion of the Russian property of the Orleans dowagers of France in 1814-5 were constant patrons of the "Trois Frères." The Muscovite appetite for champagne is well known, and the Bessemer were wiped out. But *Tempus edax rerum* is about to devour the temple so long devoted to gout eating. We trust that Verrey's, as futile as the "Trois Frères" in historical reminiscences, will be spared. It was in a *cabinet particulier* at Verrey's that the Duke of Wellington persuaded Blucher to abandon his project of blowing up the bridge of Jena.

The death of Mr. Bowyer, of her charming villa near Florence, in competence and honour, and at a ripe old age, is an event which, had it occurred a few years since, would have attracted extended comment that which, in this *sensitive naipere et reticulus*, this pre-Raphaelite age, has been allowed to pass almost unnoticed. The clever and amusing author of Mrs. Trollope poured forth in abundance, only equalled by her prolific son Anthony, have served their turn, have delighted Queen Pro Tempore Victoria, and come at last to the conclusion of cheap editions for the enlightenment of the Lower Ten Millions; but it should not be forgotten, even in an epoch which considers a whole life's labour fitted for a ten-line paragraph, that this was a woman who throughout her long and useful life ever advocated all that was good, and honest, and true, and stigmatised, with a very passionate, searching humour entirely her own, all that was mean, and false, and cruel. She "cracked" the atrocious factory system, and in "Michael Armstrong" pleaded the cause of the ill-treated, sickly, overworked children, who quivered beneath the overseer's strap and the "taskmaster's" ugly cane. She grappled with the poor-law in "Jessie Phillips," and held up its cold cruelty and heartlessness to execration. She dilated on the horrors of the American slavery in "Jonathan Jefferson Whitlaw" quite as eloquently, quite as pathetically, and much more logically than did Mrs. Beecher Stowe in "Uncle Tom." And she was a sectarian hypocrite! "The Widow Barnaby," and made it twist under the lash. In many points, and especially in the delineation of shams, she was a worthy rival to contemporary the famous Pelham Rebel, of Berlin, who afterwards became the wife of Mr. Meadows White. *Les elles hélléne quelen ich heaven*," quoth the Fraulein of one particular shrew. Frances Trollope was willingly as plainspoken, and would have agreed with her Teutonic sister that "it was not nothing better than to be angry, for a little irritation goaded her to speak the truth with more acerbity; and that disease is a malady that has often led her to speak at all."

For Alphonse de Lamartine is again in difficulties. There is a most painful advertisement in the morning papers of this week, setting forth that unless a large sum of money can be raised for him his estates must be sold. Here is a point. Has apparently turned out a failure, and Mr. de Lamartine is compelled to appeal to the British public for assistance. Will the complete edition of his works—seventeen guineas the set. It is mournful to think of this eminent author and statesman once more tendering the hat and crying *Date obolum Belisario*. We would be sorry to let the event pass which seem to cost more than they are worth; go to the hammer and accept the generosity of the British public. Should the appeal prove fruitful, it would be proud and eager to confer a pension on Alphonse de Lamartine?

SCIENTIFIC NEWS.

Colourless Lilac-flowers were produced for ornamental purposes in winter in Paris above forty years ago by amateur horticulturists by the aid of manure in their greenhouses. More recently, improved methods have been devised for obtaining them by ingenious professional gardeners. Some of these methods are described in the *Journal* of the Society of Horticulture of France, by having made many experiments with the view of ascertaining the cause of the loss of colour. He considers it to be that the ammoniacal gases in the atmosphere of the colouring matter is due neither to the heat, the enfeebling effect of the bad, nor to the absence of light, but to the gases from the current stoves. The rapidity of the development of the flowers may be an efficient cause of the loss of colour, but it is not the reason because the same effect is produced in the open air. In my last analysis I sought to seek the explanation of the fact in the influence of ammoniacal gases on colouring principles, and I have found that ammonia, or rather carbonate, in accordance with different observations, especially those of M. Grenaux, soon acts in certain proportions on the substances filled with plants existing in the free atmosphere." M. Barreau'd doubts this supposed action of ozone, and is inclined to attribute the phenomenon to the influence of the colourless matters of the plant. Whatever be the explanation, the facts certainly open up a new field for the researches of botanists and chemists.

The Colour of Salmon has been examined by Dr. John Davy (brother of Sir Humphry) with the view of determining the cause. He arrives at the conclusion that it is connected with oil or fatty matter, and that it belongs to the coloured muscles after the analogy of the colouring of the muscles of various other animals. The colour of salmon is not entirely due to chemical action in the way of metals. In beef, mutton, venison, and the hare of various species, the colour is due to blood. The colouring matter of the salmon is rendered paler by the action of a strong solution of ammonia (the spirit commonly), the colour being restored by acetic acid. Strong nitric acid it is rendered yellow; by strong sulphuric acid, brown; by strong muriatic acid a slight change of colour is produced; whilst weaker ether it acquires a brownish tint. Both the strong acids, the nitric and the sulphuric, it may be remarked, bleach the colouring matter of beef. The corresponding decomposing effect, to which the change of colour they occasion may principally be attributed, is shown in the case of the latter by the charring of the fibre, but do not deprive it entirely of colour. Both become very slightly coloured, and on cooling and evaporating to dryness the latter leaves a residue of coal. Dr. Davy is of opinion that the formation of the colouring matter is due partially to the action of the nerves on the blood-corpuscles.

The Fusion of the Points of Lightning Conductors has been clearly examined by Mr. Preece, of Newport, in a paper read before the Royal Academy of Belgium. Referring to the statistics of the subject published by M. Pouey, in which fourteen cases of steel or tubes of fusion of the points, seven were of copper, three of iron, and four of platinum, these being the only ones in which the metal composing the points of which the metal is specified. It is necessary to remark that, of the 168, 65 were made on the Saint-Sylvestre principle, with blunt points. Having reference to these and some other considerations, it seems to be proved that copper points are more liable to fusion than platinum, and platinum than those of iron, as a much better conductor of electricity. We have no space for the theoretical reasons adduced by Mr. Preece in this phenomenon, which, he says, should in no way interfere with the use of copper, the efficacy of which has been fully demonstrated by the fact that no lightning conductors composed of it in the British Navy since 1830.

Bromine in the Water of the Dead Sea.—Analysis of this water by Dr. Bence, of Rochefort, have been reported to the Academy of Sciences, Paris, by M. Peligot. Dr. Gay-Lussac, Boussingault, and other chemists, who have examined it, found that the great bulk, estimated that its composition varies within certain extensive limits—e.g., its density ranges from 1·01 to 1·20—and its proportion of chloride of calcium in these limits is contains (22 or 23 grammes per litre or kilogramme) is also very remarkable; but what is still more remarkable is the considerable proportion of bromine it contains (nearly 5 grammes per litre). If bromine should ever become an industrial agent, as it probably soon will become, the Dead Sea, over in which it is eats almost entirely contained with chloride of magnesium. We may mention for non-chemical readers that bromine has named from its stench, for a stench) is a poisonous volatile liquid element discovered in salt water by Balard in 1826. It is found in sea-water, and in the brine of salt springs, with in combination in salt-springs, in the salt of seaweed, in sponges, and in many mineral waters. It is also found in the Dead Sea, in Java, in South Wales, in Cuba, and at Huigniech, in Brittany. Very small quantities are found in Silesian zinc and in English coal-ashes.

Weather Prognostics.—A collection of the popular weather proverbs of Scotland was made by Dr. Arthur Mitchell, and published in the new number of the *Edinburgh Philosophical Journal*. The collection has been submitted to the test of science by the members of the Scottish Meteorological Society, who has since stated as a general meeting of the society that he considered that only a few of the proverbs have any real value, and also very important to have them explained and tested on scientific principles. The general meeting of the Meteorological Society subsequently held at their president, he then very liberally intimated his readiness to give twenty guineas as a premium for the best scientific explanation of these prognostics, securing the concert to make the necessary arrangements. That body accordingly have announced that they will award the prize to the writer of a good treatise, a piece of plate, or otherwise, as the successful competitor may desire. The competing papers are to be sent, before May 1, 1869, to Mr. Buchan, secretary to the society, No. 16, St. Andrew-square, Edinburgh, from whom separate copies of Dr. Mitchell's collection may be obtained. It includes notices of local prognostics: hills or mountains; 2, Mists or fogs; 3, The appearance of the sky; 4, Rain; 5, Snow; 6, Hail; 7, Dew; 8, Frost; 9, Wind, and thunder; 5, Distant objects seen with clearness; 6, Unusual sounds; 7, Underground prognostics; 8, Plants; 9, Conduct, movements, &c., of animals; and man; 10, Unclassified prognostics. Very many of these prognostics are of extreme antiquity.

The Italian schooner Gulia, of Palermo, on a voyage from Cronstadt to Dundee with flax, while entering the river Tay on Saturday last during a strong wind from the south-east and a heavy sea, was observed to have a signal of distress flying. The life-boat of the National Lifeboat Institution at Broughty Ferry immediately taken by a Dundee steamer, and soon afterwards reached the vessel. With the joint assistance of the life-boat's crew and the steamer the schooner and her crew of ten men were taken to a place of safety.

NATIONAL SPORTS.

The opening day of the Newmarket Second October Meeting was all that could be desired. The attendance of the stanch supporters of the turf was large, the weather fine, and the racing of more than the average quality for a Monday at head-quarters. The usual feature of the day, however, the Handicap Plate, over the Cesarewitch course, did not affect the state of the odds on the great race of the morrow, as although several from the great stables having horses in the Cesarewitch ran, they had not been tried with any of the likely starters for the latter race. Tuesday will long be remembered by the natives of and visitors to Newmarket, for seldom if ever have so many Royal Princes, including one crowned head, delighted to honour the sports of the people of England with their presence. The Prince of Wales has already so familiarised himself with his loyal future subjects on similar occasions that the immense assemblage on the stand and the heath considered his reappearance among them as a tacit renewal of the pledge to patronise and support the national pastime. But the unexpected visit of the youthful King of the Greeks and his illustrious father aroused an amount of interest and curiosity difficult to appreciate to its full extent. It was a Royal tribute to the mass of the English people, and found an earnest re-echo in the loyal and hearty cheers with which the august party were greeted on their arrival and departure.

The dark problem of a great handicap like the Cesarewitch had scarcely ever so easy a solution. Dulcibella, in 1860, affords the best parallel. Her rush at the Ditch gap, full of running, and her magnificent stride up the hill, where Saddler was obliged to take a pull at her, and the style in which she quitted her horses half way up the cords, will not soon be forgotten by those who witnessed the victory of William Day's mare. But Lioness won all the way just as easily, and so charmed the Prince of Wales by her performance that he could not resist the temptation of examining her racing points, all of which he was pleased to pronounce "good." Mr. Merry, too, came in for a share of the Royal condescension, and was especially congratulated by his Royal Highness on the possession of such a good animal. The success of the "yellow, and black cap" gave, except to the losers (who, by-the-by, must have been many), almost universal satisfaction, and a certain feeling about the mare that ran second could scarcely be disguised. Mr. Merry repeated his victory in the Clearwell, the next most important event of the meeting, which Crisis, a son of his favourite Saunterer, landed with odds of 100 to 15 against him. Wednesday, the "off day," was not marked by any incident worthy of special comment. Lord Glasgow won a 25-sov. sweepstakes with Anonyma, giving that St. Leger impostor, Donnybrook, 16 lb. for the year. The early turf career of the Duke of St. Albans is made bright by some petty successes; and this day he added one to the number in a sweepstakes of 10 sovs. each, over the T.Y.C., won by Ostentation. The Select Stakes was a walk over for Macaroni, and in the Oatland's Plate Donnybrook slightly redeemed himself by running away from an indifferent field. The meeting of Linda and Alpheus was a medium for some heavy betting. But the filly, giving away 6 lb., won easily, although the colt was backed freely at even money.

The illness of the Duke of Athole threw a sad damp over the Caledonian meeting at Perth, and two of the principal houses in the neighbourhood were not open, as usual, for the week. The weather was very bad and the sport wretched, and, in fact, the £610 was so frittered away by "arrangements" among the few owners who brought horses that some of the members of the Hunt seemed to be of opinion that it would be far better to bestow their money upon Highland games in future. The sum is not enough for three days' racing, but ample for two, and the sooner the meeting is reduced to two days the better. Caller Ou won the Queen's Plate, which makes, we believe, her thirteenth this year, but she looked dreadfully stale after all her journeys from one end of Great Britain to the other. Mr. Carruthers, the master of the Dumfriesshire hounds, was elected a member of the club, which was established in 1777, and is confined to seventy members.

A match, made some time back, between Captain Machell and Mr. Chadwick, to run 100 yards for 500 sovs., took place on Thursday morning, over a selected portion of ground on the Bury road, opposite Mr. Dawson's residence. Both gentlemen had undergone a severe preparation for the contest. Captain Machell, who was the favourite at 5 to 2, which odds have been laid to a large amount, won easily.

The lovers of cricket, if not the people of Great Britain generally, will have their mind's-eye fixed on the antipodes for months to come. England's grand twelve cricketers, selected to represent a second time that noble game in Australia, sailed for Melbourne on Wednesday last in the Great Britain—rather appropriate. Their names are—G. Parr, J. Cæsar, R. Carpenter, T. Hayward, W. Caffyn, A. Clarke, T. Lockyer, G. Tarrant, J. Jackson, J. Anderson, R. C. Tinley, and, though last not least, the celebrated player, E. M.Grace.

NEWMARKET SECOND OCTOBER MEETING.—Monday.

Handicap Sweepstakes of 20 sovs.—Walloon, 1. Peignoir, 2. Canace, 3.
Fifty Pounds.—Crytheia, 1. Young Rapid, 2. Caryophylus, 3.
Fifty Pounds.—Tomato, 1. Light, 2. Flutter c., 3.
Handicap Sweepstakes of 10 sovs.—Attraction, 1. Water Kelpie, 2. Bay Celia f., 3.
Sweepstakes of 300 sovs.—Linda, 1. Yamuna, 2.
Handicap Plate of £50.—Bally Edmond, 1. Gibraltar, 2. Dulcibella, 3.
Renewal of the Sweepstakes of 50 sovs.—Curaçoa walked over.

TUESDAY.

Royal Stakes.—Columba, 1. Barter, 2.
Handicap Sweepstakes of 15 sovs.—Merry Maid, 1. Gunner, 2. Actæon, 3.
Town Plate.—Equinox, 1. Petersham, 2. Belle of Yorkshire, 3.
Cesarewitch Stakes.—Lioness, 1. Limosina, 2. Jack of Hearts, 3.
Selling Handicap Sweepstakes of 10 sovs.—Norry, 1. Prince Lee Boo, 2. Knave of Trumps, 3.
Clearwell Stakes.—Crisis, 1. Planet, 2. Knight of Snowdon, 3.
Sweepstakes of 5 sovs.—Juliet, 1. Brother to Dreadnought, 2. Folly, 3.

WEDNESDAY.

Beaufort Stakes.—Water Kelpie, 1. Curaçoa, 2.
Sweepstakes of 25 sovs.—Anonyma, 1. Donnybrook, 2.
Maiden Plate.—Voucher c., 1. Eleanor, 2. Lady Milton, 3.
Handicap Sweepstakes of 15 sovs.—Plush c., 1. Signalman, 2. Roodee, 3.
Handicap Sweepstakes of 10 sovs.—Golden Dust, 1. Rosina, 2. Twilight, 3.
Sweepstakes of 10 sovs.—Ostentation, 1. Flaneur, 2. The Plover, 3.
Select Stakes.—Macaroni walked over.
Bedford Stakes.—Goldylocks, 1. Annington, 2. Antinous, 3.
Oatlands Plate.—Donnybrook, 1. Cheerful, 2. Sledmere, 3.
Sweepstakes of 50 sovs.—Linda, 1. Alpheus, 2. Lady Hawthorn f., 3.

THURSDAY.

Handicap Plate.—Revolver, 1. Birthday f., 2.
Free Handicap.—Newmarket, 1. Lady Louisa, 2.
Sweepstakes of 10 sovs.—Ostentation, 1. Norroy, 2.
Sweepstakes of 25 sovs.—Dolphin, 1. Rosebud, 2.
Sweepstakes.—Antoinette, 1. Lord Adolphus, 2.
Bretby Stakes.—Isca, 1. Sister to Mincepie, 2.
£50 Plate.—Miss Armstrong, 1. Senorita, 2.

LATEST BETTING ON THURSDAY.

Cambridgeshire.—11 to 2 agst Limosina (t), 6 to 1 agst Catch-'em-Alive (t), 100 to 6 agst Bathilde (t), 100 to 6 agst Birdhill (t), 25 to 1 agst Borealis (t), 100 to 3 agst Hubert (t), 40 to 1 agst Roman Bee (t), 40 to 1 agst Carnival (t), 50 to 1 agst Gemma (t), 60 to 1 agst Anfield (t). Only Limosina, Catch-'em-Alive, and Hubert in request.

The Grand Duchess Olga of Russia has arrived at Nice to pass the winter.

The *Gazette des Etrangérs* says that the Annamite Ambassadors, struck with admiration of the actresses of the Paris theatres, have ordered of the costume-makers specimens of the principal female costumes worn in the fairy pieces at the Opera and elsewhere. When asked what they intended to do with them, they replied that they meant to adopt them as the ordinary attire of their wives and daughters.

The ship Gipsy Bride (Mr. Paul Murphy, master), on her voyage from Hong-Kong to Singapore, struck upon the north-east point of the Scarborough reef of rocks during obscure weather. The ship settled down upon the rocks, and the ship's crew were under the necessity of leaving her in the boats. One boat arrived at Manilla on the 25th ult. with the mate and carpenter and four lascars, and on the 28th another boat reached Manilla with eight lascars; two more boats have since arrived at Manilla with lascars, but the master's boat and a sixth boat had not since been heard of.

The Peninsula and Oriental Company's steam-ship Delta sailed from Southampton on Monday. She took out on freight 696 boxes of specie, value £278,959, of which about £40,000 in sovereigns is for Alexandria, and the remainder for Bombay, consisting of bar gold, £47,050; gold coin, £5500; bar silver, £173,850; silver coin, £10,400; and gold thread, jewellery, &c., £2058. She also took out a full cargo of general merchandise, principally Manchester goods.

THE MERSEY STEAM-RAMS.

The Government has taken a decisive step in respect to the steam-rams built by Messrs. Laird at Birkenhead. Yesterday week the customs authorities at Liverpool received instructions to seize the vessels, and they at once carried their orders into effect. The "broad arrow," the official seal of detention, has been placed on one of the rams. They will now be dealt with in due course of law.

On Monday the gun-boat Goshawk, tender to her Majesty's ship Majestic, was removed from the Lower Basin into the Great Float, and was moored close to the ram which is being fitted up there.

The *Times* of Tuesday stated that a guard of Marines, from her Majesty's ship Liverpool, was put on board the El Tousson on Monday. This, however, was denied by the *Liverpool Courier* of the following day. "Neither on Monday nor subsequently (says the *Courier*) has a guard of Marines been on board the steam-ram. She is still in charge of the same customs' officer who first went on board; that officer has never been away except at rare intervals, and when absent his post has been taken by another officer of customs. In the mean time the work upon the El Tousson has not been suspended; and yesterday (Monday), while the officer in possession was pacing the deck, Mr. Laird's workmen were busily employed in completing the formidable revolving cupolas with which she is to be armed. No attempt is made to conceal the warlike character of the ship, nor could such an attempt be in any respect successful. She is palpably and undoubtedly a magnificent man-of-war. She still lies at her old moorings in the Great Float, and is the subject of a good deal of public curiosity. The gun-boat Goshawk, tender of the frigate Liverpool, has been drawn closer to the ram, and her moorings are now attached to those of El Tousson. By this arrangement the ram could not leave the dock without displacing the moorings of the Goshawk. Her Majesty's ship Liverpool, which for several days lay off the entrance to the Birkenhead docks, with fires banked up and everything in readiness for quick departure, has returned to her appointed anchorage in the Sloyne, where she now lies."

The Cardinal Archbishop of Cologne has just decided that women shall not any longer be permitted to sing in masses in the cathedral of that city, but that the service shall in future be chanted by men only.

The first synod of the United Presbyterian Churches in England, now in session at Liverpool, was opened on Monday night, when, after a sermon by the Rev. Dr. Smith, Dr. Crichton, of Liverpool, was unanimously elected Moderator, and the Rev. R. S. Scott, of Manchester, clerk of the synod. Mr. Samuel Stitt, of Liverpool, was appointed treasurer.

The annual dinner of the North Walsham Agricultural Society took place yesterday week. Lord Suffield occupied the chair. Mr. C. Buxton, M.P., in responding to a toast, said he rejoiced to find that the antagonism which at one time prevailed between the tenant-farmer and the clergyman, merely because the latter was a clergyman, was rapidly dying out; and the more educated tenant-farmer could not but perceive that the parish church was deserving of his respect and veneration, and that, not only for the sake of his own family, but for the sake of the people whom he employed, it ought to be of great interest to him to see that the national Church was made to perform its duty as well as it possibly could. Lord Wodehouse, in replying to the toast of his health, advocated a policy of neutrality in regard to both Poland and America.

There is now in course of erection in Bishopwearmouth parish church a monument to the late Mr. Thomas William Bowlby, the *Times*' correspondent in the late Chinese War, designed by Mr. J. Pennethorne, architect, of London, and executed by Mr. Wren, of Pimlico, which will be placed in the south aisle of the church, near the chancel. It is executed in Aubigny stone, the tablet being polished black marble. The design is in the pointed Gothic. Upon the tablet, in gilt letters, is placed the following inscription, written by Mr. Bowlby's schoolfellow and fellow-townsman, Mr. Tom Taylor:—"In memory of Thomas William Bowlby, son of the late Captain Thomas Bowlby, R.A., born at Gibraltar, and educated at the Grange School, in this neighbourhood, who, while fulfilling the duties of correspondent to the *Times* newspaper in the Chinese War of 1860, was captured by the enemy, and, with his fellow-prisoners, died under the barbarous treatment of his captors, on the 25th of September, 1860, in the 43rd year of his age. This tablet is erected by a body of his friends and schoolfellows as a tribute of respect and affection."

The series of religious services—the first in connection with the jubilee of the Wesleyan Methodist Missionary Society—was concluded in Leeds, on Friday night, by the Rev. W. Arthur preaching a sermon before the society in Brunswick Chapel. The subscriptions and collections during the past week amounted to £36,000. This magnificent result was attained by thirteen gentlemen giving £1000 each, another contributor £2000, his sister £1000, and by smaller sums. It is anticipated that from £300,000 to £400,000 will be raised by the jubilee services throughout the country. How this money is to be expended has not yet been determined; but it is expected (says the *Manchester Examiner*) that a theological institution will be erected near Leeds for the exclusive training of students to act as missionaries, to provide a fund for disabled missionaries and for the widows and orphans of missionaries, to create a capital fund, and to extend the missionary work in India, China, Western Africa, and elsewhere.

The Distress in the North.—The weekly meeting of the Central Executive Committee was held in the Townhall, Manchester, on Monday. The Earl of Derby, presided. The hon secretary reported that the subscriptions received during the week amounted to £542; the balance in the bank was now £279,948. One bale of clothing, specially appropriated, had been received and sent away. Mr. Commissioner Farnall read his weekly report, which stated that "on the 3rd inst. there was a decrease in the number of persons receiving parochial relief in twenty-seven unions in the cotton-manufacturing districts, as compared with the number so relieved in the previous week, of 5189; but in the corresponding week of last year I reported an increase of 4539 persons in receipt of parochial relief, as compared with the previous week. The total weekly cost of outdoor relief, on the 3rd inst., was £8348; in the corresponding week of 1861 it was £2371. In the corresponding week of 1862 it was £10,194." The following grants were made from the general relief fund:—Ashton-under-Lyne, £1800; Stalybridge, £400; Dukenfield, £150; Blackburn, £1000; Hyde, £800; Rochdale, £1000; Stockport, £1250. Some minor grants were also made.

MONETARY TRANSACTIONS OF THE WEEK.

(From our City Correspondent.)

The advance in the value of money in Paris to five per cent, and the serious drain upon the stock of bullion—about £800,000 having been withdrawn since the last return was made up—have produced considerable inactivity in the Consol Market, and a further decline in the quotations. The dividend payments having been commenced, rather more stock has been absorbed during the last few days; but it is understood that the £289,815 available for the reduction of the National Debt will be applied in the redemption of deficiency bills. In the value of the Unfunded Debt very little change has taken place.

The demand for accommodation in all quarters has been very extensive, owing, in some measure, to an anticipated advance in the Bank rate to 4½ per cent.

The supply of capital is very large; nevertheless, the lowest quotations in the open market are as follows:—

Thirty days' bills	4 per cent.	Four months' bills	4½ per cent.
Sixty days' bills	4¼ ,,	Six months' bills	4½ 5 ,,
Three months' bills	4¼ ,,		

In the Stock Exchange money has been offered at 3 per cent for short periods.

On most parts of the Continent capital is advancing in price. Annexed are the rates in the leading cities:—

	Bank rate, per cent.	Open market, per cent.		Bank rate.	Open market
Paris	5	4¾	Amsterdam	3	3
Vienna	5	5	Turin	6	6
Berlin	4	4	Brussels	4	4
Frankfort	3½	3¼	Hamburg	—	4½
			St. Petersburg	6	8

The imports of the precious metals have exceeded £700,000, and £189,000 in gold has been sent into the Bank of England. However, £151,000 has been withdrawn for export.

At the weekly meeting of the Directors of the Bank of England no alteration was made in the rates of discount.

New York advices bring a further decline in the stock of bullion held by the banks of £200,000. The amount now in the coffers is rather under £6,000,000. The exchange shows very little profit on shipments to this country. The Continental exchanges are still in our favour.

We understand that small amounts have come to hand to meet the dividends upon the Granada and Venezuela Stock; but that the Government of Equador have directed the suspension of the payment of 25 per cent of the duties of Customs pledged to the foreign creditors.

The steamer for the East has taken out £276,800 in bullion, of which £40,000 is for Alexandria; and the residue of £52,550 in gold, and £184,250 in silver, for Bombay.

On Monday, Home Securities were very dull and drooping. Consols, for Money, were done at 92⅞ 93; Ditto for Account, 93⅛ ¼; Reduced and New Three per Cents, 91½ ⅝; India Five per Cents, 108⅝ ⅞; Ditto Four per Cents (new stock), 100⅞; Ditto, Bonds, 18s. to 22s. prem.; Exchequer Bills, par to 3s. prem. The Five-and-a-Half per Cent Rupee Paper was 110⅞. The Funds were heavy on Tuesday. Consols left off at 93 to 93⅛; Reduced and New Three per Cents, 91½ ⅝; Bank Stock, 235; Long Annuities, 14⅞; India Five per Cents, 108¾; Ditto Four per Cents, 100⅝ ⅞; Ditto Four per Cent Rupee Paper, 93½; Ditto, Debentures, 99⅞ and 100½; Exchequer Bills, par to 3s. prem. There were several fluctuations in prices on the following day. Consols closed at 93 to 93⅛ for Money, and 93⅛ ¼ for Account; Reduced and New Three per Cents, 91½ ⅝; Bank Stock, 235; Red Sea Annuities, 21; India Five per Cents, 108⅞; Ditto Four per Cents, 100⅞; Exchequer Bills, par to 3s. prem. On Thursday the market was somewhat firmer. Consols, for Money, sold at 93 to 93⅛; for Account, 93⅛ to ¼; Reduced and New Three per Cents, 91½ ⅝; and Exchequer Bills, par to 3s. prem.

The Foreign House has continued heavy. In Greek, Spanish, and Mexican Securities a further slight fall has taken place; otherwise, the quotations are without material change from last week. The Confederate Loan is firmer, at 62 to 65. Brazilian Five per Cents have marked 92½ ex div.; Egyptian, 101; Greek, 34¼; Ditto, Coupons, 16½; Mexican Three per Cents, 42⅞; Moorish, 95¼; New Granada Deferred, 9¼ ex div.; Ditto, Land Warrants, 7½; Peruvian Four-and-a-Half per Cents, 1862, 87½; Portuguese Old Three per Cents, 49⅞; Ditto, 1862, 40¼; Russian Four-and-a-Half per Cents, 90½; Ditto, 1862, 93¼; Sardinian Five per Cents, 88⅞; Spanish Three per Cents, 54⅞; Ditto, Deferred, 48⅞; Ditto, Passive, 34½; Ditto, Certificates, 13⅞; Turkish Old Six per Cents, 92½; Ditto, 1858, 70½; Ditto, 1862, 71½; Venezuela Six per Cents, 62; Dutch Four per Cents, 100¼ ex div.; French Rentes, Three per Cents, 67f. 75c.; and Italian Five per Cents, 72⅞. The Scrip of the Columbian Loan has sold at par to ½ premium.

There has been less activity in the demand for Joint-stock Bank Shares, and in several instances prices have declined:—Agra and United Service have sold at 120; Alliance, 40½; Australasia, 77; Bank of Otago, 11¼; Bank of New Zealand, 13½; Chartered of India, Australia, and China, 38; Chartered Mercantile of India, London, and China, 70; Consolidated, 10¼; Continental, 10; English and Irish, 9¼; Hindustan, China, and Japan, 27¼; Imperial, 18⅞; London and Brazilian, 49½; London, Buenos Ayres, and River Plate, 49½; London Chartered of Australia, 29½; London and County, 52½; London Joint-stock, 36½; London and South African, 27½; London and South American, 3½; London and South-Western, 9½; Metropolitan and Provincial, 18½; New South Wales, 51; New Zealand, 3; Scinde, Punjaub, and Delhi, 0½; Standard of British South Africa, 23⅞; and Union of London, 59.

A limited business has been transacted in Colonial Government Securities. Canada Six per Cents have sold at 104¼; Mauritius Six per Cents, 1873, 109⅞; New South Wales Five per Cents, 1888 to 1892, 103; and Victoria Six per Cents, 110½.

The Miscellaneous Market has been tolerably firm. Ceylon Company's shares have realised 7⅞; Egyptian Commercial and Trading, 3⅞; General Credit and Finance of London, 4⅞; International Financial Society, 9⅞; Italian Irrigation Canal, 4½; Ditto, Six per Cent Bonds, 89; Joint-Stock Discount, 6⅞; London Financial Association, 13⅞; National Discount, 9¼; Oriental Inland Steam, 3; Royal Mail Steam, 75; Berlin Waterworks, 9½; East London, 132½; Hudson's Bay shares have been 1⅞ to 1½ discount; but those of the Imperial Bank of Austria have touched par to ½ premium.

Most American Securities have changed hands slowly. Erie shares have realised 69; and Illinois Central Seven per Cents, 18⅞ discount.

The Railway Share Market has been very inactive; nevertheless, no change of importance has taken place in the quotations. Annexed are Thursday's official closing prices:—

Ordinary Shares and Stocks.—Great Eastern, 51¼; Ditto, East Anglian Stock, 9½; Great Western, 65; Lancashire and Yorkshire, 111; London and Blackwall, 72¼; London, Chatham, and Dover, 41⅞; London and North-Western, 102¼; London and South-Western, 101¼; Manchester, Sheffield, and Lincolnshire, 46¼; Metropolitan, 130½; Midland, 128¼; North British, 56⅞; North-Eastern—Berwick, 101⅞; North London, 120; South-Eastern, 95¼; Staines, Wokingham, and Woking, 9⅞; Victoria Station and Pimlico, 170.

Preference Shares.—Midland—Leicester and Hitchin, 91; North-Eastern—Stockton and Darlington, 34.

British Possessions.—Bombay, Baroda, and Central India, 108⅞; Cape Town and Dock, 105¼; East Indian, 108; Grand Trunk of Canada, 23⅞; Ditto, 1st Preference, 75; Ditto, 2nd Preference, 71; Ditto, 4th Preference, 31½; Great Indian Peninsular, 108¼; Great Western of Canada, 10⅞; Madras Five per Cent, 106; Scinde, 107¼.

Foreign.—Recife and San Francisco, 18; Sambre and Meuse, 10½; Ditto, Five-and-a-Half per Cent Preference, 9⅞; San Paulo, 2⅞; Turin and Savona, 3½; Ditto, 16; Western and North Western of France, 20⅞.

The return of the Bank of England for the week ending Oct. 14 shows the following results, when compared with the preceding statement:—

An increase of circulation of	£316,238	A decrease of other securities of	£1,251,132
A decrease of public deposits of	4,894,005	A decrease of bullion of	28,498
An increase of other deposits of	3,459,176	A decrease of rest of	613,141
A decrease of Govt. Securities of	195,861	A decrease of reserve of	653,601

The total circulation is £22,860,695. Public deposits amount to £4,610,052, and private deposits to £16,352,818. Securities are £32,382,578, and the stock of bullion is £14,370,911.

THE MARKETS.

Corn Exchange, Oct. 12.—The quantity of English wheat on offer in to-day's market was only moderate; yet the demand for most kinds was in a sluggish state, at about stationary prices. Foreign wheat—the supply of which was extensive—moved off slowly, at barely late rates. In floating cargoes of grain very little was doing. The show of barley was moderately good, and the trade ruled heavy, on somewhat easier terms. New malt was firm in price; but old qualities were much neglected. Owing to a large influx from abroad, oats changed hands slowly, at 6d. per quarter less money. Beans were very dull, and 1s. per quarter lower. In peas only a limited business was passing, on rather easier terms. Flour sold slowly.

Oct. 14.—Nearly all kinds of produce met a slow inquiry to-day; but, compared with Monday, no quotable change took place in prices.

English.—Wheat, Essex and Kent, red, new, 40s. to 45s.; ditto, white, 41s. to 47s.; Norfolk and Suffolk, red, 40s. to 45s.; rye, 32s. to 34s.; grinding barley, 26s. to 28s.; distilling ditto, 29s. to 32s.; malting ditto, 28s. to 38s.; Lincoln and Norfolk malt, 60s. to 66s.; brown ditto, 50s. to 57s.; Kingston and Ware, 60s. to 66s.; Chevalier, 66s. to 68s.; Yorkshire and Lincolnshire feed oats, 18s. to 22s.; potato ditto, 22s. to 26s.; Youghal and Cork, black, 16s. to 21s.; ditto, white, 16s. to 22s.; tick beans, 30s. to 32s.; grey peas, 31s. to 36s.; maple, 38s. to 40s.; white, 37s. to 38s.; boilers, 38s. to 39s. per quarter. Town-made flour, 40s. to 43s.; town households, 34s. to 36s.; country marks, 27s. to 30s. per 280 lb.; French, 36s. to 39s. per sack; American, 19s. to 25s. per barrel.

Seeds.—The business doing in all kinds of seed is very limited, at about previous currencies. Cakes are unaltered in value.

Linseed, English, crushing, 64s. to 69s.; Calcutta, 64s. to 65s.; hempseed, 44s. to 46s. per quarter; coriander, 16s. to 19s. per cwt.; brown mustard seed, 10s. to 14s.; white ditto, 11s. to 12s.; tares, 5s. 6d. to 6s. per bushel; English rapeseed, 60s. to 61s. per quarter. Linseed cakes English, £9 10s. to £10 5s.; ditto, foreign, £9 10s. to £10 15s.; rape cakes, £6 to £6 12s. per ton; canary, 36s. to 50s. per quarter; red clover seed, 33s. to 48s.; white ditto, 51s. to 60s. per cwt.

Bread.—The prices of wheaten bread in the metropolis are from 7d. to 7½d.; of household ditto, 5½d. to 6½d. per 4lb. loaf.

Imperial Weekly Averages.—Wheat, 41s.; barley, 34s. 7d.; oats, 19s. 4d.; rye, 31s. 5d.; beans, 37s.; peas, 36s. 4d.

The Six Weeks' Averages.—Wheat, 43s. 4d.; barley, 31s.; oats, 20s. 7d.; rye, 31s. 10d.; beans, 38s. 7d.; peas, 36s. 8d.

English Grain Sold last Week.—Wheat, 110,526; barley, 81,649; oats, 14,571; rye, 239; beans, 1701; peas, 1974 quarters.

Tea.—There is about an average business doing in all kinds, and prices are supported. The stock in London amounts to 69,563,000 lb., against 51,751,000 lb. at the corresponding period in 1862.

Sugar.—All raw qualities are in request, at full quotations, to, in some instances, a slight advance. Barbadoes has realised 33s. to 40s.; Jamaica, 32s. 6d. to 36s.; and St. Lucia, 31s. 6d. to 35s. per cwt. Refined goods move off steadily, at 45s. 6d. per cwt. for common brown lumps. The stock of sugar is now 106,790 tons, against 86,180 tons last year.

Coffee.—Rather more business is doing in this article, and prices are somewhat firmer. Stock, 10,810 tons, against 8415 tons in 1862.

Rice.—The demand is steady, and the quotations rule about stationary. Stock, 30,011 tons, against 60,163 tons.

Provisions.—Irish butters move off slowly, at last week's prices. Foreign qualities continue steady. The bacon market is firm, at fully late rates. Other provisions are inactive.

Tallow.—The demand is firm, at 45s. per cwt. for P.Y.C. on the spot. The stock consists of 48,036 casks, against 46,612 ditto in 1862. Rough fat, 2s. 3½d. per 8 lb.

Oils.—Scarcely any change has taken place in the value of oils; but the demand, generally, is somewhat restricted. French turpentine, 72s. per cwt.

Spirits.—The inquiry for rum is somewhat restricted, at 1s. 5d. per gallon for proof East India. Brandy is offering at from 3s. to 11s. 4d.; Hambro' spirit, 1s. 4d. to 1s. 5d.; English ditto, grain, 1s. 8d. to 1s. 10d.; Ditto, rice, 1s. 4d. to 1s. 5d.; and English gin, for export, proof, 2s. 9d. to 3s. per gallon.

Hay and Straw.—Meadow hay, £3 to £4 10s.; clover, £4 to £5 15s.; and straw, £1 6s. to £1 14s. per load.

Coals.—Best house coals, 20s. to 21s.; seconds, 18s. 3d. to 19s.; Hartley's, 16s. 6d. to 17s. 3d.; and manufacturers', 12s. 3d. to 15s. 3d. per ton.

Hops.—There is a full average business doing in most kinds of hops, at from 100s. to 160s. per cwt. The show of samples is moderately extensive.

Wool.—The market is steady, and prices are well supported. About 60,000 bales are now on hand for the next public sales.

Potatoes.—The supplies are large, and the demand is steady, at from 50s. to 100s. per ton.

Metropolitan Cattle Market (Thursday).—There was a full average supply of beasts on offer here to-day, as to number; but the general condition of the stock was inferior. Most breeds changed hands slowly, at about Monday's currency. The extreme rate was 5s. per 8 lb. The show of sheep was only moderate, and most breeds were in fair request at about stationary prices. The best Downs sold at 5s. 4d. per 8 lb. No quotable change took place in the value of calves; but the inquiry for them was inactive. For the time of year pigs met a dull sale, at late rates. Milch cows were almost nominal in value. Per 8lb. to sink the offal:—Coarse and inferior beasts, 3s. 2d. to 3s. 6d.; second quality ditto, 3s. 8d. to 4s. 2d.; prime large oxen, 4s. 4d. to 4s. 8d.; prime Scots, &c., 4s. 10d. to 5s.; coarse and inferior sheep, 3s. 6d. to 4s.; second quality ditto, 4s. 2d. to 4s. 6d.; prime coarse-woolled sheep, 4s. 8d. to 5s.; prime Southdown ditto, 5s. 2d. to 5s. 4d.; large coarse calves, 3s. 4d. to 4s.; prime small ditto, 4s. 2d. to 4s. 4d.; large hogs, 3s. 6d. to 4s.; neat small porkers, 4s. 2d. to 4s. 6d.; suckling calves, 12s. to 20s.; and quarter-old store pigs, 20s. to 26s. each.

Head of Cattle on Sale.—Total supply:—Beasts, 1100; cows, 130; sheep, 7220; calves, 310; and pigs, 492. Foreign: Beasts, 369; sheep, 2220; and calves, 291.

Newgate and Leadenhall.—The supplies of meat are good, and a steady business is doing, as follows:—Beef, from 2s. 6d. to 4s.; mutton, 3s. to 4s. 4d.; veal, 3s. 6d. to 4s. 2d.; and pork, 3s. 4d. to 4s. 4d. per 8 lb. by the carcass.

INAUGURATION OF A VOLUNTEER FIRE-BRIGADE AT MACCLESFIELD: THE PROCESSION LEAVING THE MARKET-PLACE.—SEE PAGE 395.

NEW CORN EXCHANGE, ST. NEOTS.

THE annual dinner of the Huntingdonshire Agricultural Society was held on the 30th ult., in the New Corn Exchange at St. Neots. The building is in the Elizabethan style, surmounted by a turret. Its interior dimensions are 60 ft. by 50 ft., and it is supported by open truss-beams, painted blue and lighted with star burners. In addition it has suite and committee rooms and other conveniences. Mr. P. Bellamy, of Lincoln, was the architect, and the building was confided to Mr. Wildman, of St. Neots. The cost of the Exchange is about £2000. It stands in a central spot, at the corner of High-street and South-street.

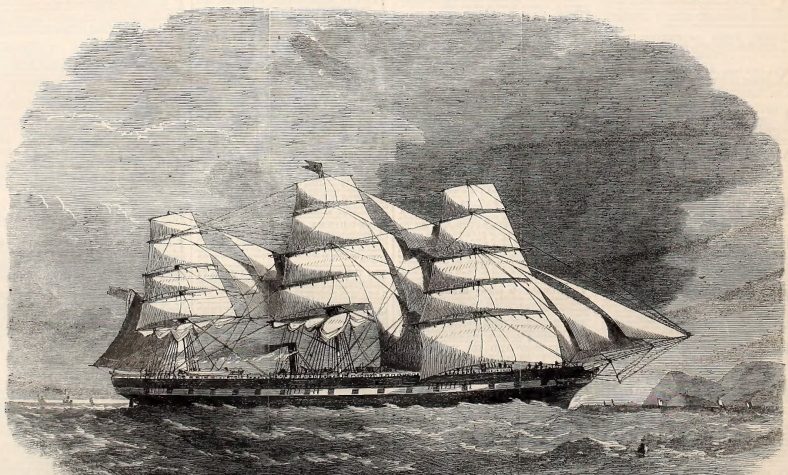
R. P. COLLIER, ESQ., M.P., SOLICITOR-GENERAL.

THE appointment of Mr. Collier to the office of Solicitor-General has only fulfilled an expectation which has been for some time entertained that he would be selected for that post on the first eligible occasion. Having already received the confidence of the Government so far

NEW CORN-EXCHANGE, ST. NEOTS, HUNTINGDONSHIRE.

as to have been chosen to hold one of their law offices—that of Counsel to the Admiralty and Judge Advocate of the Fleet, in the year 1859, his promotion to a higher function, considering the position he occupied in Parliament, was only a question of time and opportunity. Mr. Collier has taken part in most if not in all the important Parliamentary proceedings of the last few years; and the speeches made by him on the vexed question of privilege between the Houses of Lords and Commons, on the repeal of the paper duties, and, last Session, on the international law involved in the cases of the Alabama and the Alexandra, were notable and noted. He has always been a professed law reformer, and has pointedly assisted in all legislative projects having a tendency to the improvement of the principles and the administration of our legal system. In reference to the law of Parliament he has been personally active in attempts to settle the question of the payment of travelling expenses of outvoters in boroughs by candidates. In debate Mr. Collier is ready: as a speaker he is argumentative, and at the same time earnest, but does not essay the higher flights of oratory. Mr. Collier is the eldest son of the late John Collier, Esq., a merchant and shipowner, who was member for Plymouth from 1832 to 1841; and was born at Mount Tamar, near Plymouth, in 1817. He was educated at the Plymouth Grammar School and at Trinity College, Cambridge, where he graduated B.A. in 1841. In 1843 he was called to the Bar at the Inner Temple, and went the Western Circuit. The first occasion on which Mr. Collier attracted public attention as an advocate was by his defence of certain Spanish seamen, who were tried for piracy, on the Western Circuit, the case being one which involved much labour and great nicety in its conduct by their counsel; and it was generally allowed that Mr. Collier was equal to the occasion. In 1854 Mr. Collier's position on his circuit, and at the Bar generally, was thought to entitle him to the usual advancement in professional rank, and he was created a Queen's Counsel. The learned gentleman is the author of works on "The Law of Railways" and "The Law of Mines." So early as 1841 he attempted to enter Parliament, having been in that year an unsuccessful candidate for the borough of Launceston. He was first returned for Plymouth in 1852, having an hereditary as well as a local claim on the sympathies of that constituency, which he has continued to represent ever since. Mr. Collier is a Liberal, is in favour of a large extension of the suffrage, and the exemption of Dissenters from church rates; he is opposed to the grant to Maynooth, and votes in favour of the ballot.

Our Portrait of Mr. Collier is from a photograph by Messrs. J. and C. Watkins, Parliament-street.



ROBERT TORRENS COLLIER, ESQ., M.P., THE NEW SOLICITOR-GENERAL.

THE GREAT VICTORIA.

THE new Black Ball auxiliary screw steam-ship Great Victoria, of which we give an Engraving, is an auxiliary in the proper sense of the word, being fully ship-rigged, and intended generally to pursue her voyages under sail, and only to use her steam power when the favourable assistance of the winds cannot be obtained. She is built of iron, and was constructed at Nantes a few years ago, and was employed as troop-ship by the French Government during the Crimean War under the name of the Jacquard. She has been purchased by the owners of the Black Ball line of Australian packets, and, as sister-ship to the Great Britain, will take her place in the fleet of that distinguished firm. To fit her for that purpose she has been lengthened 20ft., and strengthened by Patterson, the shipbuilder of Bristol. She now, under the name of the Great Victoria, measures 800 ft. in length over all, and is calculated to carry 500 passengers in her saloon and on her saloon deck; in addition to these she will also be able to carry a large number of other passengers. The gross tonnage of the Great Victoria is 5000 tons, her auxiliary engines are of 120-horse power, made by Messrs. Fawcett, Preston, and Co., of Liverpool, but capable of being worked up to 500-horse power, and her fan can be lifted when not required as a motive power. As a carrying ship she is of great capacity, being competent to convey 7000 tons of cargo in addition to her stock of coals, and is under command of Captain Price.

The Black Ball line consists of eighty-six magnificent ships, most of which vary from 1000 to 5000 tons register, and are manned by 300 officers and 3000 seamen. The materials of which these ships are constructed, and the workmanship bestowed upon them, have been pronounced from time to time by competent Government and other officials to be unexceptionable. It is a fact worthy of note that this line sails more ships of 1000 tons and upwards than are to be found in the whole of the French mercantile marine.

THE SCREW-STEAMER GREAT VICTORIA, ONE OF A LINE OF AUXILIARY STEAM-CLIPPERS TO AUSTRALIA ESTABLISHED BY MESSRS. BAINES AND CO., OF LIVERPOOL.

**** The charge for the insertion of Births, Marriages, and Deaths is Five Shillings for each announcement.*

PIANOFORTES.—OETZMANN and PLUMB'S new PIANETTES are very superior to the French, and about two thirds of the price; largely recommended by the jurors of the Exhibition to their friends, and give universal satisfaction. One in the window marked for price, others in plain woods cheaper. Warranted.—151, Regent-street, the only address.

OETZMANN and PLUMB'S PIANOFORTES. A visit to their warerooms will convince buyers that, for quality of tone, durability, and style, their instruments are by far the most moderate in price of any respectable establishment in London, either for hire or purchase.—151, Regent-street, the only address.

CHISSHOLME AND SONS, Pianoforte Manufacturers (from Messrs. Broadwoods'), 61, Berners-street, Oxford-street, W. Studio Pianos, in solid walnut, mahogany, or ash cases, from 20 guineas. Pianofortes on hire from 10s. per month.

MUSICAL BOX DÉPOT for the Sale of NICOLE'S celebrated Musical Instruments is removed from No. 54 to 11 and 12, Cornhill, London. List of tunes and prices gratis and postage-free.

THE PLANETS and DOUBLE STARS seen distinctly by a new Telescope for £5, which will also distinguish the face of a sheep and features of a man four miles, the sign of a public-house five miles, shot marks upon a target two miles, and time by a church clock ten miles. This instrument is guaranteed in writing to perform the whole of the above, and to be equal in the most important respects to telescopes costing £70. It has a 3-in. superior achromatic object-glass, two eyepieces, &c., with portable metal tripod stand with jointed claw feet.—S. and B. SOLOMONS, 39, Albemarle-street, Piccadilly. Persons are invited to apply for a diagram with full particulars, sent free. Powerful small pocket telescopes, opera, field, and general outdoor glasses.

POCKET BAROMETER, COMPASS, and THERMOMETER, all in one, the size of a watch, for telling the weather, the heights of mountains, direction of winds, and temperature of the air. Guaranteed for 12 months. Price £1 15s., sent free. S. and B. SOLOMONS, Opticians, 39, Albemarle-st., Piccadilly.

ACHROMATIC MAGIC and DISSOLVING LANTERNS.—The advantage of achromatic lenses over the common lenses now in use is brilliancy and beautiful definition. No additional charge is made upon this improvement, as a large sale is anticipated. Catalogue sent free.—S. and B. SOLOMONS, Opticians to the Government, 39, Albemarle-street, Piccadilly.

SPECTACLES.—The PATENT TINTED SPECTACLES are patronised by the majority of the nobility, including Viscount Palmerston. They give extraordinary relief by day and night to weak, dim, and defective vision. The adaptation of spectacles to imperfect vision by experienced persons is, indeed, of vital importance. One of the Firm who has had great experience and practice attends to this branch only.—S. and B. SOLOMONS, 39, Albemarle-street, Piccadilly. Opposite the York Hotel.

DEAFNESS.—The SOUND MAGNIFIER and INVISIBLE VOICE CONDUCTOR, for Deafness. It fits into the ear not perceptible, removes singing noises in the head, and enables deaf persons to hear distinctly at church and at public assemblies.—S. and B. SOLOMONS 39, Albemarle-street, Piccadilly.

SPECTACLES "PERFECTLY ADAPTED" by the only safe process—that of the VISOMETER, an instrument for exactly determining the strength of each eye, and which has received the encomiums of the leaders in science, including Sir David Brewster, Sir P. Crampton, &c. Correspondence conducted with parties desirous of being properly suited with spectacles or eyeglass free of all charge.—SALOM and CO., Opticians, 98, Princes-street, Edinburgh. No agents nor branches in or out of London.

TEN-GUINEA "DISSOLVING" SET includes a pair very best Compound Achromatic 10-ft. disc Lanterns, large Chromatropes, Panoramas, Paintings, Photographs, Comic and Lever Slips, Moving Waters, &c. Free to any part of London or any station in Great Britain, for £10 10s. An immense bargain. Only from SALOM and CO., 98, Princes-street, Edinburgh No agents.

FIVE-GUINEA "MAGIC" SET includes 1 very best Compound Achromatic 10 ft. disc Lantern, Paintings, Photographs, Comic and Lever Slips, &c., free to any part of London or any railway station in Great Britain, for £5 5s. Only from SALOM and CO., 98, Princes-street, Edinburgh. No agents.

SALOM'S EDINBURGH "HYTHE" GLASS, although of such power as to show bullet marks at 1200 yards costs only 31s. 6d. It is a magnificent glass.—Salom and Co., 98, Princes-street, Edinburgh. No agents.

UNIVERSAL MICROSCOPE. Price £5 5s.
SMITH, BECK, and BECK,
31, Cornhill, E.C. (late 6, Coleman-street).
Catalogues sent on receipt of six postage-stamps.

CAUTION.—THE CELEBRATED LORD BURY TELESCOPE can only be had of J. H. STEWARD, Sole Maker, and his Agents. Will read the name of a light-ship at eight miles. Price £3 10s. complete. Address, 406, Strand, London. Catalogues, with testimonials, post-free.

IT is well known that the frightful glass eye, motionless, dirty, and corrosive, is superseded by a little chef-d'œuvre of enamel, solid, light, comfortable, endued with the most expressive power of motion. A person can, without any trouble, place his own ARTIFICIAL EYE upon the organ without its requiring any operation. Its Inventor, M. BOISSONNEAU, Oculist to the Army and Civil Hospitals, will be in London (LILLYMAN'S HOTEL, 7, LOWER BROOK-STREET) on the 25th and 26th OCTOBER, 1863. Persons at a distance can send him the colour of the eye, and a photograph not coloured, to his sole address, 11, Rue de Monceau Paris.

INKSTANDS, Writing Cases, Despatch Boxes, Envelope Cases, Blotting Books, Workboxes, Desks, Reticules, Purses, Teacaddies, Glove boxes, &c.
PARKINS and GOTTO, 24 and 25, Oxford-street.

BIRTHDAY AND WEDDING PRESENTS The Public supplied at wholesale Prices, from by far the largest stock in London.
PARKINS and GOTTO, 24 and 25, Oxford-street.

2s. PRIZE WRITING-CASE, fitted with Paper, Envelopes, Blotting-book, Pen-case, &c., can be sent post-free to any part of the United Kingdom upon receipt of 28 stamps to PARKINS and GOTTO, 24 and 25, Oxford-street, London.

A pamphlet is published, with 300 Engravings, as a guide to the Stock in the Showrooms. It contains the weights and prices of silver spoons, forks, tea and coffee services and table plate, with particulars of ornamental plate for private use or presentation; also, of the best silver-plated manufactures, gold and silver watches, clocks, and jewellery. Gratis on application, and post-free to any part of the British dominions.

For the use of committees, a work is printed with large lithographic drawings of plate kept ready for presentation.

STARCH MANUFACTURERS
TO H.R.H. THE PRINCESS OF WALES.
GLENFIELD PATENT STARCH,
used in the Royal Laundry,
and awarded the Prize Medal, 1862.

PRICE'S CHILD'S NIGHT LIGHTS are perfectly safe, and burn their time. The quality of these Night Lights can now be relied on.

SHERWOOD BED LIGHTS, Sixpence and Eighteenpence a Box. These candles are made to supply a want very generally expressed—a cheap, really good chamber candle. They will be found inferior only to "Price's Candles, which will not drop grease when carried," which are sold in Boxes, One Shilling and Three Shillings each.

GLYCERINE, which very simple tests show to be impure, is being sold on the statement that it is "in every respect equal to Price's." Most medical men prescribe PRICE'S GLYCERINE. Where purity is of importance, patients can ensure it by desiring to have their Glycerine in 1lb., 8oz., 4oz., or 2oz. bottles, with capsules over the stopper, marked "Price's Patent."—Belmont, Vauxhall.

BULLY'S TOILET VINEGAR, manufactured by Jean Vincent Bully, Paris; acknowledged to be superior to Eau de Cologne as a perfume and toilet water, as well as for its Hygienique properties. May be obtained at the principal Chemists and Perfumers.—Sole Wholesale Agents for Great Britain and Colonies, R. HOVENDEN and SONS, London.

COALS.—COCKERELL'S COALS, price 26s., cash. Central Office, No. 13, Cornhill, E.C.

ALL afflicted with WEAK EYES may obtain instant relief by using Dr. WARNER'S EYE WATER; it removes all inflammation arising from cold, dust, or constitutional causes.—Sold in bottles, 2s. 9d., 4s. 6d., by Sanger, Oxford-st.; Prout, Strand; Barclay, Farringdon-street; Hooper, London-bridge.

TEETH.—Messrs. GABRIEL'S INVENTION, OSTEO-EIDON (by her Majesty's Letters patent). Artificial Teeth, from one tooth to a complete set, without pain or extracting stumps, at half the usual charges, by Messrs. Gabriel, Dentists.
London: 27, Harley-street, W., and 34, Ludgate-hill, City (over Benson's); 134, Duke-street, Liverpool; 65, New-street, Birmingham. References to patients. Gabriel's "Treatise on the Teeth" gratis, or free by post. Diploma 1815. Consultation free.

ARTIFICIAL TEETH, exquisitely enamelled to nature, detection impossible, purest materials and best work, on Mr. ESKELL'S patented and painless plan of self-adhesion. His Treatise free for seven stamps.—8, Grosvenor-st., Bond-st., W.; and at 89, Bennetts-hill, Birmingham. Consultations free.

CURES of ASTHMA and COUGHS, by DR. LOCOCK'S PULMONIC WAFERS.—From Mr. Leith, chemist, 95, Baker-street, Stirling, March 10, 1863. "I find your wafers give great satisfaction, and I can recommend them with greater faith than ever." They give instant relief and a rapid cure of asthma, consumption, coughs, colds, and all disorders of the throat and lungs. They have a pleasant taste. 1s. 1½d. and 2s. 9d. per box, by all Druggists.

DYSPEPSIA.—MORSON'S PEPSINE WINE is a perfectly palatable form for administering this popular remedy for weak digestion.—Manufactured by T. Morson and Son, 19 and 46, Southampton-row, Russell-square, W.C., in bottles at 3s., 5s., and 10s. each.

LADIES NURSING.—ELAM'S NEW NIPPLE SHIELDS, for immediately Curing Cracked or Sore Nipples. 4s. 6d.; by post 6d. extra.—196, Oxford-street.

WANTED, LEFT-OFF CLOTHES, Uniforms, Furniture, Miscellaneous Property, &c. The highest price given. Ladies or gentlemen waited on by addressing to Mr. or Mrs. G. HYAM, 10, Beak-street, Regent-street, W.; or, Parcels being sent, the utmost value in cash immediately remitted. Established 1820.

WANTED, LEFT-OFF CLOTHES, Uniforms, Jewellery, Miscellaneous Property, &c., of every description Purchased to any amount by Mr. and Mrs. DAVIS, 3, Crawford-street, Baker-street, W. Ladies and gentlemen waited on, or, parcels sent, P. O. orders remitted. Established 60 years.

LEFT-OFF CLOTHES.—Uniforms, Jewellery, Miscellaneous Property, &c., of every description, purchased to any amount, by Mr. and Mrs. D. DAVIS, 49, Marylebone-lane, Oxford-street, W. Ladies and Gentlemen waited upon. Parcels sent, money-orders remitted. Established seventy years.

100 PATTERNS SILKS.—Post-free.—All the New Coloured Silks for Autumn, plain and figured from 1 guinea the Dress.

E. PHILPOTT, 37, Piccadilly.

PICCADILLY CRINOLINE ROOM is NOW OPEN.—E. PHILPOTT, 37, Piccadilly.

PICCADILLY CRINOLINES.—The PATENT ONDINA, or WAVED JUPONS, are creating a great sensation; and so perfect are the wavelike bands, that a lady may ascend a steep stair, lean against a table, throw herself into an armchair, pass to her stall at the opera, or occupy a fourth seat in a carriage, without inconvenience to herself or others, or provoking rude remarks of the observers; thus modifying in an important degree all those peculiarities tending to destroy the modesty of English women; and, lastly, it allows the dress to fall into graceful folds."—Queen. Illustrations, with pamphlet, post-free.
E. PHILPOTT, Family Draper and Jupon Manufacturer,
37, Piccadilly, W.

JAMES LOCKE and CO. beg to solicit the attention of their customers to their NEW STOCK of SCOTCH MANUFACTURED GOODS for the present and coming seasons, among which will be found the Newest Styles in Cloaks and Jackets for town or country wear, Shawls and Wraps for travelling, and Linsey Woolseys and other materials for Dresses, Skirts, &c. CRAMER and Co., 201, Regent-street.

JOASH.—"Suffer not, O Lord." 2s. 6d. The accomplished critic of the "Saturday Review," after commending Jehoiada's first air as being grave, manly, and melodious, says:—"Equally good is the mezzo-soprano air, 'Suffer not, O Lord.' The rapid changes from the natural to the flat key and back again, towards the end, strike us as peculiarly well managed, and the whole song is really beautiful."

JOASH.—"Teach me, O Lord." 3s. "The contralto air, 'Teach me, O Lord,' is as sweet and tuneful a piece of writing as we have seen for many years."—Saturday Review.

JOASH.—The March of the Levites. 4s. "As a pianoforte duet, it is vigorous, spirited, and well marked." Saturday Review.

BOOSEYS' MUSICAL LIBRARY.—The Subscribers to this Library have a larger and a better supply of Music than is to be obtained at any similar establishment in London, besides receiving gratuitously at Christmas the St. James's Album—a guinea illustrated album of new music. Subscribers paying Two Guineas per annum have the use of 12 pieces or books in town, or 20 pieces in the country. Full particulars gratis from
BOOSEY and SONS, 28, Holles-street, London.

BOOSEYS' MINIATURE PIANOFORTE, price 17 guineas, in walnut, French polished:—"We have had occasion to examine a new description of Pianoforte manufactured by Boosey and Sons, which combines quality and cheapness in a degree which has not previously been ever attempted. When heard it creates such surprise as would be caused by a child 'discoursing most eloquent' music with the voice of a full-grown man. It has a rich, brilliant tone, quite strong enough to fill the largest drawing-room; and the whole mechanism of the instrument seems to be firm and durable. No piano at so small a price has ever before been presented to the public."—Vide ILLUSTRATED LONDON NEWS, Feb. 28, 1863. This Piano is well adapted for the cabin of a ship or an extreme climate.—Boosey and Sons, 24, Holles-street, London.

NOTICE.—HALF-PRICE.—All Music, and the best Editions, at half the published price, sent post-free for postage-stamps or Post Office order.
HOPWOOD and CREW, 42, New Bond-street, W.

The prettiest drawing-room piece is

GANZ'S SOUVIENS TOI. Mélodie chantante. Price 3s. 6d.
"A most pleasing morçeau, equally simple and elegant."—Illustrated News.—HOPWOOD and CREW, 42, New Bond-street.

SIMPLE AND ELEGANT.

COOTE'S COLOGNE QUADRILLES on French Airs. Beautifully Illustrated. Solo or Duet, 4s.
HOPWOOD and CREW, 42, New Bond-street.

COOTE'S KATE KEARNEY WALTZES, introducing "Kathleen O'More," "Terence's Farewell to Kathleen," "Kate Kearney," "Savourneen Deelish." Solo or Duet, 4s.—HOPWOOD and CREW, 42, New Bond-street.

GRACEFUL AND BRILLIANT.

COOTE'S FAIRY VISIONS VALSE. Price 4s. Solo or Duet. One of this Composer's happiest ideas, sparkling and dansante.—HOPWOOD and CREW, 42, New Bond-st.

THE BEST SET OF LANCERS ARE

MUSIC HALF-PRICE and POST-FREE. All full-price Music of every publisher forwarded on these terms on receipt of stamps. The trade supplied to sell at Half-price. Catalogues gratis.—OETZMANN and Co., 27, Baker-street, W.

ENGLISH CONCERTINAS, by LACHENAL, Full Compass, with all the latest Improvements, warranted for Hot Climates, and to keep well in Tune, from Two guineas, with Case, Lock and Key, &c.
HOPWOOD and CREW, 42, New Bond-street.

CRAMER'S NEW 7-OCTAVE SEMI- OBLIQUE PIANOFORTES. Price 45 guineas in Rosewood, and 50 in Walnut.

In introducing this Instrument prominently to the notice of the public, Cramer and Co. may be permitted to observe that it is alike remarkable as regards power and quality of tone, firmness and elasticity of touch, durability of tuning, and the capacity to develop its resources. The tone may be forced by the powerful finger of the artist, or drawn out by the less accustomed hand of the amateur; in the one case there is no harshness, and in the other its charmingly vocal qualities are produced with little effort.

The action, or mechanism, is of the very best description, being somewhat similar in its principle of construction to that of the semi-grand. The stringing is complete, there being three wires to each note, like the full grand.

Cramer and Co. guarantee these Instruments for any reasonable length of time, and forward them to all parts of the country without risk to the purchaser and at a very trifling cost.
Pianoforte Gallery, 207 and 209 Regent-street
(the largest in Europe).

CRAMER'S ENGLISH PIANETTE, 22 guineas.—Cramer and Co. manufacture this capital small instrument. It has all the requisites of the best Pianoforte—check action, solid touch, agreeable tone. The case is of polished ash or pine. In practising on this Pianoforte the fingers of the player will be strengthened much more rapidly than on an old instrument, loose in the key and worn in the hammer. In rosewood, 25 guineas; in walnut, 26 guineas.

Purchasers are particularly requested to observe that this instrument has not the common or single action, but the double or check action; and that Cramer and Co. are the only manufacturers of it in England.—207 and 209, Regent-street.

INDIAN PIANOFORTE.—CRAMER, BEALE, and WOOD manufacture for India a superior COTTAGE PIANOFORTE, in solid Mahogany, with metallic bracings and all other appliances necessary to resist the effect of extreme climates. Nothing has been left solely to the glueing. The mechanism of the Instrument as well as the Case has been secured throughout by screws. Unusual skill and attention have therefore been bestowed upon the manufacture, and they have obtained the highest commendations for their excellent quality of tone and durability.

Cramer, Beale, and Wood deliver these Instruments f.o.b., packed in cases lined with zinc, at any home port, for 50 guineas. Size:—Height, 3 feet 11½ inches; width, 4 feet 4½ inches; depth, 2 feet 1½ inch.
Universal Pianoforte Gallery, 207 and 209, Regent-street, London.

CRAMER'S ARTIST'S CONCERTINA, selected by Richard Blagrove. In purity of tone, delicacy of touch, noiseless rapidity of articulation, and general perfection of mechanism these instruments are altogether unrivalled. The vibrators are of tempered steel, and retain their perfect tuning in any climate. Price 12 guineas, including case.
J. B. Cramer and Co., 201, Regent-street.

SECONDHAND PIANOFORTES. CHAPPELL and CO. have a large Stock of SECONDHAND PIANOFORTES for Sale, by BROADWOOD, COLLARD, ERARD, &c., &c., that have been hired for the season, at very reduced prices. Also, new Instruments of every description.—Chappell and Co., 50, New Bond-street.

PIANOFORTES at CHAPPELL'S.—The largest Stock in London, by Broadwood, Collard, Erard, &c., for Sale or Hire.—50, New Bond-street.

CHAPPELL'S FOREIGN PIANINO (the only Pianino to which the Prize Medal was awarded).—A very elegant Pianoforte, of small size, the full compass, check action, and most perfect touch, admirably adapted to small rooms, yachts, boudoirs, &c. Warranted to keep in tune, and to be the best and cheapest Pianoforte, with check action and all the latest improvements.

Price, in mahogany, rosewood, or walnut, 25 and 26 guineas. A great variety may be seen at
Chappell and Co.'s, 50, New Bond-street.

CHAPPELL and CO.'S ENGLISH MODEL COTTAGE PIANOFORTE.—To amateurs preferring the pure English tone of the Broadwood or Collard quality, the English Model will be found the most perfectly satisfactory instrument, at a moderate price. The action is of the same simple description as the above makers', and therefore especially adapted to the country, where the more complicated actions are objectionable to many of the tuners. In elegant rosewood case, with full fret, similar in every respect to other instruments at 50 guineas, price 35 guineas; in walnut, 40 guineas.
Chappell and Co., 50, New Bond-street.

CHAPPELL'S FOREIGN MODEL PIANOFORTE, price 50 guineas in rosewood; or in walnut, 60 guineas. This Instrument has Three Strings and the fullest grand compass of Seven Octaves. It is strengthened by every possible means to endure the greatest amount of wear, and to stand perfectly in any climate. The workmanship is of the best description; the tone is round, full, and rich; and the power equal to that of a Bichord Grand. The touch is elastic, and the repetition very rapid. No pianoforte, in all respects comparable, has hitherto been made in England at the same price. Every instrument will be warranted, and (if desired) exchanged within six months of the purchase.
Chappell and Co., 50, New Bond-street.

BROADWOOD, COLLARD, and ERARD. The best Pianofortes of every description, including all the newest kinds by these celebrated makers, may be tried side by side (and hired with option of purchase) at the new Showrooms of
CHAPPELL and CO., 50, New Bond-street.

ALEXANDRE'S DRAWING-ROOM MODEL HARMONIUM, the best that can be made, price 60 guineas; other varieties at 25 and 35 guineas. Illustrated Catalogues of Pianofortes and Harmoniums upon application to
CHAPPELL and CO., 50, New Bond-street.

SIX-GUINEA HARMONIUM by ALEXANDRE, with five octaves, two footboards, and in oak case. These instruments are lower in price and superior to all other cheap harmoniums. Descriptive lists on application to
CHAPPELL and CO., 50, New Bond-street.

SECONDHAND HARMONIUMS, by ALEXANDRE, nearly (if not quite) as good as new, at greatly-reduced prices, at CHAPPELL'S, 50, New Bond-street.

ALEXANDRE'S PRIZE EXHIBITION MODEL HARMONIUM, for the CHURCH, 13 stops, 4 rows of vibrators, and Venetian swell, worked by the heel of the right foot, in oak case, 32 guineas. A large assortment may be always seen at CHAPPELL and CO.'S, 50, New Bond-street.

PIANOFORTES for SALE at Very Low Prices for Cash, or for HIRE from 10s. per Month. A number of Cottage and Semi-Cottage Instruments, with the full compass, and all the recent improvements, in walnut-tree and rosewood cases, by Collard, Broadwood, Kirkman, Erard, and other esteemed makers, at HOLDERNESSE'S, 444, Oxford-street (opposite Tottenham-court-rd.)

BUTLER'S BRASS BAND INSTRUMENTS, Cornets, Saxhorns, Circulating Vibrating Horns, Drums, Fifes, &c., are all manufactured on the premises and sold at prices much below any other English house. A written guarantee given with every instrument. Cornets warranted, from £2 to £5. Manufactory 29, Haymarket, London. Prices and drawings post-free.

MRS. MILWARD CUTTING THE FIRST TURF AT CLIFTON OF THE BRISTOL AND NORTH SOMERSET RAILWAY.

MRS. HARE, MAYORESS OF BRISTOL, LAYING THE FIRST RAIL OF THE TRAMWAY TO THE FLOATING HARBOUR AT BRISTOL IN CONNECTION WITH THE NORTH SOMERSET RAILWAY.—SEE NEXT PAGE.

CURRENT LITERATURE.

Stronghand; or, the Noble Revenge. By Gustave Aimard. (2 vols. John Maxwell and Co.) Mexico is the land of romance; and the scene of this romantic story is well laid there. The author has omitted to avail himself of scarcely a single incident which promised to excite the reader; and the mass of adventure which he has managed to heap together in two volumes is stupendous. Love, war (civilised and uncivilised), wild-beast fighting, murder, gambling, robbery, an Indian execution, and an Indian funeral, combine their thrilling and interesting influences. The crack of the rifle, the report of the pistol, the flash of the knife, the blaze of fire, the crunch of teeth as they gnaw their prey, and the yells of savages athirst for blood, mingle in horrid contrast with the gentle tones of beauty and the tender accents of love. Stronghand is a caballero and a hunter *sans peur et sans reproche.* He has, moreover, the valuable property of being ubiquitous, whereby he is enabled to succour his friends at all times and in all situations of danger. So soon, therefore, as the reader has advanced far enough into the story to have become aware of this excellent arrangement he is spared beatings of the heart and painful apprehension; he knows that even when the jaguar has taken spring at the unprotected damsel, and is already half-way through the parabola, she will be protected by the body and saved by the bullet or the knife of the omnipresent and omnipotent Stronghand. For the plot: El Senor Conde, Don Rodolfo de Tobar y Moguer, the eldest son of the Marquis de Tobar y Moguer, whose family dated back to the first Conquistadors, for having married the daughter of an Indian Cacique and for having joined the Mexican party against the Spanish party, is, chiefly through the misrepresentations and machinations of his younger brother, Don Hernando, disinherited. Nevertheless, Don Hernando, we are naïvely assured "was not a wicked man," and did his best to supplant his brother only because he would otherwise, as younger son, have had "no other hope than the tonsure," which his soul abhorred. So, then, Don Hernando succeeds to the title and estates, and Don Rodolfo becomes the chief of an Indian tribe under the high-sounding title of Thunderbolt. Stronghand is Thunderbolt's son, and Donna Marianna, the queen of Spanish-Mexican beauty, is the daughter of Don Hernando. Is it necessary to say that Donna Marianna is the loadstar which attracts Stronghand wherever danger threatens the maiden; that he saves her from innumerable perils; that, after countless adventures he marries her, and that the behaviour of Stronghand and his father, Thunderbolt, towards the family of Don Hernando, which they save from ruin in many forms, constitutes the "Noble Revenge"? The scenes are for the most part described with astonishing vigour, the surprises are frequent and cleverly managed, the characters are most of them invested with great interest, and, whilst tragedy is of constant occurrence, comedy is by no means to seek. Occasionally, however, there is an unhappy expression which throws an air of absurdity about what is clearly not intended to be ludicrous. Take, for instance, the following example (p. 322, vol. 2):—

Sparrowhawk quitted the ranks, stepped forward, and bowed respectfully to the dying man.

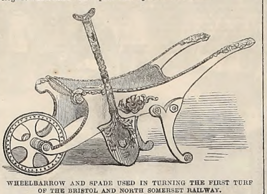
"I thank my father," he said, "for the signal honour he has done me; but I am very young to command chiefs and renowned warriors, and I fear I shall break down in the heavy task imposed on me. My father leaves a son; Stronghand is one of the great braves of our nation, and his wisdom is renowned."

"My son is a paleface; he does not know the wants of the Papazos so well as Sparrowhawk. Sparrowhawk will command."

"I obey my father, since he insists; but Stronghand will ever be one of the great chiefs of my nation."

A flattering murmur greeted these clever (*sic*) remarks.

Now, it is difficult to see the cleverness of the remarks, but not to perceive their ingenuousness; and there is a very close resemblance between the French words *ingénieux* and *ingénu*, whilst the author's name is clearly French. One is inclined to fancy, therefore, that a translator is to blame for this, and perhaps for other singularities of expression which are noticeable; but there is nothing said upon the titlepage about the work being a translation.



Katherine and her Sisters. By Lady Emily Ponsonby. (1 vol. Chapman and Hall.) Although this is a second edition (in a cheaper form, it may be presumed, than the first), it is not too late, we hope, to make a few observations upon it. It will assuredly strike feminine minds of a certain calibre as a "pretty" book, with reference to its contents rather than to its exterior; for what picture can be more "pretty" than that of a young lady, with no personal attractions beyond the goodness of heart and purity of soul which speak from her eyes and play upon her face, and which, to the thoughtful and the good, are more attractive (to purposely contradict ourselves) than any other attributes, with a morose and miserly father, and with two sisters, much younger than herself—one promising to blossom into womanly loveliness, the other threatening to fade into a womanhood of ill-health, stifling her young hopes and aging her young life that she may fulfil the anxious duties of a mother to the motherless? And this is what Katherine does. Moreover, "her sisters" are but half-sisters; for Mr. Dacre married twice, and the second Mrs. Dacre, upon her death-bed, adjured Katherine, the late-appreciated stepdaughter, to be mother as well as sister to the infants that would soon be motherless. Katherine promises that, to the best of her ability, she will do what her stepmother desires; and she performs her promise scrupulously, even to the refusal of an advantageous offer of marriage, which would not only have made her a happy wife, but also have given her an excellent opportunity of exchanging her motherly for daughterly duties towards her husband's sorrow-stricken mother. Now, to make such a character sublime, she ought to lack reward altogether on earth and wait for it until she is carried away, like her prototype, St. Katherine, in the German print, by four angels in star-spangled petticoats; but in the story her virtue receives an earthly meed, for, as Miss Frances Brandon, the most piquant character in the book observes, "this is the moral of the tale, is it? Take care of your sisters and you shall have a good husband." That is to say, Katherine obtains a husband who has many thousands a year and who has been a good son, and it is presumed, therefore, that he will make a good husband. But, to tell the truth, Mr. Trevethlan, beyond his resemblance to "pious Æneas" (reading "mother" instead of "father" in the Trojan's history) as to the filial part of his character, does not strike one as having many charming qualities; he is a moody, sulky, overbearing lover (as it appeared to us), only saved by religious principle from becoming Byronic. There is little "sensation" in the tale; it is quiet in tone, and in parts gently pathetic; its scenes are principally domestic, some lifelike, some unlifelike (so far as our experience goes); its dialogue is often strikingly natural, and not unfrequently becomes mere chit-chat; and the modicum of prayer which is introduced is sometimes concluded by the utterer with so many "Amens" that the effect is rather ludicrous. That Katherine, notwithstanding her superiority to women in general, does not disdain to employ a little feminine art (not for herself, but for her sister) is evident when Anne Dacre runs the risk of appearing with red eyes and disordered hair before an offended lover, whom it is desirable to appease; and we read, "Katherine desired her to wait while she flew for a brush and some rose-water: with the one she refreshed her sister's tear-stained face, and with the other smoothed and arranged her disordered hair." This was true maternal solicitude: it was exactly what a careful mother would have done when it was so very important to "look nice."

Letters from the Crimea, during the Years 1854 *and* 1855. (Emily Faithful.) It has seemed good to compile, in a small tractiform book, several letters written home from the Crimea by H. B., first a private and then a corporal in the second battalion of the Rifle Brigade. Poor H. B. enlisted, it appears, against the consent of his parents, and his own letters lead one to suppose he regretted the step he took. He "was wounded at the storming of the Redan, and found in Sebastopol naked and covered with bayonet wounds;" and this compilation of his letters is published in the hope the publication may "give to his parents a few pounds to cheer them in their advancing years, when age and consequent infirmities require a little indulgence, which it was the ardent wish of the devoted son to supply." Should curiosity seek to know why this particular time should be chosen for the publication of the letters, the answer is given in the preface, where it is said "The compiler has taken the present opportunity of the work published by Mr. Kinglake (now before the public) to bring the genuine and uncorrected letters of the young soldier also into notice." It is hardly necessary to say that, putting aside altogether the charitable object of the compiler towards the writer's aged parents, the letters are of value as throwing light upon the educational state of the better sort of privates in our Army even if the comments they contain upon persons and events are entitled to but scanty notice. The following extract may tend to open the eyes of those who imagine that Federal and Russian soldiers only (now that the French are our allies) commit barbarities:—"I have often seen some of our men enter a comfortable cottage and actually rob the inmates and turn them out of their own house, and before night the pretty cottage would be in ruins. I saw a daring fellow enter a poor old woman's cottage, and, after turning every rag over the poor old girl had left, he took her workbox from under her arm, despite the poor old lady's bewailing. She looked sorrowful, indeed, when she saw the ruffian depart with her only treasure; and, more than that, in passing through the garden, he took a hive of bees, which probably had been the old lady's only pride." Upon which H. B. observes, "Oh! how I wished I was her son, that I could take revenge. I would have *taken his heart out and burnt it!*" H. B.'s indignation does him credit, but we rather think—well! *de mortuis nil nisi bonum.*

Bradshaw's Illustrated Handbook to the Tyrol. (W. J. Adams.) It is late for a journey to the Tyrol; the long vacation is nearly over; and the wanderer is returning home again. Still useful books, such as this, with its maps, illustrations, and various information with respect to routes, heights of mountains, passes, glaciers, towns, &c., will keep, and retain their usefulness. It is not superfluous, then, to commend it at the eleventh hour to notice.

BRISTOL AND NORTH SOMERSET RAILWAY.

This line of railway, which is to connect the Great Western mineral line from Frome to Radstock with Bristol and its floating harbour, has been begun under circumstances peculiarly favourable to its speedy completion. The first turf was cut on Wednesday, the 7th inst., at Clutton, amid great rejoicings; and on the following day the first rail of the tramway, to connect the line with the floating harbour at Bristol, was laid in the presence of a large and influential company. We give Illustrations of these ceremonies, also of the elegant wheelbarrow and spade used upon both occasions.

WHEELBARROW AND SPADE USED IN TURNING THE FIRST TURF OF THE BRISTOL AND NORTH SOMERSET RAILWAY.

The turning of the first turf at Clutton was performed by Mrs. Milward, wife of the Rev. Prebendary Milward, one of the most active promoters of the undertaking. The event took place in a field in the occupation of Mr. Gibbon, and belonging to the Earl of Warwick, situated a little in the rear of Clutton. Thither repaired the thousands of colliers and school children who were to be honoured with a commemorative entertainment, and a large number of spectators who came from a distance. Just at one o'clock, when the authorities were about to commence the proceedings, the rain descended and continued almost without intermission, so that almost all the business, even the dining, had to be accomplished under umbrellas. After some delay a short break in the rainfall was taken advantage of, and the proceedings commenced. Mrs. Milward took the position of honour that had been assigned to her. She was attended by the chairman of the company, Mr. Colthurst, and near them were Captain Scobell, the High Sheriff of the county, and the Mayoress of Bristol, the Rev. Prebendary Mayne, the Rev. Prebendary Milward; Messrs. Cooke and Sons and Mr. J. Rees Mogg, the solicitors to the company; Mr. Frazer, the engineer; and Mr. Bethel and Mr. Walton, the contractors. The proceedings were commenced by Mr. Bingham, the secretary, reading an address to Mrs. Milward, which treated very ably of the proceedings which had transpired in connection with the undertaking, and congratulated the Rev. Prebendary Milward on the success which had attended his persistent efforts to serve this neighbourhood. Mrs. Milward replied in a suitable address, after which the Old Hundredth Psalm was sung by the children, colliers, and visitors. The united voices of the multitude joined harmoniously, and the singing was very effective. The Rev. Prebendary Ommaney, of Chew Magna, and the Rural Dean (in the absence of the Lord Bishop of the diocese), then read a form of prayer that had been prepared for the occasion. The fine March of the Israelites, from the oratorio of "Eli," was next played by a band of musicians, under Mr. J. O. Brooke. Mrs. Milward then proceeded to turn the first sod. For this purpose she was presented by the contractors with a handsome mahogany wheelbarrow, ornamented with silver, and a silver spade, with a prettily-turned mahogany handle and silver ornamentations. By the assistance of two navvies, rendered with an address and a carefulness that might not have been anticipated, the lady discharged the duty she undertook most satisfactorily, lifting several sods with her handsome spade into her pretty barrow, which she then wheeled across the platform, emptied, and returned with her little vehicle amid the hearty plaudits of the company. Three cheers having been given for Mrs. Milward, three for the Sheriff, three for the directors, and three for Mr. Milward, the National Anthem was sung by the great gathering, and, the prayers having been concluded, the 3000 colliers were marched off to their tents, where each man was supplied with a pound of bread, a pound of beef, and a quart of beer. The school children were also bountifully regaled. The déjeûner given by the directors of the line to the visitors took place in a spacious tent put up in the field.

The first rail of the tramway connecting the North Somerset Railway with the floating harbour at Bristol was laid by the Mayoress, Mrs. Sholto Vere Hare. The ceremony took place on a piece of ground on the towing-path behind St. Raphael's Church, where a platform had been erected for the accommodation of invited guests. The shipping was also well filled with spectators, and from Mr. W. Terrell's ropewalk to the edge of the water, with the exception of a small space reserved by the police, there was one dense mass of human beings. Rows of flags from various buildings, the rigging of vessels in the floating harbour, and, in fact, every salient point, imparted animation to the scene. The company was welcomed to the spot by the cheery strains of the artillery band and the merry peals of the bells of glorious old St. Mary Redcliffe. The work allotted to the Mayoress—which consisted of the filling of a highly ornamental barrow with earth, lifted with a silver spade, and wheeling it along a plank and overturning it—was efficiently performed, and was completed amid the applause of the large assemblage which the event had brought together. A large party afterwards adjourned to Mr. Hyde's sail-loft, which had been decorated for the occasion, and where an elegant déjeûner was served, and several speeches were delivered.

The silver ornamentations on the wheelbarrow and handle of the spade presented to Mrs. Milward, and on the barrow and spade of the Mayoress of Bristol, which are exactly alike, were the work of Messrs. Mappin Brothers, of London Bridge. Upon Mrs. Milward's spade is engraved the arms of the Milward family, with the motto "Vigueur de Dessus," and underneath "Presented to Mrs. Milward, Oct. 7, 1863." Mrs. Hare's spade bears the crest of the Hare family, and underneath "Presented to Mrs. Elizabeth Hare, Mayoress of Bristol, Oct. 8, 1863." To which is to be added, "In commemoration of laying the first rail of the tramway of the Bristol and North Somerset Railway."

MUSIC.

The Royal English Opera, Covent-garden, opened for the season on Monday last, under the management, as heretofore, of Miss Louisa Pyne and Mr. Harrison. This is announced as their eighth and last season. If this means that they have resolved to abandon the enterprise which they have carried on so long and with so much satisfaction to the public, this resolution will be much to be regretted; and we hope, therefore, that we may interpret the announcement in a more limited sense, as meaning only that this is the last season of their present lease of Covent Garden Theatre. When we remember the state to which our national opera had fallen at the period when Miss Pyne and Mr. Harrison began their labours, and the energetic efforts they have made to raise it to a position more worthy of a great and musical country, we think that the public owe them a debt of gratitude for what they have already accomplished, and will enable them, by support and encouragement, to accomplish still more.

Monday night's performance consisted of Mr. Vincent Wallace's new opera, "The Desert Flower." As a drama this piece is of French origin, being a version of an opera entitled "Jaguarita," produced at the Théâtre Lyrique, with music by Halévy, some seven or eight years ago. Its success, chiefly owing to the acting and singing of Mdme. Marie Cabel, was but transient, and certainly its merits are not such as to make it worthy of revival on the English stage, for the incidents are confused and improbable, and the story inspires but little interest. It is another instance of the injury done to the musical stage by the want of attention paid to the dramatic character of the pieces brought upon it. Our composers show a carelessness, a lack of judgment, in this respect which is really surprising. They accept anything in the shape of a libretto that is put into their hands; and we constantly find composers of genius and reputation throwing away really fine music upon namby-pamby and nonsense. Such things may please for a time. The public may applaud fine singing, pretty dancing, and showy spectacle; but they soon get tired of such things when they are not combined with something better; and there is not, we believe, an instance to be found of a permanently successful opera not possessed of sterling dramatic as well as musical merit.

We should only weary our readers by detailing the plot and incidents of such a piece as "The Desert Flower." The heroine, who bears this pretty sobriquet, is the queen or chieftainess of a tribe of American Indians at war with the inhabitants of a European settlement. The military commandant of the whites and this Indian Queen, happening to meet, are changed from enemies to lovers, and, after a sufficiency of adventures and perils to liberty and life incurred by each for the other's sake, are married by way of denouement. This tender "desert flower" is a regular savage—a fierce virago, familiar with blood, and accessible to feminine feelings only through the novel influence of love. She is, moreover, an impossible personage; for a chieftainess of an American tribe could not have existed among a people whose women are among the most abject specimens of female humanity. But Miss Louisa Pyne, with her versatile talent, looks and acts this truculent savage so very cleverly, and sings with such remarkable brilliancy, that all this absurdity passes off quite smoothly. As to the lover, Captain Maurice, he, personated by Mr. Harrison, is a good-looking, soldierly fellow, pleasant enough, but possessed of no quality which creates any serious interest. There is another personage—a Major Hector Pumpernickle—the buffo of the piece, whose only vocation is to make the audience laugh; and, lastly (for the dramatis personæ are fewer than usual), there is Cascan, an Indian chief, the rejected lover of the Queen and the villain of the story—a stalwart savage, with a tremendous bass voice. Both these characters are well represented—the former by Mr. Corri, the latter by Mr. Weiss.

Such being the dramatic quality of this opera, it is easy to see that its success must mainly depend upon its music. And in this respect it is entitled to much praise. Mr. Wallace's reputation is well established, and it will be sustained by the music of "The Desert Flower." We are not sure that he has ever risen above the height of his first opera, "Maritana"—a real chef-d'œuvre; but with that exception, we think, he has never written anything so uniformly good as this, his last production. It has the freshness, vigour, grace, and melody which abound in all Wallace's works; and it is written with even more than his usual correctness and purity of style. Like all our English operas, it contains many songs and ballads, introduced less with a view to dramatic appropriateness than to popularity and profit as concert and drawing-room morceaux; and in some of them this object has been successfully gained. Two songs in particular, "Why throbs this heart?" sung by Miss Louisa Pyne, and "Though born in woods," sung by Mr. Harrison, will soon be found on every piano in the kingdom.

The opera, splendidly got up and admirably performed, was received by a densely crowded audience with the warmest applause. We never heard Miss Louisa Pyne sing with greater brilliancy and beauty. Mr. Harrison was eminently successful. His voice was sweet and flexible, and his whole performance was characterised by good taste and good judgment. Mr. Corri's comic singing was lively and agreeable; and Mr. Weiss's magnificent voice and musician-like execution were heard to great advantage. The only remaining part, given to Miss Susan Pyne, is so insignificant as to be quite unworthy of that lady's talents, and, indeed, might be dispensed with altogether. The choruses and *morceaux d'ensemble* were excellently sung; and the orchestra, under the direction of Mr. Mellon, maintained its character for power and efficiency.

The crowded house had an air of brilliancy of fashion seldom seen at this season of the year. The Royal box was occupied by the members of the Royal family of Denmark now in England.

THE THEATRES.

Strand.—A new play in three acts was produced yesterday week. It is entitled "Miriam's Crime," and is written by Mr. H. T. Craven, who has treated an objectionable theme with masterly skill. The heroine is one Miriam West (Miss Kate Saville), in whose favour a will is made by the lady whom she has faithfully served, and with whose nephew, Bernard (Mr. Parselle), she is in love. But Bernard has fixed his affections elsewhere, and Miriam generously destroys the will, thinking that he will then inherit the property. But the testatrix has a brother—a scamp, who had been transported—who is next heir, and Miriam, discovering her mistake, confesses to Bernard what she had done. As Bernard, when proved to be penniless, had been discarded by his mistress, he is all the more disposed to sympathise with her distress of mind and to cherish an affection for her. Hope at last dawns on the disconsolate couple, for there is reason to believe that a prior will exists, leaving the property to the nephew. Miriam takes active measures, and, finding a key, opens the deed-box that contains the will, which she secures, and thus places her lover in a condition of independence. There are some powerful situations and effective acting in this drama. Miss Kate Saville shows much feeling and many artistic resources in her delineation, and to her efforts the success of the piece is fairly attributable. It is not needful for us to point out the radical fault of such a plot: it is too obvious. The extent, however, to which modern audiences are indifferent to the morality of a plot, provided the dialogue be neatly written and the characters respectably sustained by popular favourites, might reasonably provoke a public censor to a severe condemnation, if the public were really amenable, which it is not, to rebuke. We must, we suppose, await a further development of the popular intelligence.

Notices of "Manfred," brought out at Drury-lane last Saturday, and of "Leah," acted at the New Adelphi, will be found at page 384.

The National Shakspeare Committee have resolved that, on the first Monday of next month, they will take into consideration a proposal for calling a public meeting in London of persons interested in the Shakspeare tercentenary movement.

A subscription of £2300 has just been collected in the Mauritius for the purpose of erecting a statue in bronze to the memory of Sir William Stevenson, K.C.B., the late Governor. The Civil Service of the colony contributed £700, the planters and general public the remaining £1600. The model from which the bronze figure will be cast is in course of construction at Rome. It is to be erected at Port Louis, the capital of the island.

NAVAL AND MILITARY INTELLIGENCE.

WAR OFFICE

2nd Dragoon Guards: Quartermaster-Sergeant J. Dean to be Quartermaster. 5th: Staff Surg. J. C. Dynes to be Surgeon. 7th: Cornet R. A. Smyth to be Lieutenant: Ensign T. F. M. Bowen to be Cornet.

9th Foot: Lieut. H. A. Bantham to be Adjutant.

10th Foot: Lieut. J. Hall to be Captain.

Royal Lancaster Regiment: Capt. Ord and Brevet Col. T. Elcyon to be Colonel; Capt. and Brevet Major G. Shaw to be Lieutenant-Colonel; Capt. T. C. Halsey to be Captain; Lieut. J. M. Hunt to be Second Captain; Cadet S. A. Price, B.A., Trinity, Cambridge, to be Lieutenant.

Inniskilling Dragoons: Capt. J. H. Butler to be Major; Lieut. T. Winchell to be Captain; Ensign G. Rooney to be Lieutenant; C. H. E. Kennedy to be Ensign.

14th Foot: Lieut. A. C. Twentyman to be Captain; Ensign H. T. Thynne to be Lieutenant.

15th Foot: Lieut. and Brevet Major C. Hamilton to be Captain; Lieut. A. Hamilton to be Captain; Ensign A. F. Harrison to be Lieutenant. 16th Foot: Lieut. W. Gough to be Captain; Ensign to be Major; Lieut. A. Macpherson to be Captain; Ensign R. B. Moffat to be Lieutenant; Ensign W. C. H. Dixon to be Lieutenant. 18th: Ensign R. W. Beauchamp to be Lieutenant; Cadet A. L. F. Lovett to be Ensign. 19th: Lieut. C. J. Barrett to be Captain; Ensign A. Hamilton to be Lieutenant. 20th: Lieut. and Brevet Major Hamilton to be Lieutenant-Colonel; Lieut. A. W. Ayre to be Captain; Ensign J. Rowley to be Lieutenant. 21st: Ensign R. Hamilton to be Lieutenant; Ensign C. Pitcairn to be Ensign. 26th: Lieut. J. M. Arnou to be Captain; Ensign J. Sadleir to be Lieutenant; R. Middleton to be Ensign. 29th: W. A. Small to be Ensign. 30th: Lieut. G. W. P. Rudd to be Captain; Ensign J. Hall to be Lieutenant. 31st: Lieut. and Brevet Major J. Hall to be Captain; Lieut. C. J. Myers to be Captain. 32nd: Lieut. and Brevet Major J. Hall to be Captain; Lieut. C. J. Myers to be Captain; Ensign D. G. Anderson to be Lieutenant. 38th: Lieut. W. J. Ferguson to be Captain of Musketry. 47th: Lieut. G. Jones to be Captain. 49th: Lieut. W. Holland to be Lieutenant; Cadet F. J. Tidy to be Ensign. 60th: Capt. and Brevet Major H. Hamilton to be Lieutenant-Colonel; Lieut. and Brevet Major J. Hall to be Captain; Lieut. Lieutenant-Colonel C. Hamilton to be Captain. 74th: Lieut. J. C. Hall to be Captain; Ensign G. F. Chambers to be Lieutenant. 79th: Capt. A. H. Hinde to be Captain; Ensign J. Talbot to be Lieutenant; Cadet T. W. Wood to be Ensign. 82nd: Ensign J. G. Gage to be Lieutenant; Ensign C. Hardwicke to be Ensign. 85th: Lieut. and Brevet Major J. Hall to be Captain; Lieut. C. J. Myers to be Captain. 88th: Lieut. and Brevet Major J. Hall to be Captain; Lieut. C. J. Myers to be Captain. 90th: Lieut. and Brevet Major J. Hall to be Captain; Lieut. C. J. Myers to be Captain. 93rd: Lieut. and Brevet Major J. Hall to be Captain; Lieut. C. J. Myers to be Captain. 97th: Lieut. and Brevet Major J. Hall to be Captain; Lieut. C. J. Myers to be Captain. 98th: Lieut. and Brevet Major J. Hall to be Captain; Lieut. C. J. Myers to be Captain.

Rifle Brigade: Lieut. and Brevet Major J. Hall to be Captain; Lieut. C. J. Myers to be Captain.

Royal Artillery: Lieut. and Brevet Major J. Hall to be Captain; Lieut. C. J. Myers to be Captain.

Royal Engineers: Lieut. and Brevet Major J. Hall to be Captain; Lieut. C. J. Myers to be Captain.

Royal Marines: Lieut. and Brevet Major J. Hall to be Captain; Lieut. C. J. Myers to be Captain.

Army Hospital Corps: Hospital Assistant J. Kennedy to be Hospital Sergeant.

Medical Department: Surg. Maj. W. K. Galloway, M.D., and W. J. Fyffe, M.D., to be Surgeons-Major. Staff Surg. J. Hamilton, M.D., to be Surgeon-Major. Assistant-Surgeon A. Mitchell, M.D., to be Surgeon to have honorary rank of Surgeon-Major. Assistant-Surgeon W. P. Bingham, C.B., to be Colonel: Major and Brevet Lieut.-Col. J. Headley to have the honorary rank of Colonel: Major W. Burly to have the honorary rank of Lieutenant-Colonel: Paymaster J. Sargent and Quartermaster O. Vialls to have the honorary rank of Captains.

Another important addition to the Royal Navy was made on Wednesday at the Admiralty Yard, Isle of Dogs, by the launch of the splendid screw ram-vessel, Valiant, of 34 guns and 800-horse power.

Rear-Admiral Barnard died on Monday week at Hipwell Lodge, Richmond, Yorkshire, in his eighty-first year: General William Lindsay During died on Thursday week at Stroke House, near Cirencester, on an advanced age: and General Douglas Johnstone, C.B., Colonel of the 52nd Regiment (the Duke of Wellington's), died recently in Dublin, aged fifty-five.

Lieut.-Colonel Crawley has arrived in London, and has reported himself at the Horse Guards. The value of the non-commissioned officers, and men ordered home have arrived in England. The trial will take place as early as the 19th inst. The particularly soldiers and thirteen officers, who are to be witnesses in the court-martial, arrived in Peninsular and Oriental Company's steam-ship Ceylon.

THE VOLUNTEER MOVEMENT.

The battalion and battery prize-shooting of the 1st Middlesex Artillery Volunteers took place on Monday week, at the Laboratory-range, Plumstead, under command of Lieutenant-Colonel Couch, who was present. The competitors proved in large force. The first competition was by the effective members of the corps for a rifle presented by Captain Prosser. Corporal Schubert won the value. A silver cup, value £5 5s., also presented by Captain Prosser, and shot for by members of No. 1 Battery, was also won by the indefatigable Schubert. The members of the 3rd and 4th competed for a rifle presented by Captain Hartley, which was won by Corporal Grove. Captain Hall for a prize-cup, value 30 guineas, for Battery No. 3, was won by Gunner Grimes. The members afterwards adjourned to the prize-tent, where the shooting was excellent. The first meeting of the members of the School of Arms for instruction, under Corporal Sergeant Bellamy, of the Life Guards, took place on Wednesday week. Colonel Crees being present, the instruction will continue weekly, and will include skirmishing, sword exercise, and boxing. The quarterly inspection of this corps by Lieutenant-Colonel R. Creed took place on Saturday evening, at the head quarters, Leicester-square.

The fourth annual meeting of the 2nd (South) Middlesex took place last week, at Caterham, ranges, and extended over three days. In the first competition the challenge gold medal of the regiment, value £10 10s., was won by Private Lewis, with the maximum of 35 points (Lieutenant Jeremiah Bilmer). Third prize, £3, Private Hulme. In the next competition for the Queen's prize, the Wimbledon challenge cup and badge was won by Private F. J. Clarke; second prize, £5, by Sergeant Burnaz; third prize, £4, by Corporal Jones; fourth prize, £3, to No. 1 company; fifth prize, the shooting-company's prize, £2, by Private Hall (a sovereign), was won by Private Harral; second prize, £3, by Private Henry Radcliffe; third prize, £2, by Lieutenant Hiscoke. Some extra prizes were shot for.

The official inspection of the 1st Tower Hamlets Artillery took place at Bluewall on Saturday last, the inspecting officer being Lieutenant-Colonel Hammond, Royal Artillery. The ranks were inspected, and the men went through manual exercise and firing exercise. On Friday they were marched upon their guns (two 32-pounders), and worked them very creditably; at the close of the parade till the line was formed, they were visited by the inspecting officer, who complimented them upon their soldier-like appearance and the state of the guns. On Saturday, after the usual drill, they went through gun-drill and firing exercise.

The London Dock Company have just had erected on a piece of vacant ground at Shadwell, at a cost of about £600, a commodious structure for the use, for purposes of drill during the winter months, of the men in their service who have become volunteers.

The members of the Stoke Newington and Kingsland volunteer corps competed, at the Park range, Tottenham, on Friday week, for the possession of a handsome silver challenge vase, presented by the then Captain subsequently Major Meadows White. It was won by Sergeant Bowden.

Several companies of the London corps have contested for prizes during last week.

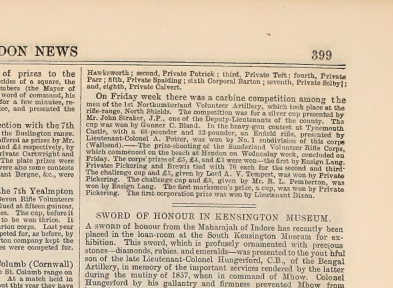
The 1st Surrey Volunteers assembled at the Crystal Palace on Saturday, when twenty-eight prizes, of the aggregate value of £300, were presented to the successful competitors by Lady Caroline Russell, Sir George Pollock, is honorary Colonel of the regiment. There was a large company, including many ladies, present to witness the proceedings. The annual competition for prizes by the members of the 9th Surrey (Reigate) took place on Saturday. The first match was for the prize-cup, value £10 10s., given by Captain Lord Monson, which was won by Private Worrell, Quartermaster-Sergeant Turner, and Lance-Corporal Bowyer tying with equal scores. In the other matches was the ladies' challenge-cup, value £20, given by the single-handed Captain Evans, which was won by Private Hall, and the 1st Surrey Private Challenge-cup had to be again carried in it. Should he win it a third year it will become his, and a handsome silver challenge-cup, given by Major Hall, for a prize of £5 5s., Sergeant Bowyer, was next shot for. It was won by Ensign King. He gave the sergeant, who came to the mark last shot, the odd point. The consolation prize was won by Sergeant Crabtree and Private Overton and Palmer. At the close of the shooting the prizes were presented by Lord Monson.

The competition for the annual prizes by the members of the 19th Kent (City of Rochester) took place yesterday week at the Government rifle-range near Gravesend. The prize was the challenge-cup presented in 1861 by the officers, to be shot for annually by effective members of the corps, the successful competitor to retain it for a year. The prize was taken by Colour-Sergeant Fletcher. The second was a silver cup presented by the Mayor of Rochester, and this was won by Sergeant Fletcher. The Corporation plate, £5, was carried off by Private Hewitt. A silver cup, given by Mr. Bancroft, was taken by Sergeant Wilson. The consolation prize was won by Private Hewitt. The garrison plate, open to all officers and men of the regulars and volunteers at Chatham Garrison, Rochester, and Brompton, was won by Private Penn, of the 19th Kent. The consolation prize was won by Sergeant Upton.

A competition between ten members of the 3rd and ten of the 21st Essex took place at the rifle-range at Gosfield on Saturday. The scores were:—3rd Essex, total marks, 219; 21st Essex, total marks, 172.

An inspection of the 1st Herts Light Horse Volunteers took place at Bishop Stortford on Saturday last. At the conclusion of the drill, the Acting Inspecting General of Volunteer Cavalry said:—"Captain Fairman and members of the corps,—I have very great pleasure in meeting you this day, particularly when I find your troop has attained to such a state of efficiency. It is very fortunate that they should possess a Captain and other officers so zealous in the discharge of their duties. You may congratulate yourselves on having so good a Captain as he has shown you. I consider the 1st Herts Light Horse to be one of the best-equipped troops in the kingdom.

The Carmarthenshire volunteers were reviewed on Tuesday week by Lieutenant-Colonel Dick, the Government inspector, at Dynevor Park, the residence of Lord Dynevor, near Llandilo. The proceedings having been performed, the inspector addressed the men, stating that some of the movements were well executed, but others were not so. He recommended a little more company drill.



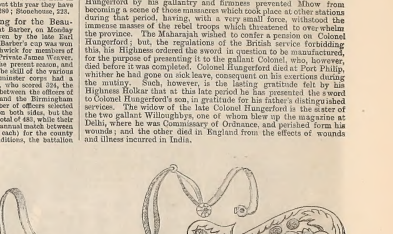
On Thursday week, at the distribution of prizes to the Portsmouth Rifles, the corps being drawn up in three sides of a square, the Major-Commandant called upon Private W. G. Chambers (the Mayor of Portsmouth) to distribute the prizes. Obedient to the word of command, his Worship stepped from the ranks, and, having retired for a few minutes, reappeared in his municipal robes and gold chain of office, and presented the prizes to his successful comrades amidst loud cheers.

The annual rifle prize competition in connection with the 7th Somerset (Taunton) took place on Monday week, at the Burlington range. Two long fenced rifle-pits and a handsome telescope were offered as prizes by Mr. Bagehot, the banker, the latter of the value of £5 and £3 respectively for the best shots. Clagfield-lieutenant. These prizes were won by Private Cartwright and Corporal Jones, the former scoring 34 points out of a possible 35, and the latter 33 points, both members of the Wellington Rifle Corps. There were also some contests for minor prizes in which Sergeant Browning, Private Hall, and Corporal Jones were successful.

On Monday the different companies (save the 7th Yealmpton Mounted Rifles) comprising the 4th battalion of the Devon Rifle Volunteers had their annual prize-meeting. After a challenge-cup, valued at fifteen guineas, the gift of Lieutenant-Colonel Bastard, and for other prizes. The cup, before it becomes the sole property of any particular corps, has to be won thrice. It was first offered in 1861, when it was won by the Ashburton corps. Last year it was won by the Totnes corps. This year the competition took place, by sections of eight men from each company. The Ashburton company kept the lead throughout and won by nine points. Other prizes were distributed for the shooting, on the whole, was good.

A challenge-match between the St. Columb (Cornwall) corps and the Stoneheuse (Devon) corps came off at the St. Columb range on Tuesday week. There were ten companies on each side, and the match on November the Devon representatives won by 16 points, but this year they have been placed in the hands of the Stoneheuse men. Lieut.-Colonel Stanhope (Penrhyn) presented the cup.

The Tenbury volunteers had their shooting for the Beauchamp cup, and a second silver cup given by Lieutenant Barber, on Monday and Tuesday last week. The Beauchamp cup (given by the late Earl Beauchamp) was won by Corporal Beeor. Lieutenant Barber's cup was won by Private Pegge. A cup value £5, presented by Lieutenant-Colonel Lane of the corps resident in the parish of Burford, was won by Private James Weaver. This finishes the shooting of the Tenbury corps for the present season, and the result has been to show a decided improvement in the skill of the various members of the corps.—The Tenbury and Kidderminster corps had a friendly match, which was won by the Tenbury men, who scored 324, the Kidderminsters scoring 308.—An interesting contest between the officers of the 1st Worcestershire battalion of rifle volunteers and the Birmingham battalion came off at Stourport on Tuesday. The number of officers selected from each battalion was ten. The shooting was good on both sides, but the Worcestershire officers were victorious, having scored a total of 481, while their antagonists scored only 458.—On the previous day the annual match between the officers of the two Worcestershire battalions (one of which is now the county challenge shield took place at Hartlebury. By the conditions, the battalion



SWORD IN KENSINGTON MUSEUM PRESENTED TO THE SON OF COLONEL HUNGERFORD.

Hawkswork; second, Private Patrick: third, Private Teft: fourth, Private Parr; fifth, Private Spalding; sixth Corporal Barton; seventh, Private Sidey; and, eighth, Private Calvert.

On Friday week there was a carbine competition among the men of the 1st Northumberland Volunteer Artillery, which took place at the rifle-range, North Shields. The competition was for a silver cup presented by Mr. John Straker, J.P., one of the Deputy-Lieutenants of the county. The cup was won by Gunner C. Black. In the heavy-gun contest at Tynemouth Lieutenant-Colonel A. Potter, was second, and Private Ellis, presented by (Wallsend).—The prize-shooting at the annual meeting of the Cheshire Rifles, which commenced on the 22nd ult., was concluded on Wednesday week, concluded on Friday. The corps' prizes of £5, £3, and £2 were won by Sergeant Long, Private Fitchett, and Private Hall, with 70 each for the second and third. The challenge cup and £5, given by Lord A. V. Tempest, was won by Private Pickering. The battalion prizes of £5, given by Mr. T. S. Pemberton, was won by Ensign Lang. The first marksmen's prize, a cup, was won by Private Pickering. The first corporation prize was won by Lieutenant Dixon.

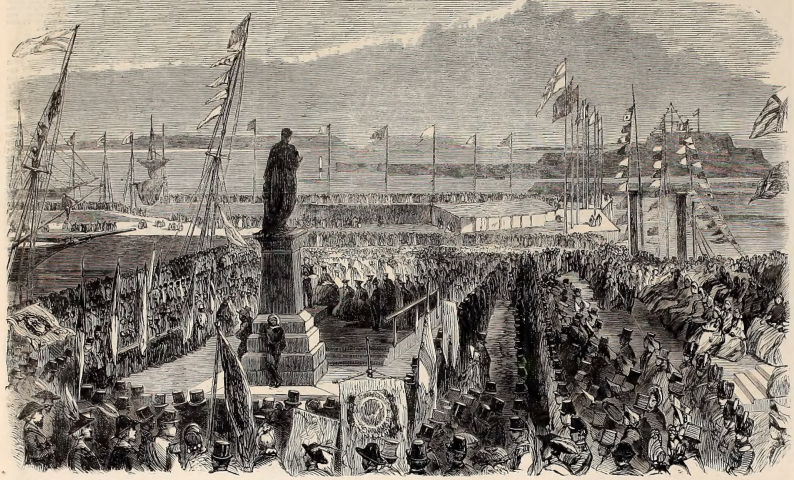
SWORD OF HONOUR IN KENSINGTON MUSEUM.

A sword of honour from the Maharajah of Indore has recently been placed in the Indian department of the South Kensington Museum for exhibition. This sword, which is profusely ornamented with precious stones—diamonds, rubies, and emeralds—was presented to the youthful son of the late Lieutenant-Colonel Hungerford, C.B., of the Royal Artillery, in memory of the important services rendered by the latter during the months of January and February, 1857, when in command of Mhow. Colonel Hungerford by his gallantry and firmness prevented Mhow from becoming a scene of the same lamentable outbreak which took place elsewhere during that period, having, with a very small force, withstood the treacherous attack of the mutinous troops which threatened to overwhelm the province. The Maharajah wished to confer a pension upon Colonel Hungerford; but, the regulations of the British service forbidding this, his Highness ordered that the sword in question to be manufactured, for the purpose of presenting it to the gallant Colonel, who, however, died before it was completed. Colonel Hungerford died at Port Philip, whither he had gone on sick leave, consequent on his exertions during the mutiny. Such, however, is the lasting gratitude felt by his Highness Rollar that at a late period he has presented the sword to Colonel Hungerford's son, in gratitude for his father's distinguished services. The widow of the late Colonel Hungerford is the sister of the two gallant Willoughbys, one of whom blew up the magazine at Delhi, where he was Commissary of Ordnance, and perished from his wounds; and the other died in England from the effects of wounds and illness incurred in India.

BALLOON SURVEY OF LONDON.

Mr. Glaisher, in the most pleasant balloon access, which took place on Friday, Oct. 9, passed over London, and as the atmosphere was unusually clear, the balloon was witnessed in its passage by a great many persons in London. On this occasion, besides Mr. Coxwell and Mr. Glaisher, there were in the car the Hon. Robert J. Walker, M.A., Counsellor-at-Law in the Supreme Court of the United States, and late Secretary of the Treasury, Governor of Kansas, &c.; Flisy Miles, Esq., of the United States Consulate from Schaffgotsch of Berlin; and Rowe, Esq.

While on the voyage, and about the time of passing over London Bridge, the aerial voyagers, at a height of 7000 ft., drank the healths of their respective Sovereigns—the Queen, the Emperor of Austria, and the President of the United States, and a toast given by Mr. Walker, "May England and America always be at peace."



At the height of 7000 ft., as we have said, the balloon passed over London Bridge.

"The scene around (says Mr. Glaisher) was probably one that cannot be equalled in the world with one exception—the homes of 3,000,000 people were seen, and on distinctly that every large building at every part was easily distinguished; while there appeared to be a perfect net-work of railways, the docks and surrounding buildings, &c., in such detail that their inner courts were visible, so that their general plans could have been drawn. Tottenham-street, leading to St. Paul's, was easily traced; it was difficult to believe at first that the small building was St. Paul's. Oxford-street and Regent-street was visible; the parks, the Houses of Parliament, and Millbank Prison, with its radiating lines from the centre, at once attracted notice. In fact, the whole of London was visible, and some parts of it very clearly so. From the great number of persons in the streets, they appeared as if were in abundance of shrubs; and beyond, the country, like a garden, with its fields and hedges, became more contracted and smaller as we ascended further and further away.

"Again, looking down, there was the Thames, without the slightest mist, with all its winding course throughout its whole length, with innumerable vessels, steamers, and boats, and the numerous bridges, from Battersea to Greenwich. Westward was visible, as were the mouth of the Thames and the coast leading to Margate, Ramsgate, and Dover, and the whole of Kent. The day was not quite so clear, but the view was extensive, and as we ascended to a greater height I looked for the coast of France, but I could not see it. On withdrawing the eye by a sweep of the horizon, the whole country round London, to the south still again London claimed yet more general attention. Smoke, thin and blue, was curling above the houses, and appeared to sweep away in one direction, and but that part south of the Thames. Here the smoke was less blue and became more visibly gray and dark as it spread over the land. As far as the eye could see, rising from the ground, the southern limits of which were bounded by an even line, denoting the extent of the vapour, was a dark and gloomy pall.

"The whole of the scene was surrounded by a canopy of blue, the sky being of a very deep tint. Beyond the vapour the scenery was of a very pleasing character, a circular band of cumuli and strata clouds, extending all round, formed a fitting boundary for the horizon. The sun was also seen under the cloud, and visible, except a small part seen through a break in a dark stratus cloud, and looked like a large, well-defined star of a red colour. The moon, which is described as fine, she sir being clear and shadows sharply defined; but as we rose the golden hue disappeared from the sun, and at this time gradually escaped from all the occupants of the car. Both Mr. Walker and Mr. Miles have had experience of the Far West, and they expressed themselves as never having seen anything so rich and picturesque. The richness of these colours decreased in intensity as we rose, but the sun was still very fine, but their effects extended to fully one fourth part of the circle, where rosecoloured clouds were seen. The whole of the scene was most completely partly by pure white cumulus of very rounded and symmetrical forms. I have not described the moon, and I need not, I am sure, do this, as she has many miles high, but nothing could exceed the view on this occasion at the height of one mile, varying to one mile and three-quarters, with a clear atmosphere. The rear of London, even at the greatest height, was one unceasing rich and deep sound, and added interest to the general circumstances in which we were placed."

Mr. Glaisher notices that he has received communications from gentlemen who saw the balloon from Hyde Park, Oxford-street, and Deptford, stating that the balloon was in their respective quarters a great, he thinks, of the little reliance to be placed on estimated observations, particularly those made near the zenith. He also remarks that the views were hidden from many who would have been required to his instruments; but Mr. Miles, he says, took notes, and he hopes the public may have the benefit of them.

INAUGURATION OF THE MEMORIAL STATUE TO THE LATE PRINCE CONSORT AT GUERNSEY.

UNVEILING THE PRINCE CONSORT MEMORIAL STATUE AT GUERNSEY.

On Thursday week the statue erected by the inhabitants of Guernsey in honour of his late Royal Highness the Prince Consort was uncovered with great ceremony.

The town, the harbour, and the roadstead put on their holiday attire. Nearly all the shops were kept closed, flags were hung across the streets, and on the public buildings, Castle Cornet, and Fort George; and all the vessels in the port were profusely dressed with bunting, while the piers, especially Albert Pier—(the site of the statue and of the intended ceremony)—were fluttering with the flags of all nations. The statue, which necessarily formed the principal feature in the scene, is situated close to the town church, between the old harbour and the wet dock. It stands nine feet high, and represents the Prince Consort dressed in the full robes of the Order of the Bath. This beautiful statue is from the cast of that made by Mr. Durham for the English nation, and is the only one of the kind from the original in her Majesty's dominions—an honour which the inhabitants prize exceedingly. It is an electro casting by Messrs. Elkington of pure copper, which, among its many advantages over bronze-casting, has that of giving the work precisely as it leaves the artist's hand, and requiring no filing or chasing. The statue is fixed upon a pedestal of granite, with a plinth of three or four feet.

On the south side of the statue was erected a substantial gallery of several stages, which accommodated about five hundred ladies and gentlemen, who obtained admission by the purchase of tickets. In front of the statue, and at about thirty feet from it, a platform, covered with green carpeting, was erected for the personages who were to take the chief part in the inauguration, a small dais being raised on one portion of it, on which were placed seats for the Lieutenant-Governor and the Bailiff. Behind this platform was fenced off a large space for the accommodation of the subscribers to the statue fund; and the remainder of the pier was appropriated to the troops and the various bodies who were to assist in the ceremony.

The orders, clubs, and Sunday schools which were to take part in the procession assembled at the Militia Arsenal at half-past ten o'clock, arriving in procession from their several places of rendezvous. Four regiments of Guernsey Light Infantry Militia lined the streets leading to the harbour, the procession passing between the lines and proceeding from the Arsenal along Candie-road, Doyle-road, Grange-road, St. James's-street, Smith-street, High-street, and Quay-street to the Albert Pier. One company of the rifles of the 1st Regiment of Militia, with the band, met at the Assembly Rooms at ten o'clock to act as a guard of honour and escort to the Freemasons to the Arsenal, where the other company was mustered, and the two subsequently acted as advance and rear guard to the procession, which was accompanied by the bands of the 1st Regiment and of the Militia Artillery; and, finally, on the arrival of the procession, the two companies took the position assigned them near the statue.

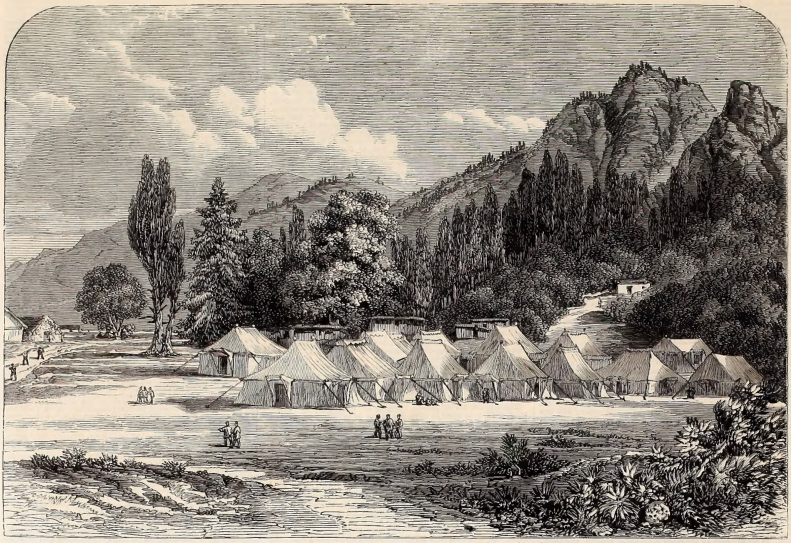
The procession had a very pleasing appearance. The school children, about two thousand in number, were accompanied by their teachers, male and female, and carried flags, some of which denoted the schools or parishes to which they belonged, while others bore appropriate mottoes and devices. The Freemasons, Oddfellows, and Foresters, who amounted to several hundreds (their strength having been augmented by a considerable number of brethren from Jersey), formed an imposing feature in the pageant by their banners, emblems, paraphernalia, and splendid dresses.

The members of the States of the island, consisting of the Bailiff and Jurats of the Royal Court, the Queen's Procureur, Comptroller, Greffier, and Sheriff, the Rectors, and the Constables and Douzeniers of the several parishes and cantons, numbering altogether about two hundred, accompanied by the Queen's Sergeant and Deputy-Sergeant, and Deputy-Sheriff, proceeded from the Courthouse shortly after eleven o'clock, escorted by the rifle companies of the 2nd Regiment of Militia, and on arriving at the Albert Pier placed themselves on each side of the platform.

At twelve o'clock the Lieutenant-Governor, Major-General Sir Marcus J. Slade, Bart., accompanied by his staff, arrived on the ground, where he was received by the special committee, by whom he was conducted to the platform, when the troops presented arms and the bands played the National Anthem.

There were also on the platform Peter Stafford Carey, Esq., Bailiff, and the Jurats of the Royal Court, the Clergy, the Queen's Procureur and Comptroller, Colonel White, Adjutant-General R.G.M., Captain Bell (Government Secretary), Colonel Priaulx, Q.A.D.C., Colonel Broun, Captain Saumarez Brock, C.B., R.N., and Captain Priaulx, Aides-de-Camp; Colonel Ogle, commanding R.E.; Colonel Paynter, C.B., commanding R.A.; Major Nelson, Fort Major; Mr. Clucas, Judge of Alderney; Captain Philip De Saumarez, R.N.; Mr. Thompson, Barrackmaster; and Joseph Durham, Esq., the author of the statue, together with the members of the two special committees. Lady Slade and daughters and Mrs. Stafford Carey and daughters were on the platform.

After a short delay having been allowed for the whole of the troops to close up and form on the positions appointed for them—two companies of her Majesty's 61st Regiment being posted on the southern side of the statue and platform, and the Militia Artillery, with four fieldpieces on the emplacement on the Castle Pier—Commissary-General Tupper Carey briefly addressed the Lieutenant-Governor of Guernsey, Major-General Sir M. J. Slade, Bart. His Excellency then directed the statue to be uncovered, and four seamen hereupon withdrew the linen covering from the statue, amid the cheering of the multitude, a salute being at the same time fired from the guns of Castle Cornet. The Lieutenant-Governor presented the memorial to the chief magistrate (or bailiff), P. S. Carey, Esq., in keeping for the people of the island. A Royal salute was fired by the guns of the Guernsey Militia Artillery, and, the whole assemblage having given hearty cheers for the Lieutenant-Governor and Bailiff, the ceremony of the inauguration was completed.



Lady Slade subsequently presented, in front of the platform, to the officers, non commissioned officers, and privates of the militia (about thirty in number) the prizes they had gained for rifle-shooting during the year.

MISSION-HOUSE AND SOLDIERS' HOME AT ALDERSHOTT.

SOLDIERS' HOME AT ALDERSHOTT.

THIS building, of which we this week give an illustration, is situated on an elevated part of the town of Aldershott, at a short distance from the High-street. The

CAMP OF THE EUROPEAN WORKING PARTY ON THE MURREE HILLS, INDIA, 7000 FEET ABOVE THE SEA.

ROAD-MAKING ON THE MURREE HILLS BY THE EUROPEAN PARTY.—SEE NEXT PAGE.

fabric is in the Gothic style, built of Kentish rag, with stone dressings. It has gables in the front, and is entered by a neat porch, having three steps; each gable has a light ornamental vane at the top; and the roof is covered with red and blue Welsh slate, laid in bands horizontally. In the centre, at the back of the house, is a spacious hall, capable of containing eight hundred people. This hall is to be used for lectures and meetings, where addresses will be delivered, not only to the soldier but to the civilian. The roof of this hall is of timber, with open timber-work dividing the bays. It is well lighted by a large centre window at the end and good side lights on each side. The house itself contains a library and reading-room, coffee and smoking rooms; also dwelling chambers for a resident missionary and his wife, with other chambers for the parties having the care of the house. The whole is supplied with the attendance of the soldier and townspeople from the public-house. The only drawback to the present arrangement is sought, the library will be furnished with draught and chess boards, materials for drawing, writing, &c., and other articles for quiet and healthy recreation. The ground has been kindly presented by Mr. Egger, a resident of the town of Aldershott, and who, in conjunction with his partner, was the architect. Mrs. L. Daniell, of Aldershott, undertook the whole agency the work has been carried out. The building has been principally by the donations of many, and has already cost more than three thousand pounds. We believe one thousand more is required to meet the various demands. It is impossible to estimate the value of such an institution in the town, to the soldier in camp, as well as out of it. We should mention that the soldier and the civilian will have the advantage of a bar, where he can take a chop or steak and have it cooked, and will be enabled to procure tea or coffee at a reasonable rate. Thus not only mental but bodily food are to be provided for.

The opening service of the Mission Hall took place on Saturday evening last, when a meeting for prayer was held in the new and handsome edifice in Bank-street. On Sunday, at three o'clock, there was a special service, which was largely attended, and the usual evening address was delivered by the Rev. W. Pennefather, of Barnet. Special services have taken place during the present week. The Rev. Lord Radstock, the Hon. and Rev. H. Cholmondeley, Lord Radstock, the Hon. A. Kinnaird, M.P., Colonel Travers, Captain Trotter, Captain Fishbourne, the Rev. Dr. Reid, Mr. Robert Baxter, and Mr. Richard Weaver have taken part.

THE EUROPEAN WORKING PARTY ON THE MOUNTER HILLS, INDIA.

(From a Correspondent.)

THE proposal employing European soldiers in working on the hill roads originated, we believe, with Colonel Sir Sydney Cotton, who lately commanded the Peshawur division, and received the approval of the Lieutenant-Governor of the Punjaub, the Commander-in-Chief, and the Governor-General. Accordingly, early in May of this year, a full company of one hundred men of the 101st Royal Bengal Fusiliers, with their officers to each company and one assistant-surgeon for the detachment, were sent up to the Murree Hills, the Rawul Pindee, the nearest station on the plains having a European garrison. The cliff-road was originally constructed as a bridle-road, formerly for purposes of work, under the direction of the superintending engineer of the division, who would best understand explaining the nature of the work to be done, and the localities where it was to be carried on. The detachment encamped for work at Bressa Cairn, a piece of table-land about seven miles from Murree, on the Abbotabad road, which it was designed to improve. Above this point forty miles in length, and about twelve miles south of the lofty hills stretching between Murree and Abbotabad. It was made about a couple of years ago, at great cost of labour, and has had a most favourable influence, not only in civilising, at least in bringing more under control, the turbulent population of the Hazara Hills. The promoters of the undertaking are of opinion that the easiness of the slopes, the immense depth of the cuts, or precipices, the scarcity of labour, and other difficulties, and the unfavourable state of the early completion of the communication, the road was not made wider than an average of 6 ft. throughout its entire extent. It is now proposed to widen it to 12 ft.; and, as the road was originally designed as much, if not mainly, for the convenience of military operations as for general traffic and communication, it is but fit and appropriate that the soldiery should be employed in rendering it more serviceable for the latter purpose, although in so improving it it was rendered better suited for general objects.

The present movement is the more interesting from its being the first experiment in India, since annexation of the Punjaub, in the way of employing European manual outdoor labour. Except in field operations, where the necessities of service render it unavoidable, there has been no instance, we believe, in this country where Europeans have been employed in actual outdoor labour throughout the day.

The detachment having been temporarily placed under the management of the Department of Public Works, a fixed rate of daily labour pay has been admitted. A soldier capable of skilled work, entitling him to be considered an artificer, is allowed working pay at the rate of ten annas, or 1s. 8d., a day; an ordinary soldier labourer, the pay of six annas, or 9d., per diem; and a non-commissioned officer, whose duty is to superintend the men, working pay, or 1s. per diem. These wages are in addition to the military pay of the men.

To such completion the mule road was proclaimed as the first instalment of work. The rocky nature of the soil, principally limestone and hard shale, the high level of the hills, and consequent necessity for frequent blasting, rendered the work arduous and trying. In six weeks the two miles were nearly completed, when, in consequence of the setting in of the rains, the detachment was ordered further on the road to the top of a hill 1700 ft. higher, to but themselves against the cold weather. In this occupation they are now employed.

The scheme has so far proved a success. The European soldiers have worked willingly and well, and have for some months past relieved the native labourers, or coolies, as they are called, who are usually employed in these operations. Their labour, however, for the whole day has done as much as two coolies working the whole day of ten or twelve hours. The Department of Public Works has, we believe, incurred any additional outlay in the employment of European labour while practically carrying out the present experiment. The work improved and more substantial, and will in future accustomed to hard labour, and in a better condition of health and strength than are the soldiers of Indian garrisons, the results of the scheme would have been even more satisfactory.

The health of the soldiers employed on this work has steadily improved, and is in marked contrast to the present condition of the regiments at Rawul Pindee, from which they have been detached.

The hygienic advantages of the detachment will probably lead to a greater extension, if not the final adoption, of Sir Sydney Cotton's plan of employing European regiments in connection with the Indian hills during the hot season. It is more advantageous to the men themselves and to the State to have them so employed in the salubrious climate of the hills during a season when in the plains disease prevails universally, and the best necessitates a life of idleness to soldiers.

King Leopold of Belgium conferred the Grand Cordon of his Order on the King of the Greeks when at Brussels, and the young Sovereign wore the insignia at the dinner which took place in his honour at the Palace of Laeken.

The Museum of Palermo has purchased two antique marble sarcophagi discovered many years since near the capital of Sicily, and supposed by some to be that of Philistis, wife of King Pyrrhus; and the other discovered in 1726, and supposed to be Phrynichus or Carbinatelus.

CHICAMAUGA CREEK.—A correspondent gives the following description of this new famous locality :—"I am familiar with the names and localities near Chattanooga, and I beg to correct the spelling of the word by which the battle is generally called. It should be 'Chickamauga,' not 'Chickamauga.' It is a Cherokee compound, and is probably translated 'stream of creek;' the whole signifying the stream of creeks. The village of Lafayette, on the Georgia road, is very near the seat of the principal chief of the Cherokees. The valley and hills which run through Chickamauga are low, and subject to overflow. The river doubtless derived its name from the unfathomness of the little valley, through which it passes."

THE FARM

THE Claremont steamer landed us at Portree, that little village capital of the Isle of Skye, just too late for the annual cattle show, whose prices are supplied partly by the Highland Agricultural and partly by the local society. The cattle were entirely of the Highland breed, and about forty were in the yard. Mr. Stewart, of Dunthoine, whose family have long been famed for their hardy breed, was present with a couple of fine animals, and took two firsts for bulls, a first and second for three-year-old heifers, and three firsts for Cheviot rams and gimmers; in fact, every prize he tried for. Dr. Nicholl Martin, of Glenhaile, was second in the old bull class with a bull (bred by Mr. Campbell of Jura), which took the first prize in 1855. Mr. Fraser, of Kirkhill, was born May 21, 1712, at Boston, America, then a town of the British empire, and was, when very young, brought to Scotland by his father. He was educated first by a private tutor, and afterwards at Trinity College, Cambridge, where he took a mathematical scholarship. He also won the second Smith's prize (mathematical), and was selected Fellow of his college, and was appointed travelling bachelor. He then went to the bar, and had the opportunity of visiting his birthplace, Boston. On his return to England, in 1742, he was created M.A. and LL.D., afterwards he entered the Court of Lincoln's Inn, and was called to the Bar on the 8th of June, 1814. He chose the Midland Circuit, and was made Queen's Counsel in 1827. He was also prominently known from the ability he displayed as one of the counsel who defended Wilson and Thistlewood, and Tidd, for high treason in 1817. He entered Parliament as member for the borough of Yarmouth, Isle of Wight, on the 26th of March, 1818, but the same year became a Bankruptcy Judge and Chief Justice of Chester. He afterwards sat for Ashburton and the University of Cambridge. He was soon looked on as the most able lawyer of his party (the Tory side) in the House of Commons, and, a convenient opportunity presenting itself by the removal of Sir Samuel Romilly to the Rolls, Mr. Copley was appointed Solicitor-General in July, 1819, and was knighted. He, while holding the office of Solicitor-General in 1820, was selected for the Crown's two memorable cases—viz., the trial at the Old Bailey of the Cato-street conspirators and their ringleader, Mr. Thistlewood, and at the proceedings against Queen Caroline, in the House of Lords. In both affairs, Sir John Copley displayed remarkable judgment, and fortunate moderation. He became Attorney-General in 1824, and Master of the Rolls in 1826. He at first energetically opposed the Reform Bill, and was one of the party with those who felt the absolute necessity of Catholic Emancipation being carried. He took office in the Ministry of Mr. Canning in 1827, and was appointed Lord Chancellor for the first time April 20, 1827, and was created Lord Lyndhurst. He was for a short time Speaker of the House of Lords, during the premiership of the Duke of Wellington, the last administration but one in which he retired from the cares of office. He was on the accession of the Whigs to power in 1830, but was appointed Chief Chief Baron of the Exchequer in 1831, and in 1834 was again called to the woolsack on the sorie and high-minded manner in which he presided over the trial of Lord Melbourne, for criminal conversation, was elegance, and quite led the way for the Bill to be declared to be detrimental to the best interests of the people and inconsistent with the prerogative of the Crown. One crisis in the history of the bill in the House of Lords was when the Duke of Wellington, aware of the disinclining closure, his carrying which caused the Ministry to be compelled to resign, on the 9th of May, 1832, Lord Lyndhurst, on resumption of Sir Robert Peel's short Administration in 1834, was again appointed Lord Chancellor, but again resigned in April, 1835, and was created Lord Lyndhurst of the United Kingdom in 1840. In 1841 Sir Robert Peel returned to power, and Lord Lyndhurst for the third time assumed the chancellorship, which he finally resigned in July, 1846. He nevertheless took subsequently an active part in the debates of the House of Lords, and was frequently called upon to fill up the force of his high character, wisdom, and eloquence there, to the very last year of his life. In both he was a conspicuous figure, as speaking of the Courts of Exchequer and Chancery, Lord Lyndhurst had been pre-eminent, and his judgments in Burne v. Burne, Sir Wm. Scott's case, Bligh v. Lord Darnley, and the bankruptcy case, are looked on as models of lucid reasoning and admirable decision. Lord Lyndhurst, in his early days, when past eighty of age, on the war with Russia, on Cambridge University Reform, the Wensleydale peerage, and the disturbances in Ireland, displayed the same vigorous mind and sagacious eloquence. Lord Lyndhurst, on the death of the venerable Lord Sinclair, had a twelve days before his own decease, obtained the senior Peer of the House of Lords. Lord Lyndhurst married, first, March 13, 1819, Sarah Garay, daughter of Chas. Brunsden, Esq., and by her (who died Jan. 15, 1857) had a son, Chas. Wm., who fell at Waterloo, and his Lordship by her (who died Jan. 15, 1814) had a son and four daughters. He married, second, two daughters of Sir Geo. Pratt, and the two surviving daughters have been married—viz., Sarah Elizabeth, in 1850, to Henry John Selwin Ibbetson, Esq., M.P., and Georgiana Mary, in 1851, and present Baronet, of Leeds, Yorkshire; and Sophia Clarence, in 1854, to Hamilton Beckett, Esq., late 60th Rifles, second son of Sir Edmund Beckett, Baronet, of Leeds Goldsmith, Esq., by whom (who survives him) he has had another daughter, Georgiana Mary, born in 1855. His wife, the last mate, is Charles Du Cane, Esq., M.P. Lord Lyndhurst died on the 12th inst., at his town house (now known as No. 1, Sussex Gardens), St. George's Hyde Park-square, and, as he leaves no male issue, the barony of Lyndhurst becomes extinct.

OBITUARY OF EMINENT PERSONS.

LORD LYNDHURST.

The Right Hon. Sir John Singleton Copley, P.C., F.R.S., D.C.L., Baron Lyndhurst, of Lyndhurst, in the county of Hants, High Steward of the University of Cambridge, and one of the Governors of Charterhouse, a great lawyer, orator, judge, and statesman, was the son of the celebrated painter, John Singleton Copley, Esq., R.A., by his wife, Miss Clarke, daughter of Richard Clark, Esq., a wealthy merchant in Boston, United States, and grandson of Col. John Turbi Copley, for their two trade there, and was grandson of Richard Copley, Esq., of the county of Limerick, by his wife, Sarah, younger daughter of John Singleton, Esq., grandson of Sir Joseph Copley, and John Singleton, Esq., J. P., of Quiesville Abbey, in the county of Clare, High Sheriff of that county in 1825. Lord Lyndhurst, the future Lord Chancellor, was born May 21, 1772, at Boston, America, then a town of the British empire, and was, when very young, brought to Scotland by his father. He was educated first by a private tutor, and afterwards at Trinity College, Cambridge, where he took a mathematical scholarship. He also won the second Smith's prize (mathematical), and was selected Fellow of his college, and was appointed travelling bachelor. He then went to the bar, and had the opportunity of visiting his birthplace, Boston. On his return to England, in 1742, he was created M.A. and LL.D., afterwards he entered the Court of Lincoln's Inn, and was called to the Bar on the 8th of June, 1814. He chose the Midland Circuit, and was made Queen's Counsel in 1827. He was also prominently known from the ability he displayed as one of the counsel who defended Wilson and Thistlewood, and Tidd, for high treason in 1817. He entered Parliament as member for the borough of Yarmouth, Isle of Wight, on the 26th of March, 1818, but the same year became a Bankruptcy Judge and Chief Justice of Chester. He afterwards sat for Ashburton and the University of Cambridge. He was soon looked on as the most able lawyer of his party (the Tory side) in the House of Commons, and, a convenient opportunity presenting itself by the removal of Sir Samuel Romilly to the Rolls, Mr. Copley was appointed Solicitor-General in July, 1819, and was knighted. He, while holding the office of Solicitor-General in 1820, was selected for the Crown's two memorable cases—viz., the trial at the Old Bailey of the Cato-street conspirators and their ringleader, Mr. Thistlewood, and at the proceedings against Queen Caroline, in the House of Lords. In both affairs, Sir John Copley displayed remarkable judgment, and fortunate moderation. He became Attorney-General in 1824, and Master of the Rolls in 1826. He at first energetically opposed the Reform Bill, and was one of the party with those who felt the absolute necessity of Catholic Emancipation being carried. He took office in the Ministry of Mr. Canning in 1827, and was appointed Lord Chancellor for the first time April 20, 1827, and was created Lord Lyndhurst of the United Kingdom in 1840. He was for a short time Speaker of the House of Lords, during the premiership of the Duke of Wellington, the last administration but one in which he retired from the cares of office. He was on the accession of the Whigs to power in 1830, but was appointed Chief Chief Baron of the Exchequer in 1831, and in 1834 was again called to the woolsack on the sorie and high-minded manner in which he presided over the trial of Lord Melbourne, for criminal conversation, was elegance, and quite led the way for the Bill to be declared to be detrimental to the best interests of the people and inconsistent with the prerogative of the Crown. One crisis in the history of the bill in the House of Lords was when the Duke of Wellington, aware of the disinclining closure, his carrying which caused the Ministry to be compelled to resign, on the 9th of May, 1832, Lord Lyndhurst, on resumption of Sir Robert Peel's short Administration in 1834, was again appointed Lord Chancellor, but again resigned in April, 1835, and was created Lord Lyndhurst of the University of Cambridge in 1840. In 1841 Sir Robert Peel returned to power, and Lord Lyndhurst for the third time assumed the chancellorship, which he finally resigned in July, 1846. He nevertheless took subsequently an active part in the debates of the House of Lords, and was frequently called upon to fill up the force of his high character, wisdom, and eloquence there, to the very last year of his life. In both he was a conspicuous figure, as speaking of the Courts of Exchequer and Chancery, Lord Lyndhurst had been pre-eminent, and his judgments in Burne v. Burne, Sir Wm. Scott's case, Bligh v. Lord Darnley, and the bankruptcy case, are looked on as models of lucid reasoning and admirable decision. Lord Lyndhurst, in his early days, when past eighty of age, on the war with Russia, on Cambridge University Reform, the Wensleydale peerage, and the disturbances in Ireland, displayed the same vigorous mind and sagacious eloquence. Lord Lyndhurst, on the death of the venerable Lord Sinclair, had a twelve days before his own decease, obtained the senior Peer of the House of Lords. Lord Lyndhurst married, first, March 13, 1819, Sarah Garay, daughter of Chas. Brunsden, Esq., and by her (who died Jan. 15, 1857) had a son, Chas. Wm., who fell at Waterloo, and his Lordship by her (who died Jan. 15, 1814) had a son and four daughters. He married, second, two daughters of Sir Geo. Pratt, and the two surviving daughters have been married—viz., Sarah Elizabeth, in 1850, to Henry John Selwin Ibbetson, Esq., M.P., and Georgiana Mary, in 1851, and present Baronet, of Leeds, Yorkshire; and Sophia Clarence, in 1854, to Hamilton Beckett, Esq., late 60th Rifles, second son of Sir Edmund Beckett, Baronet, of Leeds Goldsmith, Esq., by whom (who survives him) he has had another daughter, Georgiana Mary, born in 1855. His wife, the last mate, is Charles Du Cane, Esq., M.P. Lord Lyndhurst died on the 12th inst., at his town house (now known as No. 1, Sussex Gardens), St. George's Hyde Park-square, and, as he leaves no male issue, the barony of Lyndhurst becomes extinct.

THE ARCHBISHOP OF DUBLIN.

The Right Hon. and Most Rev. Richard Whately, D.D., Lord Archbishop of Dublin, Bishop of Glendalough, and Bishop of Kildare, Provost of Cashel, Vicar of Cullen in St. Patrick's Cathedral, Visitor of Trinity College, Dublin, Ex-Vice President of the Royal Irish Academy, Chancellor of the Order of St. Patrick, and of the University of Dublin, was born in St. Peter's Parish, Joseph Whately, D.D., of Nonsuch Park, Surrey, Archdeacon of Bristol, by his wife, Elizabeth Sarah, daughter of William Fleamer, Esq., of Ware Park, Herts, and sister of William Fleamer, Esq., late deputy-lieutenant and M.P. for Hertfordshire. He was nephew of Thomas Whately, secretary to the Duke of Suffolk and Berkshire, and author of some valuable works, and of Richard Whately, the economist. He was born in Cavendish-square, on Feb. 1, 1787, and was educated at Oriel College, Oxford, where his career was brilliant. He graduated B.A. 1808, and was elected Fellow and mathematics in Michaelmas Term, 1808. He, in 1810, took orders for his Bachelor's essay. "What are the arts in the cultivation of which the University of Dublin, now the Archbishop of Dublin,

He was, in 1811, elected Fellow of Oriel, and proceeded M.A. in 1812. In 1822 he was appointed Principal of Oxford, and in the same year took the living of Halesworth with Chediston, in Suffolk. In 1825 he published his "Elements of Logic," and in 1826 his "Elements of Rhetoric," and since "Sermon on the Christian's Duty to Establish Christianity as a Law," and "Sermon on the Scripture Account of Miracles." Besides "his very copious volume called "Historic Doubts Relative to Napoleon Bonaparte." This work is a complete refutation of the arguments adopted by Hume in his essay directed against the Christian miracles. The most remarkable work that it was as one of the Commissioners of National Education, and the establishment of Normal Schools. In 1831 he published "Introductory Lectures on Political Economy," "Transportation," "The Kingdom of Christ," "Introductory Lectures on St. Paul's Epistles," "Lectures on the Three Creeds" (edited and in the main inspired by him), &c. He was a contributor to the Edinburgh and Quarterly Reviews, and to almost every periodical of any learned or instructive nature. His very latest contributions are to be found in a popular magazine, Fraser's, established by his friend, the late James Anthony Froude. He also brought out an emended and improved edition of Archbishop King's "Origin of Evil," and of Archbishop Leslie's "Short and Easy Method with the Deists," and "Bacon's Essays, with Annotations." Dr. Whately married, in 1821, Miss Jane Deacon, daughter of W. Pope, Esq., and by her (who died April, 1849) he leaves issue. One of his sons, the Ven. Edward Whately, is Archdeacon of Dublin, and another, Rev. Henry Whately, is Rector of Rathcoole. The wife and Most Rev. Archbishop died at Rostrevor, near Dublin, on the 8th inst.

JOHN SHEEPSHANKS, ESQ.

John Sheepshanks, Esq., of 24, Rutland-gate, Hyde Park, the accomplished owner of the famous collection of pictures known as the Sheepshanks Gallery, was born in 1787, and was the son of a wealthy cloth manufacturer at Leeds, whom he succeeded in the business, and was the brother of the Rev. Richard Sheepshanks, B.D., F.R.A.S., formerly Fellow of Trinity College, Cambridge, a distinguished astronomer. Mr. John Sheepshanks has for a long time been known as a munificent patron of art, and has given away from his collection, 1851, profits, liberal to artists and happy in their society. He is Dorsetshire, 1851, profits, liberal to artists and happy in their society. He is Dorsetshire, 1851, presented to the nation the whole of his splendid collection of drawings and

paintings, for the purposes of public instruction in art. In this munificent donation, he made it a condition that the responsibility of taking care of his collection should rest with an individual Minister—the Vice-President of the Committee of Council on Education; and he stipulated that his collection should be removed to South Kensington, giving also a liberal permission to provincial towns to have the pictures on loan, if the authorities provided suitable places to exhibit them. Lord Palmerston accepted the gift on behalf of the Government, and the collection was removed from Rutland-gate to South Kensington early in 1857. The collection is worth about £60,000. It is especially rich in the best works of Mulready, Leslie, and Landseer, and contains fine examples of the principal modern British oil-painters. There are 233 oil-paintings, 103 sketches and drawings by Turner, Stanfield, Chalon, &c. Mr. Sheepshanks died at his town house, at Rutland-gate, on the 5th inst.

SIR J. R. DASHWOOD, BART.

Sir John Richard Dashwood, sixth Baronet, of West Wycombe, Bucks, was the third son of Sir John Dashwood, the fourth Baronet, by his wife, Mary Anne, daughter of Theodore Henry Broadhead, Esq. He was born in 1792, and succeeded his brother, Sir George Henry Dashwood, M.P. for Bucks, as sixth Baronet, March 4, 1862. He died at Halton, on the 24th ult., and is succeeded by his nephew—viz., his brother Edwin's, of the Royal Horse Guards, eldest son, now Sir Edwin Hare Dashwood, the seventh Baronet, who was born in 1825, and was formerly in the 10th Regiment, and distinguished himself at the battle of Sobraon; and who married, in 1853, Roberta Henrietta, daughter of Sir Robert Abercromby, Bart., of Birkenbog, and sister of Lady Forbes and of Robert Abercromby, a gallant officer in the British service, who fell at the battle of the Alma. By this union Sir Edwin Hare Dashwood has four sons and a daughter. This family of Dashwood is of old Dorsetshire and Somersetshire origin. The first Baronet, Sir Francis Dashwood, was so created in 1707; and his son, Sir Francis, the second Baronet, became, in right of his mother, Baron Le Despencer, which title fell into abeyance at his death, while the baronetcy passed to his half brother, Sir John Dashwood King, grandfather of the Baronet just deceased.

MRS. TROLLOPE.

Frances Anne Trollope, one of the cleverest and most amusing novelists of her day, was the daughter of the Rev. William Milton, Vicar of Heckfield, Hants, a gentleman well known as an accomplished man of science, and particularly as the designer of the West Dock at Bristol. She was born at the vicarage, Heckfield, in 1779, and was married, in 1809, to Thomas Anthony Trollope, Esq., B.C.L., of Oxford, and Barrister-at-Law, son of the Rev. Anthony Trollope, and grandson of Sir Thomas Trollope, fourth Baronet, of Casewick, in the county of Lincoln. Mrs. Trollope's husband died at Bruges, on Oct. 23, 1835. Mrs. Trollope's first appearance as a writer was in giving vent to a bitterness of feeling on account of the many désagrémens she had experienced in a journey she took to America. Her "America and the Americans," with its companion novel of the "Refugee in America," at once made her reputation, and she continued a long career of authorship, which has been as prolific as it has been prosperous. In succession appeared "Belgium and Western Germany;" "Paris and the Parisians," descriptive of the early period of the reign of the citizen King, Louis Phillipe; "Jonathan Jefferson Whitlaw," a novel bringing out the peculiarities of the black and coloured races of the Southern States; "Vienna and the Austrians," with a novel, "The Romance of Vienna;" and "The Vicar of Wrexhill," a chef d'œuvre in its way. Mrs. Trollope then published a most diverting novel, "The Widow Barnaby," being the history and adventures of a crafty husband-hunter, without principle or money. This was followed by "Michael Armstrong, the Factory Boy," exposing the evils of the manufacturing system; and "One Fault," a domestic story, showing the sad consequences of ill temper, the result of pride and over-sensitiveness. In 1840 she gave "The Widow Married," "Chesterfield," "Hargrave," "Jessie Phillips," and "Lauriston." These were followed by numerous others, of the principal of which space allows only the enumeration here of the titles—viz., "Tremordyn Cliff," "The Robertses on their Travels," "The Blue Belles of England," "The Ward of Thorpe Combe," "The Attractive Man," "Petticoat Government," "Father Eustace," "Uncle Walter," "The Clever Woman," "The Three Cousins," "Mrs. Mathews, or Family Mysteries," "Gertrude, or Family Friends," and "Fashionable Life in Paris and London." Mrs. Trollope died at Florence on the 6th inst.

WILLS AND BEQUESTS.

The will of Sir Frederic William Slade, Bart, Q.C., of Maunsell Grange, North Petherton, Somerset, a Bencher of the Middle Temple, was proved in the London Court on the 6th inst., by the executors, Lord Vaux of Harrowden (the testator's brother-in-law), and Lucius Henry Fitzgerald, Esq., barrister-at-law, the personalty being sworn under £16,000. The will was executed in 1862. The testator was the son of the late General Sir John Slade, Bart., G.C.H., and succeeded to the baronetcy in 1859, and attained the age of sixty. Sir Frederic, after making provision for his wife (who is the sister of Baron Vaux), and securing to her Ladyship an annuity for her life, has directed his property to be divided amongst all his children not otherwise provided for. Sir Frederic was a magistrate and Deputy-Lieutenant for Somerset, and Lieutenant-Colonel of the West Somerset Yeomanry.

The will of Richard Owen, Esq., formerly of Wakefield Lodge, Northamptonshire, but late of Leamington Priors, Warwickshire, was proved in the London Court, on the 17th ult., by Thomas Samuel Wright, Esq., solicitor, Leamington Priors, the sole executor. The personal property was sworn under £14,000. The testator died in July last, having executed his will in 1856, and a codicil in March, 1861. He has disposed of his property almost entirely to charitable objects. After leaving to a sister a life-interest arising from £1000, and to each of the children and grandchildren of the brothers and sisters of his mother a legacy of £100, and to his executor £200, and a few other legacies, he bequeaths the remainder as follows:—To the London Society for Propagating the Gospel, £4000; Church Missionary Society, £3500; Pastoral Aid Society, £500; London Orphan Asylum, £1500; London Fever Hospital, £500; Welsh Charity School, £100; the District Schools at Leamington, £100; and to the Brompton Consumption Hospital, £1000, this latter legacy being a reversion falling due on the death of his sister. The residue of his property he directs to be divided into two equal parts, leaving one moiety to the Leamington Hospital and the other moiety for the relief of the poor of Leamington Priors.

The will of Alfred Ricketts, Esq., of Lansdowne-place, Bath, was proved in the London Probate Court under £60,000 personalty, the executors nominated being his relict, together with Alfred Hudson Ricketts, Esq., the son; Heberden Finden Emery, Esq., of Banwell; and Captain W. Stocker, R.N. The will bears date April, 1862. To his wife he bequeaths a life interest over £12,000, in addition to her marriage settlement, and other bequests. To his son Loftus he devises his freehold estate at Banwell, Somerset. To each of his three sons and daughter he leaves a legacy of £5000 beyond any other provision or settlement, appointing his sons Alfred and Charles residuary legatees of the real and personal estate. There are legacies left to some personal friends, to his executors, and to his servants.

The negotiations respecting the marriage of the Prince of Orange with Princess Frederica of Hanover have been concluded. The Prince was born in 1840 and the Princess in 1848.

The English Government has addressed, through the French Minister of Foreign Affairs, her Majesty's thanks to the civil, maritime, and military authorities of Havre, for the care with which the funeral honours were rendered to Admiral Washington, who lately died in that town.

"A part of the property of King Otho and of Queen Amélie of Greece has," says the *Ost-Deutsche Post*, "arrived at Venice from Athens. The most valuable articles, particularly the Queen's jewels and the King's private library, still remain in the palace at Athens."

The inquiry into the loss of the Norwegian steamer has terminated. The master's certificate is suspended for twelve months, the chief point urged against him being that he was going at full speed in a dense fog, and exposed to the varying influence of strong currents.

The State apartments of Windsor Castle are closed until further notice. During the absence of her Majesty the presence chamber, or grand reception-room, one of the finest of the State apartments of Windsor Castle, has been undergoing a complete re-decoration and gilding by Mr. J. V. Cooper, of Windsor.

There has been a serious collision in the Channel between the French ship Zaide Celine, Roussel, from Cardiff to Rochefort, and the James, of Fowey. The latter vessel foundered almost immediately, and the captain and two men are reported to have perished. The Zaide Celine succeeded in putting into Falmouth.

The Deep Sea Commission met again on Saturday, this time at Brixham, on the Devonshire coast. The evidence there was as conflicting as in Northumberland—the advocates of line-fishing declaring that the trawlers were ruining the trade; the trawlers insisting that the fishing grounds were benefited rather than injured by their operations.

The Government emigration ship Ariadne, 770 tons, Captain G. Barnes, belonging to Messrs. T. M. Mackay and Co., London, sailed on the 6th inst. from Liverpool for Brisbane, Queensland, having on board 275 Government emigrants, comprising 25 married couples, 95 single men, 62 single women, 33 boys, and 31 girls between the ages of one and twelve, and four infants, under the care of Dr. Alexander Cumming, surgeon superintendent.——The Emigration Commissioners have chartered the Vernon, 891 tons, Captain Boyd A. Johnstone, belonging to Mr. Litchfield Green, London, for the conveyance of emigrants to Brisbane, Queensland, at the rate of £15 17s. 6d. per statute adult. The Vernon is appointed to sail from Southampton about the 30th of November.

CHESS.

TO CORRESPONDENTS.

ARGUS.—The monstrous innovation of the "Dummy Pawn" is scouted, of course, by every player of common sense; but in one of our lunatic asylums it is said to be coming into operation, and there, when a player advances a Pawn to the eighth square, he expresses the movement by saying, "I pawn my Pawn!"

C. W., of Sunbury.—No. 2 has been turned to account; but No. 1 appears to us defective: for suppose, 1. B takes Q (ch), 2. Q to K B 3rd (ch), how can mate next move be prevented?

T. SMITH.—It would facilitate reference if you numbered your problems. The one last amended is still incorrect, and admits of an easy solution in *four* moves by 1. Q to K sq, 2. R to K 7th, &c. Is it not so?

PRIMOGENITUS.—It is allowable for a player to have as many Queens or other pieces on the board *at one time* as he can get by advancing Pawns to their eighth square.

I. W. B.—Such a claim, after ten years' silence on the subject, and from a player whose inventive genius never soared beyond the notion of a "dummy Pawn," is, as you say, too absurd for serious notice. The object of it, like the fulsome parade of great folks' names in the same quarter, is only a desperate effort to attain a little reflected celebrity.

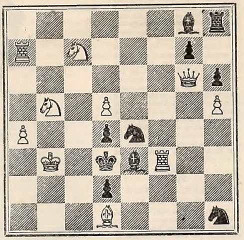
F. JOHNSTON.—They are at the moment under examination.

IOTA.—If you will be at the trouble to inform us in what year the problem was published, we will endeavour to let you have the position.

A CHESSPLAYER.—We have heard four-handed chess extolled by many persons who practise it, as a very entertaining game, and are pleased to find that it is becoming popular.

B. R.—Mr. Mackenzie, who recently played with so much success against the chief players of the Grand Cigar Divan, is at present in New York, and we await with some interest the report of his encounters with the leading players of America.

NEREUS.—No; you have yet to find the solution of the beautiful two-move mentioned. Try it once more.



ALTON, Hants.—There are fifty solutions of the problem of the Knight's march over the chessboard. Some years since Dr. Roget published a very elegant key to this puzzle, which we have no doubt you could obtain by an application to him. You will find several articles on the subject in recent numbers of *La Nouvelle Régence*, and an exhaustive summary of it in M. De Jaenisch's great work, "Traité des Applications de Mathématique au Jeu des Echecs."

SOLUTIONS OF PROBLEM NO. 1023, by Margaret, E. F. P., Dover, I. S. G., Primogenitus, A Bath Archer, D. D., F. R. S., Ernest, P. H. D., Simple Simon, J. Guthrie, Delta, F. R. S., Quidnunc; I. G., Wandsworth; Alton, Hants; Johnston Mills, Sergius, Stella, R. M., Puzzled, Felix, Vicar, A Learner, T. V. B., Little Dorrit, Lionel, F. C. S., Nemo, Typo, Œdipus, Manfred, The Ghost, Presis, H. W., Conrad, I. H., Clericus, F. C. S., Tom Noddy, W. M., Stanley; B., of Ghent; G. M., Philo-S., Boston Stump, Tomaso, F. N., T. Rudge, Carfax, Gamma, A German, C. B., United Service Club, Box and Cox, Bookworm, R. B. W., A Bohemian, Romola, Gil Blas, L. S. D., 1853, Bumble, Omicron, Try-again, I. H. S.; B. B., Bradford; I. H., of Sheffield; D. V. D.; R., of Clapham; F. C. S., Volunteer, A Templar, Victoria, Bentham, S. W. H., G. W. R., Charley, I. B., Caroline, Athos, Clifden, Henricus, Rodolph, Sigma; D., of Barnstable; Peregrine, Travellers' Club, Antony, A Lady, Sisma, Vernon, are correct. All others are wrong.

PROBLEM NO. 1025.

By Mr. T. SMITH.

BLACK.

WHITE.

White to play, and mate in four moves.

CONTINUATION OF MR. BUCKLE'S GAMES.

A Game in which Mr. BUCKLE gave the odds of the King's Kt.

(*Remove Black's K Kt from the Board.—Queen's Gambit.*)

BLACK (Mr. B.)	WHITE (Mr. C. K.)
1. P to Q 4th	P to Q 4th
2. P to Q B 4th	P takes P
3. Kt to Q B 3rd	B to K B 4th
4. P to K 3rd	

(It must have been difficult to resist the temptation to play this Pawn a square further, and we are not sure that the resistance was wise. P to K 4th would have gained a move and given Black a good free game.)

BLACK (Mr. B.)	WHITE (Mr. C. K.)
4.	P to K 3rd
5. B takes P	P to Q R 3rd
6. P to K R 3rd	Kt to K B 3rd
7. Castles	B to Q 3rd
8. P to K B 4th	Q Kt to Q 2nd
9. P to K 4th	B takes K R P

(Why not have taken the King's Pawn, instead of throwing away a piece? There no doubt was valid reason why, but we do not see any at the moment.)

BLACK (Mr. B.)	WHITE (Mr. C. K.)
10. P takes B	B to K 2nd
11. P to K 5th	Kt to Q 4th
12. B takes Kt	P takes B
13. P to K B 5th	Kt to Q Kt 3rd
14. P to Q R 4th	

(This was not played with Mr. Buckle's customary acumen. He should rather have moved his Queen to K Kt 4th, and then it would have been next to impossible for White to avoid defeat.)

BLACK (Mr. B.)	WHITE (Mr. C. K.)
14.	P to Q B 4th
15. P to K B 6th	P takes K B P
16. P takes K B P	B takes P
17. R to K sq (ch)	K to B sq
18. Q to Q Kt 3rd	R to K Kt sq (ch)
19. K to K R sq	Kt to Q B 5th
20. P takes Q B P	P to Q 5th
21. Kt to K 4th	Q to Q 4th
22. B to K R 6th (ch)	B to K Kt 2nd
23. B to K B 4th	B to K B 3rd
24. K to R 2nd	B to K 4th
25. B to K Kt 3rd	B takes B (ch)
26. Kt takes B	Q to K Kt 4th
27. P to Q B 6th	

(Here, also, Black appears to lose time. He should have played B to K B sq, or R to K Kt sq, instead of the useless move in the text.)

BLACK (Mr. B.)	WHITE (Mr. C. K.)
27.	P takes P
28. R to K Kt sq	Kt to Q 7th
29. Q to Q R 3rd (ch)	P to Q B 4th
30. Kt to K 4th	

(By playing Q R to Q sq he might still have given White a good deal of trouble; but the move made threw away the game at once.)

BLACK (Mr. B.)	WHITE (Mr. C. K.)
30.	Q to K B 5th (ch)
31. R to K Kt 3rd	Kt takes Kt

And White wins.

CHESS IN GERMANY.

An elegant little Game, played at Breslau between M. ANDERSSEN, the famous German player, and Mr. S. HAMEL, a skilful Amateur of the Nottingham Chess Club.

(*Evans' Gambit.*)

WHITE (Mr. A.)	BLACK (Mr. H.)
1. P to K 4th	P to K 4th
2. Kt to K B 3rd	Kt to Q B 3rd
3. B to Q B 4th	B to Q B 4th
4. P to Q Kt 4th	B takes Kt P
5. P to Q B 3rd	B to Q B 4th
6. Castles	B to Q Kt 3rd

(It is immaterial whether this Bishop retreats now or after the advance of the enemy's Q Pawn.)

WHITE (Mr. A.)	BLACK (Mr. H.)
7. P to Q 4th	P takes P
8. P takes P	P to Q 3rd
9. P to Q 5th	Q Kt to K 2nd
10. P to K 5th	B to K Kt 5th
11. Q to Q R 4th (ch)	Q to Q 2nd

(His best plan was to interpose the Q Bishop, though that move would have deprived us of some pretty play on the part of Mr. Anderssen.)

WHITE (Mr. A.)	BLACK (Mr. H.)
12. B to Q Kt 5th	P to Q B 3rd
13. P to K 6th	

(Clever and decisive.)

WHITE (Mr. A.)	BLACK (Mr. H.)
13.	B takes K P

(He might have prolonged the game by taking with his K B Pawn.)

WHITE (Mr. A.)	BLACK (Mr. H.)
14. P takes B	P takes P
15. B to Q 3rd	Kt to K B 3rd
16. Q Kt to Q 2nd	P to K 4th
17. B to Q R 3rd	Kt to K Kt 3rd
18. Kt to Q B 4th	B to Q B 2nd
19. R to Q Kt sq	P to Q Kt 4th
20. R takes Q Kt P	P takes R
21. Kt takes Q P (ch)	K to Q sq
22. B takes Q Kt P,	

and Black resigns.

A NEW MOVE.

In some lines of much sweetness, by a living American poet, we meet with an amusing solecism in the technical language of the game.

The Game of Chess.

We played at chess, Bianca and myself,
One afternoon, but neither won the game.
Both absent-minded, thinking of our hearts;
Moving the ivory pawns from black to white,
Shifted to little purpose round the board.
Sometimes we quite forgot them in a sigh,
And then remembered it and moved again;
Looking the while along the slopes beyond,
Barred by blue peaks, the fountain and the grove,
Where lovers sat in shadow, back again,
With sideway glances in each other's eyes.
Unknowingly I made a lucky move,
Whereby I *checked my mate*, and gained a queen;
My couch drew nearer hers, I took her hand—
A soft white hand that gave itself away—
Told o'er the simple story of my love,
In simplest phrases, which are always best,
And prayed her if she loved me in return,—
A fabled doubt,—to give her heart to me;
And then and there, above that game of chess,
Not finished yet, in maiden trustfulness—
I'm coming, Sweet!—she gave her heart to me

COLUMN FOR THE CURIOUS.

BEFORE the George and Blue Boar Inn, Holborn, has entirely disappeared, we have a few words to say on "the intercepted letter." While Cromwell was meditating how he could best "come in" with Charles, one of his spies—of the King's bedchamber—informed him that his final doom was decreed; and that what it was might be found out by intercepting a letter sent from the King to the Queen, wherein he declared what he would do. The letter, he said, was sewed up in the skirt of a saddle, and the bearer of it would come with the saddle upon his head that night to the Blue Boar Inn, in Holborn; for there he was to take horse and go to Dover with it. This messenger knew nothing of the letter in the saddle; but some persons at Dover did. Cromwell and Ireton, disguised as troopers, taking with them a trusty fellow, went to the inn in Holborn; and this man watched at the wicket, while the troopers continued drinking beer till about ten o'clock, when the sentinel at the gate gave notice that the man with the saddle was come in. Up they got, and, as the man was leading out his horse saddled, they, with drawn swords, declared they were to search all who went in and out there; but, as he looked like an honest man, they would only search his saddle. Upon this they ungirt the saddle and carried it into the stall where they had been drinking, and left the horseman with the sentinel; then, ripping up one of the skirts of the saddle, they found the letter, and gave back the saddle to the man, who, not knowing what he had done, went away to Dover. They then opened the letter, in which the King told the Queen that he thought he should close with the Scots. Cromwell and Ireton then took horse and went to Windsor; and, finding they were not likely to have any tolerable terms from the King, they immediately from that time forward *resolved his ruin.—Earl of Orrery's State Letters.*

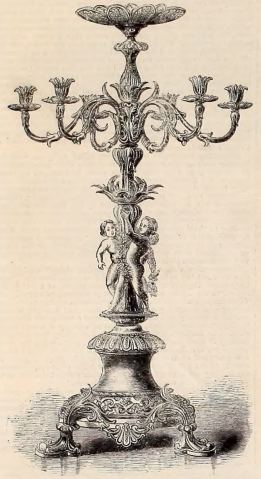
Among the earthquake retrospections called up by the reality of Tuesday week we do not find the absurd rumour which gained credence in the spring of 1842, that London would be destroyed by earthquake on the 17th of March in that year. This report was founded upon certain doggrel prophecies: one pretending to be pronounced in the year 1203, and contained in the Harleian Collection (British Museum), 800 b., folio 319; the other by Dr. Dee, the astrologer (1598, MS., British Museum). The rhymes, with their "authorities," inserted in the newspapers, actually excited some alarm, and a great number of timid persons left the metropolis before the 17th. Upon reference at the British Museum no such "prophecies" were to be found, and their forger subsequently confessed them to have been an experiment upon public credulity—which must be considered a very reprehensible piece of mischief.

In connection with a claim for "ancient rights" tried in the Sheriffs' Court last week, it may be useful to quote, from the London Corporation Inquiry, in 1834, the ancient custom of the City with respect to the taking away of a light (a window), as stated by Mr. Woodthorpe, the Town Clerk:—"If a man had a window in his house looking into an open space in which there had been any building within his memory, and that another erected a wall which obstructed the light from that window, the person so erecting it would be justified if he could show that a building had, at any time within the memory of man, stood there. All that the party erecting had to do was to get the Recorder to appear in the Court of King's Bench, and (on proof of the fact of the previous building) to plead the custom of the city of London, and the right of the party erecting the building would be admitted; or, in other words, the action of the party opposing the obstruction would be barred."

The British Archæological Association commenced their Congress at Leeds, on Monday last, with a programme of "an extraordinary amount of objects of archæological research and of the greatest interest." We shall notice a few of the most curious objects next week. The Congress will terminate on Monday.

We return to the subject of the "Crannoges" of the Irish lakes, noticed in our Journal of Oct. 3, for the sake of reference to a very interesting paper "On Lake-dwellings of the Early Periods," by Mr. William M. Wylie, M.A., in the *Archæologia*, vol. xxxviii.:—

> The earliest account we have of any people betaking themselves permanently to dwellings on sites of artificial construction among waters is that given by Herodotus of a Thracian tribe who thus dwelt in Prasias, a small mountain lake of Pœonia, now part of modern Roumelia. Their habitations, we learn, were constructed on platforms raised above the lake on piles, and connected with the shore by a narrow causeway of similar formation. These platforms must have been of considerable extent, for the Pœonians lived there in a state of polygamy, with their families and horses, their chief food being the fish which the lake produced in great abundance.



Mr. Wylie then refers to the discoveries of very ancient remains in the lakes of Switzerland, sometime previously reported to the Society of Antiquaries, and first discovered in the dry winter of 1853-4, on the Lake of Zurich. Here were found remains of piles driven deeply into the bed of the lake, formed of the stems of oak, beech, birch, and fir trees. Among these piles lay relics, with one exception, of the Stone Period. They consisted of hammers, corn-crushers, &c.; axes and celts of various kinds of stone, peculiar, in some instances, to the East, many fitted into hafts of staghorn. Implements of flint were numerous, although flint is rarely found in that country. Mixed with slabs (hearthstones) were implements in bone, the teeth of bears, boars' tusks, and skeletons of deer and wild boar; one amber bead; and an armlet of thin brass wire, the sole instance of any metal whatever. There also occurred fragments of coarse pottery and masses of charred wood. It was evident that not only this settlement, but the great majority of those subsequently found, perished by fire. Not a trace of a saw was perceptible in the woodwork; the piles had all been pointed with stone axes, or by fire, and split by means of wedges. "In fact," says Mr. Wylie, "these remains belong to a very early period, though others since discovered claim a yet more remote antiquity. Probably they belonged to a race preceding the Kelts, whose very name is lost to us." A minute account of the Swiss lake-dwellings has been published by M. Troyon, of Lausanne. Mr. Wylie then turns to the analogous remains of our own land, the Irish *crannoges*, long well known, though not examined till 1839; since which period, in the drainage and inland navigation works of Ireland, "no less than forty-six *crannoges* have been discovered in the lakes of Leitrim, Roscommon, Cavan, Down, Monaghan, Limerick, Meath, King's County, and Tyrone;" to which may be added the *crannoge* described by our Correspondent.

Returning to the Swiss discoveries, we find that the Society of Antiquaries of Zurich hoped from the first to verify their discoveries with the descriptions of Herodotus, which Mr Rawlinson, in his edition of "The Father of History," has seized upon. Having quoted from him the peculiar mode of life of the inhabitants of Prasias, Mr. Rawlinson notes:—

> Recent discoveries in the lakes of Central Europe, particularly those of Switzerland, have confirmed in the most remarkable way this whole description of Herodotus. It appears that at an ancient date, probably anterior to that of the immigration of the Celts, there lived on most of these lakes a race or races who formed for themselves habitations almost exactly like those which Herodotus here describes. At a short distance from the shore, rows of wooden piles were driven into the muddy bottom, generally disposed in lines parallel to the bank, but not at regular intervals, upon which there can be no doubt that platforms were placed and habitations raised. Within the area occupied by the piles, and over the space immediately adjoining, are found at the bottom, often occupying a depth of several feet, objects of human industry, consisting of rude pottery and various implements in stone, bone, and bronze. Everything marks the high antiquity of these remains. The pottery is coarse in character, and shaped by the hand; it has scarcely a trace of ornament. The implements in stone and bone indicate a nation in the most primitive condition. The complete, or almost complete, absence of iron is most significant. Also, it must be observed that there is in most places a deposit of mud, the growth of centuries, covering the remains, in the whole of which there are no implements. Bones of animals, which had apparently been killed for food, appear throughout the whole stratum of mud in which the implements were found.
>
> Antiquaries seem fully agreed that these are among the most primitive remains in Europe, belonging either to the early Celtic, or, perhaps, more probably to a pre-Celtic, period. It is a reasonable conjecture that they come down to us from that Finnish (Turanian) race, which (as has been observed, vol. i., p. 645, note) seems to have peopled the whole of Europe in primeval times. We may suspect that this people occupied the lakes for security at the time when the Celts began to press upon them; but that they failed to maintain themselves and gradually yielded and were absorbed in the immigrants. In some places it is evident from the deposits that the platforms were finally destroyed by fire (Lettre de M. Troyon, p. 7), abundance of charred wood being found above all the rest of the remains. A similar mode of life to that here described by Herodotus, and apparently practised by the early inhabitants of Switzerland, is found among the Papous of New Guinea (see the *Histoire* of Dumont d'Urville, tom. iv., p. 607).

TESTIMONIAL TO THE LATE SECRETARY TO THE BOARD OF INLAND REVENUE.

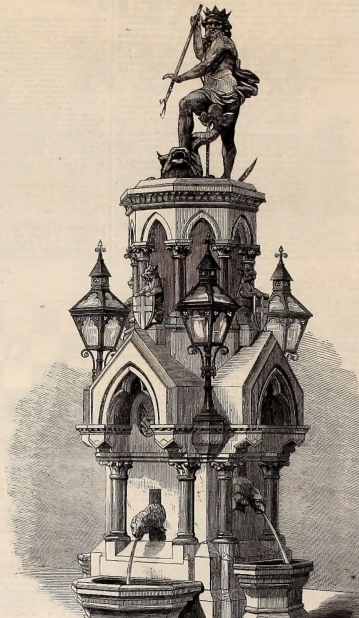
MR. DOBSON has recently retired from the secretaryship of the excise branch of the Inland Revenue Department, which office he had filled for more than forty years with signal advantage to the State. The Commissioners of Inland Revenue, announcing to the Lords of the Treasury the fact of Mr. Dobson's contemplated retirement from public service, state that they would but inadequately acknowledge the services of one of the most valuable public servants that has ever been employed in the Revenue of Excise if they confined their observations

TESTIMONIAL TO THOMAS DOBSON, ESQ., LATE SECRETARY TO THE BOARD OF INLAND REVENUE.

to the ordinary form of certificate. The commissioners then proceed to enumerate some of the most important services which Mr. Dobson has rendered; amongst which are the discovery, in conjunction with Mr. Phillips, of the method of testing the original gravities of beer, and the substitution of duty-free malt in distilleries in the room of the partial and dangerous system of malt drawback—a measure which has proved equally beneficial to the trade and the revenue—and state that for the last ten or twelve years all the material improvements (and they have been many and important) in the regulations for levying the duty on spirits have been chiefly due to his advocacy or invention. The commissioners conclude by stating that for the existing harmony between themselves and the representatives of the principal trades, subject to the excise laws they are very largely indebted to Mr. Dobson, and they feel that they cannot too strongly recommend to the consideration of the board one who, during his long career, has laboured so constantly and so efficiently in the service of the public. We learn by a Treasury minute that their Lordships, having reference to Mr. Dobson's special services as brought under their notice by the Commissioners of Inland Revenue, and within their Lordships' own cognizance, have awarded him a special retiring pension of £1010 a year, and intend submitting his case to Parliament for the grant of a special retiring allowance.

Nor was the appreciation of Mr. Dobson's services confined to the heads of the departments. An address and a testimonial have recently been presented to him by 2489 officers of all grades in the Excise Surveying Department, as a mark of respect and in recognition of the services he has rendered to their body. The subscriptions to this testimonial were accompanied with cordial expressions of the respect and esteem felt for Mr. Dobson.

The testimonial consists of a candelabrum, or épergne, in Renaissance style, with a group of three boy figures surrounding the shaft and supporting branches for seven lights; a large engraved salver; and a tea and coffee service of the same style, consisting of tea-kettle, lamp, and stand, coffee and tea pots, sugar-basin, cream-ewer, and bread-basket. These articles are of massive silver, of exquisite design and workmanship, and were manufactured, at a cost of £610, by Garrard and Co.



MEMORIAL CHURCH AT COLD HANWORTH.

THURSDAY, Sept. 3, was a great day at Cold Hanworth, near Lincoln, in consequence of the opening of the newly-erected church at that place. The new church is dedicated to All Saints, and has been built at the expense of Commodore F. Cracroft, C.B., and his wife, to the memory of the late Colonel Cracroft. We copy from the *Lincoln Standard* some details of the edifice:—It consists of nave, chancel, vestry, tower, and spire. The style is Decorated, and is carried very freely. The whole of the walling is rough-faced, from the Hackthorn quarry. The exterior and interior dressings are of Ancaster stone, except the reredos and font, which are partly of Caen stone, red Mansfield, and green polished marble shafts. The inside of the church is partly of red brick and partly plastered. The whole of the roofs are Memel timber, stained and varnished, the covering being of Broseley brindled tiles, with a crested ridge. The height of tower and spire is about 60 ft., and the top of the spire terminates with a beautiful weathervane. The whole of the benches (which are open) are of deal, stained and varnished. The pulpit, reading-desk, communion rail, and font top are of oak. The terminations, capitals, springers, &c., are richly carved, both interiorly and exteriorly. The windows are glazed in cathedral glass, the tracery of which is in geometrical patterns. The naves and porch floors are paved with Minton's plain red, buff, and black six-inch tiles. The chancel, sanctuary, and baptistry (which is formed under the tower) are paved with very rich encaustic tiles. The church is seated to accommodate about eighty, enough for the whole parish. The churchyard, on the west, south, and north, is inclosed with a low wall of the same materials as the church, with Ancaster stone coping, and Ancaster stone piers at intervals, forming it into bays. The architect is J. Croft, Esq., Islington, and the builder is Mr. W. Huddleston, Lincoln; the cost will be upwards of £2000. It has been built in the short space of six months.

NEW DRINKING-FOUNTAIN AT DURHAM.

MONDAY, the 21st ult., witnessed the opening of the new drinking-fountain which has replaced the unsightly yet venerable structure, called the punt, which for many years had been a prominent object in Durham Market-place.

The fountain, which has been erected out of the public rates, is a graceful and beautiful ornament to the city. The architect (Mr. E. R. Robson) has won general approval and admiration. Annexed are a few particulars of the fountain, taken from the *Durham County Advertiser*:—It is at once a drinking-fountain, a public reservoir, and a well for cattle; and these three distinct functions are severally referred to in three sculptured discs on its walls. The first represents Hagar athirst in the wilderness; another depicts the well-known subject, Moses striking the rock; while the third, which is placed immediately over the cattle-trough, shows the meeting of Jacob at the well, and quotes, on its rim, the passage, "Drink, and I will give thy camels drink also." The fountain is a quadrangular block of masonry, from each side of which projects a sculptured animal, or gurgoyle, spouting water into a semi-octagonal basin beneath; while above, a steep, projecting pediment, surmounted by an animal holding a shield bearing the arms of the city, is, on each face, carried by shafts of polished Aberdeen granite and boldly-sculptured corbels. This forms the fountain proper, and, while three of the ducts are provided with drinking-cups, and their basins with iron bars for patrons, the fourth has simply a larger basin placed at a lower level, and so arranged as to stand always full of water for the use of cattle. Into all the four basins the water constantly flows, but an increased volume can at any moment be obtained from the cistern inside by pressing a button. After escaping from the basins the water runs into a shallow trench, which surrounds the fountain and is sloped to a drain; before reaching which, however, it passes through and continually replenishes two dog-troughs. In its upper portion the structure has four lamps (made by Mr. Skidmore), placed at the base of the pediment, and immediately afterwards it develops into an octagonal podium, or pedestal, ornamented with moulded arches and shafts of polished Peterhead granite, and terminating in a sculptured cornice. Upon this pedestal has been placed, neatly painted and gilded, the old lead figure of Neptune, which for so many years occupied a corresponding position on the old punt, or pant, now replaced by the fountain. The height of the fountain is 14 ft., irrespective of the full-size figure which surmounts it. The masonry was executed by Messrs. Henry Thornton and Son, of Durham, and the sculpture by Mr. Beall, of Newcastle. The stone used is from the Prudham Quarries.

NEW DRINKING-FOUNTAIN IN THE MARKET-PLACE, DURHAM.

MEMORIAL CHURCH AT HANWORTH, LINCOLNSHIRE.

LONDON: Printed and Published at the Office, 198, Strand, in the Parish of St. Clement Danes, in the County of Middlesex, by GEORGE C. LEIGHTON, 198, Strand, aforesaid.—SATURDAY, OCTOBER 17, 1863.

THE ILLUSTRATED LONDON NEWS.

No. 1228.—VOL. XLIII. SATURDAY, OCTOBER 24, 1863. WITH A SUPPLEMENT, FIVEPENCE

LORD LYNDHURST.

It has been the felicitous lot of but few of our statesmen to have so far outlived the storms of political life as to occupy, for a considerable interval before making their final exit from this earthly stage of being, that loftiest summit within reach of an Englishman's ambition, from which, lifted above both the claims and the limitations of party ties, he is at once the object of veneration and the dispenser of counsel to the whole country. Such, for many years, was the position of the Duke of Wellington; such, for a few months only, was that of Sir Robert Peel; and such, through the last decade, was the distinguished place assigned by his admiring countrymen to Lord Lyndhurst. Once the ablest and the most daring of the party leaders of his day, he had long ceased to be remembered as such. The luminary across whose disc, sometimes brilliant

THE NEW IRON-CLAD FLEET: LAUNCH OF HER MAJESTY'S FRIGATE VALIANT, 34 GUNS, AT MILLWALL.—SEE NEXT PAGE.

sometimes obscured, the storm-clouds of political passion drove at midday, shone with a mild and uninterrupted lustre through at midday, shone with a mild and uninterrupted lustre through a long evening, and sank at last beneath the horizon, followed by the respect and regret of all classes, quite irrespectively of their political opinions. The character and fame of Lord Lyndhurst belong, not to a section, but to the entire people of the United Kingdom; and the interest attaching to his name is of sufficient breadth to admit of being shared by all who are able to appreciate intellectual vigour.

It is not our intention in the following observations to sketch the career of this remarkable man. Its most salient features will be familiar to most of our readers. His birth at Boston, United States, when America had not as yet ceased to be a colony of Great Britain—the removal of his Royalist father to this country when his son John was but a child—his early education under the parental roof—the academical distinctions he won for himself at Cambridge—his subsequent visit to the land of his birth, during which he became acquainted with George Washington, the patriotic founder and subsequently idol of American independence—his course of legal study at Lincoln's Inn—his forensic labours and moderate success on the Midland Circuit—his introduction to the House of Commons, at the mature age of forty-five, through the now-extinct borough of Yarmouth, Isle of Wight—his serviceable but not very dazzling efforts as Solicitor-General to Lord Liverpool's Administration—his memorable speech against the Catholic claims, followed so speedily by his elevation to the woolsack by Canning, who so trenchantly replied to it—the part he took in opposing the Reform Bill, and the subtlety, the oratorical force and skill, and the unshrinking boldness he displayed as a party leader—his judicial ability as Chief Baron of the Exchequer, marvellously displayed in his judgment in the case of "Small *v.* Attwood"—his differences with Sir Robert Peel, under whom, however, he was subsequently prevailed upon to take office—his celebrated "Sedan" amendment, and finally his occasional speeches in his advanced old age, in which he assumed the part of counsel for the nation and commanded the reverent attention of Europe—will furnish ample materials for a most interesting and instructive memoir, and associate his biography with the political history of his country for well-nigh half a century. Upon none of these passages of his life do we purpose to offer the slightest comment. It is rather to the attributes of the man than to the circumstances of his career that we venture to point attention—for it is as an exemplification of intellectual power, rather than as a great and practically successful statesman, that Lord Lyndhurst will be remembered.

The backbone of his intellectual structure was that instinctive sagacity by which, above any public man that can be compared with him, he seized upon the vital principle which belonged to any mere assemblage of facts, detected their relationship one to another, arranged them in their due order of sequence and mutual dependence, and made them tell their own consistent story. Give him but time to survey the whole of the details with which in any case, legal or political, he had to deal, and his eye detected at once the shape which they would assume when put together in their natural and logical connection. In the classification and arrangement of his ideas he was peculiar. He not only set them in their most precise purpose he had in hand, but he was able to discern as if by instinct the true relationship to it of every item of information of which he was possessed, and could instantly assign to it its proper place and function. The bent of his intellect was constructive. He was not inquiring, but he did not invent. But he saw just how and where one thing fitted in with another, and he put them together, and built them up into a harmonious and intelligible whole. Hence his skill in unravelling the most entangled mass of apparently contradictory evidence, and hence also his unrivalled mastery in the art of stating a case. The glance of his intellect was like that of a consummate General; and he not only caught at a first view the strategic points of the ground upon which he was to operate, and the opportunities it offered him, but he could handle the various forces with the most consummate ease, and at the right moment, place every arm and every battalion just where its distinctive service would be most available. He had no confused notions, vast as was their store. He recognised in them, when he first came across them, something which associated them with his predominating faculty—the same power of classification which moved him to select the place which it should occupy in his memory enabled him to lay his hand upon it whenever it was wanting.

To this intellectual characteristic Lord Lyndhurst added all the advantage which can be derived from a complete mastery of language. Probably, the latter acquisition was immensely assisted by the natural structure of his mind. His diction was as simple as the order of his ideas was lucid. There was a colouring transparency in his style, which let the thoughts shine without tinging them. In the structure of his sentences he also seemed to be to transmit light rather than music; yet so perfectly did his words adjust themselves to his meaning that music was the result. He seems to have regarded figure as superfluous ornament, he wanted the fancy and the sentiment which alone could furnish it; at any rate, his greatest efforts were singularly destitute of ornamentation. But the sword of his logic had the keenest edge, and the bite of his sarcasm left a rankling wound. He was not, however, as a combatant that his supreme power made itself manifest. It was when speaking from the bench of judgment, and laying down the law in its application to a complicated case, that his style of oratory most commended itself. His cold, passionless, inflexible manner detracted nothing from the force of his matter in his judicial deliverances. His object in these cases was not to engage the sympathies, nor persuade the will, nor stir the indignation; but, light in hand, to thread his way through intricate perplexities, and lead the mind, with or without its own assent, up to his conclusions. His sole business then was with the intellect, and to the intellect he exclusively addressed himself. Had he pursued a legal career without mixing himself up with the turmoil of politics, he would probably have left his own image and superscription deeply impressed upon the jurisprudence of his country.

Lord Lyndhurst, although at no stage of his lengthened career an audacious party politician, was unusually free from personal bitterness of feeling. He had a keen zest for the pleasures of social life, which probably obtained the homage of his sympathies to a far greater extent than his political convictions. He was angrily denounced as a trader in his principles, of which there is no incontestable proof. But it may be inferred from the general tenour of his life that his politics never struck their roots deeply into the soil of his will. They do not seem to have been the counterpoints of his conscience. So into they were more in the nature of means than ends, and, although unquestionably he had his preferences and his prejudices, they did but slightly sway his heart. Certainly they did not alter, nor interfere with, his personal friendships. He lived on terms of intimacy with his most formidable antagonist—Lord Brougham. He seldom hesitated to serve with those who had been his most eager assailants. He forgave political affronts without any visible severity of intestine struggle. He refused none of the courtesies of his high position on account of either pain or pleasure to his susceptibilities. In this character he was a true British nobleman, never carrying with him into the banquet-hall the feelings which belonged only to the tilting yard or the tournament.

Although the name of Baron Lyndhurst will be conspicuous in the history of England, our children's children will probably be at some loss to discover the secret of that high reputation in which he was held by his contemporaries. He has left behind him no monument of his power which will be more than commemorative. The fame of his forensic relics only will descend to posterity to justify the judgment of their predecessors as to the intellectual pre-eminence of Lord Lyndhurst. Whether he was ambitious of posthumous renown we have no means of knowing; but, from some cause or other, he has left it to others to accomplish what he did not lay himself out to ensure it. His vast powers have enshrined themselves in no imperishable work, and his greatest political efforts will present themselves to the judgment of mankind as those of an unsuccessful partisan. Fortunately for himself, he then crossed the Rubicon which divides the lighter from the enduring qualities of his nature stood clearly out from the stormy elements which tended to obscure them. Old age, pitiless to some men, befriended him. The passions which he raised, and with which he sported, died away. The policy which his genius originated, or grappled with, and for a moment staggered, prevailed. He discreetly bowed to what he could not ultimately resist. Long before his departure from among us he received from his fellow-countrymen, without distinction of party, the highest homage which they pay to their great men. They were proud of him as one who had done much to illustrate the leading traits of their national spirit and the genius of their political constitution. They had left off criticising, and were contented to admire. The use which he made of his splendid abilities gave him a claim to their impartiality of history. We, who have just witnessed the close of his long life, find it more in unison with our feelings to breathe out the prayer, "Peace to his memory!"

LAUNCH OF THE VALIANT.

THIS important addition to our mercantile fleet was launched on Wednesday week from the Admiralty yard, Millwall. A very numerous company, including several distinguished guests, had assembled on board the vessel, among whom were Baron Brunnow, Ambassador and Captain Kolokoltsoff, of the Russian navy; Captain Blanco, of the Spanish navy; Mr. Peter Bolt, Admiralty surveyor; Mr. Watts, managing director, of the Thames Ironworks and Shipbuilding Company; Mr. Rundell, Chief Constructor of her Majesty's Navy; Mr. Samuda, Mr. Wigram, Mr. Green, and many shipbuilders and engineers.

The ceremony of naming her was performed by Mrs. Thomas Bolt, daughter-in-law of the chairman of the Thames Ironbuilding Company, by whom the vessel has been completed; and at half past ten the noble ship, which is 280 ft. in length between the perpendicular, and beneath her keel, glided with majestic ease into the stream. A more brilliant and successful launch has never in our experience been witnessed.

The Valiant is one of quite a new class of iron frigates—a contesting link in the chain between the Warrior and the vessels of the Defence and Resistance class. Her length over all is 290 ft., her extreme breadth 58 ft., and her tonnage 6,700 tons (bm). The full armament of 34 guns will be distributed as follows:—On the main deck twenty-four 68-pounders, 95 cwt. smooth-bore guns, and six 110-pounder Armstrong guns; and on the upper deck four 40-pounder Armstrong guns, which will be furnished from the Royal Arsenal.

Her bow is of a peculiar kind, and the sides of the vessels will be defence and Resistance class. Her length over all is 280 ft., her extreme breadth 58 ft., and her tonnage 6,700 tons (bm). The full armament of 34 guns will be distributed as follows:—On the main deck twenty-four 68-pounders, 95 cwt. smooth-bore guns, and six 110-pounder Armstrong guns; and on the upper deck four 40-pounder Armstrong guns, which will be furnished from the Royal Arsenal.

Her bow is of a peculiar kind, and the sides of the vessels will be are still sufficiently projecting beneath the water-line to enable her, if she got a chance next year, in enemy, to inflict fearful mischief, without in the least risking the safety of her own hull. She is a sister ship to the Hector, which was launched from the Thames yard a few weeks last year. In construction she is on the principle in the same as that of all the iron frigates—that is to say, the hull, within her outer plating, is built up of a strong web of wrought-iron ribs and longitudinal girders. Like the new frigates, however, she is to be plated from end to end, amidships, the stem being absent as fine as her bows, and with an additional plating of iron over her outer stempost and rudder-head. About eight feet above the load-line she is fitted with a semicircular shield, which extends from one side of the vessel to the other, and rises from the upper deck to the level of the bulwarks on the gundeck. This is coated with 4½ in. armour plates, and lined with teak 24 in. thick behind the iron. On this shield it is proposed to put on the principle in the same as that of all the iron frigates—that is to say, the hull, within her outer plating, is built up of a strong web of wrought-iron ribs and longitudinal girders. Like the new frigates, however, she is to be plated from end to end, amidships, the stem being absent as fine as her bows, and with an additional plating of iron over her outer stempost and rudder-head. About eight feet above the load-line she is fitted with a semicircular shield, which extends from one side of the vessel to the other, and rises from the upper deck to the level of the bulwarks on the gundeck. This is coated with 4½ in. armour plates, and lined with teak 24 in. thick behind the iron. On this shield it is proposed to put on the upper deck it is pierced for two of the heaviest guns, for use in chasing an enemy, or when bearing down on one to strike her as a ram. Abaft the shield the upper deck is planked with teak, as are the others, manufactured at Messrs. Brown's works, Sheffield, are ready for fastening.

The Valiant will be fitted with horizontal engines, of 800-horse power, by Messrs. Maudslay, Sons, and Field. The two-bladed screw propeller is 20 ft. in diameter, and is constructed with a variable pitch. When in full power, it is anticipated that the engines will work about sixty revolutions in the minute. There are six boilers, three on each side, the steaking-room being between them; and the ship is also fitted with a pair of auxiliary engines, of the aggregate power of forty horses. These engines are applied to several purposes. They will be available in case of fire, as they will work two double acting force-pumps, there being a system of pipes throughout the ship to meet any such emergency; they will drive two fans for ventilating the cabin; and they will also work a blast-fan for a cupola furnace placed at the foot of the main-hatch.

The Valiant will be completely fitted early next season. She is a fine addition to the Royal Navy and an honour to the company by whom she has been built, who are now far advanced with their important work the Minotaur, which floating fortress, rumour says, is to be launched by the Prince of Wales.

FOREIGN AND COLONIAL NEWS.

FRANCE.

The Emperor held a review of the Imperial Guard in the Bois de Boulogne on Wednesday. Great crowds were present, and the Emperor and the King of the Greeks, who accompanied him, were received with continued acclamations.

M. Billault was buried on Saturday. The funeral service took place in the Church of St. Germain d'Auxerre. The ceremony was very splendid, and large crowds assembled to witness the pageant. The interment took place at the cemetery of Mont Parnasse, where M. Billault's wife, who died two years ago, lies buried. M. Berache made a speech over the grave. The Emperor has written to the Empress and the deceased Ministers, expressing his sympathy in the calamity which has fallen on them and his deep regret for the loss of their father.

The vacancies created by the death of M. Billault are filled up. M. Rouher, President of the Council of State, becomes Minister of State in the room of M. Billault, and M. Baudrit takes the place of M. Rouher.

M. Delangle has been appointed First Vice-President of the Senate.

A decree has been issued fixing three as the number of the Vice-Presidents of the Council of State. The Vice-Presidents will exercise, in regard to the Senate and Corps Législatif, the powers determined by Article 31 of the Constitution. MM. Forcade-Laroquette and Chasseloup-Laubat have been appointed Vice-Presidents, and M. Vuitry, Governor of the Bank, Vice-President.

M. Jerome has been appointed to the rank of Senator.

A dinner was given on Tuesday evening by M. Drouyn de Lhuys in honour of the King of the Greeks. Lord Cowley and Baron Budberg were present.

The funeral service of Marshal Count O'Donnel was celebrated on the Champ de Mars, in the presence of the King of the Greeks, and a vast crowd witnessed the ascent. The Champ de Mars was kept by the military. Nine ladies and gentlemen ascended in the balloon, but it first made a short reconnaissance with two persons. The balloon floated away eastward, then northward, then crossed the Meuse, and finally made its way down into the Germans' Fatherland. Near Eystrup, in Hanover, it came to earth, on Monday afternoon. The balloon was dragged for several miles the anchors having broken. Of the nine persons in the car three were seriously and two slightly injured. The aeronaut himself fractured both his legs dislocated. Meme. Nadar, however, suffered injuries in the thorax, and has had one of her legs severely contused. The sufferers were taken up by the city of Hanover and placed under the care of the French Legation.

THE EMPRESS OF THE FRENCH IN SPAIN.

The Empress Eugenie is still in Spain. She has been every where received with an enthusiasm which paid little heed to her supposed desire for privacy.

Her Majesty was at Seville on the 9th, and visited the cathedral, the Alcazar, the ruins of Italica, and several quarters of the town, both Moorish and Andalusian. She called all other visits, and wore the Spanish costume of that part of the country, the long black silk mantilla, the high tortoise-shell comb worn on the back of the hair, embroidered corsage, wide skirt, and fan. On the 10th the Empress proceeded by rail in the morning to the country seat of the Marquis de Villafranca in the province of Huleva, where there was a hunting party. Her Majesty departed on the 11th for Cadiz, whence, after a short detention, she embarked for Madrid or Valencia. On Saturday last she reached Valencia, and left on Sunday for Madrid.

The Empress arrived at the Royal Palace, Madrid, at eight o'clock on Sunday evening. The King and the Marquis de Miraflores met her at the railway terminus. A great crowd assembled round the terminus and in the streets through which her Majesty passed and gave her a cordial reception. The Queen received her Majesty very affectionately. The Empress has held a reception in Madrid, and the Queen has given a dinner party in honour of her Imperial guest. A grand soirée took place on Wednesday evening.

THE FRENCH IN MEXICO.

The Paris papers of Wednesday publish a telegram from St. Nazaire with intelligence from Vera Cruz to Sept. 18, stating that, according to news received from the interior of Mexico, a successful engagement had taken place to the annoyance of Mexico to France.

Advices received from Vera Cruz to the 16th of September state that the Archduchess Charlotte was in good health, and had a magnificent reception.

The national fete of the 16th was of a brilliant character.

The blockade of all hostile Mexican ports has been effective since the 8th of the month.

PORTUGAL.

The baptism of the Royal infant, Don Carlos, took place on Monday in the Church of Belem. Dom Pedro, the grandfather, King Ferdinand and Princess Clotilde officiated as sponsors. The Portuguese and Italian squadrons were illuminated.

PRUSSIA

The preliminary elections came off on Tuesday, and, as far as known, have resulted in favour of the Liberals. In Berlin the old Liberal majority has been maintained.

The refusal to pay taxes is becoming more common. M. de Bennath, a wealthy merchant of Westphalia, has lately allowed his goods to be seized by the taxgatherer, and they are to be sold by auction. It is also said that M. Waldkhausen, member of the Chamber of Deputies, and other leaders of the Liberal party, have refused to pay their taxes.

DENMARK.

The King arrived at Copenhagen on Thursday week, unexpectedly, from Schleswig. The *Berlingskel* states that the importance of the political question is the cause of his Majesty's arrival. Important notes are said to have been received from England and France. The Ministers were prepared to hold a Privy Council immediately upon the King's arrival.

The King has given a magnificent fete at his Castle of Lykaborg, in Schleswig, to celebrate his fifty-fifth birthday. Prince Oscar of Sweden, brother of King Charles XV., who was present, drank to the health of his Majesty, declaring that the alliance already existing between Sweden and Denmark for their common defence would prevent the two countries invincible, and secured the safety of all the Scandinavian States.

As regards the treaty between the two Northern Powers, the Swedish papers are almost unanimous in stating that the stipulations of an alliance with Denmark are agreed upon, but that the ratification will not take place until German troops are dispatched to Holstein.

The Government has ordered that a larger body of troops shall be massed upon the southern frontier of Schleswig.

THE INSURRECTION IN POLAND.

If possible, the condition of Warsaw grows worse and worse. On

Sunday morning the Hôtel de Ville was discovered to be on fire in three places simultaneously. No doubt is entertained of this fire being the work of incendiaries. All the treasure-chests, securities, account-books, and valuable objects have been saved. Letters from the unfortunate city state that the Government had ordered civilians to give up all arms; that all officials of Polish descent in the city are to be dismissed and replaced by Russians; and that the Russian language is to be employed in future in the acts of administration in Poland.

The National Government has issued a circular justifying the political executions which have taken place since the latter, and which it declares to have been very few, and imperatively necessary to prevent espionage.

The Russian officials in Italy have published a circular requesting all Poles residing in Italy to return to their country as soon as the term for which their passports are granted expires, under penalty of their property being confiscated.

Several telegrams from different places promulgate or allude to the extraordinary statement that an alliance is contemplated between the Poles and the Turks.

AMERICA.

We have news from New York, by way of Cape Race, to the evening of the 11th. By the information received, which is not very definite, dealing largely in rumours, we learn that the relative positions of the belligerents are practically unchanged.

The progress in the siege of Charleston is far from encouraging to the assailants. General Gilmore had been obliged to remove his headquarters from Morris Island to Folly Island, in consequence of the delight of the tides and "other causes," and had to begin de novo the destruction of Fort Sumter, which the Confederates had restored to a state of defence. The Confederates had made an attack on the Federal fleet, in which the Ironsides was much damaged, and the other vessels greatly alarmed for their safety. A combined land and naval attack upon the place was to take place on the 11th.

The Confederate army in Virginia was making movements which seemed to indicate a recommencement of offensive operations. Near Robertson's Tavern they attacked Stuart's cavalry, and were repulsed.

Rosecrans is "in safety" at Chattanooga, and Bragg is still concentrating his forces in preparation for the final attack. Burnside remains at Knoxville. Longstreet has taken possession of the passes between Knoxville and Kingston, Tennessee, in the view of intercepting the reinforcements which General Rosecrans expects from Burnside, who is whilst Bragg is between them, living off supplies from the north-east. A telegram to the *Richmond Inquirer* from General Bragg's army announces that the Confederate Commissary-General has shelled the position of General Rosecrans for several hours on the 6th inst. Federal accounts via Nashville, on the 7th and 8th, say that a skirmishing war of constant occurrence, and that another general engagement was considered imminent. Reports had been received in Nashville that Bragg's force, with all the Federal troops there, had been captured by the Confederates. This rumour, however, has not been corroborated. On the contrary, we are told that the Confederate cavalry had been driven back from Murfreesville and routed, with a loss of 100 killed. General Bragg is said to have been largely reinforced from Richmond and elsewhere, and that his forces now number at least 175,000 men. It is also represented that 45,000 troops under the command of General Burnside, are available as reserves. General Rosecrans has also received reinforcements.

In Kentucky the Confederate General Wheeler had been defeated. There are no other military movements in this State.

From the Mississippi reports have reached Washington of a serious defeat having been sustained by the Indian army, with the loss of fifteen hundred prisoners. Which was the particular army that sustained this crushing defeat, or which the army that achieved the victory, we not mentioned.

General Banks had ordered the conscription in Louisiana, and negroes in the Confederacy were to be detailed for service.

Twelve merchant steamers had been burnt on the Mississippi, it was supposed by Confederate emissaries.

At New Orleans a malignant fever had been produced by the heat.

President Lincoln has issued a proclamation desiring all Americans, whether at home or abroad, to observe the last Thursday in November as a day of public worship. Mr. Lincoln says in the course of it—"That although in the midst of a stupendous civil war, the industrial resources and energies of the country have been preserved, that its population, notwithstanding the waste in the camp and on the battle-field, is steadily increasing, and that no foreign power which foreign Powers have been preserved, even though the severity of its domestic conflict seemed to invite and provoke the aggression of foreign States."

JAPAN.

Admiral Kuper, with the British squadron, has besieged and levelled Kagosima, and burned the three steamers which the Prince of Satsuma had purchased from Europeans.

The following particulars are furnished by the Foreign Office:—"All attempts at negotiation being exhausted, the English fleet, on Saturday, the 15th of August, took up a position opposite and before the city of Prince Satsuma, and prepared for action. Two of the Japanese above batteries opened fire on our ships, which returned it. By dusk the town was in flames in several places, and three forts were silenced. Our loss was eleven killed and thirty-nine wounded. Captains Josling and Wilmot were killed by the second shot. On Sunday, the 16th, the fleet stood out, engaging the whole of the batteries, which, it is reported to be one mass of ruins—magazines, arsenal, &c. Three steamers of the Prince of Satsuma are completely destroyed. The above batteries are reported to have been well served by the Japanese."

Kagosima is in Kiusiu, the most southern of the four Japanese Islands.

METROPOLITAN NEWS.

The Metropolitan Board of Works have decided to accept Mr. Pirrett's tender of £320,000 for the northern embankment of the Thames between Westminster and Vauxhall Bridge.

Lord Lyndhurst's remains were interred at Highgate Cemetery on Saturday last, the funeral, in accordance with an injunction left by the deceased Peer, was of the most simple character.

Another purpose has been obtained for the Crystal Palace Company on the north side of Sydenham, in Lincolnshire, and was conveyed up by train in a wet blanket and enveloped in wet grass. It is no wonder that, after such treatment, the inquisitive red lovebugs are described as "combative between a couch and a sneeze, when an unfortunate patient has, at the outset, exposed the fiery insect to the cold air." Let us hope that the warmth of the year with the stargaze, who seem very jealous of him.

Sir Richard Mayne has refused to allow street stalls to be retained in Westminster. A deputation from the committee appointed by the inhabitants of the district and the ratifiability of the measure waited upon him to rescind his orders to the police on the subject, as the district Board of Works had recently passed a resolution calling upon him to abolish the stalls. He declined declined to comply with the request.

The Metropolitan Board of Works have assented to an application from Mr. J. N. Mays, the secretary of the Improved Industrial Dwellings Company, to have to erect on a piece of land close to the South Western Railway Station, King's-cross, several large blocks of dwellings after the model which has recently built for Lord Shaftesbury in Bloomsbury. The dwellings (the construction of which is about to be immediately commenced) will comprise accommodation for about 100 families.

The Court of Aldermen met on Tuesday, when a vote of condolence with the family of the late Alderman Humphery was passed unanimously. Mr. Alderman Sidney Stevens, M.P., Lord Mayor in 1858, was elected Sheriff, as he introduced to the Court, and cordially welcomed by the members present. The hope was expressed that the City traffic, framed under the City Police Act of last Session, were read, and ordered to be transmitted to the Home Secretary for his approval.

The Home Secretary has required the Bethnal-green authorities to inform him what they are doing to remedy the evils brought to light in the inquests on children who had died in Thorold-square. The vestry reply, in effect, that Bethnal-green is not worse as to its sanitary state than other parishes. Thorold-square is, they admit, very bad, but it is being cleansed, and the unhealthy neighbourhood of Is Island, Cow-lane, Ball's-pond-road, and Sir George Grey that they have a very intelligent medical officer of health, an inspector of nuisances, and a committee of six members to carry the Nuisances Removal Act into execution.

THE COURT.

The Queen continues at Balmoral, in good health.

On Wednesday week her Majesty, accompanied by Princess Louise and Princess Beatrice and attended by Lady Churchill, drove round by Glen Beg. The Crown Prince and Princess of Prussia and Prince and Princess Louis of Hesse drove to the Castle.

On Thursday week her Majesty, accompanied by Prince and Princess Louis of Hesse and Princess Louise, drove to Loch Builg. On the same day Prince and Princess Louis of Hesse, attended by Baroness von Schenck and Captain Westerweller, visited the Crown Prince and Princess of Prussia at Abergeldie.

On Friday week the Queen, accompanied by Princess Helena, walked out; later in the day her Majesty, accompanied by the Crown Prince and Princess of Prussia and Princess Arthur and attended by Lady Churchill, went up Aberarder and returned by Inveraudle. Princess Louise and Prince Arthur, attended by Lady A. Bruce and Major Bigge, visited the Crown Prince and Princess of Prussia at Abergeldie.

On Saturday last Mr. Theed's statue of the Prince Consort, which has been placed in the principal corridor at Balmoral, was uncovered. The Queen, the Crown Prince and Princess of Prussia, Prince and Princess Louis of Hesse, Princess Helena, Princess Louise, Princess Beatrice, Prince Arthur, and Prince Leopold assembled in the corridor at half-past two o'clock. The ladies and gentlemen in attendance her Majesty's household, and the Rev. A. Anderson officiated.

On Sunday her Majesty, accompanied by Princess Helena, walked out. Subsequently her Majesty, accompanied by the Crown Princess of Prussia and Princess Louis of Hesse, drove by Carlelem round the Lion's Face. Princess Helena and Princess Louise, attended by Lady Churchill, rode to Invercauld. The Crown Prince and Princess dined with her Majesty at Balmoral.

The Queen has been pleased to present a handsome watch to the Rev. Mr. Macpherson, of Crathie, in recognition of her Majesty's deep on the day of the accident to the Queen and the Princesses, while driving in the Highlands.

Prince Arthur, attended by Major Elphinstone, left the castle on Monday morning, and visited the Prince of Wales. His Royal Highness proceeded on Tuesday to Blackheath.

THE PRINCE AND PRINCESS OF WALES.

The Prince and Princess of Wales continue at Sandringham Hall.

On Saturday last their Royal Highnesses received the Lord Overkirk with their gentleman in waiting, went out shooting, and met with abundant sport. The Princess, Princess Christian, and Princesses Louise visited the Hall.

On Sunday the Prince and Princess, Prince and Princess Christian, Prince Frederick William of Denmark, and the Lord Chamberlain in waiting, attended Divine service in the church of Sandringham. The Rev. T. Hill officiated in the absence of

On Monday the Prince walked over the estate and inspected the Hall Farm, of which his Royal Highness has recently taken possession. Subsequently the Prince went shooting by Castleton, drove to Wolverton station to meet the Duke of Cambridge, who arrived by the 3.45 train from London, and returned to Sandringham. The Prince accompanied his Royal Highness to Sandringham. The Princess and Princess Christian received the Duke on his arrival to the Hall. Prince Frederick of Denmark, attended by Captain Lord and Mr. Fisher, left Sandringham at half-past ten on this day, and proceeded to Cambridge, where he joined the Prince of Wales and will pursue his studies.

On Tuesday the Prince, the Duke of Cambridge, and Prince Christian of Denmark, with the gentlemen in waiting, went out shooting. The Princess, Princess Christian, and Princess Louise visited the Hall in the afternoon. Later in the day their Royal Highnesses drove to King's Lynn.

On Wednesday the Prince, the Duke of Cambridge, and Prince Christian went out partridge-shooting. The Princess, Princess Christian, and Princess Louise visited the factory of Wolverton Hall.

The Countess of Morton arrived at Sandringham on Tuesday, to attend upon the Princess as Lady in Waiting.

PRINCE ALFRED.

Prince Alfred continues at Malta.

On Wednesday week his Royal Highness, accompanied by Prince William of Hesse, attended by Captain Lord Walter Kerr and Captain Seymour, was present at the meeting of the National Association for the Promotion of Social Science in the Free Church Assembly Hall. Subsequently the Prince and Prince William of Hesse attended the Levée in the day the Prince and Prince William of Hesse attended the concluding general meeting of the National Association for the Free Church Assembly Hall.

On Thursday the Prince entertained at dinner at Holyrood Lord Brougham, the Lord Justice General, the Lord Provost, the Lord Advocate, Major-General Walker, Sir J. M'Neill, and Principal Dr. David Brewster.

On Friday week the Prince and Prince William of Hesse rode in the Queen's Park, and afterwards visited Craigmillar Castle. During their ride Major Cowell's horse stumbled and threw the Major over its head into the road. Fortunately, he received no serious injury. In the evening the Prince and Prince William of Hesse were present at the entertainment of the Christy's Minstrels.

On Tuesday the Prince and Prince William of Hesse, attended by Major Cowell, Captain Zeagler, and Dr. Lyon Playfair, C.B., proceeded to Glasgow. Lord Provost Sheddon received them at the railway station by the Hon. the Lord Provost and several of the municipal authorities. Their Royal Highnesses visited the cathedral, Mrs. Cowan's warehouse, the Exchange, the Royal Infirmary, Dr. Ironworks, and the printing and bleaching works belonging to Walter Crum, M.P., and R. Napier and Sons' engineering establishment at Mr. Crum's residence, The Rookery. The Princes next visited Mr. Napier's establishment at Shandon, and inspected the vessels which are in process of building for the Turkish Government. Their Royal Highnesses next visited the Exchange; from thence they drove to the railway station. Lord Provost Sheddon saw them off. The Princes and their suite took their departure from Glasgow by the 8.20 train. Their Royal Highnesses during their visit to Glasgow were greeted with marked enthusiasm. The Prince and Prince William of Hesse arrived at Edinburgh at 10.30 p.m. on the same day, and the Master of Rexburghe with a visit at Floors Castle. Their Royal Highnesses attended the grand ball given at the castle, and took their departure yesterday (Friday) for Edinburgh.

M. Favre, B.A., LL.D., is appointed French tutor to the Prince and Prince William of Hesse during their stay in Edinburgh.

His Royal Highness the Duke of Cambridge returned to Gloucester-house yesterday (Friday) from visiting the Prince and Princess of Wales at Sandringham.

His Royal Highnesses the Duchess of Cambridge and Princess Mary arrived at the Cottage, Kew, on Tuesday, from Germany.

Their Royal Highnesses the Duke and Duchess d'Aumale arrived on Tuesday last to Orleans House, Twickenham, from a tour of visits.

His Excellency the Prussian Ambassador and Countess Bernstorff and family returned on Tuesday to Prussia House, from Brighton.

His Excellency the Bavarian Minister and Baroness de Cetto arrived at their residence, in Hill-street, a few days since, from Brighton.

His Excellency M. Balcazar, Envoy Extraordinary and Minister Plenipotentiary of the Argentine Republic to the Court of St. James, has arrived at Munley's Hotel from Paris.

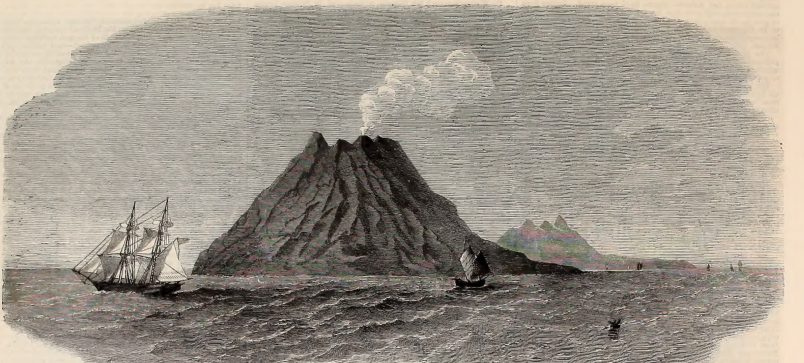
ECHOES OF THE WEEK.

ALAS for M. Nadar! Alas for the boast *sic itur ad astra!* Once more has the dauntless aeronaut tempted the fate of Icarus, and once more has he tumbled earthward; this time not without serious dislocations, almost warranting the assumption that he will be maimed for life. The "Géant," has ascended from the Champ de Mars, has drifted due north, has passed over the Belgian frontier at Esquelines—by its conductors defying the commands of the custom-house officers—has descend and have their luggage examined—and has reached the Hanoverian territory; but there the chronicle of its successful progress ends. The bag at the moment unmanageable, the anchors parted, the machine was dragged along the ground with frightful violence, and the car, in which were at last eighteen persons—M. Mdme. Nadar and M. H. Felix are, as well as the projector of the scheme, among the injured—was flung from the whole party as it wrecked their lives to the courage and presence of mind of M. Jules Godard.

M. Nadar had better give up balleoning as a bad job. We have already seriously enough and to spare; but the Parisian public cannot afford to spare a very worthy man, and a clever photographer who divides with Disdéri the palm of supremacy in vigorous and graceful portraiture. The Parisian Nadar is a well-known work; surely M. Nadar is not ambitious to have a niche there in the character of Prometheus.

The enormous size and unwieldiness of the two-storied car seem to us to be literally at the bottom of the Géant's disasters. Mr. Coxwell, or any other really experienced aeronaut, will tell us that the conductor, to have his balloon fully under his command, should have it completely in view, and that, with the exception, perhaps, of a scientific associate or two, the companionship should be *de trop*. M. Nadar chose to be hampered by ladies and legs of mutton, cameras, photographic apparatus and the like, and his result has been serious, narrowly missing catastrophe. It is true that M. Nadar's object was to by ostentatious his aeronautic capabilities, and to convert a scientific toy into an engine of public utility; but he has failed twice; and surely his "two warnings" should be sufficient to make him dread the "third." The Parisians appear to be tried with.

The breakdown of the "Géant" will be a sad blow to Mr. Bowley and the Crystal Palace Company. The hoardings of the metropolis were already covered with gigantic placards inscribed "Nadar is coming;" and the photographic accounts of the balloon, the car, the passengers, *one thousand pounds! and half the receipts* at exhibition for the benefit of the grandsons of Sydenham. The chief drawback to passing a night in a balloon appears to be the inevitable eventuality that, if fifty thousand people can be persuaded to pay a shilling each for the privilege of seeing the balloon leave the earth, five hundred thousand will be able to see it when it is in the air for nothing. This argument was sensibly brought to bear upon Mr. Hendon in the pantomime, and he gave up through the sensible high-pose performances on a cable stretched between the two water towers. With the air of Mr. Hendon's performance fresh in our mind from Waterloo Bridge the movements of the illustrious funambulist. However, there is an end, we hope, of M. Nadar and his balloon, so far as the Crystal Palace is concerned. The Géant, with its double-storied car, at Sydenham would come under the head of those "dangerous exhibitions" towards the encouragement of society for which of late so commendably manifested.



Talking of M. Nadar, and his five thousand pounds demand, it is said that Mr. Charles Reade has appointed the right of republishing his novel of "Very Hard Cash," now approaching termination in "All the Year Round," at the modest price of three thousand pounds! No publishers have as yet, so far as we can learn, become inmates of the lunatic asylums likewise, as predicted by this author, but *wise a price* may, although some of the bibliopoles are said to wince at such an extortionate demand, be found. There will probably be couple of thousand pounds for the reprint of a book which twenty years since an English author of the highest standing would have been glad to part with, *de fond en comble*, for a few hundred. We should not be a popular novelist in the year of grace 1863? Let it be chronicled that we "pooh-pooh" Mr. Charles Reade's merit or to ensure his desire for gain. We should like to hear of his receiving fifteen guineas for a novel such as Balzac's or a commentary on the Laws of Lunacy, with which he is now favouring the public. "You should write dramas, many dramas," said Balzac to Klumpflumpy, "in order to be successful." It is necessary that an author should live magnificently. Then you may write novels as an amusement, or in the pure service of this dictum proved. If an author wishes to gain money and "live magnificently" he should write novels; after that, *your se distruire*, he may devote himself so the drama.

The town has been just startled by the apparition of a new Jack Sheppard. A middle-aged convict, a person by profession and under sentence for forgery, has managed to escape from the apparently impregnable and unscalable Pentonville Penitentiary at Milbank. A survey of this man's evasion is perfectly marvellous. We are told how he twisted a rope out of the coir he was set to pick, how he fashioned a hook from the wire which served as a mat to the cell-ing-ing, how he made a trifle it with a bag of sand from the allowance periodically served out for cleaning the cells. With this hook he caught the rope which hung from a corner of his cell, to reach a gutter to drop into a garden, and to climb over a wall into the road. *Quelle facilité, quelle facilité!* Indeed, Lord Leigh Hunt said of the pig in Long-lane. Now, the disappearance of this convict (one of whose hands was crippled, by-the-way) is negative proof that he was unable to *evade personne* by night as well as by day? The manner in which military sentinels are at present employed is simply ridiculous. The sentry at Portsea is there their presence is, of course, ornamental, symbolic, and honorific; but where, on earth, is the use of posting two tall grenadiers in front of a collection of curiosities? The new Jack Sheppard had escaped in broad daylight to abscond from Milbank and from Pentonville; and the Governor of the penitentiary where the summons would be served with the Nisi-next bolts? That the old masters will fall to fisticuffs with the modern queers (*quære* the Old Bailey), and that the police-duties will be performed by the military? We don't wish to see soldiers employed in the internal management of civil prisons, but they might, without any danger to the liberties of the country, guard outside, war. The Ad the Mint. It would be better for a few hundred men to be so detailed for guard duty every day than that they should be idlers about the streets.

A poultry show at the Crystal Palace was opened on Monday, and continued for three days. The collection was especially rich in ducks, geese, pigeons, and ornamental water fowl.

A great meeting was held in Exeter Hall on Tuesday evening, under the auspices of the Emancipation Society, to hear an address from the Rev. Henry Ward Beecher on the subject of the American war. The hall was densely thronged, and immense numbers were unable to obtain admission. The chair was occupied by Benjamin Scott, Esq., Chamberlain of London. Mr. Beecher, at considerable length and in a speech of much eloquence, referred to the causes of the American struggle, which he attributed to the slaveholders for the North. There were some few expressions of dissent, but the meeting warmly sustained the general policy. A resolution thanking the speaker, reprobating the "slaveholders' rebellion," and approving of the emancipation policy of the President, was carried all but unanimously.

SKETCHES FROM JAPAN, BY OUR SPECIAL ARTIST.

SULPHUR ISLAND, OPPOSITE SATZUMA'S DOMINIONS.

Our Special Artist and Correspondent in China writes as follows from Yokohama, on Aug. 9:—"The fleet sailed the day before yesterday for Kagosima, the Prince of Satzuma's capital. Seven men-of-war went, and seven remain here. Nothing further has been attempted at Semoncseki, where the vessels were fired upon. The Coquette returned, having anchored under the fort that was taken by the French, and a Japanese officer came on board and drank wine with the captain; but it appears that no one on board understood much of what he said, there being a paucity of interpreters on both sides. A Japanese soldier was shot in the arm a few days ago by some Europeans. They state that he drew his sword upon them, and they naturally fired. A complaint was brought against them, and they have been bound over to keep the peace for five weeks, and appear when called upon by the Japanese. This affair happened at Kanasawa, a picnic place much in favour and near Yokohama. The Dutch Consul-General has gone up to Jeddo, where he intends remaining ten or fifteen days. All the environs of this place are studded with guardhouses and numerous Japanese troops. At the principal bridge leading into Yokohama they have a brass field-piece and sentry and barracks; so that if they are here for our protection we are well guarded. The Tycoon has returned from Osaca, and is now in Jeddo; he came back in a steamer, the Lyemaon. I send you a sketch of Japanese soldiers going to relieve sentry at one of the guardhouses in Yokohama; they keep step, as you see, and have discarded flowing robes. They are armed with muskets and wear two swords. The sentry in the corner belongs to the guardhouse protecting the bridge. Sulphur Island is opposite Satzuma's dominions, and is a conspicuous landmark for vessels passing through Van Diemen's Straits; it is an active volcano, and produces much sulphur. The fleet is, or ought to be, nearly there now."

As will be seen by later news from Japan, in another column, Admiral Kuper has returned to Yokohama, having besieged and levelled Kagosima, and fired Prince Satzuma's three steamers.

"THE DEATH OF NELSON." PAINTED BY TURNER, IN THE NATIONAL GALLERY.

This picture is a work of Turner's early time: his "period of student-ship" as Mr. Ruskin terms it—i.e., from 1800 to 1820. Exhibited at the British Institution in 1806, it was painted while Turner was under the influence of the Dutch masters. Before this date he had made his most elaborate efforts in rivalry with Vandervelde. Turner had a strong love of the sea and everything seagoing, especially in the early part of his career; and although there are many mistakes in his pictures of such subjects, he had considerable knowledge of naval matters. He has, besides innumerable marine pieces, painted all the chief varieties of fishery round our coast; and before this work he had executed the large companion-picture to the Earl of Ellesmere's Vandevelde, the "Calais Pier;" "The Shipwreck," for Sir John Leicester, afterwards exchanged for "The Sun Rising in a Mist" (painted also before the present work), and, if not before, probably the same year, the famous "Wreck of the Minotaur."

The great painter's strong sense of patriotism, as well as his sailor-like love of ships, are both indicated by the fact that he is known to have gone to Portsmouth in 1805 to see the fleet returned from the great battle, the anniversary of which took place on the 21st inst. Turner has evidently on this occasion taken unusual pains to be accurate, and his "Death of Nelson" is unquestionably a very noble realisation of that most terrific of all the forms of human strife—a great sea-fight. The particular incident commemorated is, to our mind, the most touching and heroic in modern warfare. How pathetic to read of that presentiment Nelson for the first time had, that he was about to lay down his life. Yet he would not consent—indeed, no one dared to ask him—to remove those stars which made his heroic breast such an attractive mark for the enemy's riflemen. "In honour I gained them," he had said when such a thing had been hinted to him, "and in honour I will die with them." To read in Southey's "Life" of how he took his ship, the rightly named Victory, into action, is quite Homeric. The shout with which his for-ever-memorable signal—"England expects every man will do his duty"—was received throughout the British fleet, was infinitely more sublime than the roar and crash of three thousand cannon. Not a shirk did the Victory return, although fifty of her men had been killed or wounded, till she was alongside the Redoubtable, the ship represented on the right of Nelson's in our Engraving. Beyond the Redoubtable is the Téméraire—the

BELIEVING GUARD AT YOKOHAMA.

"THE DEATH OF NELSON," BY J. M. TURNER, R.A., IN THE NATIONAL GALLERY.

"Fighting Téméraire" which had been taken from the French, and which, "tugged to her last berth," was afterwards the subject of perhaps the most glorious picture Turner ever painted. On the larboard is the Bucentaure, and the huge four-decked Spanish Santissima Trinidada. The spectator is placed on the mizen starboard shrouds of the Victory, and thus obtains, as well as may be through the smoke, a partially "birdseye" view of the whole slippery, bloody deck, with the sailors struggling at the gun carriages, the group, including Captain Hardy, surrounding the wounded Nelson, and some brawny fellows hauling on board the flag of the enemy's ship, which has struck on the larboard, one of whom is calling the dying hero's attention to the prize. Nelson was struck down about half-past one, in the very heat of the action. He was taken below, and died about three hours later. The fatal bullet which ended the marvellous career of our greatest hero and pierced a nation's heart was fired by a rifleman in the Redoubtable's mizen-top. (Mr. Thornbury, in his "Life of Turner," after praising the painter for his sailor-like knowledge, says the bullet was fired from her mizen fore-jib!) One cannot even now help feeling a grim satisfaction that every man in the top was afterwards killed. The midshipmen on the poop of the Victory, that hit the rifleman who shot Nelson, is seen in our picture preparing to fire. The French ship received the Victory when she came alongside with a broadside, and then instantly let down her lower-deck ports, for fear of being boarded through them (Turner represents them still up); and Nelson, seeing she carried no flag—for, although Turner has painted it flying, the enemy did not run up flags till he perceived the necessity of lowering them—twice gave orders to cease firing upon the Redoubtable, supposing she had struck, because her great guns were silent. Yet from this ship, which he had twice spared, he received his death. The Victory's guns are, however, now blazing away beneath us in fierce unanimity. Turner has not given the flash or its reflected light on the smoke successfully; but he has very admiraby represented the ever-swelling thundrous clouds and rolling piles of battle-fog beyond, through which the hulls of the great ships loom with their apparent elevation and gigantic bulk greatly increased, partly from this cause and partly from the very effective point of view chosen. Around and overhead the splintered masts and yardarms, the torn and flapping sails, and the cloven cordage, form a mass of inextricable confusion, which, notwithstanding technical and historical inaccuracies, and notwithstanding the weak painting of the figures below, completes an effect of terror, of life-or-death pertinacity, which has perhaps never before or since been realised on canvas, and which entitles this picture to rank as one of the grandest possible representations of a scene surpassing all ordinary powers of imagination.

Probably about the same year Turner painted another view of the great battle for George IV. This "Battle of Trafalgar" the King presented in 1829 to Greenwich Hospital, and it still adorns the Painted Hall.

CALENDAR FOR THE WEEK ENDING OCT. 31.

SUNDAY, Oct. 25.—Twenty-first Sunday after Trinity. St. Crispin, martyr (about 303). Death of Chaucer, 1400. Victory of Henry V. over the French at Agincourt, 1415. Formation of the French National Institute by the union of the five academies, 1795.

MONDAY, 26.—The North-West Passage discovered by M'Clure, 1850. Garibaldi meets Victor Emmanuel and salutes him as "King of Italy," 1860. Full Moon, 5h. 55m. p.m.

TUESDAY, 27.—Constantine, having taken the cross as his standard, defeats Maxentius at Rome, 312. Servetus, one of the discoverers of the circulation of the blood, burnt for heresy at Geneva, 1553. Charge of the Six Hundred at Balaklava, 1854. Death of Ida Pfeiffer, the female traveller, 1858.

WEDNESDAY, 28.—St. Simon and St. Jude. Inauguration of the New Royal Exchange, London, by the Queen, 1844.

THURSDAY, 29.—Death of the great mathematician, D'Alembert, 1783. The poet Keats born, 1796.

FRIDAY, 30.—Fruitless Insurrectionary Attempt of Louis Napoleon (now Emperor), aided by two officers and a few privates, at Strasburg, 1836.

SATURDAY, 31.—General Submission to the Provisional Government in Greece, 1862.

ROYAL ENGLISH OPERA, COVENT-GARDEN.—Under the management of Miss LOUISA PYNE and Mr. W. HARRISON.—Triumphant success of Wallace's new Romantic Opera, THE DESERT FLOWER, which will be repeated Every Evening until further notice—Miss Louisa Pyne, Miss Susan Pyne, Messrs. W. H. Weiss, H. Corri, A. Cook, and W. Harrison. Conductor, Mr. A. Mellon. Commence at Eight.

THEATRE ROYAL, DRURY LANE.—Managers, Messrs. Edmund Falconer and F. B. Chatterton. Great and continued success of the production of Lord Byron's MANFRED, generally acknowledged by the Press and the Public to be one of the most complete and legitimate triumphs of a combination of artistic capabilities achieved on the stage for many years.

On MONDAY, OCT. 26, and during the Week, the performances will commence with the comedietta, by John Oxenford, Esq., of GONE TO TEXAS. Principal characters by Mr. Walter Lacy, Mr. Neville, Mr. Spencer, and Miss Murray. After which, commencing at a quarter before Eight o'clock, and concluding about ten o'clock, Lord Byron's Choral Tragedy of MANFRED. Mortals:—Manfred, Mr. Phelps; Abbot of St. Maurice, Mr. Ryder; a Chamois Hunter, Mr. A. Rayner; Manuel (an aged Retainer), Mr. Neville; Herman (a young Domestic in the Castle of Manfred), Mr. G. Weston; Retainers, Messrs. Bedford, Weaver, Kirk, Wilson, Smith, and Edwards. Immortals:—Arimanes (Ruler of the Evil Agencies), Mr. Warde; Ariel (Spirit of the Ether), Miss Emma Heywood; Hesper (Spirit of the Stars), Miss Louisa Ritter; Undine (Spirit of the Waters), Miss Poole; Miserima (Spirit of Memory), Miss Cicely Nott; Auster (Spirit of the Storm), Mr. Swift; Astaroth (Spirit of the Earth), Mr. Mengerson; Nubes (Spirit of the Shadow of Night), Mr. Ryde; Titanos (Spirit of the Mountains), Mr. G. Spencer; Nemesis (Goddess of Vengeance), Mrs. Edmund Falconer; Clotho, Lachesis, and Atropos (the Three Destinies), Miss Emma Atkinson, Miss C. Weston, and Miss Murray; The Phantom of Astarte, Miss Rose Leclercq; the Witch of the Alps, Miss Heath; Evil Agencies and Spirit Spectres of the Weird World, Messrs. T. Matthews, J. Morris, and J. Cormack; Miss Seymour, Miss Harfleur, Miss Green, Mrs. Melville, Mrs. Warlow, and the Ladies and Gentlemen of the Choir and the Ballet. Order and character of the Scenery:—Act I.—Scene 1. Studio and Gothic Gallery in Manfred's Castle. Scene 2. A Precipice and Glaciers nigh the summit of the Jungfrau. Act II.—Scene 1. The Chalet of the Chamois Hunter and Alpine Pass. Scene 2. The Steinbach, a Waterfall, in one of the Lower Valleys among the Alps and overhanging Cliffs, the Haunt of the Witch of the Alps.

The sunbow's rays still arch the torrent with the many hues of Heaven,
And roll the sheeted silver's waving column o'er the crag's perpendicular.

Scene 3. The Snow-capped Summit of the Jungfrau, by Moonlight. Scene 4. The Hall of Arimanes in the Nether World painted by Mr. Danson and Son. Act III.—Scene 1. Terrace and Exterior of Castle. Scene 2. The Turret Studio, the Magician's Midnight Haunt, Shook and Illumined by a Thunderstorm, and finally Destroyed by Flashing Bolt and Crashing Avalanche. Last Scene. A Snowy Alpine Waste or Wilderness. Programme of the Songs and Choruses:—Act I.—Scene 1. Mystical Responses of Viewless Spirits to the Magian's Invocation. First solo, "Mortal to thy bidding bow'd," Miss Emma Heywood. Second solo, "In the blue depth of the waters," Miss Poole. Third solo, "I am the rider of the wind," Mr. Swift. Septet, Misses Poole, Heywood, Cicely Nott; and Mr. Swift and chorus. The imprecation solo, "When the moon is on the wave," Miss Cicely Nott. Solo, "Though thy slumber may be deep," Miss Poole. Chorus by the whole choir. Act II.—Scene 3. Solo and chorus, "The Captive Usurper," Miss Cicely Nott and chorus. Song, "The ship sailed on, the ship sailed fast," Miss Emma Heywood. Scene 4. Grand Choral Hymn of the Evil Agencies, "Hail to our master, Prince of Earth and Air!" solo verses by Mr. Swift. Chorus by full choir. Jubilant chorus and accompanying Dance, by full choir and the ballet. Act III.—Last Scene. Grand dual chorus of Good and Evil Spirits by the principal singers and full choir. The general action of the tragedy arranged by Mr. Phelps. The incidental dances designed and directed by Mr. Cormack. Costumes from designs by R. W. Keene, Esq., and from Flaxman's Illustrations of Classical and Mythological Conceptions. Machinery by Mr. J. Tucker and assistants. Gas illuminations by Mr. J. Hinckley. Spectral illusions by Mr. Cox, under the direction of Mr. Telbin. The whole of the entirely new scenery designed and principally painted by Mr. W. Telbin, assisted by his son, Mr. H. Telbin. The Hall of Arimanes painted by Mr. Danson and Sons. The increased orchestra and present arrangement of the music (originally composed by Sir Henry Bishop) under the direction of Mr. Barnard. The choir under the direction of Mr. Charles Beale. To conclude with the Musical Farce of A ROLAND FOR AN OLIVER. Principal characters by Messrs. Walter Lacy, Addison, G. Belmore; Misses Heath, R. Leclercq, and Murray. Stage Manager, Mr. Phelps.

Private boxes, 10s. 6d., 21s., £1 11s. 6d., £2 2s., £3 3s., and £4 4s.; stalls, 6s.; dress circle, 4s.; first circle, 3s.; boxes, 2s.; pit, 2s.; lower gallery, 1s.; upper gallery, 6d. No half-price. Box-office open from Ten till Five daily. Doors open at Half-past Six; the performances commence at Seven o'clock, and terminate every evening at a Quarter-past Eleven.

NEW THEATRE ROYAL, ADELPHI. — Sole Proprietor and Manager, Mr. B. WEBSTER.—On MONDAY, and during the Week, at Seven, THE TRAGEDY QUEEN—Mrs. Stirling; at Eight, LEAH—Messrs. A. Stirling, R. Phillips, A. Wood, and Billington; Miss Bateman, and Miss H. Simms; and CATCHING AN HEIRESS—Miss Woolgar.

PRINCESS' THEATRE.—HERRMANN.—IMMENSE SUCCESS.—"The tricks and feats of Herr Herrmann are nearly all of the most astonishing and incomprehensible kind. His sleight-of-hand feats are really marvellous; and the ease, finish, and accuracy of his tricks are such as have never before been witnessed in this country."—Morning Herald and Standard, Sept. 19. HERRMANN in his celebrated MONEY TRICK EVERY EVENING. "A new system of making plenty of money." Commence at Eight; Half-price, Nine O'Clock.

MR. GERMAN REED begs respectfully to announce that a NEW ENTERTAINMENT, in which he will introduce an entirely New and Original Opera di Camera, entitled JESSY LEA, written by John Oxenford, Esq., and composed by G. A. Macfarren, Esq., with Scenery by Mr. John O'Connor, will be produced for the first time on MONDAY EVENING, NOV. 2, at Eight o'Clock. Royal Gallery of Illustration, 14, Regent-street. GHOSTS. Price 1s. — 110, Regent-street. Post-free.

QUITE NEW.—Mr. and Mrs. GHOST (previous to their departure) have honoured the Artists of the London Stereoscopic Company with sittings for their CARTES DE VISITE, and these remarkably successful Portraits were, by permission, published on Monday last, the 19th inst. Price 1s.; Stereoscopic, 1s. 6d.; free by post for stamps.—54, Cheapside; and 110, Regent-street.

144 REALLY COMIC SCRAPS, all different, and printed on superfine paper of various colours, are now sent post-free for 12s. 6d. in stamps. This series of truly laughable prints, forming a most amusing collection for scrapbooks, screens, or the drawing-room table, only require to be introduced to ensure plenty of mirth and jollity.—Address, JOHN JERRARD, 172, Fleet-street, London.

THE GLORIES of the HEAVENS seen distinctly by a New Telescope for £5, which will also distinguish the features of a man four miles, and time by a church clock at ten miles. This instrument is guaranteed to be equal in the most important respects to telescopes costing £70.—S. and B. SOLOMONS, 39, Albemarle-street, Piccadilly.—Persons are invited to apply for a diagram with full particulars, and testimonials sent free.

OPERA, Race, Field, and General Outdoor Day and Night GLASSES, with an improvement which renders them much more portable and powerful, they being suited to the waistcoat pocket. It has always been a great drawback to the general use of field-glasses on account of their weight and large size; but as Messrs. S. have overcome this difficulty, a more rapid sale is expected, which induces them to reduce the prices, which range from 20s.—S. and B. SOLOMONS, Opticians, 39, Albemarle-st., Piccadilly.

POCKET BAROMETER, COMPASS, and THERMOMETER, all in one, the size of a watch, for telling the weather, the heights of mountains, direction of winds, and temperature of the air. Guaranteed for 12 months. Price £4 15s., sent free.—S. and B. SOLOMONS, Opticians, 39, Albemarle-street, Piccadilly.

ACHROMATIC MAGIC and DISSOLVING LANTERNS. The advantage of achromatic lenses over the common lenses now in use is brilliancy and beautiful definition. No additional charge is made upon this improvement, as a large sale is anticipated. Catalogue sent free.—S. and B. SOLOMONS, Opticians to the Government, 39, Albemarle-street, Piccadilly.

SPECTACLES. — The Patent Newly-invented TINTED SPECTACLES are patronised by the majority of the nobility, including Viscount Palmerston. They give extraordinary relief, by day and night, to weak, dim, and defective vision.—S. and B. SOLOMONS, 39, Albemarle-street, Piccadilly.

DEAFNESS.—The SOUND MAGNIFIER and INVISIBLE VOICE CONDUCTOR, for Deafness. It fits into the ear not perceptible, removes singing noises in the head, and enables deaf persons to hear distinctly at church and at public assemblies.—S. and B. SOLOMONS, 39, Albemarle-street, Piccadilly.

UNIVERSAL MICROSCOPE. Price £5 5s.
SMITH, BECK, and BECK,
31, Cornhill, E.C. (late 6, Coleman-street).
Catalogues sent on receipt of six postage-stamps.

STEWARD'S BINOCULAR FIELD and LANDSCAPE GLASSES are unequalled for their power and brilliant definition. Price 3½ and 6 guineas; in alluminium, one-third the weight, 10 and 14 guineas. Highly recommended for India, or any climate. Address 406, Strand, London. Catalogues post-free.

THE PRETTIEST GIFT for a LADY is one of JONES'S LEVER WATCHES, at £11 11s.; for a Gentleman, at £10 10s. Rewarded at the Exhibition for cheapness of production. Manufactory, 338, Strand, opposite Somerset House.

DENT, Chronometer, Watch, and Clock Maker, by special appointment to her Majesty the Queen and H.R.H. the Prince of Wales, and maker of the Great Clock for the Houses of Parliament.—61, Strand (adjoining Coutts's Bank), and 34, Royal Exchange.

BY M'CABE, a GOLD LEVER WATCH, perfect in condition (cost £28). Price £16 16s. A written warranty given. At T. W. NEILSON'S, 252, Strand (4 doors west of Temple Bar).

WATCHES.—A. B. SAVORY and SONS, WATCHMAKERS, 11 and 12, Cornhill, London (opposite the Bank). First-class Patent Detached Lever Watches, with the latest improvements and maintaining power, to continue going whilst being wound, recommended for accuracy and durability.

SCOTTISH WIDOWS' FUND LIFE ASSURANCE SOCIETY.
Just published,
BENEFITS to POLICY-HOLDERS in the Scottish Widows' Fund Life Assurance Society, and Comparative Results in the Standard Life Assurance Company—The Life Association of Scotland—The North British and Mercantile—and The Caledonian Insurance Company. Being an Answer to Statements published by those Proprietary Companies. By SAMUEL RALEIGH, Manager of the Widows' Fund Society.
Copies will be sent free of charge on application to the Head Office, 9, St. Andrew-square, Edinburgh; or to Hugh M'Kean, the Society's Central Agent, 4, Royal Exchange-buildings, Cornhill, London, E.C.

INVESTORS should consult J. MANSFIELD SMITH'S JOINT-STOCK SHARE PRICE-LIST and MINING CIRCULAR sent post-free on application. It contains NOTICES OF MEETINGS, ABSTRACTS OF PROSPECTUSES, REPORTS, and other information of a valuable nature to those interested in companies generally.
Office, 38, Threadneedle-street, London, E.C.

CHUBBS' FIREPROOF SAFES, with their Drillproof and Powderproof Locks; Cash and Deed Boxes, Detector Locks, Street-door Latches. Illustrated Price-lists gratis and post-free.—Chubb and Son, 57, St. Paul's-churchyard, London.

LONDON CARPET WAREHOUSE.—WAUGH and SON 3 and 4, Goodge-street; and 65 and 66, Tottenham-court-road, W. Curtains, Portières Chintzes, &c., of first-class manufacture, for every style of decoration.

DÉPOT of genuine HUNGARIAN WINES, 7, Mincing-lane, London, E.C. Open for tasting free of expense. Assorted sample dozen cases at 24s., 30s., and 36s. Price-lists will be sent on application.—MAX GREGER (from Hungary).

"VIN ROUGE," 24s. per dozen.—Natural Wine of France, Port in character, rich in quality, free from spirit, and highly nutritious. Recommended with confidence. In Cases, inclusive of bottles and railway carriage, 27s. per dozen. To be obtained only of HENRY BRETT and CO., Holborn-bars, and 30, Regent-street.

WINES.—PURE AND CHEAP.
THE IMPERIAL WINE COMPANY, consisting of leading Growers of Clarets, Ports, Sherries, &c., imports the choicest Wines and sells to the Public at reasonable prices.
Cellars—Marylebone Court House, W.;
Stores and Offices—314, Oxford-street, W.;
Export and Bottling Vaults—15, John-street, Crutchedfriars, E.C., London.

KINAHAN'S LL WHISKY v. COGNAC BRANDY.—This celebrated Old Irish Whisky rivals the finest French Brandy. It is pure, mild, mellow, delicious, and very wholesome. Sold in bottles, 3s. 8d., at the retail houses in London; by the agents in the principal towns in England; or wholesale at 8, Great Windmill-street, Haymarket.—Observe the red seal, pink label, and cork branded "Kinahan's LL Whisky."

PRICE'S CHILD'S NIGHT LIGHTS are perfectly safe, and burn their time. The quality of these Night Lights can now be relied on.

SHERWOOD BED LIGHTS, Sixpence and Eighteenpence a Box. These candles are made to supply a want very generally expressed—a cheap, really good chamber candle. They will be found inferior only to "Price's Candles, which will not drop grease when carried," which are sold in Boxes, One Shilling and Three Shillings each.

FUR CARRIAGE WRAPPERS, full size, Lined and Trimmed with cloth, 25s. to 20 guineas; Sealskin Coats, 4½ to 10 guineas; Cloth Coats, lined with Fur, 5½ to 30 guineas; Black Bear Hearthrugs, 65s. to £10; a large lot of Fancy Fur Mats, 4s. 6d. to 15s.—W. P. LILLICRAPP, 19A, Davies-street, Berkeley-square, W.

W. P. LILLICRAPP, 19A, Davies-street, Berkeley-square, W.

JAYS' MANUAL OF FASHION.—Messrs. Jay have to express their great regret that the delivery of the Manual has been delayed several days later than was promised by their publisher, but they are daily expecting the books from Paris. The addresses of all applicants have been carefully preserved, and Messrs. Jay will have the honour to forward the Manuals, free of expense, immediately after their arrival in London.—247, 249, Regent-street.

BONNET'S SILKS A LYONS.—Every article of commerce takes its title either from the inventor or manufacturer, and the more perfect the production the greater is the credit which attaches to the originator. Bonnet's silks are said to be incapable of identification in England; but the fallacy of such an assertion is exposed by the very trade mark of the firm, as exhibited by Messrs. Jay, of Regent-street. The following interwoven mark may be seen at the end of each piece:—"Manufacture des C. J. Bonnet & Cie, à Lyon & à Jujurieux—wear guaranteed."

LANA CRAPE.—The texture is delicate, but strength and durability are its essential recommendations. For cheapness, no other material in Mourning can compete with it.
THE LONDON GENERAL MOURNING WAREHOUSE,
247, 249, and 251, Regent-street.

MILLINERY FOR MOURNING.
JAYS',
247, 249, and 251, Regent-street.

REAL FUR SEALSKIN CLOAKS and JACKETS, full size, rich in quality, and new in shape, from 9½ to 35 guineas; ditto, trimmed with Grebe, 11 to 38 guineas. Astracan Lamb Jackets, 15 to 25 guineas. Velvet Cloaks, trimmed with Grebe, 8 to 20 guineas. Sealskin and Velvet Cloaks, trimmed with Sable and every other kind of rich Fur, from 40 to 190 guineas. Sealskin Muffs, 21s. to 4 ts.; Ties, 21s. to 25s. 6d.; Gloves, 21s. to 35s.; Vests, 30s. to 45s.; Caps, 18s. 6d. to 35s.; Foot Muffs, 4s. 6d. to 10s. 6d.; Sable Muffs 35s. to 20 guineas; Mink ditto, 25s. 6d. to 4½ guineas; Astracan Lamb Ditto, 10s. 6d. to 25s. 6d. The ILLUSTRATED LONDON ALMANACK is inclosed in an elegant cover printed in colours.
Published at the Office of the ILLUSTRATED LONDON NEWS, 198, Strand, and sold by all Booksellers and Newsagents.

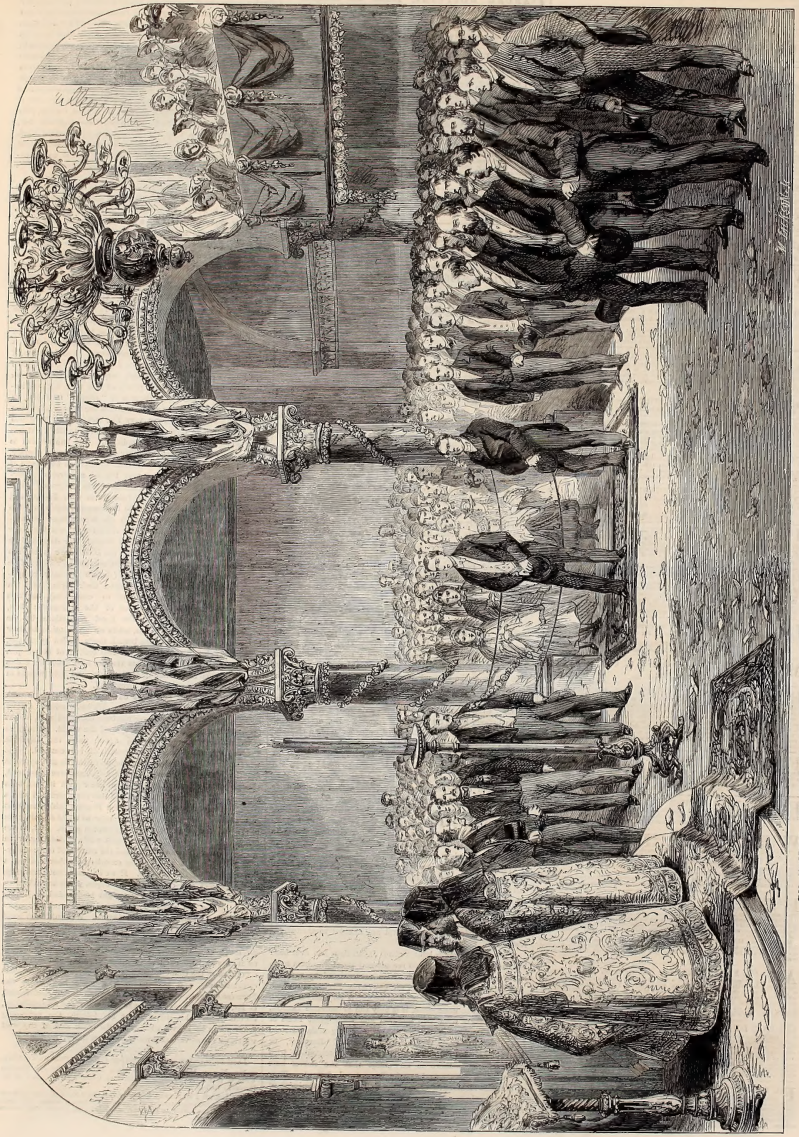
THE ILLUSTRATED LONDON NEWS.

LONDON: SATURDAY, OCTOBER 24, 1863.

PRINCE SATZUMA discovered, about the middle of August last, that he had something to learn. He is a great grandee, and is said to have £600,000 a year; and his soldiers are armed with rifles, thoroughly understand discipline, and are not enemies to be despised. He reads European works on military matters, and may possibly have pirated Sir William Armstrong's inventions. Moreover, he is a haughty aristocrat and a confirmed Protectionist, and is violently opposed to the admitting the middle class to power, and to the admitting foreigners into Japan under any circumstances whatever. He supposed himself "cased in complete steel," and to be the strong man armed who could keep his house against all comers. But just at the time when we in England were packing our boxes and procuring our passports, and devoting the Bradshaw Sphinx to every kind of evil fate, a British fleet was giving Prince Satzuma a terrible lesson. He seems to have had it in two instalments: the first on Saturday, Aug. 15, and the second lesson having been appointed for Sunday, the 16th. The result was that his town, Kagosima, was set on fire and speedily reduced to ruin; that three of his steamers were destroyed, as were his palace, factories, arsenal, and whatever else of his was destructible. He, or his men, fought well. They killed eleven of ours, including a Captain and a Commander, and wounded thirty-nine men; but the language of the telegram and our knowledge of the way in which British seamen do their work leave no doubt as to the completeness of the vengeance.

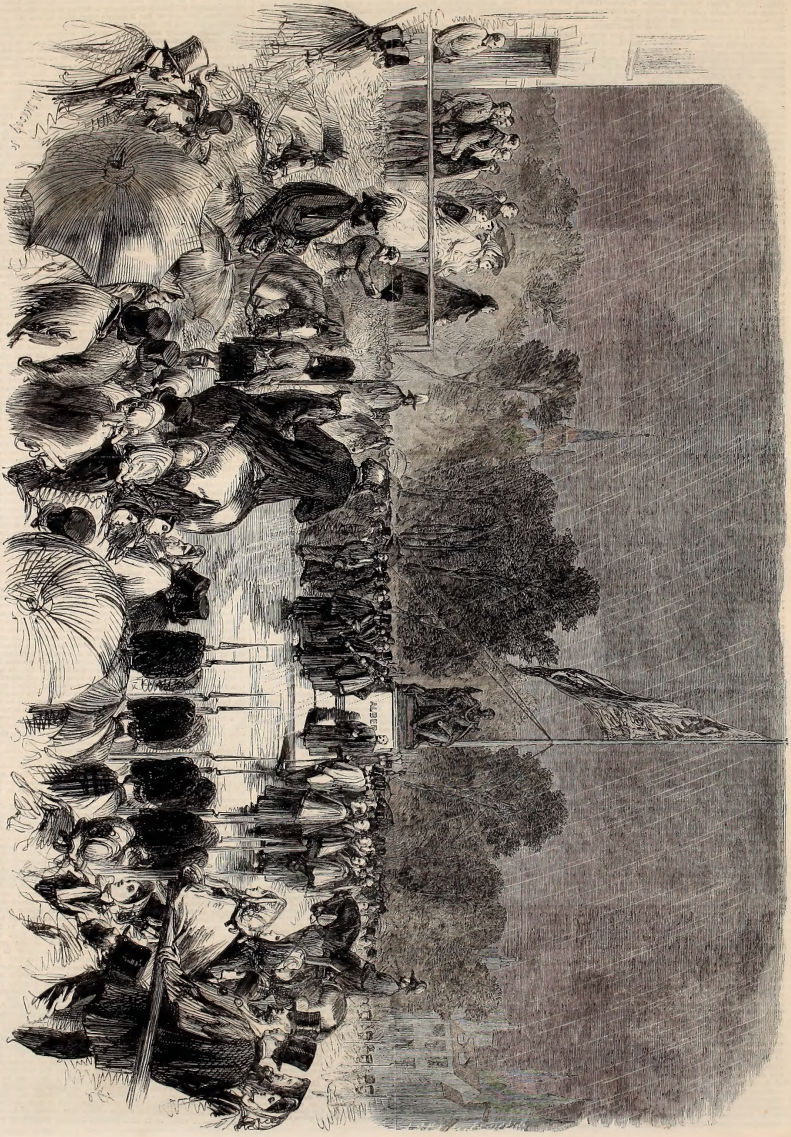
We are, of course, anxious to receive details, and still more anxious to know what has followed the affair. The fleet may have gone to another Prince's port and favoured him with similar proofs that when England demands the fulfilment of treaties and compensation for the murder of her children she is in thorough earnest. Or submission may have followed, and we may be upon the best terms with the Japanese. But, in any case, it will be a long time before the power of the aristocracy is broken down and the "blessings of commerce" (the French call it "glory" when they go civilising, but the meaning is the same) are freely accepted by the extraordinary people to whom we have accredited our militant missionaries. But, having committed ourselves to the struggle, we must go through with it, for concessions to an Oriental are suicidal to Occidental reputation.

A great deal more is known about Japan than has ever been known before, and we would recommend those who wish to be masters of the knowledge hitherto accumulated to read an article in the new number of the *Quarterly Review*, in which the subject, both *en bloc* and in detail, is very ably handled. So far as can be understood, it is only the aristocratic faction, which numbers some two hundred aud sixty great Peers of Japan and pillars of the State, that will long make resolute head against us. Whether the Spiritual Emperor, or Mikado, be sincere or not in wishing intercourse with the barbarians, there is no doubt that the nobles hate us with a great and perfectly natural hatred. They of the blue blood have everything to lose by the admission of Japan into the family of nations. They have enormous incomes and almost uncontrolled power, and they are an isolated class, who spurn commerce and treat the wealthiest merchant as a creature infinitely beneath them; they deny him any position as a part of the Government, and they even expose him to personal humiliation. The result of carrying out the treaty, of expanding the commercial views of the merchants, of planting foreign traders on the sacred soil, would necessarily and instantly be to elevate the mercantile public of Japan into a class that would ultimately become a power in the State. Hereditary privileges would be curtailed, the Japanese merchant would learn from his European friends that commerce rules where civilisation extends; and it is not impossible that an early revision of Japanese taxation and finance generally might operate to the reduction of the vast revenues spent by the nobles either in soldiers or in sensuality, or both. Add to all these material considerations the pride of birth, and perhaps some other feelings—for if these nobles have not religion to make them good friends, they have superstition to make them bigoted foes—and add that, though they have a very high civilisation of a certain kind, they are ferocious, cruel, and treacherous, and we shall see that the aristocracy of Japan will need a great deal of enlightenment before they see their way to frank and liberal dealings with Christendom.



As to the feelings of the Japanese people on the subject of intercourse with Europe, it is difficult to arrive at a conviction. *Prima facie*, it would appear that they have very good reason to hate their superiors, and that a war which should end in the subjugation of the aristocracy and of Tycoon tyranny would find favour in the eyes of the millions. It is also alleged that the people of Japan would willingly fraternise with us if the chiefs would permit it—that free trade doctrines, of course in the most modified form, have made some way among the merchants—and that we should find friends as soon as we should have made it safe for them to declare themselves. All this may be. But we have tried a great many experiments in various parts of the globe, and most of them have taught us, in a disastrous manner, that we have been imperfectly informed as to national feelings, and that it is dangerous to hope for the sudden conversion of a whole people. Especially dangerous would be such a hope, if practically indulged, in reference to Japan, of which, though we hear a great deal, we know enough only to be certain that we are exceedingly ignorant on points of the very highest importance. It is clear that there is *no* "people" in Japan, in the European sense of the word, and that the weaker have been too long used to something very like servitude to have had the temptation to form any wishes at all for a more righteous arrangement of their social condition. But superstition is often to be feared when all other motives cease to operate, and we do not know at this moment whether, in the hearts of the millions of Japan, there may not be a powerful superstition that will present an effectual bar to progress. When Spain, after so many years of intercourse with France and England, refuses even toleration to Protestant worship, is it too much to suppose that Japan, which has been almost hermetically sealed from intercourse with the outward world, has *her* superstitious fear of the religion of others? We do not place too much weight upon the fact that the Dutch are compelled to place their feet upon the emblem of Christian salvation before being allowed to trade in Japan (though we may compliment that high-minded people upon their giving such an extreme proof of their devotion to commerce), for this insult may have been a device of the aristocratic class, and will be swept out of the fiscal regulations by the whiff of grapeshot. But let us, while we are considering how Commerce can best mount the breach made for her by cannon, take some pains to understand the real feeling of the people. Do not let us repeat the blunders that we have made in China and the French have made in Madagascar, and both nations in more places than need now be mentioned.

That British ships and guns can make a way for British settlers there is, of course, no doubt. We have inflicted a blow because our just demands have not been complied with, and at present we stand all right in the eyes of the world. It may be necessary to strike again and again, until the Japanese Tycoon and the Princes are cowed, if not crushed. But whether it will be desirable to go much further is an important question. Our treaty was, no doubt, a diplomatic success; and, though at the time thinking men knew that it had been obtained by a certain pressure and had been accorded with a treacherous intention, it gratified the English public, and that is a necessity to which statesmen must at times submit, even at the expense of the sacrifice of common sense. But, as the treaty does not work, it may be worth while considering, when we have avenged its violation and the murder of our countryman, whether it is worth while extorting another treaty or a re-ratification of the old one. If we had sufficient knowledge of the subject, and could say that Japan wants to trade with us though its nobles do not, we might be justified in joining Japan against its nobles and making short work with two hundred and a half aristocratic brigands. We could then build some forts, proclaim free trade, and say, proudly, that we have done something more for the civilisation of mankind. But, inasmuch as to blunder at this time would assuredly involve us in a war with enemies of much prowess, and would be a repetition of the Chinese business, under more disadvantageous circumstances, and perhaps with a little likeness to the Burmese struggle, we hold it very meet and fit that Earl Russell, or Mr. Layard, or somebody who has brains and responsibility, should satisfy himself, and, at his leisure, the taxpaying public, that he knows what is on the other side of the wall which we are so valiantly ready to batter down.



Lord Palmerston entered upon his eightieth year on Tuesday.

Mr. Henry Mills, Q.C., has been appointed by Sir Charles Wood to be a Judge of the High Court at Calcutta, in the place of Sir Mordaunt Wells, who has resigned.

The Ionian Parliament has resolved, by a vote of thirty-three to three, that the protectorate of England over the Ionian Islands shall cease immediately, the Senate be dissolved, and the Ionian Islands forthwith be annexed to Greece.

HIS MAJESTY THE KING OF THE GREEKS ATTENDING DIVINE WORSHIP AT THE GREEK CHURCH, LONDON WALL.—SEE PRECEDING PAGE.

UNVEILING THE EQUESTRIAN STATUE OF THE LATE PRINCE CONSORT AT ABERDEEN, IN PRESENCE OF THE QUEEN AND MEMBERS OF THE ROYAL FAMILY.—SEE NEXT PAGE.

UNVEILING THE STATUE AT ABERDEEN OF THE LATE PRINCE CONSORT.

On Tuesday week her Majesty the Queen, accompanied by the Crown Princess and Prince of Prussia, the Prince and Princess Louis of Hesse, Prince Alfred, Princess Louise, Princess Helena, and Princess Arthur and Leopold, paid a State visit to Aberdeen, and inaugurated the memorial statue of the late Prince Consort. The statue, by Baron Marochetti is universally approved as a good likeness, as a work of art, too, it has been more generally admired than some of the Sardinian sculptor's public works. The figure is seated, and this has necessarily prevented any tendency to the exaggeration of action and forbidden character of composition in which Baron Marochetti occasionally indulges. The plaid, the kilt, and the pedestal are of grey and white granite of the district. His Royal Highness is represented wearing the robe of the Order of the Thistle over a plaid, which is uniform while he adds in his hand a roll of manuscript, intended to represent the address delivered by the lamented Prince on the occasion of his presiding over the British Association for the Advancement of Science. A pedestal has been held holiday in honour of the occasion, and her people turned out in thousands to honour the Queen's first appearance in public since the death of her beloved Consort. Our Number last week contained a brief report of the proceedings; and answered to-day's more detailed, whether from the Sovereign's movements, is chronicled with our Illustration of the ceremonial at page 419.

Strict precautions issued by the magistrates and announced extensively throughout the city, forbade the citizens to display bunting, to employ bands of music, or to make use of any of the hunting, to employ bands of music, or to make use of any of the ordinary methods of testifying their loyalty to and admiration of their Sovereign; and the consequence was that, although the town had signified its intention of celebrating the auspicious occasion by means of the inauguration of the memorial to her husband, there were no triumphal arches or street decorations whatever.

About half-past eleven the gentlemen who were to take part in the ceremony mustered in the Exchequer Court, Marischal-street, consisting of upwards of twenty carriages, having been formed in order, started from the hall about twelve o'clock, and, proceeding by way of Marischal-street and Broadgate, they drove up Union-street, at the vicinity of the railway station, to await the arrival of her Majesty.

The preparations made at the North-Eastern station for the reception of her Majesty and the Princes and Princesses were very simple and undemonstrative. Two tents were erected between the station house entrance and the door of the passage leading into the portico at Guild-street was laid with crimson cloth. The following gentlemen were in waiting at the station to receive the Royal party on the platform:—The Duke of Richmond, the Lord Provost and magistrates, the Hon. Captain Colville, R.N., Colonel D. H. Elphinstone; Sir Alexander Bannerman, Bart.; Lord Saltoun; Mr. Thomson, of Banchory; Colonel Fraser, of Castle Fraser; Colonel Duguid, of Castle Forbes; Mr. Leith, of Warthill, M.P.; Mr. Irvine, of Drum, convener of the county; Colonel Farquharson, of Invercauld; Russell Ramsay, John Watson, and Mr. Ross, chairman of the railway directors and officials. The Royal party arrived about half-past one.

On leaving the station a procession was formed, and proceeded by way of Guild-street, Regent-quay, Marischal-street, Castle-street and Union-street, to the site of the memorial. The route was wound its way along the densely-packed streets amid the deepest silence of the assembly, not even a cheer being heard, as if to show the universal desire to abstain from any popular demonstrations that might be distasteful to her Majesty. On reaching the platform Clerk Register Sir Alexander Bannerman, conducted the Queen and the Royal Family, who arrived by the twelve o'clock train from Edinburgh, the Prince and Princesses, who had come from Balmoral and Ballater by the 10.30 train. The Duke of Charles Fitzroy, Major-General Hood, Dr. Jenner, General Grey, and the ladies and gentlemen of the suite were conducted to the platform into the lobby and thence into the billiard-room, a handsome, lofty apartment, which forms a hall over the arch of the Union-terrace. The Lord Provost then presented to her Majesty the address of the subscribers to the statue.

After Sir Lewis's reply had been handed to the Lord Provost, Sir George Grey commanded his Lordship to kneel, when her Majesty, taking a sword from Sir George, touched the Provost on the shoulder, and said, "Rise, Sir Alexander Anderson." This ceremony concluded, the Queen and the whole of the Royal party proceeded to the platform, her presence on which was announced by the firing of artillery and loud cheers from the assembled multitude. Her Majesty, who appeared to be in excellent health and spirits, was conducted to the seat allotted, advanced to the front of the platform, while the Princes, who were all attended by aides-de-camp, and the Duke of Richmond, in their silk dresses, white bonnets, and dark grey cloaks, took up a position immediately behind her. The proceedings were opened with a prayer by Principal Campbell, who spoke for about ten minutes, the assemblage standing uncovered in the rain, which was falling heavily at the time. At the conclusion a signal was given for hoisting which had concealed the statue was hoisted to the top of a flagstaff, and the ceremony was complete. Her Majesty, having scanned the statue narrowly, bowed to the assemblage and retired from the platform, followed by the Royal party.

After the ceremony the company had luncheon in the club, the procession was re-formed and proceeded, the same way as it came, to the Scottish North-Eastern station, in Guild-street. Her Majesty left Aberdeen about three o'clock.

THE KING OF THE GREEKS ATTENDING DIVINE SERVICE AT THE GREEK CHURCH.

THE small but important community of Greek merchants in London manifested their fidelity to George I., the newly-elected King of the Greeks, by keeping a grand "Te Deum" in the Greek Church, in honour of his Majesty, at the Greek Church, in London-wall, on which occasion the King honoured his subjects dwelling in London by his presence.

The church is a small but well-built edifice in the Byzantine style, having a lofty vaulted roof. It was erected about a quarter of a century ago by the Greek residents of London, who bought the ground and expended altogether about £3,000 in the work.

In order to accommodate a portion of the applicants for admission a gallery was erected at the end of the church opposite the altar. The other arrangements were nearly the same as on ordinary occasions, except that the pillars supporting the gallery on each side were entwined with white and red roses, emblematic of the Greek flag; and the same kind of decoration being continued round the arches above the gallery. In front of the communion rails was placed a full-length crimson cloth and decorated with gilt ornaments, and in the centre was the following inscription: "Live George, King of the Greeks," in Greek—the characters being woven in dark blue on a white ground colour. At the top of the pillars and between the arches were the flags of England, Denmark, and Greece, arranged in the form of a V, the centre. As a further and symbolical sign of welcome, the carpet with which the floor of the church is covered, and the steps leading to the altar, were strewn with laurel and bay leaves and sprigs of rosemary.

The altar-screen of the church is ornamented with some beautiful paintings of scriptural subjects in accordance with the usual custom in the Greek churches, where no sculptured figures or statues—except that of the cross, are not allowed, but where pictures are freely displayed, and are held in such high honour that they are lavishly gilded and painted at a very considerable cost. On each side of the altar were two beautiful gilt stands holding three tall wax tapers in each, while behind were two silver crosses also lighted.

It had been proposed to erect a throne for the accommodation of the King, but his Majesty declined to assent to this arrangement, and expressed his intention to stand during the service, in accordance with the usual practice of the Church in the kingdom of Greece, one of the three branches of the Holy Orthodox Catholic and Apostolic Church. The only arrangement made for the King's accommodation was the placing of a hearth-rug on the floor of the church in front of the pillars supporting the gallery to the left of the altar.

About ten minutes before twelve his Majesty arrived, and was received at the entrance by the wardens of the church, with whom were also Mr. A. C. Ionides, Greek Consul-General at London; Mr. D. R. Genneadius, Greek Consul at Liverpool; and Mr. S. N. Frangoudis, Greek Consul at Manchester. The ministers of the Greek Church in England—the Archimandrite Morphinos; the Archimandrite Meletios, of Liverpool; and M. More, of Hull—officiated—attired in their satin robes, richly adorned with gold and silver, and, preceded by two white-surplice boys bearing censers and tapers, also proceeded to the entrance of the church to receive his Majesty. The Archimandrite Morphinos bore a copy of the Old and New Testament, enshrined in a magnificent binding, and carried reverently across the breast.

His Majesty, who was attended by Count Sponneck, Baron Goldencrone, Lieutenant Funch, Lieutenant Leth, Dr. Philemon, and Professor Koeppen, was conducted to the position assigned to him, when the service immediately began by the choir, chanting the Psalm of David, "Who is so great a God as our God?" After which a canon of St. Theodosius was sung by the choir, and then the Evangelists were read by the officiating minister. A short but eloquent sermon was then delivered, in which the boys' voices tapers, entered the body of the church (which was kept clear of the congregation), bearing the sacramental elements and the consecrated cross. The service, altogether was marked by much splendour of ceremonial, and the hymns and other portions were beautifully chanted. The music, which was of a very high character, accompanied by instrumental music, which is forbidden in the Greek Church. When prayers were offered up for the King and Queen, Archimandrite Morphinos; the second for all the faithful, by the Archimandrite Stratoulis; and the third for those who died in the cause of independence, by M. Mores. As soon as the King was also sung, at the conclusion of the liturgy the grand "Te Deum" burst from the choir. The words were the same as the "Te Deum laudamus," sung in our own church. The "Te Deum," the hymn, and some of the responses were chanted by a number of sacred music composed by M. Covas, the master and leader of the choir. The service, which was in Greek, was concluded by the benediction from the Archimandrite, when the King and his suite were conducted to the door by the deputation who received his Majesty at his entrance, preceded by the officiating ministers. When his Majesty left the church he was greeted with hearty cheers.

COUNTRY NEWS.

Mr. Henley, M.P., has resigned the chairmanship of the Oxfordshire Quarter Sessions.

The Barnsley Town Council have resolved to increase the town clerk's salary from £800 to 1000 guineas.

The Nantwich and Market Drayton Railway was opened on Monday last with great ceremony.

Lord Palmerston has subscribed £50 towards the building of a new town-hall and assembly-room at Rugby.

The Sheffield borough magistrates have passed unanimously a resolution in favour of Sheffield being constituted an Assize town.

The election of Lord Lifford as Vice-Warden of the Stannaries, in the room of the late Lord Devon has terminated in the return of Lord Inchiquin.

Twenty-three more bodies have been recovered from the Clarence's Head colliery, making a total of forty-one since the sinking up of the pit.

The Dean of the late Archbishop Whately was buried on Thursday week in the vaults of Christ Church, Dublin. The funeral was on a very impressive character.

The Lord Mayor and Lady Mayoress entertained the members of the Lancashire Relief Committee at dinner in the Egyptian Hall, Mansion House, on Thursday evening, to commemorate the close of their labours.

An address has been adopted on the recommendation of the Marquis of Clanricarde, Lord Lieutenant of the county, and signed by a number of gentlemen, magistrates, and landowners of the county of Galway, congratulating the country of the Earl of Leitrim.

The Duke of Cleveland has appointed Mr. G. P. Dale, surgeon, of Scarborough, a Knight of the Royal Order of Alberta, in consideration of the professional services rendered by him to the Duke and Duchess of Prussia Sophia, of Saxony, during their recent sojourn at Scarborough.

An explosion occurred on Saturday, at Penrhiwceiber, Glamorganshire, where there is one of the largest coalpits in South Wales. There were 400 workmen in the pit. Forty-three hands were at work in the headway. Many have the misfortune of whose number are severely burned, and no fewer than eight are dead.

Peterborough Cathedral was entered by thieves on Saturday night, and a number of articles of value abstracted therefrom, and also very broken open and rifled of its contents. A few days previously the Church of St. Mark, Lincoln, was broken into, and plundered by sacrilegious thieves, and no less than eight persons.

The Council of the Royal Agricultural Improvement a meeting of the members, to be held at Burlington House on Thursday next, the 22nd inst., at four o'clock, for the purpose of electing the Prince of Wales as patron, vice the late Prince Consort. His Royal Highness, as president of the Institution, vacated by the decease of Mr. Tooke, who succeeded the late lamented Prince in that capacity, and held office for a year.

A private conference on the subject of capital punishment was held at Liverpool on Monday, when resolutions were passed by magistrates unanimously agreed that the execution of the present extreme penalty of the law has produced results of views most pernicious in their tendency; and that, on the grounds of Christian principle and experience, death punishment should be abolished, and some other punishment substituted in its place.

A prosecution has been commenced at Hereford against Robert Watkins, the landlord of the Nag's Head Inn, Ross, for selling adulterated whisky, the bulk was brought to rule. Pryer, who has been convicted for a year and a half since for a similar offence, was charged in a very recent case with the same, but was acquitted on the point in law. The charge selected was one of dealing at Ross on the 3rd of February, 1868.

The Earl of Derby Knowsley addressed crowded and enthusiastic, though not always quiet, audiences on American affairs last week in Manchester and Liverpool. Speaking of the war, he unreservedly advocated the cause of the North, and claimed for it the sympathies of Englishmen of all parties, on the ground that it was a struggle conducted in the hostile to slavery, and would eventually extinguish it.

A leaden coffin has been found in the Isle of Wight, which must formerly have been attach'd to a Papal bull, has been discovered among some rubbish in the cellar of a house in Quay Passage, Cowes. On one side of the coffin are the words "Nicholas, P.P.V.," surmounted by a small cross; on the other side the letters "S.P.A.," also surmounted by a cross. The lead is very much worn, the impressions are in a state of good preservation. The bull to which the coffin was attached is supposed to have been one of Nicholas V.

The *Bristol Daily Post* states that a proposition is afoot to erect a pyramid, in memory of the late lamented Prince Consort, on Worlebury Hill, Weston-super-Mare. The idea originated with Mr. Alderman Proctor, Mr. J. B. Smyth Pigott, who has not only offered a piece of ground, in a division; and the remainder to be raised by the sale of allotments. The point of the hill upon which it is proposed to build the pyramid commands a magnificent view of the Bristol Channel, extending from Cardiff to the Land's End.

Mr Cobden, departing from his usual practice of not attending public dinners, presided on Wednesday night at the annual dinner of the Peace Society, held in Freemasons' Hall, Great Queen-street. After the hearty gathering of the members of the calling of all grades. The institution has been established for the last thirty-three years, and during that time it has received, and there are now in the schools 62 children—47 boys, and 15 girls, who are entirely supported by the subscriptions of the members of the society, during the evening, announced subscriptions to the amount of £1,000.

Two accidents on the railway line between Crewe and William Norton, got into a roadside with the Duke of Buckingham at the Bush railway station on Saturday last. The Duke was proceeding from Crewe to Stowe in the compartment in which he had travelled, the Messrs. Norton are stated to have pushed violently against him in the various rushings which took place. No conduct was resulted is not reported, but the commercials seized the Duke, dragged him out of the compartment, handled him roughly, and gave him a shaking. High words followed, and one of the Nortons is said to have struck at his assailant, but the blow fell upon the arm of the gentleman in it. The Duke came to Bath on Tuesday, from Oxford, specially to take out a summons against the Messrs. Norton, for the assault, but the case was withdrawn and consented to pay £5 to an hospital, which the Duke agreed to.

Three elections for seats in the House of Commons—one opposition, and Liberal candidates were returned. The Attorney-General and the solicitor-General were returned for their respective seats of Richmond and Plymouth, and Mr. Lefevre was returned for Reading in place of Mr. Sergeant Pigott, now Baron Pigott. There is, therefore, no change in the political representation of these boroughs, as two of them continue to be represented by the same men, and all three by politicians of the same hue. The Barnstaple election terminated on Tuesday in the return of Mr. Lloyd, the Liberal candidate. Mr. Bate, the last member for the borough, was a Conservative, and the result is, therefore, a loss to the cause, reducing the gains on the Coventry and Tamworth elections. There is still, however, a gain of one vote to the Conservative cause in the recent changes. The Conservatives at Barnstaple threaten a petition against the return of Mr. Lloyd on the ground of bribery.

MEMBERS OUT OF PARLIAMENT.

Can there be anything in the soft whisper which steals along the political atmosphere that Members out of Parliament are about to take place in the organisation of the Conservative party? Casting aside all mystery, let it be plainly said that the rumour, however faint, is distinct enough to indicate that, owing to failing health, Mr. Disraeli retires from the lead of her Majesty's Opposition in the House of Commons, and that Mr. Henley will take the place he vacates. It is true that Mr. Henley has been exceedingly frequent in his public appearances this autumn—he was again in the thick of it only the other night at Oxford last week, surrounded by most of the other Oxfordshire members—but there is absolutely no evidence as to the fact of his having risen into a higher political eminence than he has hitherto attained into a higher political eminence than he has hitherto attained into a higher political eminence than he has hitherto attained. Mr. Henley has been very profuse in his declarations that he is growing old, that he is not so strong as he could wish to be; and there has been even a slight tremor in the voice of his addresses. He has even resigned the chairmanship of the Oxfordshire Quarter Sessions, which is one of the most important, with the power for the performance of the duties of that function. But, notwithstanding all this, it is not likely that the Conservative party, of course, his power of doing the duties of Quarter Sessions would be diminished by the circumstance of his assuming the leadership of his political colleagues in the House of Lords of age and weakness. But not Cardinal Manning above like a bent and failing old man until the Conclave, in order to secure the most commanding chance, elected him to the Papacy, confidently as a temporary arrangement, as it was supposed that the old man's life long; and he had not the instant of his elevation up erect and vigorous, and become one of the most powerful of Pontiffs as well as a long-reigning one. The cases may be parallel. But we shall see. Then, too, there is also the certain theological innovations uttered by Major Beresford—who is supposed to be a ruling spirit of the Tory party—that Mr. Disraeli is not very much to allegiance to Mr. Disraeli—in his second speech delivered this autumn, only last week, at Castle Bingham, in which he congratulated Protection and witchcraft, or rather of a belief in witchcraft. It has been held by some people wiser than their fellows that he meant something special in relation to the Irish Church, and that he has immediate Irish party. So, putting this and that together, it seems that a case is made out for a new set of things and a new régime on the cold, shady side of the house next Session.

However all this may be, whatever may be the secret machinations of the prime Ministers, there is no doubt a decided reaping of parties in Parliament, where numbers are so nicely balanced, Ministers do not seem to be overwhelmed with the unbecoming desire to be in office, as Mr. Cardwell—a Cabinet Minister, who does not enjoy the enforced leisure of a Premier, and who is constantly seen in the committee-room and crotchety Mr. Milner Gibson should be President of the Board of Trade—been talking platitudes and generalities in his most platitudinous style to the Leeds people, and of that invaluable article he is! Then, but not another Cabinet Minister, who is a great deal too busy at the Board of Trade and the Governing Committee of Foreign and Financial Secretaries have been doing in India for the last four years—has not Sir Charles Wood been trying his hand at Halifax? Then, but not forgetting things connected with farming, he would not shrink from talking about them at Halifax, and Mr. Childers, who has been a constant and frequent public appearances of Sir Charles in Yorkshire, which it has not been his custom to make, is confirmation of the rumour which has been about, that, should Parliament be dissolved, he is to be the candidate, he will have to fight for his seat at Halifax at the next election. Is there not, indeed, a considerable feeling in the Liberal party from Hickleton Hall has become familiar in Halifax in the last few months?

These agricultural gatherings in the provinces are producing all sorts of interesting results. Lord Lifford, a gentleman who has a roof of land thinks it necessary to be present at any meeting of this kind that is held within a day's journey of his home, and Mr. Gathorne Hardy, who is a great agriculturist, and who has been a constant attendant at these rural assemblies, is to be the candidate for the University of Surrey. To be sure, he was well backed up by Mr. Caird, the master for the Board of Trade, in the statement on the subject that he is a learned theoretical agriculturist, and who tells the House every Session exactly how much corn there is in the land, and how much of it is in the barns, and seems to have a personal acquaintance with individual turnips all over the country. Then there was Mr. Bruce, one of the Commissioners of Parliament, who is now to be seen in the house who have the twang and the tone of the old school of Henry Wyndham and Sir Thomas Acland since the passing of the Reform Bill; and there was his colleague, Mr. George Cubitt, who has given the best proof he can of the moderate of his pretensions to be the successor of the late Mr. Henry Drummond by taking care never to open his mouth, publicly at least, since he was elected for East Surrey. But Mr. Lambert, who is himself, all for he has begged at the conference from the South, who came with all the halo about him of the battle of Sadowa, and who has shown what he can have done got service, and who reiterated on his side of the question nearly as giddy and quite as confidently, if not with so much popularity-evoking power, as Mr. Henry Wyndham and his colleague Colonel Loman and Colonel Loman get on Mr. Lindsay's right hand at the feast at Chertsey? To be sure, the Conference was not confined to the Tory supremacists, but that what has tried to do with the grand principles involved in the exposing of the Irish Church.

It is a great distinction to be the sole representative of a great class or profession in the House of Commons, even if the great profession or class is represented by only one man. Sir Fitzroy Kelly was the last who could avoid the denial. The doctors—medical doctors we mean—have rarely sought the honour of Parliamentary representation. Mr. Ferguson, of Glasgow, has lately to obtain it are too busy. Fancy the agonies of a whipper-in chasing an M.D. in full practice over Dublin, in the town to have a seat in the House! Mr. Dillwyn, the Select Committee on a Railway Bill being obliged peremptorily to adjourn because one of its members attended by one of the Queen's doctors was called away suddenly! That would make no denial. When George IV. wanted to make Sir Astley Cooper a Peer, he was advised that, under the great man's patronage, to give up his practice, which he never would, it was impracticable; and the inducement would not be consistent with the fact that the functions of the Lower House are the duties of the practitioner of the highest rank. Then, the great man would be in existence a doctor on whom Fortune has showered her favours so lavishly that he is practically exempt, and can afford that attention which has established his reputation on the extensive care of a district, on the whole body politic, where he can bring his professional acquirements to bear on the physiology of the condition of the land, and do that for his country, in a certain sense, which he has done for the individual. Then, too, the Queen flourish as a Parliament man, and elect himself into the guardian and the vindicator of the rights of his profession. Happily for the present age, the Royal College of Physicians and Surgeons in the United Kingdom may sleep in peace, knowing, as they do, that a vigilant eye and an unclaimed heart are over at their service in the great council of the nation. Well, the county of Leitrim rejoices that it has the privilege of returning a perfectly unique member to Parliament, one who has had no rival since poor, enthusiastic, irascible Dr. Michell, who sat for a short time for Truro, honourably and indignantly resigned a seat in Parliament which he could not retain on terms which implied something like corruption. Of course, sanitary science is under the special charge of the sole medical M.P., and the vexed—so vexed as to have assumed a certain grandeur of pro-

portion—question of sewage has not been suffered to escape his ken. Last Session he twice brought forward the subject, and three mortal hours he dwelt upon it, when he was counted out; and he tried a second time to have four mortal hours more, which, if he had succeeded—looking to the time he began—would have brought the sitting of the House on that occasion to a quarter past six o'clock in the morning exactly. But zeal has no special area, and the question, which was not in odour with the House, has been removed during the recess—last week—to the fitting locality of Lambeth, where, doubtless, it is well understood, and will be considered from the most practical point of view.

THE FARM.

THE harvest-homes, at one of which Jenny Lind sang a hymn, have made very satisfactory progress this autumn; but the agricultural dinners have been rather quiet affairs. No "charmed weapon" has been brandished before the admiring audience at Castle Hedingham or elsewhere; but Sir Edwin Landseer has amused and delighted the Staffordshire farmers, in what he declared was a maiden speech, by protesting against the lumps of obesity he met with at their show, as vigorously as he did last year against the ear-cropping of terriers and Dalmatians. The Duc D'Aumale has made a speech in such admirable English that, it is said, the most critical ears could only detect one slight misapplication of a word; and Mr. Mechi has advocated oilcake for his "necessary evils" to an extent that neither the purse of man nor stomach of beast could compass for three months. The highest living authority assures us that he once gave a bull of iron constitution 24 lb. a day for six weeks (and we have heard of a show heifer under nearly as high pressure); but he considers that 7 lb. or 8 lb. a day for six weeks is the utmost that a prudent breeder ought to go to for "common commercial beasts," when he gives them "the last dip" for Christmas. Prize beasts are, of course, trained differently; but even with them the highest feeders seldom think it necessary to go beyond 14 lb. in November, and very few will eat that.

The autumn in Scotland has wandered very widely from Keats's description of it, "close bosom-friend of the maturing sun." In the Carse of Stirling, certainly, nothing is left out save the beans; but when we got father north, last week, we found a copious remnant of the oat harvest still uncarried, and some of it in the west of Aberdeenshire in a piteous plight, from six days continuous soaking. However, a change seemed to come with the first quarter of the new moon, and the harvest suppers loom in sight at last. The bere—which is not used for meal, as in Skye—and the barley were secured a few weeks ago in good condition, and both are turning out well. Oats will be of good quality; but the grub got at them in the spring, and the yield is rather light and the price still lighter. Turnips are very good, and Mr. M'Combie, the celebrated "King of the Scottish Feeders," has no less than 303 (about 200 of them "heavy blacks") in his stalls and yards busily engaged on the Aberdeen yellows and swedes, along with oat straw and oilcake. The latter article is becoming so dear that Mr. M'Combie is substituting crushed corn (i.e., oats, bere, and barley equally mixed) for it to a great extent. The gem of the Tillyfour herd is a seven months' calf, "Kate of Aberdeen," from the second prize heifer at Battersea; and she is at present one of the most, if not the most, perfect things of her age that we have seen during our five years' wandering among the herds.

At Falkirk Tryst there were hardly any Aberdeens or Galloways to be seen, and the North and West Highland Cattle and the blackfaced sheep had the pull over the "spotted ones" (as they call the crosses) and the Cheviots; but still there was a rise on everything as compared with last year. Lady Menzies' blackfaced wedders, the best in the market, fetched 32s., and some two-year-old Cheviot wedders 36s. 6d. On Tuesday the sales were very quick; and at eleven o'clock we found nearly all the best lots of cattle tarred and put to one side of the muir. The horses were a very middling lot, and four fifths of them would "not have passed Dick," as the Edinburgh Veterinary College men would say. There were a few Shetland ponies, at all prices down to £2 10s.; mules with about as much mouth as Mr. Waterton's alligator; and donkeys which had just finished their toils for the season at the fashionable Bridge of Allan.

Hereford Fair and Show took place on Tuesday and Wednesday last. At the fair there was below the average number of cattle on offer. The prices ruled about five per cent above those of last year, and, although we missed the more than octogenarian breeder of "white faces" (Mr. Monkhouse) from within the confines of the showyard, yet on the pitching of Broad-street the faithful herdsman, "Sam," from the Stow, looked proudly on another dozen of "Chieftains," two-year-old steers, which the wary "Bufton" had previously secured at £28 each, and who readily realised £80 for the pick of two. The fine quality and noble proportions of these animals were the theme of general admiration, and we heard of no similar price being obtained for animals of the same age. Perhaps Messrs. Coxen, of Birmingham, who bought eighty-two on the first day and a large number on the second, may be considered amongst the largest buyers from the midland counties.

The show extended this year for the first time to the close of the fair. The principal prize of £20 was awarded to Mr. Roberts's Sir Thomas (2228), exhibited in that favourite class amongst the Hereford men, consisting of bull, cow, and their offspring. The next principal prize was £15, which was given to Mr. Capper's bull-calf Worcester, winner of the second Royal honours at the place of his title. Amongst the yearlings, Mr. Baldwin's Battersea (1865) again came to the front, and is much improved since his Worcester defeat. In the two-year-old class Morris's Moderator had to give place, for the first time, to Hollings's Chieftain the 2nd (1917). Amongst the females, Mr. Roberts again claimed first honours with his pair of heifer calves by Sir Thomas, and may perhaps well feel disappointed that Mr. Arkwright's unnoticed yearling at Worcester intercepted his doing so in the next class. That excellent prize for the best lot of breeding cows, according to acreage, attracted considerable competition, and was awarded to Rea's lot of seven, from Westonbury. The sheep classes were better filled than heretofore, and two out of the three prizes offered for shortwools were won by Downing's Ryelands.

LINCOLN AUTUMN MEETING.—MONDAY.

Carholme Stakes.—Lyra, 1. Fauconberg, 2. Bouquet, 3.
Selling Hurdle Race.—Princess, 1. Cronstadt, 2. Quarantine, 3.
Lincoln Autumn Handicap.—The Monk, 1. Earl of Surrey, 2. Bally Edmond, 3.
Blankney Selling Stakes.—Contractor, 1. Weatherden c., 2. The Sapper, 3.
Rifle Volunteer Handicap Hurdle Race.—Hetman, 1. Margery, 2. Endor Witch, 3.

TUESDAY.

Lindum Nursery Handicap Plate.—Land of the West, 1. Fauconberg, 2. Lyra, 3.
Witham Handicap.—Bernice, 1. Topsy, 2. Quicksand, 3.
Consolation Scramble.—Cronstadt, 1. Maid of the Mist, 2. Doncaster, 3.
Her Majesty's Plate.—Caller Ou, 1. Bally Edmond, 2. Woodford, 3.
Innkeepers' Selling Stakes.—Weatherdam's dam c., 1. Chalybeate, 2. Dirt Cheap, 3.
Great National Autumn Steeplechase.—Reporter, 1. Socks, 2. Mary Ann, 3.

The bread-fruit tree from South Africa in the tropical department of the Crystal Palace is now bearing its colossal fruit.

At the Notts Michaelmas Quarter Sessions, on Wednesday, it was decided to adopt the Highway Act for the county.

The third annual ploughing-match of the Isle of Wight Agricultural Society was held yesterday week. The day was fine, and thirty-five ploughs competed for the prizes offered.

Last week the births of 1939 children—1001 boys and 938 girls—were registered in London. In the ten corresponding weeks of the years 1853-62 the average number (corrected) was 1843.——There were 1205 deaths registered in London last week. Of these 610 occurred under twenty years of age; 361 at twenty years and under sixty; and 234 at sixty years and more advanced ages. In comparing the present results with those of previous weeks there is found to be a decrease in the deaths of young persons, but an increase in those of the aged part of the population. The average number of deaths in the ten corresponding weeks of 1853-62 (viz., the forty-second in each of those years) becomes, after the omission of deaths from epidemic cholera in 1854 and with a correction for increase of population, 1149. Twenty-nine cases of smallpox were returned, a number which shows little variation from the weekly results obtained during the last two months. The deaths from scarlatina were 114; they exhibit a decline on the heavy returns of scarlatina in previous weeks. As the weather grows colder bronchitis begins to be more fatal; there were ninety-four deaths from it in the week.

MONETARY TRANSACTIONS OF THE WEEK.

(From our City Correspondent.)

ALTHOUGH a new loan for Portugal of £2,500,000 has been brought forward—and although it is stated, on good authority, that France will shortly require one for £16,000,000 sterling—there has been rather more firmness in the value of National Stocks. The business doing, however, has been very moderate. The Unfunded Debt has shown signs of weakness.

The supply of money on offer in the discount market continues very large; yet, owing to the activity in the demand for commercial purposes, no advances can be obtained in Lombard-street under the following quotations:—

Thirty days' bills	.. 3¾ to 4 per cent.		Four months' bills	.. 4½ to — per cent.
Sixty days' bills	.. 4¼ "		Six months' bills	.. 4¾ to 5 "
Three months' bills	.. 4½ "			

In the Stock Exchange money may be had at from 2½ to 3 per cent.

Most of the Continental money markets are very firm. We annex the quotations in the leading cities:—

	Bank rate, per cent.	Open market, per cent.		Bank rate.	Open market.
Paris	5	4½	Amsterdam	3	3
Vienna	6	5	Turin	6	6
Berlin	4	4	Brussels	4	4
Frankfort	3½	3½	Hamburg	—	5½
			St. Petersburg	6	9

Another sale of bills on India has taken place. The amount disposed of was £300,000, and the applications within the limits were for £3,170,000. The minimum price on Calcutta and Madras was 1s. 11⅞d., and on Bombay, 1s. 11¾d., per rupee.

The imports of the precious metals have amounted to about £300,000, and nearly the whole of them have been disposed of to the Bank of England. About £50,000 has been withdrawn for export purposes.

The Portuguese loan will not, it is supposed, have much influence upon our money market. It is in a three-per-cent stock, at 48. About £1,000,000 has been subscribed privately, and £250,000 is reserved for Portugal.

The steamer for the East has taken out £202,034, of which £20,400 is gold for Alexandria, £40,000 for the Mauritius, £132,434 silver for China and the Straits, and £7299 in gold and £1901 in silver for India.

The Paris Bourse has been extremely inactive, and prices have given way to some extent.

Debentures for £21,000, bearing interest at the rate of six per cent per annum, have been disposed of for the Cape of Good Hope Government. The average price realised was 108.

The dealings in Home and Indian Stocks, on Monday, were limited; nevertheless, very little change took place in prices. Consols, for Money, were done at 93 to 93⅛; Ditto, for Account, 93⅛ ¼; Reduced and New Three per Cents, 92⅞ 93; Long Annuities, 14⅜; Red Sea Ditto, 21; India Five per Cents, 109¼; Ditto Four per Cents, 100⅜; Ditto, Bonds, 19s. to 22s. prem.; Exchequer Bills, 2s. dis. to 1s. prem. Bank Stock sold at 235; India Ditto, 224; and the Five-and-a-Half per Cent Rupee Paper, 116⅜. On the following day Consols, for Transfer, closed at 93⅛; Ditto, for Time, 93⅛ ¼; Reduced and New Three per Cents, 93⅛ ¼; Bank Stock, 235½; India Stock, 224; Ditto, New, 109¼; Ditto, Four per Cents, 100⅞ ⅞; Exchequer Bills, 2s. dis. to 1s. prem. On Wednesday Consols sold at 93 to 93⅛; Reduced and New Three per Cents, 91⅞ ⅞; India Five per Cents, 109¼ ⅜; Ditto Four per Cents, 100⅞; Ditto, Five-and-a-Half per Cent Paper, 116⅜; Exchequer Bills 1s. dis. to 2s. prem. On Thursday Consols were somewhat firmer, at 93 to 93⅛ for Money, and 93⅛ to ¼ for Time. The Reduced and New Three per Cents sold at 91⅞ to ½; Exchequer Bills were 1s. dis. to 2s. prem.

In the Foreign House, attention has been chiefly directed to Mexican, Greek, and Turkish Securities, the prices of which have fluctuated to some extent. The Confederate Loan has marked 65 to 67; the Scrip of the New Brazilian Loan, ⅞ to 1⅛ and ⅛ to ⅜ prem.; of the Portuguese, ⅞ to 1⅛ and ½ to ⅜ prem.; Brazilian Five per Cents have realised 99¼ ex div.; Ditto, 1859 &c., 100 ex div.; Ditto, Four-and-a-Half per Cents, 92; Egyptian, 101; Greek, 30¼; Ditto, Coupons, 15; Mexican Three per Cents, 48⅛; New Granada, 15⅞ ex div.; Peruvian Four-and-a-Half per Cents, 1862, 87¼; Portuguese Old Three per Cents, 49⅜; Ditto, 1862, 48?; Russian Five per Cents, 9⅛; Spanish Three per Cents, 55½; Ditto, Passive, 36⅜; Ditto Certificates, 14⅜; Turkish Old Six per Cents, 92¼ ex div.; Ditto, 1858, 71; Ditto, 1862, 71⅜; Venezuela Three per Cents, 25½; Ditto Six per Cents, 61⅜; and Italian Five per Cents, 72¼; Columbian Scrip has sold at 14.

There has been more firmness in the market for Joint-Stock Bank Shares, and an increased amount of business has been transacted. Prices in some instances exhibit a slight improvement, when compared with last week. Alliance have been done at 44⅜; Ditto, New, 21; Australasia, 75; Ditto, New, 37; Bank of Egypt, 27½; Bank of Otago, 11⅜; Chartered of British Columbia, 12; Chartered Mercantile of India, London, and China, 71; Consolidated, 10½; Continental, 9⅞; Hindustan, China, and Japan, 20½; Imperial, 24; Imperial Ottoman, 18⅜; London and Brazilian, 50½; London, Buenos Ayres, and River Plate, 53½; London, Birmingham, and South Staffordshire, 10½; London Chartered of Australia, 30; London and South African, 28; Ditto, New, 20; London and South American, 5¼; London and South Western, 10; London and Westminster, 80; National of Liverpool, 19½; National Provincial of England, 128½; Ditto, New, 37½; Ditto, 27½; New Zealand, 3½; Provincial of Ireland, 92½; South Australia, 41½; Standard of British South Africa, 25½; Union of Australia, 57⅜; Union of Ireland, 20⅜; and Union of London, 38⅜.

Colonial Government Securities have been dealt in to a limited extent. The leading quotations are as follow:—Canada Six per Cents, 1877-84, 101½; Ditto, Five per Cents, 91; Mauritius Six per Cents, 1878, 109⅞; Natal Six per Cents, 108½ ex div.; New South Wales Five per Cents, 102⅞; Nova Scotia Six per Cents, 105½; South Australian Six per Cents, 113½; and Victoria Six per Cents, 111.

Miscellaneous Securities have been in moderate request, as follow:—Anglo-Mexican Mint, 22½; East India Irrigation and Canal 5⅛; Egyptian Commercial and Trading, 4½; Canada Land, 84; Crystal Palace, 39⅜; General Credit and Finance of London, 4⅜; Hudson's Bay, 8⅜; International Financial Society, 10½; Joint-Stock Discount, 6½; London Financial Association, 15⅜; London General Omnibus, 2½; National Discount, 9⅜; Peninsular and Oriental Steam, 85; Rhymney Iron, 25½; Rio de Janeiro City Improvements, 25½; Royal Mail Steam, 79½; Van Diemen's Land, 12⅜; Berlin Waterworks, 9⅜; East London, 132½; European Gas, 15⅜; Phoenix, 122; Indemnity Marine Insurance, 144; London and Provincial Marine, 2½; Ocean Marine, 17⅞; Thames and Mersey Marine, 6½; and Universal Marine, 5⅜.

Most American Government Securities have changed hands slowly. Erie shares have been 68; Ditto, Seven per Cent Preference, 66; and Illinois Central, 18½ discount.

The Railway Share Market has been steady, as to price; but the dealings in it have been by no means extensive. Annexed are Thursday's official closing quotations:—

Ordinary Shares and Stocks.—Blyth and Tyne, 161; Great Eastern, 50⅜; Ditto A Stock, 47; Great Northern A Stock, 130½; Great Western, 65½; Lancashire and Yorkshire, 111½; London and Blackwall, 71⅜; London and Brighton, 111⅜; London, Chatham, and Dover, 45½; London and North-Western, 102⅜; London and South-Western, 101⅞; Manchester, Sheffield, and Lincolnshire, 47½; Metropolitan, 131½; Midland, 128½; Ditto—Birmingham and Derby, 97⅜; North-Eastern—Berwick, 101; Ditto, Stockton and Darlington, 37½l; South-Eastern, 95⅜; Vale of Neath, 86½.

Preference Shares.—Great Eastern, Five per Cent, No. 1, 111⅜; Great Northern Five per Cent, 109; Great Western Five per Cent, 103; Midland—Bristol and Birmingham, 138; North Eastern Four per Cent, 93⅜; Ditto Four-and-a-Half per Cent, 101½.

Lines Leased at Fixed Rentals.—London, Tilbury, and Southend, 100; Preston and Wyre, 45½; Shrewsbury and Hereford, 137.

British Possessions.—Calcutta and South-Eastern, 105½; East Indian, 103; Grand Trunk of Canada, 22⅜; Ditto, Second Preference, 70⅜; Ditto, Fourth Preference, 31½; Great Indian Peninsula, 109⅛; Great Western of Canada, 10⅜; Madras Five per Cent, 105½; Scinde, 107; Punjaub, 107.

Foreign.—Antwerp and Rotterdam, 8⅜; Bahia and San Francisco, 10⅜; Dutch Rhenish, 18½; Namur and Liege, Six per Cent Pref, 20⅜; Ottoman, 12½; Sambre and Meuse, 10; San Paulo, 22⅜; Turin and Savona, 15⅜; Western and North-Western of France, 20½.

The return of the Bank of England for the week ending Oct. 21 shows the following results, when compared with the preceding statement:—

A decrease of circulation of ..	£30,229	An increase of bullion of	£74,658
A decrease of public deposits of ..	178,217	An increase of rest of	16,971
A decrease of other deposits of ..	1,081,556	An increase of reserve of	133,813
A decrease of securities of	1,353,689		

The total circulation is £22,824,466. Public deposits amount to £1,437,815; and private deposits to £15,271,262. Securities are £31,028,810; and the stock of bullion is £14,645,259.

THE MARKETS.

CORN EXCHANGE (Oct. 19).—The supply of English wheat on offer in to-day's market was limited; nevertheless, all kinds moved off slowly, at about last week's prices. There was a large quantity of foreign wheat on the stands. Good and fine samples commanded previous rates; but low and damp qualities were very inactive, at barely last week's currency. Floating cargoes of grain were steady. The show of barley was by no means extensive; yet the inquiry ruled somewhat heavy, on former terms. No change took place in the value of malt. Good sound oats were steady in price; but inferior qualities gave way 6d. per quarter. Both beans and peas declined 1s. per quarter, with a heavy sale. No change took place in the value of either English or foreign flour.

Oct. 21.—All kinds of produce met a heavy demand to-day. Compared with Monday, however, no change took place in prices.

English.—Wheat, Essex and Kent, red, new, 40s. to 45s.; ditto, white, 41s. to 47s.; Norfolk and Suffolk, red, 40s. to 45s.; rye, 32s. to 34s.; grinding barley, 26s. to 28s.; distilling ditto, 29s. to 32s.; malting ditto, 28s. to 38s.; Lincoln and Norfolk malt, 60s. to 66s.; brown ditto, 50s. to 57s.; Kingston and Ware, 60s. to 66s.; Chevalier, 66s. to 68s.; Yorkshire and Lincolnshire feed oats, 18s. to 22s.; potato ditto, 24s. to 26s.; Youghal and Cork, black, 16s. to 22s.; ditto, white, 16s. to 23s.; tick beans, 30s. to 31s.; grey peas, 32s. to 34s.; maple, 36s. to 38s.; white, 36s. to 37s.; boilers, 36s. to 38s. per quarter. Town-made flour, 40s. to 43s.; town households, 34s. to 36s.; country marks, 27s. to 30s. per 280 lb. French, 35s. to 39s. per sack. American 19s. to 25s. per barrel.

Arrivals this Week.—English and Scotch: wheat, 660; barley, 30; malt, 380; oats, 290; flour, 530. Irish: oats, 500. Foreign: wheat, 9980; barley, 6050; oats, 17,710; flour, 40 sacks.

Seeds.—The amount of business doing in seeds is very limited, and the quotations are barely supported. Cakes support previous rates.

Linseed, English, crushing, 64s. to 69s.; Calcutta, 64s. to 65s.; hempseed, 44s. to 48s. per quarter; coriander, 16s. to 19s. per cwt.; brown mustard seed, 10s. to 14s.; white ditto, 11s. to 12s.; tares, 5s. 6d. to 6s. per bushel; English rapeseed, 60s. to 64s. per quarter. Linseed cakes, English, £9 10s. to £10 5s.; ditto, foreign, £9 10s. to £10 15s.; rape cakes, £6 to £6 12s. per ton; canary, 36s. to 50s. per quarter; red clover seed, 38s. to 48s.; white ditto, 51s. to 58s. per cwt.

Bread.—The prices of wheaten bread in the metropolis are from 7d. to 7½d.; of household ditto, 5½d. to 6½d. per 4 lb. loaf.

Imperial Weekly Averages.—Wheat, 40s. 4d.; barley, 34s.; oats, 18s. 8d.; rye, 30s. 2d.; beans, 36s. 5d.; peas, 34s. 7d.

The Six Weeks Averages.—Wheat, 42s. 8d.; barley, 34s. 11d.; oats, 20s. 1d.; rye, 31s. 1d.; beans, 38s. 2d.; peas, 36s. 3d.

English Grain Sold Last Week.—Wheat, 99,519; barley, 88,352; oats, 11,934; rye, 451; beans, 4254; peas, 1723 quarters.

Tea.—There is a fair demand for most kinds, and prices are well supported.

Sugar.—A large business has been doing in raw qualities, at an advance in the quotations of 1s. 6d. per cwt. Barbadoes has realised 36s. to 41s. 6d.; Jamaica, 35s. to 38s. 6d.; St. Vincent, 35s. to 37s. 6d. per cwt. Refined goods are firm, at 46s. per cwt. for common brown lumps. The stock of sugar is 104,052 tons, against 85,600 tons last year.

Coffee.—No quotable change has taken place in prices, and the demand is far from active. Stock, 10,620 tons, against 9100 tons.

Rice.—The demand is steady, at previous quotations. Stock, 41,905 tons, against 60,533 tons.

Provisions.—Most descriptions of butter are in fair request, at very full prices. There is a full average business doing in bacon, at extreme rates. Hams and lard are quite as dear as last week. In other provisions very little is doing.

Tallow.—The market is inactive. P.Y.C., on the spot, is selling at 44s. 3d. to 44s. 6d.; and for December, 45s. per cwt. The stock consists of 55,430 casks, against 46,619 ditto last year. Rough fat, 2s. 3½d. per 8 lb.

Oils.—Linseed oil is selling at 43s. per cwt. Rape is quoted at from £41 to £44; cocoa-nut, £45 to £47 10s.; and fine palm, £39. French turpentine, 72s. per cwt.

Spirits.—Rum moves off slowly, at 1s. 5d. per gallon for proof East India. Brandy is quoted at from 2s. to 11s. 4d.; Hambro' spirit, 1s 4d. to 1s. 5d.; English ditto, grain, 1s. 8d. to 1s. 10d.; ditto, rice, 1s. 4d. to 1s. 5d.; and English gin, for export, proof, 2s. 9d. to 3s. per gallon.

Hay and Straw.—Meadow hay, £3 to £4 5s.; clover, £4 to £5 10s.; and straw, £1 6s. to £1 14s. per load. Trade dull.

Coals.—Best house coals, 20s. to 21s.; seconds, 18s. to 19s.; Hartley's, 16s. to 17.; and manufacturers', 13s. 3d. to 15s. 3d. per ton.

Hops.—The demand for all kinds is somewhat active, at extreme quotations. Present rates range from 100s. to 160s. per ton.

Wool.—Most descriptions command extreme rates, with a moderate inquiry.

Potatoes.—The supplies are large, and the demand is inactive, at from 50s. to 90s. per ton.

Metropolitan Cattle Market, Thursday, Oct. 22.—Our market to-day was but moderately supplied with beasts, chiefly in middling condition. The few prime breeds on offer moved off steadily, at Monday's currency, the top figure being 5s. per 8 lb. Otherwise, the beef trade was heavy, at late rates. There was a good consumptive inquiry for sheep, and previous quotations were well supported. The best Downs realised 5s. 4d. to 5s. 6d. per 8 lb. A few choice calves produced 4s. 8d. per 8 lb.; but inferior qualities of veal were a dull sale, at Monday's currencies. Pigs and milch cows were very dull, and rather drooping. Per 8 lb., to sink the offal:—Coarse and inferior beasts, 3s. 2d. to 3s. 6d.; second quality ditto, 3s. 8d. to 4s. 2d.; prime large oxen, 4s. 4d. to 4s. 8d.; prime Scots, &c., 4s. 10d. to 5s.; coarse and inferior sheep, 3s. 8d. to 4s.; second quality ditto, 4s. 2d. to 4s. 6d.; prime coarse-woolled sheep, 4s. 8d. to 5s. 2d.; prime Southdown ditto, 5s. 4d. to 5s. 6d.; large coarse calves, 3s. 4d. to 4s. 2d.; prime small ditto, 4s. 4d. to 4s. 8d.; large hogs, 3s. 6d. to 4s.; neat small porkers, 4s. 2d. to 4s. 4d.; suckling calves, 12s. to 20s.; and quarter-old store pigs, 20s. to 26s. each. Total supply:—Beasts, 924; cows, 140; sheep, 4630; calves, 320; pigs, 400. Foreign: Beasts, 450; sheep 1240; calves, 225.

Newgate and Leadenhall.—The supplies of meat are moderately good, and the demand is steady, as follows:—Beef, from 2s. 8d. to 4s.; mutton, 3s. 4d. to 4s. 6d.; veal, 3s. 4d. to 4s. 4d.; and pork, 3s. 2d. to 4s. 4d. per 8 lb., by the carcass. ROBERT HERBERT.

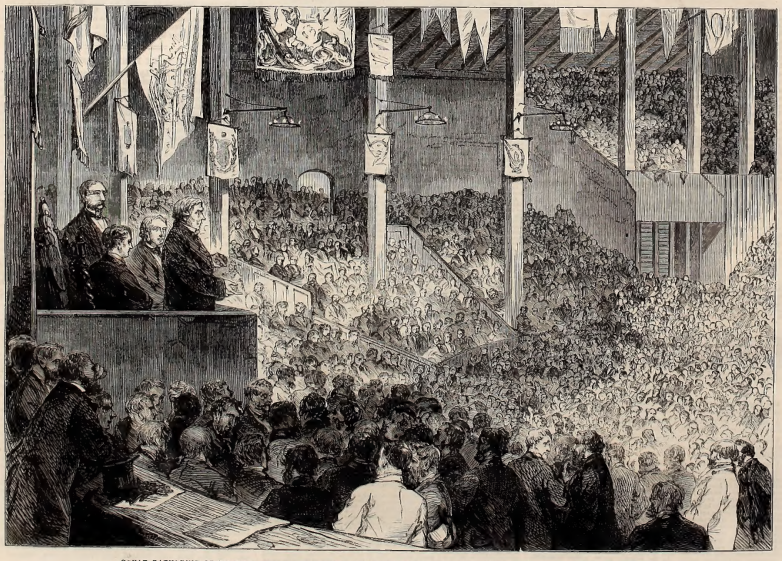
THE LAWRENCE ASYLUM AT MURREE.

IN the Himalayas, five thousand feet above the level of the sea, is situated Murree, one of the most picturesque of the sanitariums of India; and on the spur of the hill on which Murree stands is built the Lawrence Asylum, of which we give an Engraving, from a photograph by Robert T. Hickey, Esq., Captain 101st Foot. This asylum has been erected for the education of the children of European soldiers serving in India, and is a branch of the parent institution established at Sanawur by the late Sir Henry Lawrence.



THE LATE LORD LYNDHURST.

IT is probable that if Lord Lyndhurst had passed from this life ten years ago, when he had attained to a decade more than the period allotted to mortal man, the circumstance would have attracted less notice, and certainly less interest, than it undoubtedly has at the present moment. It is mainly to the fact that within the last few years Lord Lyndhurst has, from time to time, performed intellectual and, in some sort, physical feats, which were something more than wonderful in an octogenarian who was verging on nonagenarianism, that so much notice has been now bestowed on him. It was a world-wonder to behold a man of his years appearing in his place in Parliament and delivering speeches which exhibited all the characteristics, mellowed by experience and toned down by change of circumstances, which marked those wonderful Parliamentary exercitations in which, under the denomination of summaries of the Session, Lord Lyndhurst used to review the doings of the Whig Government, and that in such a manner as to move even the equable temper and easy epicureanism of Lord Melbourne into something very like rage. Until the last year Lord Lyndhurst has been accustomed once or twice in the Session to pronounce a set oration on the affairs of the country, and to give advice where he thought it was needed, in the abstract character of a statesman who had studied men, things, and politics for half a century, and ought, therefore, to be supposed competent to utter, as it were, judicial decisions on public questions then in issue. A great deal has been said and written of these speeches, and mostly in a strain so laudatory that they have been treated as storehouses of wisdom and as models of Parliamentary oratory. Those who from an unbiassed position heard and carefully noted the nature and subject-matter of those addresses, and were witnesses to their delivery, would be inclined to say that, taken for themselves, they have been very much overrated. It is undeniable that the speeches in question were clear statements of facts put together with logical sequence, that their language was pure English, their sentences constructed neatly, and always finished and complete; but the arguments were commonplace and the deductions so obvious as not to have about them any merit of originality. The marks of elaborate preparation were palpable; and, in short, though singular and even striking as coming from a man at an age which is generally inconsistent with the mental and oratorical qualities which Lord Lyndhurst then developed, they were accepted as miracles beneath the surface of which no one cared to look. Then, as to the physical part of those displays, it is quite true that, amidst a silence so complete and an attention so rapt as that which always awaited one of these speeches from Lord Lyndhurst, the earlier parts of them were heard, and they were spoken in tones which even in decay were measured, clear, and silvery. But after the first twenty minutes nature had her way, and much that was said was lost even on the most attentive and quickest ear. But, whatever may be the opinion of those last political acts of a man who in his time played many parts, and all of them skilfully, it is certain that they caused Lord Lyndhurst to fill a space in the public eye in the last years of his life which he would, perhaps, not otherwise have occupied. Looking back to his lengthened career, and considering the various qualities of his mind and intellect, Lord Lyndhurst would have been a remarkable man in any condition of life; but it would seem as if he was especially designed to become the kind of statesman and the kind of lawyer that he was. His knowledge of the principles and practice of both these callings was just sufficient to enable him to make his nearly brilliant but wholly keen and practical talents, energy, and courage—a kind of negative moral courage—available for getting on. It has been well said of him that he was destined to

THE SOCIAL SCIENCE CONGRESS AT EDINBURGH.

LORD BROUGHAM DELIVERING THE OPENING ADDRESS IN THE FREE-CHURCH ASSEMBLY-HALL.

GREAT GATHERING OF WORKING MEN IN THE CIRCUS—LORD BROUGHAM, CHAIRMAN, ADDRESSING THE MEETING.—SEE PAGE 2.

get on both by his better and his worse qualities. With all his abilities, and with graces of manner and person well calculated to make a favourable impression on those on whom depends the advancement of a practising barrister, he did not leap at once into great business, and he began to reap the substantial rewards of his profession about the time that they are usually attained. The clearsightedness of Lord Castlereagh, who accidentally witnessed his forensic powers, was the cause of his becoming something more than a successful lawyer; and a seat in Parliament, obtained under the auspices of the leader of the Tory Government in the House of Commons of the day, led to the usual promotion. The Solicitor-generalship came in due course, and his career in that office has found a parallel at the present moment when the second law officer of the Crown overstepped and obscured the Attorney-General in Parliament and in the conduct of the business of the Government. Sir Robert Gifford, an able lawyer and a most estimable man, paled before Copley, and was probably only too glad to seek the comparative ease of the Bench and leave his *quasi* subordinate to ruffle it in the higher place of Attorney-General. In due course the Mastership of the Rolls was attained, and Sir John Copley was supposed to be learning equity and training for the chancellorship. By an anomaly in our Parliamentary law, the Master of the Rolls is the only Judge who can sit in the House of Commons, and Copley retained his seat in that assembly, and kept himself steadily within the ring-fence of politics wherein are kept place and power. At length he ascended the "marble chair," having become Lord Chancellor in the short-lived Administration of Canning; and he continued to hold the seals with Lord Goderich, and subsequently with the Duke of Wellington, giving his assent to Catholic Emancipation with a facility which now causes no surprise, although he was believed to be a standing and personal pledge in the Cabinet against any such concession. Leaving office with the Tory Government, and accepting the subordinate judicial office of Chief Baron, Lord Lyndhurst then became, and continued to be up to 1841, when he, for the third time, became Lord Chancellor (having held the Great Seal a second time in the brief Ministry of Sir Robert Peel in 1835), a remarkable political character. His contest with the Whig Government on the Reform Bill; his possession of the confidence of William IV. in the second epoch of his reign to such an extent that he was once charged by that Sovereign, as Prime Minister, with the formation of a Government, although he did not succeed in his object; his guerrilla attacks on the Whig Government of Lord Melbourne, above alluded to, have been recently recalled to notice in the numerous and full biographies of him which have appeared in most of the journals. When he came into office in 1841 with Sir R. Peel he seemed to have subsided into a calm performance of the routine duties of his office, not appearing to interfere with the policy which was pursued, and acquiescing with indifference, real or assumed, in the free-trade measures which Sir Robert Peel inaugurated. It is remembered by frequenters of the House of Lords and the Court of Chancery of those days that Lord Lyndhurst appeared to have taken to a sportive view of public life; he was always cheerful, even jocose on the woolsack and the bench, keeping up an under-current of facetious comment on all that occurred, in tones more or less audible, for the amusement of those who were near him. By the time that he was obliged to leave office, on the change of Ministry, in 1846, he had grown old, and practically retired from active public life. He still occasionally attended the sittings of the House of Lords on appeals; but after the delivery of an able judgment on the celebrated Bridgewater will case in 1850, he ceased to perform any of the judicial functions to which he was entitled as a Peer. In fact, Lord Lyndhurst had nearly disappeared from the public view, until his revival—shall we say resuscitation—in the House of Lords, of which we have already spoken, occurred. Although it would not be easy to make out that Lord Lyndhurst was what is generally called and accepted as a great man, he was something very near it. That he has made his mark in the history of this country is indisputable; but it will hardly be said of him that he was a great statesman, or even a great lawyer. His best achievements as a Judge were coeval with his occupancy of the function of Lord Chief Baron, for which his common law education and practice had better adapted him than for the duties of the first Judge in Equity, the practice, if not the principles, of which he had confessedly to learn after he had attained to the Bench. It has been his fortune to have been, in the course of his career, one of the most unpopular men in this country, but at last to have died an object of admiration as one of England's sages.

Our Portrait of Lord Lyndhurst is from a photograph by Mr. Herbert Watkins, of Regent-street; and is taken, by permission, from "Herbert Fry's National Gallery of Photographic Portraits."

THE LATE LORD LYNDHURST.

THE LAWRENCE ASYLUM, MURREE, IN THE HIMALAYAS, FOR THE EDUCATION OF CHILDREN OF EUROPEAN SOLDIERS SERVING IN INDIA.—SEE PAGE 413.

*** The charge for the insertion of Births, Marriages, and Deaths is Five Shillings for each announcement.*

BIRTH.

At Fermoy, on the 9th inst., the wife of Captain J. Cumming Clarke, 13th Light Infantry, of a son.

MARRIAGES.

On the 15th inst., at the parish church, Mickleham, Surrey, by the Rev. C. E. Smith, uncle to the bride, George, younger son of George Carr Clark, Esq., of Ellinthorp Hall, Tasmania, to Ellen Louisa Henrietta, only daughter of the late W. Crafton Smith, Esq., of Zagrad, Fiume, Austria. No cards.

On the 9th inst., at St. Mary's Church, Colchester, by the Rev. R. Leggett, M.A. of Stonham Aspal, James Spalding Gardiner, of Borley Lodge, Sudbury, Suffolk, to Jessie Ann, youngest daughter of William Harris, of Higham, Suffolk.

On the 20th inst., at St. George's, Bloomsbury, by the Rev. Emilius Bayley, the Rector, Charles Frederick Bailey, Esq., of 5, Stratford-place, London, and Lee, Lynton, North Devon, to Emily Jeannette, eldest daughter of Charles Norris Wilde, Esq., and the Hon. Mrs. C. N. Wilde, of 17, Russell-square.

On Sept. 9, at St. George's Cathedral, Madras, by the Rev. R. Murphy, LL.D., Charles Grant Walker, Madras Civil Service, late of Queen's College, Oxford, to Lucilla, only daughter of the late Mitchell Henry Fagan, Captain H.M.'s 64th Regiment, and sister of the Rev. H. S. Fagan, M.A., Charlcombe, Bath. No cards.

On Sept. 22, at Nassau, Bahamas, by the Rev. John Davy, Thomas Augustus Le Mesurier, Deputy Assistant Commissary-General, to Lucy Evelyn, second daughter of the Hon. Timothy Darling, of Nassau.

On the 9th inst., at the British Legation, Berne, by the Rev. E. W. Dillon, Chaplain, Thomas Rudd, Esq., eldest son of Henry Rudd, Esq., Kilbryde Castle, Perthshire, to Louisa Matilda, daughter of the Rev. Laurence Lockhart, of Wicketshaw and Milton Lockhart, Lanarkshire, N.B.

On the 20th inst., at Uffculme, Devon, by the Rev. G. T. Marker, Vicar, Richard Thornton West, Esq., of Streatham Hill, Surrey, to Sarah, eldest daughter of Richard Bowerman, Esq., of Lambscroft, Uffculme. No cards.

On the 21st inst., at Worfield Church, Shropshire, by the Rev. C. F. Broadbent, M.A., Vicar, David Beatson, Esq., youngest son of the late John Beatson, Esq., of Rotherhithe, Surrey, to Sarah Catherine, youngest daughter of the late Michael Smith Stokes, Esq., of Roughton, near Bridgenorth, Shropshire. No cards.

On the 20th inst., at the Royal Bavarian Chapel, Warwick-street, by the Rev. Dr. Hearne, Francis Van Zeller, Esq., Portuguese Vice-Consul, Newcastle, to Maria Cecilia Weishaupt, eldest daughter of William Weishaupt, Esq., of 42, Gordon-square.

On the 13th inst., at St. Bride's, Liverpool, by the Rev. E. Roberts, M.A., John Odell, of Foochow, China, second son of Thomas A. Odell, Esq., of Peckham-rye, Surrey, to Elizabeth Robinson, second daughter of Richard M. Bird, Esq., of Grove-street, Liverpool. No cards.

On the 24th of September, at the British Legation, Tangier, by the Rev. C. Hart, Chaplain to her Majesty's Forces at Gibraltar, William Kirby Green, Esq., British Vice-Consul at Tetuan, to Mary, third daughter of the late Sir Thomas Reade, C.B. No Cards.

On the 7th inst., at the parish church, Cullompton, by the Rev. Dr. Chave, Mr. Joseph Foster, druggist, of the above place, to Jane, only daughter of Mr. Wm. Toogood, banker, also of the same town.

DEATHS.

On the 10th inst. John Clemmitt, Esq., late of Clemmitt's Inn, Old Bailey, much respected and deeply regretted, in his 65th year.

On the 17th inst., at No. 1, St. Peter's-terrace, Kensington Park Gardens, Notting-hill, William James Stewart, Esq., in the 33rd year of his age.

On the 19th inst., at 23, Cleveland-square, Hyde Park, Elizabeth, the beloved wife of Robert Clarke, Esq., in the 47th year of his age.

On the 29th of July, at Rownhams, near Tannuda, South Australia, after giving birth to a daughter, Catherine, wife of Charles H. Barton, Esq., J.P.

PHILLIPS'S LAW OF COPYRIGHT.

This day is published, in 8vo, price 12s., cloth,

THE LAW OF COPYRIGHT IN WORKS OF LITERATURE AND ART, and in the Application of Designs. With the Statutes relating thereto. By CHARLES PALMER PHILLIPS, of Lincoln's Inn, Esq., Barrister-at-Law.

The object of the author has been to write a book of moderate bulk, which would present a concise and connected statement of the whole law of copyright in this country.

This volume contains separate chapters on copyright before and after publication in literary and musical works—in the representation and performance of dramas and musical compositions—on the copyright of the Crown, and of certain Universities and Colleges—on copyright in lectures after public delivery—in published engravings—in paintings, drawings, and photographs—in sculpture—in designs (ornamental and useful)—lastly, on international copyright.

All the important judicial decisions and dicta, at law and in equity, upon the subject will, the author hopes, be found in the work; and in the Appendix are the statutes to which it may be necessary to refer.

V. and R. STEVENS, SONS, and HAYNES, Law Booksellers and Publishers, 26, Bell-yard, Lincoln's-inn.

Now ready, at all Libraries,

FRY'S ICELAND MOSS COCOA. A combination of Cocoa with Iceland Moss. Very Strengthening and Nutritious for Invalids, and agreeable FOR THE GENERAL CONSUMER.

NOTICE.—We have now supplied the larger portion of the Family Grocers of England with our ONE HUNDRED AND TWENTY-FIRST ANNUAL DELIVERY OF

KEEN'S MUSTARD. Purchasers of this valuable table condiment will, upon obtaining our manufacture, award to it the character of superior quality which it has maintained during the SALE OF MORE THAN A CENTURY.

KEEN, ROBINSON, BELLVILLE, and CO., London. Oct. 3, 1863.

KEEN'S GENUINE MUSTARD. There are many qualities of Mustard sold. Obtain Keen's Genuine Mustard and full approval is guaranteed. FIRST MANUFACTURED 1742.

Sold by most Grocers from the Cask, and in 1lb. and ½lb. Canisters.

KEEN, ROBINSON, BELLVILLE, and CO., London.

OSWEGO PREPARED CORN, for Puddings, Custards, Blancmanges, &c. Manufactured and Perfected by T. KINGSFORD and SON, of Oswego, State of New York.

It is the original preparation from the farina of maize, established 1848, commands the highest price from the trade, and offers the best value to the consumer.

It is a quarter stronger than any of the imitations, has a finer grain, and is more delicate.

The Oswego has the natural golden tinge, and not the chalk white produced by artificial process.

KEEN, ROBINSON, BELLVILLE, and CO., Garlick-hill, London.

LETTERS PATENT 1823. PRIZE MEDAL 1862.

ROBINSON'S PATENT GROATS is the most valuable preparation for making pure and delicate gruel. Modern chemistry has shown that this food is easy of digestion and rich in nutriment.

ROBINSON'S PATENT BARLEY makes a delicious custard pudding, directions for which have been given by Mons. C. E. Francatelli. It is appreciated as a non-inflammatory drink, is excellent for mothers nursing, and has long been used with great success for rearing children by hand.

KEEN, ROBINSON, BELLVILLE, and CO., London.

STARCH MANUFACTURERS TO H.R.H. THE PRINCESS OF WALES.

GLENFIELD PATENT STARCH, used in the Royal Laundry, and awarded the Prize Medal, 1862.

COALS.—COCKERELL'S COALS, price 26s., cash. Central Office, No. 13, Cornhill, E.C.

DR. DE JONGH'S (Knight of the Order of Leopold of Belgium) LIGHT-BROWN COD-LIVER OIL, prescribed by the most eminent Medical Men throughout the world as the safest, speediest, and most effectual remedy for CONSUMPTION, CHRONIC BRONCHITIS, ASTHMA, COUGHS, RHEUMATISM, GOUT, GENERAL DEBILITY, DISEASES OF THE SKIN, RICKETS, INFANTILE WASTING, AND ALL SCROFULOUS AFFECTIONS, is incomparably superior to every other variety.

SELECT MEDICAL OPINIONS.

Sir HENRY MARSH, Bart., M.D., Physician in Ordinary to the Queen in Ireland.

"I consider Dr. DE JONGH'S Light-brown Cod-liver Oil to be a very pure Oil, not likely to create disgust, and a therapeutic agent of great value."

DR. GRANVILLE, F.R.S., Author of the "Spas of Germany."

"Dr. Granville has found that Dr. DE JONGH'S Light-brown Cod-liver Oil produces the desired effect in a shorter time than other kinds, and that it does not cause the nausea and indigestion too often consequent on the administration of the Pale Oil."

EDWIN CANTON, Esq., F.R.C.S., President of the Medical Society of London, &c., &c.

"For several years past I have been in the habit of prescribing Dr. DE JONGH'S Light-brown Cod-liver Oil, and find it to be much more efficacious than other varieties of the same medicine which I have also employed with a view to test their relative superiority."

DR. DE JONGH'S LIGHT-BROWN COD-LIVER OIL is sold only in Imperial half-pints, 2s. 6d.; pints, 4s. 9d.; quarts, 9s.; capsuled and labelled with his stamp and signature, WITHOUT WHICH NONE CAN POSSIBLY BE GENUINE, by respectable Chemists and Druggists.

SOLE CONSIGNEES,

ANSAR HARFORD and CO., 77, STRAND, LONDON, W.C.

JOASH: A Sacred Drama. By E. SILAS. Performed for the first time at the Norwich Festival. Price 10s. 6d. net.
CRAMER and CO., 201, Regent-street.

JOASH.—"Suffer not, O Lord." 2s. 6d. The accomplished critic of the "Saturday Review," after commending Jehoiada's first air as being grave, manly, and melodious, says:—"Equally good is the mezzo-soprano air, 'Suffer not, O Lord.' The rapid changes from the natural to the flat key and back again, towards the end, strike us as peculiarly well managed, and the whole song is really beautiful."

JOASH.—"Teach me, O Lord." 3s. "The contralto air, 'Teach me, O Lord,' is as sweet and tuneful a piece of writing as we have seen for many years."—Saturday Review.

JOASH.—The March of the Levites. 4s. "As a pianoforte duet, it is vigorous, spirited, and well marked." Saturday Review.

IMPORTANT MUSICAL WORKS. POPULAR MUSIC OF THE OLDEN TIME: A Collection of the Ancient Songs, Ballads, and Dance Tunes which constitute the National Music of England. Arranged Chronologically, with Remarks and Anecdote, and preceded by Sketches of the Early State of Music and of the Amusements associated with it in England during the various reigns. By W. CHAPPELL, F.S.A.; the Airs harmonised by G. A. MACFARREN. In two vols, royal octavo, £1 11s. 6d.; or, in 17 parts, each 3s. Selections from the above, full music size, in 10 Parts, each containing 12 Songs, 6s. Each Song may also be had separately, price 1s.
OLD ENGLISH SONGS AND BALLADS. Selected from W. Chappell's "Popular Music of the Olden Time," with an Introduction. The long Ballads compressed, and occasionally new Words written, by J. OXENFORD. The Symphonies and Accompaniments by G. A. MACFARREN. In 10 Parts, 1s. each; or, complete in cloth limp, 10s. 6d.
THE SONGS OF SCOTLAND. Wood's new and complete Edition, with appropriate Symphonies and Accompaniments for the Pianoforte. The critical dissertations and the historical notices attached to each Song have been written by GEORGE FARQUHAR GRAHAM. 3 vols., cloth, or the three elegantly half-bound in 1 vol. 21s.; full-bound morocco, 31s. 6d.
THE SONGS OF IRELAND. Moore's Melodies. With new Symphonies and Accompaniments, and Edited by G. A. MACFARREN. In 1 vol., full music size, 21s; in Parts, each containing 12 Songs, 4s.; or each Song separately, 1s.
CRAMER'S (J. B.) CELEBRATED STUDIES FOR THE PIANOFORTE. In 2 vols., 21s. each; or in 8 Parts, 6s. each.

THE ST. JAMES'S ALBUM FOR 1864 will be published on the 1st of November, beautifully bound and illustrated, price one guinea. Subscribers to Booseys' Musical Library receive this handsome volume gratuitously.

BOOSEYS' MUSICAL LIBRARY.—The Subscribers to this Library have a larger and a better supply of Music than is to be obtained at any similar establishment in London, besides receiving gratuitously at Christmas the St. James's Album—a guinea illustrated album of new music. Subscribers paying Two Guineas per annum have the use of 12 pieces or books in town, or 20 pieces in the country. Full particulars gratis from
BOOSEY and SONS, 28, Holles-street, London.

BOOSEYS' MINIATURE PIANOFORTE, price 17 guineas, in walnut, French polished:—"We have had occasion to examine a new description of Pianoforte manufactured by Boosey and Sons, which combines quality and cheapness in a degree which has not previously been ever attempted. When heard it creates such surprise as would be caused by a child 'discoursing most eloquent' music with the voice of a full-grown man. It has a rich, brilliant tone, quite strong enough to fill the largest drawing-room; and the whole mechanism of the instrument seems to be firm and durable. No piano at so small a price has ever before been presented to the public."—Vide ILLUSTRATED LONDON NEWS, Feb. 28, 1863. This Piano is well adapted for the cabin of a ship or an extreme climate.—Boosey and Sons, 24, Holles-street, London.

PRATTEN'S SEVEN-GUINEA PERFECTED CYLINDER FLUTE, old system of Fingering. This Instrument, the result of many years' experiments, possesses all the reputed advantages of the Cylinder Flute on Boehm's and other principles, without changing the familiar Fingering of the old 8-keyed Flute, in addition to which, through Mr. Pratten's ingenious improvements in its construction, the manufacturers are enabled to produce this instrument at one third of the expense of any cylinder flute hitherto sold.
An Illustrated Prospectus may be had on application to the manufacturers, BOOSEY and SONS, 24, Holles-street, London, W.

ROBERT COCKS AND CO.'S NEW MUSICAL PUBLICATIONS.
THE QUADRILLE OF THE DAY—THE ROYAL BOUDOIR QUADRILLE—performed with wonderful success at Alfred Mellon's Promenade Concerts, introducing the new National Song, "God Bless the Prince of Wales," "The Albert Edward March," &c. Arranged by CHARLES COOTE. Piano Solo, with Cornet ad lib., Illustrated, 4s.; Duet, 4s.; Quadrille Band, 3s.
W. V. WALLACE.—Songs by the Composer of "The Desert Flower," "Maritana," &c.—THE READING GIRL. Sacred Song. Beautifully Illustrated. 3s. THE SLEEP OF SORROW, THE SLEEP OF JOY, each 2s. 6d.

HOMAGE TO THE PRINCESS OF WALES, introducing "The White Cross of Denmark," and "God Bless the Prince of Wales," for Military Band. By A. F. Godfrey. 4s.
HARVEST HYMN and GLEANING SONG. By Anne Fricker. Ea. 2s.
ROBERT COCKS and CO'S CIRCULAR gratis and post-free.
ROBERT COCKS and CO.'S PIANOFORTES, in Walnut and Rosewood, 6¾ octaves, £25, £35, £42, and £45.
London: ROBERT COCKS and Co., New Burlington-street, W., Publishers to the Queen, H.R.H. the Prince of Wales, and the Emperor Napoleon III. Agents for India—Messrs. BURKINYOUNG and CO., Calcutta.

NEW SONG, THE OAK AND THE SAPLING, composed by HENRY SMART. Price 2s. 6d. (sent at half price). This is one of the most successful songs of the season. It is universally admired. Compass from D to E.
DUFF and HODGSON, No. 20, Oxford-street.

W. VINCENT WALLACE'S SONGS. "Old Friends and Other Days," "Thou wilt come back again," "Remember and Forget." Price 2s. 6d. each (sent at half price). The gifted Composer of "Maritana," "Lurline," &c., has added to his fame by the production of the above three Songs, which are perfect gems. DUFF and HODGSON, 20, Oxford-street.

MUSIC HALF-PRICE and POST-FREE. All full-price Music of every publisher forwarded on these terms on receipt of stamps. The trade supplied to sell at Half-price. Catalogues gratis.—OETZMANN and CO., 27, Baker-street, W.

CRAMER'S PIANOFORTE GALLERY, 207 and 209, Regent-street (the largest in Europe). The most varied selection of Pianofortes are to be found in this Gallery.
The quality of every instrument may be relied upon as at least equal to representation. Pianofortes of the very inferior class are carefully excluded from the stock. Every facility is afforded to exchange, without loss to the buyer, any time within six months, should an instrument of a higher class, or by a different maker, be thought desirable.
Pianofortes by every maker of eminence will be found in the Gallery.

CRAMER'S NEW 7-OCTAVE SEMI-OBLIQUE PIANOFORTES. Price 45 guineas in Rosewood, and 50 in Walnut.
In introducing this Instrument prominently to the notice of the public, Cramer and Co. may be permitted to observe that it is alike remarkable as regards power and quality of tone, firmness and elasticity of touch, durability of tuning, and the capacity to develop its resources. The tone may be forced by the powerful finger of the artist, or drawn out by the less-accustomed hand of the amateur; in the one case there is no harshness, and in the other its charmingly vocal qualities are produced with little effort.
The action, or mechanism, is of the very best description, being somewhat similar in its principle of construction to that of the semi-grand. The stringing is complete, there being three wires to each note, like the full grand.
Cramer and Co. guarantee these Instruments for any reasonable length of time, and forward them to all parts of the country without risk to the purchaser and at a very trifling cost.
Pianoforte Gallery, 207 and 209, Regent-street
(the largest in Europe).

CRAMER'S ENGLISH PIANETTE, 22 guineas.—Cramer and Co. manufacture this capital small instrument. It has all the requisites of the best Pianoforte—check action, solid touch, agreeable tone. The case is of polished ash or pine. In practising on this Pianoforte the fingers of the player will be strengthened much more rapidly than on an old instrument, loose in the key and worn in the hammer. In rosewood, 25 guineas; in walnut, 26 guineas.
Purchasers are particularly requested to observe that this instrument has not the common or single action, but the double or check action; and that Cramer and Co. are the only manufacturers of it in England.—207 and 209, Regent-street.

CRAMER'S INDIAN PIANOFORTE. CRAMER and CO. manufacture for India a superior COTTAGE PIANOFORTE, in solid Mahogany, with metallic bracings and all other appliances necessary to resist the affect of extreme climates. Nothing has been left solely to the glueing. The mechanism of the Instrument as well as the Case has been secured throughout by screws. Unusual skill and attention have therefore been bestowed upon the manufacture, and they have obtained the highest commendations for their excellent quality of tone and durability.
Cramer, Beale, and Wood deliver these Instruments f.o.b., packed in cases lined with zinc, at any home port, for 50 guineas. Size:—Height, 3 feet 11½ inches; width, 4 feet 4½ inches; depth, 2 feet 1½ inch.
Universal Pianoforte Gallery, 207 and 209, Regent-street, London.

CRAMER'S ARTIST'S CONCERTINA, selected by Richard Blagrove. In purity of tone, delicacy of touch, noiseless rapidity of articulation, and general perfection of mechanism these instruments are altogether unrivalled. The vibrators are of tempered steel, and retain their perfect tuning in any climate. Price 12 guineas, including case.
J. B. Cramer and Co., 201, Regent-street.

SECONDHAND PIANOFORTES. CHAPPELL and CO. have a large Stock of SECONDHAND PIANOFORTES for Sale, by BROADWOOD, COLLARD, ERARD, &c., &c., that have been hired for the season, at very reduced prices. Also, new Instruments of every description.—Chappell and Co., 50, New Bond-street.

PIANOFORTES at CHAPPELL'S.—The largest Stock in London, by Broadwood, Collard, Erard, &c., for Sale or Hire.—50, New Bond-street.

CHAPPELL'S FOREIGN PIANINO (the only Pianino to which the Prize Medal was awarded).—A very elegant Pianoforte, of small size, the full compass, check action, and most perfect touch, admirably adapted to small rooms, yachts, boudoirs, &c. Warranted to keep in tune, and to be the best and cheapest Pianoforte, with check action and all the latest improvements.
Price, in mahogany, rosewood, or walnut, 25 and 26 guineas. A great variety may be seen at
Chappell and Co.'s, 50, New Bond-street.

CHAPPELL and CO.'S ENGLISH MODEL COTTAGE PIANOFORTE.—To amateurs preferring the pure English tone of the Broadwood or Collard quality, the English Model will be found the most perfectly satisfactory instrument, at a moderate price. The action is of the same simple description as the above makers', and therefore especially adapted to the country, where the more complicated actions are objectionable to many of the tuners. In elegant rosewood case, with full fret, similar in every respect to other instruments at 50 guineas, price 35 guineas; in walnut, 40 guineas.
Chappell and Co., 50, New Bond-street.

CHAPPELL'S FOREIGN MODEL PIANOFORTE, price 50 guineas in rosewood; or in walnut, 60 guineas. This Instrument has Three Strings and the fullest grand compass of Seven Octaves. It is strengthened by every possible means to endure the greatest amount of wear, and to stand perfectly in any climate. The workmanship is of the best description; the tone is round, full, and rich; and the power equal to that of a Bichord Grand. The touch is elastic, and the repetition very rapid. No pianoforte, in all respects comparable, has hitherto been made in England at the same price. Every instrument will be warranted, and (if desired) exchanged within six months of the purchase.
Chappell and Co., 50, New Bond-street.

BROADWOOD, COLLARD, and ERARD. The best Pianofortes of every description, including all the newest kinds by these celebrated makers, may be tried side by side (and hired with option of purchase) at the new Showrooms of CHAPPELL and CO., 50, New Bond-street.

ALEXANDRE'S DRAWING-ROOM MODEL HARMONIUM, the best that can be made, price 60 guineas; other varieties at 25 and 35 guineas. Illustrated Catalogues of Pianofortes and Harmoniums upon application to
CHAPPELL and CO., 50, New Bond-street.

SIX-GUINEA HARMONIUM by ALEXANDRE, with five octaves, two footboards, and in oak case. These instruments are lower in price and superior to all other cheap harmoniums. Descriptive lists on application to
CHAPPELL and CO., 50, New Bond-street.

SECONDHAND HARMONIUMS, by ALEXANDRE, nearly (if not quite) as good as new, at greatly-reduced prices, at CHAPPELL'S, 50, New Bond-street.

ALEXANDRE'S PRIZE EXHIBITION MODEL HARMONIUM, for the CHURCH, 13 stops, 4 rows of vibrators, and Venetian swell, worked by the heel of the right foot, in oak case, 32 guineas. A large assortment may be always seen at CHAPPELL and CO.'S, 50, New Bond-street.

ENGLISH CONCERTINAS, by LACHENAL, Full Compass, with all the latest Improvements, warranted for Hot Climates, and to keep well in Tune, from Two guineas, with Case, Lock and Key, &c.
HOPWOOD and CREW, 42, New Bond-street.

PIANOFORTES.—OETZMANN and PLUMB'S new PIANETTES are very superior to the French, and about two thirds of the price; largely recommended by the jurors of the Exhibition to their friends, and give universal satisfaction. One in the window marked for price, others in plain woods cheaper. Warranted.—151, Regent-street, the only address.

OETZMANN and PLUMB'S PIANOFORTES. A visit to their warerooms will convince buyers that, for quality of tone, durability, and style, their instruments are by far the most moderate in price of any respectable establishment in London, either for hire or purchase.—151, Regent-street, the only address.

MUSICAL BOX DÉPOT, 48, Cheapside London.—Messrs. KEITH, PROWSE, and CO. importers, have just received from Messrs. Nicole Frères another assortment of their newest boxes, some of which are with flute, bell, and drum accompaniments, the expressive effects of which upon the ear are exceedingly novel and beautiful. The ordinary boxes (4 to 12 airs) at one guinea each air. Direct remittances will receive prompt attention.

BUTLER'S BRASS BAND INSTRUMENTS, Cornets, Saxhorns, Circulating Vibrating Horns, Drums, Fifes, &c., are all manufactured on the premises and sold at prices much below any other English house. A written guarantee given with every instrument. Cornets warranted, from £2 to £5. Manufactory, 29, Haymarket London. Prices and drawings post-free.

DENT'S CHRONOMETERS, WATCHES, and CLOCKS.—M. F. DENT, 33, Cockspur-street, Charing-cross, Watch, Clock, and Chronometer Maker by special appointment to her Majesty the Queen, 33 and 34, Cockspur-street, Charing-cross (corner of Spring-gardens).

GOLD CHAINS and FINE GOLD JEWELLERY.—A very elegant STOCK of GOLD CHAINS, 18s. to 20 gs.; Gentlemen's Albert Chains, 21s. to 18 gs.; Gold Brooches, 20s. to 15 gs.; Gold Bracelets, 55s. to £20; Wedding and Keeper Rings, 10s., 15s., and 20s. Gem ditto, 12s. 6d. to 20 gs.; Gold Earrings, 12s. 6d. to 5 gs. per pair. Gold Lockets, 10s. to 16 guineas. Gold Scarf Pins, 5s. to 10 gs.—FREDC. HAWLEY, Goldsmith, 148, Regent-street. Jewellery repaired and Diamonds reset. List of prices free.

WATCHES, TIMEPIECES, and CLOCKS. Elegant GOLD WATCHES, jewelled in four holes, £2 15s. to £35; Silver Watches, £1 5s. to 12 guineas; eight-day Timepieces, 12s. 6d. each; Clocks going 14 days, three guineas and upwards.—FREDERIC HAWLEY, Watchmaker, 148, Regent-street, W. (from 75, Strand, and Coventry-street). Established nearly a Century. List of prices free. Old Watches, Gold, Silver, Diamonds, &c., purchased or taken in exchange. Merchants and Captains supplied on liberal terms. Watches and Clocks repaired. A new assortment of large Musical Boxes with all the late improvements.

CHANDELIERS in BRONZE and ORMOLU for DINING-ROOM and LIBRARY, Candelabra, Moderator Lamps, in Bronze, Ormoulu, China, and Glass. Statuettes in Parian, Vases, and other ornaments.—OSLER, 45, Oxford-street, W.

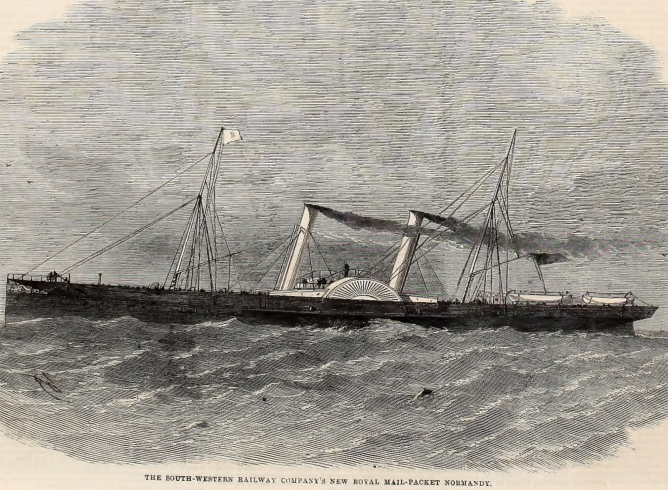
OSLER'S GLASS CHANDELIERS, WALL LIGHTS, and Lustres, for Gas and Candles. Table Glass, &c.
Glass Dinner Services for 12 persons, from £7 15s.
Glass Dessert Services for 12 persons, from £2.
All articles marked in plain figures.
Ornamental Glass, English and Foreign, suitable for presents.
Mess, Export, and Furnishing Orders promptly executed.
London—Showrooms, 45, Oxford-street, W.
Birmingham—Manufactory and Showrooms, Broad-street.
Established 1807.

LAMPS. SHARPE'S English-made MODERATEUR LAMP is the only Lamp to be relied on. Complete, 21s.
Geo. Sharpe, 428, Strand.

SIR R. PALMER, M.P.

THE attainment of the office of Attorney-General by Sir Roundell Palmer, M.P. for Richmond, was a matter of course, and contingent only on the ordinary circumstances of promotion. When this eminent equity lawyer accepted the Solicitor-generalship under Lord Palmerston it was universally allowed that a great accession of strength had been made to the personnel of the Government in the House of Commons. Although Sir Roundell Palmer had not held a seat in Parliament since 1857, he not having sought to be elected by any constituency in the general election of that year and that of 1859, he was known to have passed a noviciate in the House of Commons. In 1847 he was chosen to represent the borough of Plymouth, and continued to sit for that town until 1852, when an effort was made to eject him, on account, it is said, of his having opposed the Ecclesiastical Titles Bill, which was partially successful, the rival candidate, Mr. C. J. Mare, having been elected. On petition, however, his election was declared void, and Mr. Roundell Palmer was declared to be the sitting member. During his tenure of a seat in Parliament Mr. Palmer, though not a frequent speaker, always commanded attention by the great eloquence which he displayed and the broad and philosophical views which he took of all questions on which he dilated. If he, then, had a fault it was that he was too purely oratorical for the House of Commons. Five or six years of the leading Chancery business in the Court of the Master of the Rolls and before the Judicial Committee of the Privy Council, and the House of Lords on appeals, had the effect of toning down his style; and on his return to Parliament in 1861 he was found still to have retained his grace and fluency as a speaker, and to have discarded redundancy and any tendency to declamation; while, as an arguer, whether for clearness or ingenuity, he was second to none. At once Sir Roundell Palmer assumed a position in the house which has been attained by no lawyer since Sir William Follett; and, practically, his position is superior to that of Follett; for he is what Follett was not—one of the most active as he is one of the foremost debaters of the Government. To him has been already assigned, and probably will again, the distinction of winding up great debates; and this is significant of the confidence of the chief of the Ministry that in his Attorney-General he has, besides a first-class law officer, a supporter with special qualities for the conduct of Parliamentary business, and with the capabilities of a statesman. Sir Roundell Palmer is the second son of the late Rev. William Jocelyn Palmer, Rector of Mixbury, Oxfordshire, and was born in 1812. He was educated, first, at Rugby, and afterwards at Winchester Schools, and proceeded to Oxford, where, in 1830, he obtained a scholarship at Trinity College. He subsequently became a Fellow of Magdalen. He graduated in 1834, when he was first class in classics. During his University career he gained the Chancellor's prizes for Latin verse and the Latin essay, and the Newdegate prize for English verse. He obtained the Ireland Scholarship and the Eldon Law Scholarship. Having chosen the Bar as his profession, he was called in 1837 at Lincoln's Inn. Having achieved a professional success more than sufficient to justify his promotion, he was made a Queen's Counsel in 1849. Since that he has held one of the first places at the Chancery Bar; and, having reached his present high office, there is but one step between that and the very highest function in the law and in the State which can be discharged by a lawyer; and if the time shall come when he reaches to that professional height, few, if any, will be found who will deny his claim to its attainment.

Our Portrait of Sir Roundell Palmer is from a photograph by Messrs. John and Charles Watkins of Parliament-street.



SIR ROUNDELL PALMER, M.P., THE NEW ATTORNEY-GENERAL.

THE ROYAL MAIL-PACKET NORMANDY

THE splendid fleet of passenger-steamers belonging to the South-Western Railway Company has been augmented by this beautiful vessel, just placed on the line between Southampton and the Channel Islands; and for speed, passenger comfort, and seagoing qualities of the highest class, her performances have given the greatest satisfaction. She has averaged fourteen knots and a half through all her voyages, and performed the distance between Southampton and Guernsey in six hours and a half.

The Normandy was designed and built by Mr. James Ash, of Millwall, Poplar, and is of the following dimensions:—Length on water-line, 210 ft.; breadth, 24 ft.; depth of hold, 14 ft.; and is 600 tons, builders' measurement. She is propelled by oscillating engines, of 220-horse power, by Messrs. John Stewart and Co., of Poplar, fitted with their patent surface condensers, by which great saving is effected, the Normandy having attained the highest rate of speed with the smallest proportionate amount of fuel of any vessel afloat. In the official Government trial-trip, with twenty-two pounds pressure of steam, she averaged in four runs, at the measured distance in Stokes Bay, a speed of eighteen miles per hour; maintained fifteen knots in a voyage round the island; and ran home from the Needles to Southampton, against the tide, in an hour and sixteen minutes.

THE SOUTH-WESTERN RAILWAY COMPANY'S NEW ROYAL MAIL-PACKET NORMANDY.

CURRENT LITERATURE.

Leo. By Dutton Cooke. (3 vols. Smith, Elder, and Co.) It will be no more than common charity to at once relieve the curious mind with the information that the title of this novel has no connection with a wild beast, a Newfoundland dog, or a Pope. It is merely the abbreviation of a Christian name, the Christian name of a charming brunette. Leonora Carr, or, more correctly speaking, Leonora Agnes Carr, is the late-born daughter and only surviving child of Mr. and Mrs. Carr, of Croxall Chase, Woodlandshire. Adjoining Croxall Chase is Oakmere Court, the property, at the commencement of the story, of Mr. Arnold Page, Barrister-at-Law. To Arnold it had descended from his father, General Page, C.B., who, notwithstanding the antiquity of his family and estate, had not disdained to cultivate close friendship with old Carr, the wealthy ironfounder, the mushroom land-proprietor. Arnold and Leo, therefore, had been thrown together from childhood, and at the opening of the story are engaged to be married. The events which prevent their course of true love from running smooth are not many, but, like Mercutio's wound, "will serve." Indeed, Mr. Cooke's novel must be regarded rather as a collection of excellent sketches than as a specimen of constructive art, for several of the more prominent characters might, for all the influence they exercise upon the main issue, be omitted altogether. Still, this does not detract from the skill with which those characters are delineated, or from the pleasure one derives from following their fortunes. We would not willingly have missed the touching episode of Barbara Gill, her early sorrows, and her early death. Besides, the ill-fated Baby does, if only to a slight extent, change the colours in the kaleidoscope; for without her it had not been easy to arrange that meeting between Arnold and Janet which sent poor Leo home in tears to accept the hand of the Marquis of Southernwood. Monsieur Anatole, however, and his two associates, so soon as they have driven Janet to seek refuge in Coppice-row; Miss Bigg, so soon as she has been the means of bringing Janet and Leo together; and many other characters, so soon as their temporary services had been rendered, might have been dismissed without detriment to the story, though not without injustice to the author, who would thereby have hidden his descriptive light under a bushel. But Mr. Cooke's great charm is in his style—it is so easy and flowing, with its undercurrent of quiet humour and good-humoured satire, that one is carried contentedly along withersoever he chooses to meander. Whether it be Leo who prattles, or little Lord Dolly who chatters, or Mrs. Simmons who scolds, or Miss Bigg who proses, or Booth who cants, or the Rev. Purton Wood who whines, or Monsieur Anatole who jabbers, or any artist who talks art or the opposite to art, there is sure to be piquancy, pungency, and wit.

Sackville Chase. By C. J. Collins. (3 vols. Maxwell and Co.) This is what is called a "sporting novel;" it is extremely coarse, clever, and amusing. It is remarkable for containing not a single estimable character; for even Mr. Van Bruggen, the most gentlemanlike of the men, is not so particular in his companions as he ought to be; and the Countess of Sackville, the most ladylike of the ladies, is a nonentity. Mr. Van Bruggen is an American, and the owner of a racehorse called Arbitrator; it is, therefore, not unfair to suppose that a portrait is in his case drawn of a living personage; and there are signs throughout the book that other turf-frequenters and turf-supporters have sat unwittingly for their likenesses. The resemblance is not perhaps perfect, but it is so close that the initiated will have little difficulty in (to suit our language to the occasion) putting the saddle upon the right horse. The object of the author, if he had any beyond the entertainment of his readers, appears to have been to represent in as black colours as possible English noblemen who patronise the turf, and to do so he brings the Earl of Sackville to the confines of adultery and incest. To complicate matters, the Earl and his two sons pay court to the same woman. The Earl's intentions, as he is married and his wife is living, must necessarily be strictly dishonourable; but the two young scions of nobility seem to have had the most honourable intentions towards their (as it ultimately turns out) aunt. Moreover, to add to the embroilment, the aunt is herself married to the Earl's secretary (though his Lordship is kept unacquainted with the fact), and the secretary and his amiable and beautiful wife exercise a skilful alchemy, whereby they transmute the Earl's passion into gold, or rather cheques, for considerable amounts. Indeed, at one sitting, over a pleasant game of écarté, Mdlle. d'Arlincourt (which is the name under which Mrs. Secretary flirts and cheats) manages, with her husband's assistance, to defraud the enamoured noble of twenty-eight thousand pounds! The hero of the story is Agony Jack, originally a racing stable-boy, and afterwards a seller of "c'rec cards" at races, whose sobriquet is due to a faculty which he possesses of working his face into diabolical expressions of pain. Agony Jack, however, turns out to be the eldest son of the Earl of Sackville, and, on arriving at his title and estates, drinks himself to death after the fashion which he considers becoming his rank and opportunities. Denzil Raikes—a degraded clergyman, who becomes "the lord of Conquest Abbey" by means which it is unnecessary to explain, and which we do not think would have borne strict investigation—is the chief instrument whereby Agony Jack is raised to his short-lived dignities; for Denzil had joined the Earl of Sackville in holy matrimony to Bianca Capelli, a Corsican, whom he deserted and by whom he had issue—Agony Jack. The noble Earl then married again, and the legality of his second marriage is providentially secured by the fact being ascertained that poor Bianca had died in the workhouse just three days before it was contracted. Bianca having been a Corsican, there is, of course, a vendetta, undertaken by the neglected girl's mother, who, as the first step towards the completion of her vengeance, stole away the Earl of Sackville's baby-sister, Lady Marian Sheraton, alias Mdlle. d'Arlincourt. Lady Marian had long been mourned as dead, and thus it is explained that the noble Earl did not recognise in the lady who cheated him at cards his own lost sister. The other characters are chiefly trainers, stable-boys, cheats, and sporting landlords; and the scenes, which are for the most part very graphically described, include a picture of a night at Newmarket during the racing season, very powerfully drawn. You may also learn how to "nobble" the favourite for the Derby, and how, according to Mr. Collins, it happens that in a handicap the horse wins whose weight appears to preclude every chance of winning. We must conclude by repeating that the novel is very clever, and certainly amusing, but overcharged with coarseness of thought, of incident, and of language.

Captain Boys' Narrative of Adventures. (1 vol. C. T. Newby.) This book takes us back to the days of Nelson, when Edward Boys, now Captain, R.N., was a midshipman on board H.M.S. Phœbe. The young midshipman had the misfortune to be taken prisoner by the French; and here in a volume, without much pretence to literary merit and plentifully besprinkled with misprints, he tells the story of his capture, his imprisonment, and his escape. The personal history does not embrace the names of many who have become "household words;" and it was written, we are informed, "in the West Indies, in 1810, at the previous suggestion, and for the sole amusement, of the writer's own family." Still, the remembrance of "the war" has not yet died out, and the wonderful adventures of any one who shared, in however humble a capacity, in it, are not likely to lack readers, admirers, and sympathisers. Captain Boys, in a modest preface, declares his object to be "to convey the simple truth in its simplest form;" and if, as we have no reason to doubt, he has attained his object, he has confirmed the correctness of that saying which gives the superiority in point of strangeness to truth over fiction.

Poems. By Francis Charles Weedon. (1 vol. Longmans.) The early death, at thirty years of age, of this songster did not come upon him so enviously soon as to cut him off from all hope of living upon the lips of posterity. There are many pieces amongst those collected here which lovers of poetry will read with pleasure and connect gratefully with the name of him who gave them soul of fancy and body of words. If tenderness of thought, and gracefulness of expression, and elegance of versification can still command attention, Mr. Weedon's verses will be not scantily read and not meanly appreciated. To have received the commendation of the late Lord Macaulay is no small testimony to their worth, and that was accorded to Mr. Weedon's compositions in succinct but forcible terms. "You can have no difficulty," he said, "in finding a magazine in which such verses as those you have sent me will be inserted with joy and gratitude." The lines alluded to were those called "A Sketch of the Peloponnesian War," and there are more charming efforts to be found in the volume.

FINE ARTS.

ARCHITECTURAL PHOTOGRAPHIC ASSOCIATION.

This society continues and extends its very useful operations. It has just published twenty-two photographs, taken in France during the past summer, uniform with the series from Wells Cathedral, which we reviewed last year. The present series have novel interest and value, including, as they do, the richest portions of cathedrals and church buildings, mostly in central and southern France, that have been very unfairly neglected in favour of the more readily accessible architectural monuments of northern and western France; and exemplifying also phases of architectural style which we should hardly find so clearly and fully illustrated elsewhere. The first three of the series represent the very curious projecting porch of the Cathedral of St. Trophime, at Arles, constructed in the twelfth or early in the thirteenth century, and two views of the still more curious cloisters of this cathedral. Then follow three views of the magnificent triple west doorways of Auxerre Cathedral. Six photographs are very properly devoted to the splendid porches, portals, and doorways of the Cathedral of St. Etienne, at Bourges—one of the finest cathedrals in France. The west façade of this immense edifice has no less than five deeply-recessed portals, all ornamented in a style of peculiar richness and originality, with sculptures by some sculptor whose name, like that of the architect, is unknown. Three views are given of the three doorways of the famous west portal of the Abbey Church of St. Gilles—a masterpiece of the Romanesque style, dating, perhaps, as early as the eleventh century. Every species of ornamental decoration and sculpture, combining many of the elements of classical architecture, has been lavished on the west front of this still remaining "lower" (but not subterranean) church. Views of the palace of the Archbishop of Lyons; the west portal of Sens Cathedral, one of the finest of its style—early Gothic or Transition Norman; the south portal of the Church of St. Martha, at Tarascon, which is of the twelfth century, the remainder of the church being Gothic of the fourteenth; and the quaint, Romanesque west portal of the Abbey Church of Vezelay complete the series. The photographs were taken for the society by Messrs. Cundel and Downes, of New Bond-street, and are generally very satisfactory—the detail in no instance being sacrificed to mere force of effect. These photographs are to be obtained of the hon. secretary to the association, 23, Bedford-row, W.C.

The statue of the Prince Consort by Mr. Theed, just placed in the principal corridor at Balmoral, represents—very appropriately for the situation—his Royal Highness in a strictly domestic character, in the Highland dress, with a rifle in the left hand and the right resting on the head of a favourite dog. Upon the pedestal is the following inscription, selected by her Majesty:—"Albert, Prince Consort, 1861; his life sprang from a deep inner sympathy with God's will; and therefore with all that is true, and beautiful, and right."

The screen which for more than three hundred years had separated the choir from the nave of Cologne Cathedral has been recently removed, and the vista which now bursts upon the traveller standing at the western door, and looking along the entire length of the glorious edifice, is unparalleled for beauty and hardly equalled for grandeur. The windows, too, have received nearly all the stained glass prepared for them, and it is, perhaps, the most beautiful of modern times.

A collection of the rarest etchings and engravings from masters of all schools are being copied in photo-lithography by the Brothers Burchard, and are in course of publication in Berlin.

The curious and otherwise remarkable process of "photo-sculpture" of Messrs. Willème and Co., of Paris, which we described some time since, is being successfully employed; and there are examples of the art in the present exhibition at Paris of industrial art, in the Palais de l'Industrie. A correspondent of the *Athenæum*, writing on these specimens, says:—"I had already seen the figure of M. Théophile Gautier produced in plaster by this process, and very odd and quaint it looked—a statuette, a few inches high, of this popular writer, as faithful to life as a photograph, and in white plaster. It looked like M. Gautier covered with flour and seen from the wrong end of a telescope. But the writer in his habit as he lives looks classical when compared with the figure of a lady in bonnet and crinoline, produced in the material that supplies cheap copies of the Venus of Milo? The photo-sculptures of Willème and Co. are exact copies from life, and we may now look forward to the appearance of galleries of photo-sculptures; and people will exchange their statuettes as they now exchange their cartes de visite.

The Prince Consort Memorial bronze statue, an Engraving of the inauguration of which at Guernsey we gave last week, is a duplicate of the statue of the Prince inaugurated in June last in the gardens of the Horticultural Society.

The important new Musée Napoleon III., in the Louvre, Paris, the arrangement of which has occupied several months, has just been opened. It occupies the nine large rooms in the Louvre which follow each other to the east of the square saloon, and which were formerly occupied by the paintings of the French school. This museum is composed of antiquities procured by M. Renan during his mission in Phœnicia and in Asia Minor, together with some articles selected from the Duke de Luynes's collection, paintings from Pompeii, and a portion of the ceramics in the Campana Museum. The ceramic collection affords a complete history of the potters' art in ancient Judea, Greece, Etruria, Rome, &c.; and the Pompeian paintings seem as fresh as the day they were executed.

Sir Rowland Hill having been compelled, by the state of his health, to obtain leave of absence for six months, Mr. Tilley, the Senior Assistant Secretary, will, by direction of the Postmaster-General, perform the duties of Secretary of the Post Office during Sir Rowland Hill's absence.

Mr. Gould, the English ornithologist, has written to the secretary of the Adelaide Institution in South Australia, stating that one of the birds discovered during Stuart's exploration was a new species of paroquet, which he has named Polytelis Alexandra, in honour of the Princess of Wales.

On Monday her Majesty's ship Tweed, laden with the last consignment of the telegraphic cable about to be laid down over a length of 1200 miles, from the mouth of the Persian Gulf along the seacoast to Mekran, left the works of Messrs. Henley and Co., the contractors and manufacturers, at North Woolwich.

The master of the steamer Georgia, which was lost on Sable Island, while on her voyage from New York to Liverpool in August last, has had his certificate suspended for twelve months. The Court was of opinion that in this case—as in that of the Norwegian, which was recently investigated—the vessel was lost through culpable neglect.

A novelty in the way of "Testimonials" is recorded in the *Dublin Evening Post*—the presentation of a valuable piece of plate, with an address, to a Protestant Rector, by his Roman Catholic parishioners, the parish priest himself being one of the subscribers. The clergyman who has won this remarkable distinction is the Rev. C. S. O'Grady, for fifteen years Rector of Athlacca, in the county of Limerick. The subscribers gratefully acknowledge his ever-ready and kind advice, courteously given to those who sought it, and his numerous acts of charity, and they observe that in thus marking their sense of their many obligations to him and his family "they are only performing a work of love and duty."

Mr. W. C. Macready has consented to act as a vice-president of the National Shakspeare Committee. Steps have been taken, or are on the eve of being taken, to form local committees in aid in Edinburgh, Glasgow, Ayr, Manchester, Newcastle-on-Tyne, Brighton, Dudley, Birmingham, and Dublin, in the latter place under the sanction of Earl Carlisle. A deputation, consisting of Sir Richard Kirby, Messrs. Westland Marston, Robert Bell, Shirley Brooks, John Oxenford, Rev. J. M. Bellew, Dr. Doran, F. G. Tomlins, B. Webster, H. G. Bohn, S. Phelps, J. B. Buckstone, Stirling Coyne, and Linnæus Banks, hon. dramatic secretaries, are about to wait upon the managers of the leading London theatres and request them to give performances in aid of the fund.

The little library the Jutland ladies were to present to the Princess of Wales on her marriage-day has been at length completed, and will be shortly sent over to England. It is intended to form a supplement to the collection her Royal Highness took with her from Copenhagen, and contains the works of thirty-four Danish authors, together with several atlases and illustrated works. Among other writers of a miscellaneous character, the King of Denmark is represented in it by his "Essay on Northern Antiquities," which heads the list in the Danish original, together with an English, French, Greek, Italian, German, and Czechian translation. The bindings of shagreen and moire antique have the initials of her Royal Highness, surmounted by a crown and tracery-work. In some of the bindings the ornamental gilding is executed after the drawings of eminent Danish artists, the workmanship being so neat and perfect in its way as to add not a little to the value of the handsome gift.

MUSIC.

At the Royal English Opera, Wallace's new piece, "The Desert Flower," continues to draw good houses. The next novelty at this theatre will be the opera which Balfe has just completed, and which, it is expected, will be produced about the end of November. The libretto is taken from the popular drama "The Duke's Motto."

Five performances of Italian opera are announced at Her Majesty's Theatre; the first, this evening, will consist of Gounod's "Faust," the remainder will be given during next week. Mdlle. Titiens will be the prima donna, and Mr. Sims Reeves the tenor. It is also said that, at the same theatre, a series of English opera performances will be given after Christmas, and that the company will include Mdme. Lemmens Sherrington, Mr. Sims Reeves, and Mr. Santley.

M. Louis Jullien has announced a series of promenade concerts, similar to those of his late father, at Her Majesty's Theatre, commencing on the 7th of November.

A new opera, entitled "Hiarne; or, the Tyrfing Sword," a posthumous work of the late Heinrich Marschner, the celebrated author of "The Vampire," has just been produced at Frankfort-on-the-Maine with great success. It is described by the German journals as a powerful and interesting work, worthy of the high reputation of the lamented composer.

A national festival has taken place at the Hague, when the music consisted wholly of works by Dutch composers. Among them were a psalm by Lubeck, and an oratorio, entitled "The Resurrection," by Heinze.

Great interest is excited in Paris by the expected production of a new opera by the illustrious octogenarian Auber, which is now in rehearsal at the Opéra Comique. It is entitled "La Fiancée du Roi de Sarbe." The libretto was written many years ago by Scribe. The veteran composer is said to enjoy unimpaired health and vigour; and this opera is described by those who have heard it as being as fresh and sparkling as the works of his best days.

A correspondent at Hamburg writes us under the date of the 12th inst.:—"It might be of some interest to your readers to learn that Miss Adelina Patti has eleven times performed in our city with immense success. All local newspapers are full of praise of every part she sung. The operas were 'Dinorah' three times, 'Il Barbiere di Siviglia' twice, 'Traviata," 'Faust and Marguerite,' 'Lucia di Lammermoor,' and 'Martha.' She got £120 every night. She departed on Saturday night, presenting £30 to the orchestra, and an equal sum to the members of the chorus—half a guinea each—and her carte de visite. In the course of next week she will appear at the Royal Opera, Berlin. Another generous trait of Mdlle. Titiens I have to state at the same time. On the 26th inst. the newly-erected St. Nicholas Cathedral, in our city, will be inaugurated with the performance of Handel's 'Messiah.' Mdlle. Titiens, a native of Hamburg, has kindly consented to sing the solo parts, undergoing the trouble of the journey, and even paying the travelling expenses herself. Her offer was heartily accepted."

THE THEATRES.

Haymarket.—Sheridan's comedy of "The Rivals" was last week revived at this theatre for the purpose of introducing to the London public a débutante in the character of Mrs. Malaprop. Miss Snowdon is an elegant actress, and gives rather a refined interpretation to the part. There is a manifest tendency in new performers to take what may be termed delicate views of old characters. The robust creations of our time-honoured dramatists are thus reduced to the nice proportions preferred by a more polished age, and assimilated as much as possible to the drawing-room dramas of the present day. Mr. Buckstone, however, in his portrait of Acres, wisely keeps to the old type, and still expects us to laugh at him, which we do heartily. On Mr. Chippendale's Sir Anthony Absolute and Mr. Farren's Captain we need not enlarge, any more than on Mr. Howe's Falkland, now for so many years familiar to West-end audiences. We are happy to find that this excellent comedy has held its place during the present week, alternating with the Countess of Gifford's "Finesse." The public will hear with some satisfaction that Mr. and Mrs. Charles Mathews return to this house on Monday next, and will, doubtless, render a hearty welcome to the facile and gentlemanly actor who has lately won the tribute of admiration from Parisian audiences.

Sadlers' Wells.—The management here is progressing in the plan of establishing the success of the house on Shakspeorean revivals, and shows a laudable determination to excel in the manner of producing pieces, having adopted, in "The Merchant of Venice," Mr. Kean's introduction of gondolas into the action. This liberality has been appreciated by the audience. Miss Marriott, too, has added the scene of the Morocco Prince to the casket episode, and thus shown a proper reliance on the poet's own arrangement of his drama. Mr. Marston's Shylock was especially good, as was also his Hamlet on Monday. The public will benefit by the opportunity now afforded to this classical actor of showing his powers in the highest efforts.

THE DISTRESS IN THE NORTH.

The usual weekly meeting of the Central Relief Committee was held in the Townhall, Manchester, on Monday—Lord Egerton of Tatton presiding. Mr. Farnall reported a further decrease of 1629 in the number of persons receiving parochial relief in the cotton-manufacturing districts. With regard to the state of employment, the following facts have been collected by the honorary secretary of the Central Relief Committee:—On the 26th ult. there were 267,962 operatives in full work, 104,198 on short time, and 160,835 out of work, against 235,827 in full work, 118,900 on short time, and 171,535 out of work in August, and 235,827 in full work, 121,718 on short time, and 178,205 out of work in July. In December last there were on full time only 121,129, on short time 165,600, and 247,230 entirely out of work in the districts then in communication with the committee. A very important discussion took place on the probable cotton supply of the coming year. The discussion arose upon a paper prepared by Mr. E. Ashworth, who, basing his calculations on what he believed to be trustworthy testimony, estimated that in 1864 the imports of cotton will exceed those of the present year by 610,000 bales. The following grants, with some smaller ones, were made:—To Stalybridge, £450; Dukinfield, £250; Oldham, £800; Bolton, £500; Chorley, £200; Tintwistle, £150; Shawforth, £100; Whitworth and Facit, £200; Stockstead, £100; Crompton, £100.

At a special meeting of the Town Council of Blackburn, held on Monday, it was agreed, on the motion of the Mayor, to affix the corporate seals to an indenture of mortgage between the Corporation and the Loan Commissioners to secure the sum of £10,000 at 3¼ per cent interest, being part of a sum of £78,300 agreed to be advanced to the Corporation under the Public Works Act.

The Local Government Act has been adopted by the township of Hopwood, Lancashire.

The Mansion-house Committee met yesterday week—the Lord Mayor in the chair. The total amount of subscriptions received up to Thursday was £551,883, of which sum £447,261 had been remitted to the distressed districts. The subscriptions received during the fortnight amounted to £388, of which £328 11s. was from home, and £59 13s. 2d. from colonial sources. The following grants were made for distribution at the meeting:—Blackburn, £500; Rochdale, £500; Wigan, £300; Salford Borough, £250; Dukinfield, £250, and for clothing, £50; Hyde, £200, and for clothing, £100; Bolton, £150; Glossop, £200; with several smaller ones, making a total of £3509.

Letters for British Columbia, Vancouver Island, and the Sandwich Islands, forwarded by British or United States' packet to the United States, will in future be chargeable with the following reduced rates of postage, viz.:—Not exceeding ½ oz., 1s.; above ½ oz., and not exceeding 1 oz., 2s.; above 1 oz. and not exceeding 2 oz., 4s.; every additional ounce, 2s. This postage must be paid in advance, or the letters cannot be forwarded.

The Cathedral of Cologne has, after the vicissitudes of more than six centuries, so far approached completion that the nave and transept have been declared to be finished. The long-promised celebration of this great event was commenced on Wednesday week, on the morning of which day all the bells of the city rang joyful peals and the citizens decorated and beflagged their houses and the streets, while thousands of people from far and near poured in to take part in or witness the celebration.

The Sandwich Islands, according to the *Panama Star*, are decreasing in population and business. The number of foreign vessels which had arrived at Honolulu during the first half of the present year was less by half than during the corresponding period of last year. There is a great scarcity of labourers for the sugar plantations, and parties are earnestly urging the Government authorities to import coolies from Polynesia. The population of the islands is decreasing more rapidly than at any former period. It is now estimated that they contain only 60,000 inhabitants.

COLUMN FOR THE CURIOUS.

Lord Lyndhurst died in the house No. 25, on the east side of Great George-street, Hanover-square. Here his Lordship's father, John Singleton Copley, established himself in 1775, after his return from Italy. We find his collection of pictures briefly described in the *Picture of London* for 1806. He died here in 1815. Lord Lyndhurst possessed some of his father's paintings among which are "The Death of Major Pierson, at Jersey," which is, perhaps, the painter's best picture. In his great son, three times Chancellor of England, some pleasant gossip has recently appeared, not omitting the story of the damasking of the Great Seal (the perquisite of the Lord Chancellor) at the demise of George IV. Lord Lyndhurst never held the Seal, but Lord Brougham was its Keeper when the Seal of William IV. was completed; hence there were two claimants for the damasked Seal, one arguing that it was really a Seal of the preceding reign, and not to be vested in him at the death of the Sovereign; the other that it was in full force till it was actually defaced. King William was appealed to to settle the dispute, and decided that each of the two Lords should have half the Seal. As Major ponders over his goldsmith to insert the two halves in two superb silver salvers, which he presents to Lord Lyndhurst and Lord Brougham, recommending them to "toss up" which should have the obverse and which the reverse of the Seal. Another story of Lord Lyndhurst resigning the Great Seal, and, on his descending the palace staircase, being addressed with "*Lord* Lyndhurst, can I do anything for you?" was told with much humour by the ex-Chancellor himself. His generosity in sending money to an infirm and distressed Radical who had many years virulently abused him, and his pleasantry of "he who acts as his own counsel has a fool for his client," being an adage framed in the dock, are not forgotten.

The recent earthquake will contribute something to the elements of seismometry, and observers are asking for information through the journals. Mr. Jones describes the earthquake movement in the observatory at Beeston, as a wooden rod, 30 ft. long, freely hung in a tube 6 in. in diameter, which carried a fine aluminium wire base of the tower. At the base of the rod is attached a solid brass ball, with a steel index below—"An earthquake, by moving the position of the tower, causes the index to plough up the chalk. On the smoked curved chalk registering the displacement of the summit of the tower, while the time is that in the direction of the index." The circumstances of this pendulum, after having been idle (except once) for thirteen years, is described by Mr. Lowe as very satisfactory. What a pity, and in simplicity to Dr. Buckland's *bowls of treacle*, which, set in places liable to earthquakes, measure their extent; the inclination of the treacle in the bowl showing the position of shock. By-the-way, how amusingly has Horace Walpole chronicled in his "Letters" the freaks of the earthquake of 1750. The pamphlets and caricatures were a mine of fashion by the foretelling of future shocks, and a host of odd associations, made Walpole unwilling to leave so fruitful a subject for his fascinating pen.

We see it stated that a memorial to Captain Cook is about to be erected in Sandwich Islands. Many years ago Governor Thomas Brisbane, when Governor of New South Wales, caused to be placed upon the top of the cliff at Cook's Landing Place, in Botany Bay, a cast-iron first lauded—a brass tablet commemorating that event.

The Duke of Buckingham, whose correspondence with Goethe" has just appeared, was a man of a very active turn of mind; and, at the same time, an archæologist and a worker in the fields of science. He is known to have discovered a portrait of Anne Boleyn painted in the fifteenth century, and showing that annual domestication like a camel. He also discovered from the Harleian Manuscripts the original charter of the year 1495, drawn on parchment, and ascribed to Kibera, but evidently by an earlier hand. The Duke took a lively interest in the English Tudor experiments, in the early efforts of lithography, and in numismatary enterprises. In 1823 he was told by the Duke of Clarence a story to this effect—that the steam-vessels could not possibly prevail against the constant friction of the sea-water would necessarily ignite the paddles.

A Correspondent of *Notes and Queries* tells us that at a recent auction in the county of Tipperary, the contents of a library (between six and seven hundred-weight) were knocked down at one halfpenny per pound. We were the books merely waste paper? Not at all. There were works of Bacon, Hammond, Usher, Tillotson, with many more modern authors, "good books" now.

An old story of haddocks and whitings is told in Dr. Carlyle's amusing "Autobiography." The scene was round the coast of Fife, and Lord Lovat and some friends at Lucky Vint's celebrated village tavern, Edinburgh. Carlyle says:—

As soon as we were set, Lovat asked me to send him a whiting from the dish of fish that was next me. As they were all haddocks, I answered that they were not whitings; but, according to my custom, he had not a bone in it. The whiting was not ill-off. This saying takes its rise from the superiority of haddock to whitings in the Firth of Forth. This fish has been more plentiful and more more than fifty drogoons; he was sure they must be whitings, as he had bespoke them. Sandie lifted one the wine, and, perceiving they were not, he had not little skill, and, as his Lordship had bespoke them, I must certainly be mistaken. Upon this he called, I sent him one, which he took and ate, pleased with, swearing again that he never could eat a haddock all his life. The landlord, after afterwards that he had been very much affronted by the haddocks, and she had no other, she made her cook carefully *scrape out St. Peter's mark* out of the shoulders, which she always does to haddocks.

Ghostology has almost driven table-turning out of mind. Still, it is worth while to note an instance of this supernaturalism, related as a judgment upon the murderers of Becket, at Canterbury, and known as a popular tradition at South Malling as late as the fourteenth century. It is thus concisely narrated by Dr. Giles in his "Memorials of Canterbury":—"They (the murderers) rode to Saltwood the night of the deed; the next day to Lewes, and so the court to South Malling. On entering the house they threw off their arms and trappings on the dining-table, which stood in the hall, and after supper gathered round the blazing hearth. Suddenly the table started back, and threw its burthen to the ground. The attendants, roused by the crash, came in with lights, and replaced the table. But a second and still louder crash was heard, and the various articles were thrown still further off. Soldiers and servants in wild confusion scrambled in vain under the solid table to find the cause of its convulsion, till one of the conscience-stricken Knights suggested that it was indignantly refusing to bear the sacrilegious burden of those who shed the earliest and most memorable instance." adds Dr. Stanley, "of a rapping, leaping, and moving table.

Fewter has almost entirely disappeared from our private dinner-tables, chiefly in to be seen in the few long-established metropolitan chophouses, to which it may be conveniently transported when time. It has almost become one of our domestic antiquities, so that we are not surprised to find it figuring in a recent exhibition of the Society of Antiquaries. Mr. Octavius Morgan lately exhibited a pewter plate of the reign of Morgan of Tredegar, and of the Duke of Monmouth impaled with those of Morgan of Dérey (Therow), in their quarterings. It formed part of a dinner-service, consisting of many plates and dishes, the latter all circular, and profusely engraved with the family arms and crest. William Morgan, son and heir apparent of Thomas Morgan, of Tredegar, married, in 1661, Blanche, daughter and afterwards coheress of William Morgan, Esq., of Therow, in the county of Brecon, Knight Attorney of South Wales. The service, therefore, must have been made shortly after that date, and is a good illustration of the table-services of the gentry of interval, the wealthier and more important of whom ranged using silver, whilst the humbler classes of the population used treasures of wood; these were mostly engraved with the initials frequently sunk at one corner to hold salt. This service continued in use at the old family house at Therow, in Buckinghamshire, till the year 1817, various additions of soup-tureens and vegetable-dishes having been made to it, in more recent times. It was at length removed to the servants' hall, where, from rough usage, the plates became much bent and injured, and in course of time found their way to the plumber's, except the specimen exhibited and another similar plate. The inventory of this pewter service, dated 1713, includes a pair of candlesticks, and 12 salvers, 2 sauces.

The lead and foot stones of the grave of Daniel Defoe, in Bunhill-fields, have just been repaired, and an epitaph added (the former inscription being obliterated), at the expense of Dr. Rogers, of Dalston.

DAY AND NIGHT SIGNALS AT SEA.

WEDNESDAY was the anniversary of Nelson's last and greatest victory, over the combined fleets of France and Spain, gained off Trafalgar in 1805. Immediately before the action Nelson exhibited the ever-memorable signal, "England expects every man will do his duty." In the accompanying Engraving it is shown in the great a number and variety of flags had to be used to convey this signal to the fleet. The horizontal-lined portions of the flags indicate blue, those with perpendicular lines red, and with oblique ones purple, whilst the dotted parts represent yellow. The blank spaces are of course white. Each of the flags had to be arranged according to its corresponding number in the signal book, and run up to the masthead, and kept there until answered and acknowledged by every ship. Then another set of flags had to take the places of those hauled down, and so on until the signal was complete. It is easy to conceive how great a length of time was occupied in this manner, but, as neither the French nor English fleet had steam power in those days, time was of less importance.

This method of signalling by flags is still used in the Navy, but it is very much simplified. In some cases a semaphore is used, similar to those at railway stations, and consists a message is conveyed by an apparatus resembling four umbrellas upon one stick. These are so contrived as to work independently of each other; each pair point towards each other, and can be opened so as to represent a one, a circle, or a square. When these signalling each other are near enough a conversation may be carried on by the initiated, merely by raising the right, or left, or both the arms of the individuals communicating by certain words.

The code of signals used by night is also much simplified. Formerly different coloured lights were used on the mastheads and arranged in various positions, either horizontal, or vertical, or in the form of a cross. This is now done by a series of intermittent flashes of white light; sometimes these flashes are instantaneous, at other times prolonged, and the duration of the interval of darkness between one flash and another also indicates a certain part of the signal. A powerful lantern is hoisted, and probably a gun fired, to call attention. The light in this lantern is what is used in "showing light," being an argand flame inclosed in a large glass globe. Over this flame fits a large extinguisher arrangement, which, without affecting the burning of the light itself, can, by a simple method, effectually prevent any light being visible. By raising and lowering this extinguisher it is easy to what flashes of light can be made at regulated intervals, and so a signal conveyed. An ingenious method of working the lantern has been contrived by the barrel organ principle, to raise or lower what we may designate as the extinguisher. The index is arranged with four levers, which are first of all moved to correspond with the numbers on the instruments, agreeing with the numbers in the signal-book. This being set to the required signal, which is the work of a few seconds, a man turns the handle of the instrument, and the levers, working upon the cord or rod, which passes through the deck, gives the signal required. He continues to do this until all the signals have been passed, and by this arrangement the signal is repeated again and again with perfect accuracy; the man at the lantern, taking care that the darkness intervenes. This is very simple.

In addition to the explanation to Nelson's Last Signal, we may state that the original may be seen near the Trafalgar model in the Royal United Service Institution, in Whitehall-yard.

The Naples journals announce that last week at Pompeii, in removing the earth in the rooms which were discovered at the time of the visit of the Emperor of Genoa, several necklaces were found, ornamented with precious stones.

A son of Mustapha Fachs, an Egyptian Prince, and six months, and member of the Khedivial family, 17 persons in all, left Marseilles from Constantinople, to be educated in one of the public schools of Paris. Mustapha Fachs is the Khedive's brother.

M. H. de Pène, in his "chronique" in the *Figaro*, announces that Mlle. Jane Hading is to be shaved off her curls in Paris during the coming season is that of feminine whiskers. The little tuft (says the writer) which starts from the end of the ear, on each side, and which formerly formed the little curl known as an *accroche-cœur*, is now to fall straight down, and shine in a thick mass.

It is said that some time since the Prince Royal of Prussia was looking at several emigrants embarking at Danzig for America when a young peasant approached and said, "I remember, your Highness, when we had a crown I will tell you how to prevent any further emigration." "Here is a gold piece," replied the Prince; "tell me how." "Then," said the lad, "let the wind M. Bismarck to America, and I promise you no Prussian will follow him."

DWELLINGS OF THE POOR IN BETHNAL-GREEN.

(*From our own Correspondent.*)

THAT public attention has at last been directed to the condition of the poorer neighbourhoods of Bethnal-green is attributable to the evidence of the coroner during the inquest upon the body of a child, declared that death had been caused by "blood-poisoning." Although the case was by no means singular in certain districts. That a wide and populous district has for years been subject to all the foulest influences which accompany a state of extreme filth and neglect would seem to be a fact little known, and certainly cannot have had little to fear from parochial authority, even when they have not been actually caused by the same influences.

The disgusting details which have lately been revealed to that portion of the public who have only heard of Bethnal-green as a low neighbourhood where the weavers live, somewhere in the far east of London, have been the steady growth of years. Those where duty it has been to point out their inevitable consequences have treated them with indifference, or have suffered themselves to hope that some more powerful authority would eventually compel the alterations which they have faintly suggested. But "threatened men live long"; and even now the owners of the putrid sties in the purlieus of Fournier-street, Church-row, Thrawl-street, Twig-folly, and other centres of pestilence may well believe that neither board, nor commission, nor sanitary officer will trouble them if they can only let inquiry itself die, and so contrive to hush up the whole matter until the passing excitement is directed to some new object.

Anybody whose acquaintance with Bethnal-green commences I more than a quarter of a century ago will remember that some of those names of streets and rows which now seem to have such a grimly sarcastic meaning expressed not inapply the places to which they originally referred. Hollybush-place, Green-street, Mount-pleasant, and other neighbourhoods, which now consist of ruinous tenements reeking with abominations, decaying, sodden, crumbling, dangerous, standing on or near plots of garden ground, where the inmates breed pigs and fowls and grow cabbages on their scanty loam, were then some of the last of the old French refugees doomed away the evenings of their lives in their summer-houses, amidst flower-beds gay with virginia stocks and creeping Jenny.

At the time, and before the present main road was formed to supersede the old Bethnal-green road, which led from Shoreditch to Bethnal-heath, this district was but a sort of country extension of Spitalfields: for Spitalfields began to assume the appearance which its exhibits now that its worst features have been exceeded by the wretched maze of streets and alleys which have built all greenness, except that belonging to the cemetery, out of Bethnal. It may be remarked that the worst parts of Bethnal-green are not those inhabited by weavers, and where the weaver has retained his personal cleanliness and the tidiness of his poor room often at considerable cost to those easy of his labours. His work requires a "long light," or leaden casement, so that he most frequently occupies garrets originally designed for his trade. Poor, suffering, nearly starved, and living under the most unhealthy with the rest both of bad or no drainage and insufficient water supply, his business requires at least some amount of personal cleanliness. The delicate fabric on which he is employed could never come out unsullied from the touch of contact.

Skirting the station of the Great Eastern Railway in Shoreditch, and traversing Club-row—the Sunday morning resort of pigeon and bird fanciers—the visitor has only to cross that road to enter the land up Nichols-row, to find himself in as foul a neighbourhood as can be discovered in the metropolis. Indeed (except He has nothing to compare to it), and amongst a population depressed almost to the last stage of human endurance. Should he have started with an impression that report had exaggerated the horrors of these dwellings, he will be have the heart—and, he said, the stomach—to inspect them. Should he have begun his inspection in language could not have inadequately express the condition of the dens which surround Friars-mount. A few of the external evil of these miserable fabrics, though dirty and ruinous enough, do not indicate externally the teeming and filthy rooms, which can only be appreciated by a personal examination. The houses, though in a falling tenement is propped up by a shoring-beam to prevent the wall from falling into the street, there are still in many cases of poor respectability in some places; and ragged, dirty children, and paint women. Even the windows of the lower rooms, though they have faded, alternate with the clean-looking and even well-dressed families of some of the shopkeepers. Let the traveller penetrate further, and he will enter upon a scene of wretchedness which is a disgrace, and each of which contains tributary hovels many degrees worse than itself. Many of these courts have no real name, since, if they had any names, the names have been obliterated except from the memory of the police or the City missionary, the doctor or the landlord; and the entrance to many of them is by a covered alley not broader than an ordinary doorway—nay, sometimes so narrow that a brewer's dray-man would be required to back his load through.

At the end of this blind court there will be found either a number of wretched tenements, or the entry three sides of a square of little square, like a fetid tank with a bottom of mud and slime; or an irregular row of similar tenements, mostly of four small rooms, fronted by rotten wooden palings. In one or more of these are the factories which are common to a great part of the whole neighbourhood.

The miserable occupants are principally Irish labourers and in an almost inconceivable extent. The water for some fourteen or fifteen houses is frequently supplied from one tap in a dirty corner, where it runs for only a few minutes one or two days in the week. Sanitary arrangements are utterly unknown. The water for some fourteen or fifteen houses is frequently supplied from one tap in a dirty corner, where it runs for only a few minutes one or two days in the week. Sanitary arrangements are utterly unknown. At the time of the occupants to an almost inconceivable extent. The water for some fourteen or fifteen houses is frequently supplied from one tap in a dirty corner, where it runs for only a few minutes one or two days in the week. Sanitary arrangements are utterly unknown. Add to this the decay of vegetable matter, and the constant evidence of the presence of pigs from adjacent premises which have lately (these have none), and that sickly odour which belongs always to pigs-sties, and which, in the case of human habitations will represent a scene of places extending over Bethnal-green parish for more than a mile in length and half a mile in breadth.

This district of Friars-mount, which is mainly represented by Nichols-street, Old Nichols-street, and Half Nichols-street, including, perhaps also Sclater-street, is the worst of the vice and misery of the district, and the limits of a single article would be insufficient to give any detailed description of even a day's life in this scene of picturesque in such misery; it is but one painful and monotonous round of vice, filth, and poverty, huddled in dark cellars, ruined garrets, bare and hideous rooms, and even with disease and death, and without the means, even if there were the inclination, for the most ordinary observance of the simplest rules of decency. In the neighbourhood where the inhabitants follow poor trades the condition is but little better: a few streets where there is a more clearly appearance do but be a repetition of the worst. In a few cases a basement, usually a cellar whole families occupy single rooms, or, if they can find a corner of available space, take a lodger. In one *cul-de-sac* especially, separated by intolerable fetor, the fetid yards are devoted to the donkeys, which are kept in numbers, and in places which must be mentioned without loathing. Bandbox and lucifer-box makers, cane workers, clothespeg makers, shoemakers, and tailors, mostly earning only just enough to keep them from starvation, sometimes from roof to basement; and, as the owners of such houses have frequently bought the leases cheaply, and have made all they can out of them before to the landlords are greater in proportion than those on a middle-class dwelling.

The visitor who, after having threaded the labyrinth of Friars-mount, remembers that it is principally to Throld-square that attention has been called in the House of Commons, will be aware that the neighbourhood he has just left. The truth is, that it is in nothing worse—by, in many respects, much better. The worst remains the main road; but that such a den should for so long have been suffered to open from a broad public thoroughfare is in itself a pretty good evidence of what is to be found in the courts and alleys which are hidden in almost unexplorable corners. Throld-square is a representation of but, as it were, the outside and sinewless skin. But what it is muddy, that its houses are ruinous, and that the rotten, ruined, wooden pump, since full of ruin, which adorns its filthy area is a pretty good representative of the usual water supply. It is equally true that on entering it from the main street the visitor will feel a sickly feeling even in the open air, would, if he were previously hungry, discover within himself a sudden loathing for food and a desire for drink instead. But Throld-square is by no means an unfavourable specimen of Bethnal-green, although the parish authorities are unable to point out of it, as though for its condition alone they had been liable to censure.

This impression is still further increased on reaching Hollybush-place, where the poor mother occupies a parrot with a family, has lost two children by disease which has been directly established by the coroner, and in reference to Hollybush-place that the Inspector of Nuisances took exception to the inaccuracy of a report which was current a few days ago, that a shed for cows and only nine feet from the house where the shoemaker's children died of putrid fever, and that pigs were also kept close by. He declares that there were but fifty cows in the whole town, and that one of these from the house, and that pigs have not been kept there lately. Taking this correction for what it is worth, the visitor will have proceeded on his journey several stifling localities where, amongst the crowded hovels, pigs are very evidently kept, and add their filthy exhalations, and their special disease, to the general abominations. As there are also several crowsheds and not a few slaughter-houses in this eastern portion of Bethnal-green, which, at the district of Twig-folly and all that neighbourhood, rivals Friars-mount itself, and has horrible peculiarities of its own, it might be useful to inquire to what purpose the animals are ultimately applied. There can be no necessity for stall-fed cows in this particular district, and the milk cows trained little to the pail. But perhaps they are the inhabitants) might readily be sent from the country by the Great

THE DWELLINGS OF THE POOR IN BETHNAL-GREEN.

GARRET AT NO. 10, HOLLYBUSH-PLACE.

Eastern Railway to Mile-end station, and there delivered to the dealers.

It is scarcely too much to say that stall-fed cows huddled together in filthy, undrained sheds, in the midst of fever-haunted houses, must yield milk of a very inferior quality, but both cows and pigs suggest a more startling consideration. It is the custom when cows "go off their milk" to exchange them for others; but what of the instances where cows either die or, being past yielding, are slaughtered? What of the pigs, which poison if they are not poisoned in return by the foulness of their habitations? It is a significant fact, whether it has any relation to this inquiry or not, that all through this teeming neighbourhood of Bethnal-green the visitor will have noticed a surprising number of shops where the coarsest parts of meat seem to share the space with what butchers call offal. Cow-heels, bullocks'-hearts, kidneys, and livers, thin and poor-looking tripe, and sheeps-heads are amongst the uncooked portion of the stock; while the cooked viands are represented by piles and chains of bruised, and often damaged-looking, saveloys, black-puddings, and a sort of greasy cakes of baked sausage-meat, known as "faggots," sold for a penny or three farthings, and made of the harslet and other internal portions of the pig. It is often the case that these shops have some display of joints of meat, often coarse, poor, and flabby-looking, but they bear no proportion to the staple trade. It would be curious to inquire how many Bethnal-green pigs, or if any Bethnal-green cows, ever find their way to a regular dead-meat market, there to come under the observation of an authorised inspector. Whether they do or not, the places in which they live must be removed, and this foul district must be purged, or our sanitary legislation is ineffectual, and all the wonderful sanitary schemes of which we have heard, and for which we shall have to pay so much, are but costly failures.

ROOM OCCUPIED BY A MILITARY TAILOR AND HIS FAMILY, AT NO. 10, HOLLYBUSH-PLACE.

MEETING OF THE BRITISH ARCHÆOLOGICAL ASSOCIATION AT LEEDS.

THE 20th annual session of the British Archæological Association was held last week in Leeds, Lord Houghton (formerly Mr. Monckton Milnes) being the president, and taking an active part at the various evening sittings of the society. His Lordship also delivered an able inaugural address to the society and the assembled inhabitants of Leeds, on Monday, in the Victoria Hall, after the Mayor and Corporation had given the society a formal reception and welcome to the town. In the evening a brilliant conversazione was given by the civic authorities.

The archæologians during the week made excursions to a Norman church at Adel, near Leeds; to Ilkley, the Olicana of the Romans; to Aldborough, the Isurium of the Romans; to the wayside chapel and the old houses in Wakefield; to Pontefract Castle and Church; to Ripon Cathedral and Fountains Abbey; to Kirkstall Abbey; and to Halifax. The session terminated on Monday with a visit to York. It is intended to hold the next annual congress at Northampton.

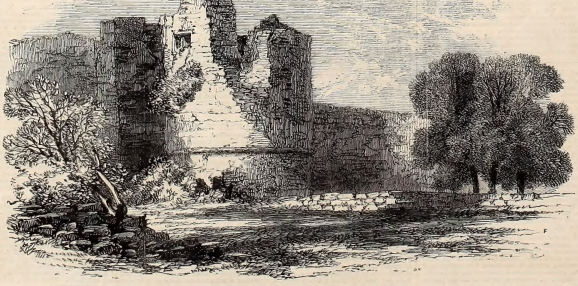
During the week the society had the use of the lecture-hall of the Philosophical Society, and many valuable and interesting papers were read by Mr. J. R. Planché, Rouge Croix; Mr. A. S. Lawson, Aldborough; Mr. John Lee, LL.D., F.R.S., F.S.A.; Mr. T. Wright, M.A., F.S.A.; Mr. Gordon M. Hills; Mr. E. Levien, of the British Museum; Mr. H. Syer Cuming; Mr. E. Roberts, F.S.A.; Mr. G. R. Wright, F.S.A.; Rev. C. H. Hartshorne, Mr. G. Wentworth, Rev. W. C. Lukis, Rev. Scott F. Surtees, and many other distinguished antiquaries.

A correspondent has supplied us with the following details relating to the subjects of the accompanying Engravings:—

Fountains Abbey is situated in the valley of the Skell, in a landscape of great beauty, about three miles from Ripon, at the western edge of the pleasure-grounds of

FOUNTAINS ABBEY, FROM THE WEST.

the magnificent domain of Studley Royal. The "mighty carcase," as Whitaker terms it, retains vestiges of nearly the whole of the component parts of a religious establishment of the highest order. With the exception of the tower and portions of the eastern end of the building, the whole fabric presents the combination of the Circular with the Early Pointed arch, which constitutes the transition style of English architecture. The site of the monastery was granted in 1132 by Thurstan, Archbishop of York, to certain monks who separated themselves from the Benedictine Abbey of St. Mary, York, and undertook the Cistercian discipline introduced by St. Bernard. In the depth of winter, we are told, Richard, the Prior, with the Sub-Prior, ten monks of St. Mary's, and Robert, a monk of Whitby, retired to this secluded spot, where they commenced a church in honour of the Holy Virgin. Some yew-trees near the Abbey are pointed out as having afforded shelter to this pious community during the progress of their work. Here they are said to have undergone great privation. They were invited to join St. Bernard, the head of the Cistercian order at Clairvaux, in Champagne; but wealth flowed into their coffers, and they were enabled to carry out the stately edifice, whose remains bear testimony, after the lapse of six centuries, to their zeal and diligence, which continued unabated even after a considerable portion of the edifice had been devastated by fire within eight years of its erection. In 1204 the foundations of the church were laid by John de Thoresco. The building was carried on by John de Phard, the next Abbot, and was completed by his successor, John de Canisia, who instituted nine altars in the church, added the ornamental pavement, built a new cloister, the infirmary, and an hospitium, for the entertainment of the poor. After many fluctuations, Fountains became one of the greatest and most wealthy religious establishments in the land, its possessions being contained in a ring fence, computed at sixty thousand acres, or a hundred square miles. Considerable remains of the church, the Lady chapel, the refectory, and the chapter-house still attest the magnificence of the establishment. The accompanying view is from the west, showing the east window and upper portion of the nave, with the cloisters and dormitory. The vaulted roof of the cloisters is borne aloft by nineteen pillars, which divide the interior into two aisles, each being 300ft. by 21ft. The south end of the cloisters overlooks the bright waters of the Skell, where it flows through scenery rich in beauty, and which adds a striking charm to an edifice solemn and majestic even in decay.



SOUTH PORCH OF THE NORMAN CHURCH AT ADEL.

ANCIENT DOOR-HANDLE, ADEL CHURCH.

SAXON CROSSES AT ILKLEY.

PONTEFRACT CASTLE.

Pontefract Castle was founded by Hubert de Lacy, who received a grant of the site in the tenth year of William the Conqueror. The name is said to have been given by him to the borough of Pontefract, which had been previously called "Kirkby," on account of some resemblance which it bore to Pontfrete, in Normandy, his birthplace. The ruins of the castle stand upon a rocky eminence. The dungeons were of the strongest and most formidable construction, peculiar to castles of

the Norman style of building. The castle occupied an area of about seven acres, but time and violence have almost erased this once noble edifice; and, in modern times, neglect and petty depredation have wellnigh completed the work of utter destruction—"even its ruins ruined." The small remaining portion indicates, however, a building of great strength and massiveness. Here it was that Richard II. came by his mysterious death, of which even Froissart could only say, "How Richard died, and by what means, I could not tell when I wrote this chronicle". Whether dispatched by assassin or whether left to the lingering agonies of famine, which latter seems most probable, will never in all probability be clearly ascertained. This ancient stronghold, after being the scene of many atrocities, was ordered to be demolished, during the Commonwealth, by order of Parliament.

On Tuesday, the 13th inst., the members of the association undertook a series of visits, of considerable interest, to the Norman church of Adel; to Farnley Hall, the residence of F. H. Fawkes, Esq., and to Ilkley, the Olicana of the Romans. The proceedings of this day are thus chronicled by our Correspondent:—

Adel is not named in "Doomsday Book," hence, and from peculiarities in its architectural features, it is concluded to date from about the reign of Stephen. The points of interest of this building were ably described by Mr. E. Roberts, F.S.A. The church is of the simple form of small parish churches of the Norman time, being, instead of cruciform with transepts, as in larger edifices, of that shape which is considered to have been intended to represent the ark, consisting only of a nave and chancel. The dimensions of the church are as follow:—The nave, 47 ft. 6 in. by 21 ft. 6 in.; and the chancel, 25 ft. 9 in. by 18 ft.; the walls being about 3 ft. in thickness. The most interesting feature in this ancient edifice is the south porch, which contains a series of figures representative of the vision of St. John in the island of Patmos, as described in Revelations. The symbolism and meaning of this series were described by the Rev. Mr. Simpson. At the apex of the gable is the Agnus Dei, crowned with a nimbus, and having probably borne the banner of the Church militant; on each side of the sacred lamb are figures of the sun and moon, such as are seen in ancient rood crosses, as witnesses of the Crucifixion of our Lord. In the centre, immediately below the lamb, is the type of the first person of the Holy Trinity, having on his right hand the symbolic angel, the evangel of St. Matthew: this figure points to a volume—the Gospel of St. Matthew; and on the left the eagle, the evangel of St. John. On the right of the angel is the emblematic bull of St. Luke, and on the opposite side is the lion of St. Mark. Towards the base of the gable, on each side of the spandril formed by the circular top of the arch, are what appear to have been intended severally as the symbolic lily of the Holy Virgin and a bundle of torches, the latter, perhaps, typical of the seven Churches of Asia—the seven golden candlesticks. On the corbel table are a series of heads, which have been said to represent the four-and-twenty elders; but, as the heads count more than that number, this idea seems inadmissible, the more especially as the expression of some of the heads is decidedly grotesque. Another peculiarity consists in some of those corbels being composed of two heads, half the size of the others conjoined. The arch which is surmounted by this display of ancient symbolism is composed of a series of bold mouldings, enriched with a variety of the zigzag ornament and pellet ornament intermixed. The inner moulding is curiously enriched with the heads of eagles, their beaks pointed inwards. The capitals of the columns which support the arch bear fabulous animals and an ornament resembling the Runic knot. The zigzag pattern and the eagles' heads are carried down the angular abutments between the columns. Mr. Roberts, in the course of his observations, drew attention to the original Norman string-course, which has been partly cut away for the reception of windows of a later date and larger opening. Before entering the church, the party paused to examine the ancient door-handle of the church—carved in iron, and in excellent preservation—which represents the head of the enemy of mankind, horned, with fierce goggle eyes and batlike aspect, holding between the huge fangs which flank his jaws the head of a sinner who, having died excommunicate or impenitent, without receiving the offices of the Church, is appropriately planted, together with his tormentor, on the wrong side of the door. The interior of the church is remarkable for a large and fine chancel arch, with mouldings, enriched by various devices.

The party then proceeded to Farnley Hall, enjoying the fine dale scenery for which Yorkshire is celebrated. On their way—just where the view commands the vale of the Air and Wharfdale—a grand effect was witnessed, as a thunderstorm rushed down over the elevated and wild moors in the distance. Farnley Hall is finely situated on an eminence, looking down upon the windings of the Wharf, and embosomed in a noble wood. The nucleus of the building is of fifteenth-century character, to which wings have been added. Here the visitors were received with a cordial welcome, and they proceeded through a suite of rooms whose walls are enriched by a collection of masterpieces of the most eminent ancient and modern painters. Among the former was noticed, as a striking curiosity, a study of an angry owl, conceived with characteristic grandiose energy by Michael Angelo, in a deep tone of colour worthy of Titian. Works of the school of Snyders, and other capital pictures, do fitting honour to the ancient masters; but the crown and glory of the collection consists in a large collection, in oil and water colours, of the works of the great master of landscape-painting, J. M. W. Turner, of whom Mr. Faukes and his father were warm admirers and generous patrons. With many pleasant anecdotes the visitors were led by their hospitable entertainer from room to room, from treasure to treasure, and several odds and ends, interesting from their associations, elicited much lively discussion.

Lastly, the party assembled on the terrace to view the fine prospect which it commands; after enjoying which they proceeded on their way to Ilkley—the Olicana of the Romans—celebrated for its group of so-called Runic, but in reality Saxon, crosses, dating probably from about the eleventh century. The churchyard in which those crosses are seen occupies the area of a Roman camp. The church presents no feature earlier than the architecture of the fourteenth century; but doubtless a Saxon church formerly occupied its site. The Saxon obelisks—for crosses they can no longer in strictness be called, having been deprived of the crosses by which they have been surmounted—are of various height, the tallest being about 8 ft. high by about 16 in. square at the base, tapering upwards. Camden, finding those monuments within the area of a Roman camp, erroneously pronounced them to be of Roman workmanship. They are ornamented in compartments, with the representations of beasts, birds, the pattern known as the Runic knot, foliage, dragons, and the head of some saintly personage crowned by a nimbus. Time has done its work of partial obliteration on those ancient monuments, but parts, especially the foliage, remain very sharp and fine. Near the church are the ruins of a parsonage, of nearly contemporary date with the church itself, and at a little distance on the sloping side of the hill crowned by the Roman camp is a mass of wall composed of rubble, with hard mortar, evidently Roman masonry. Two altars have furnished material in the erection of the church tower. Camden mentions an inscription dug up here in his time, by which it may be understood that this fortress had undergone a thorough repair, under the superintendence of Virius Lupus, Lieutenant and Propraetor in Britain in the reigns of Severus and Antoninus (Caracalla). Severus died at Eboracum (York), in the year 211, and his successor, Caracalla, in 217. The oldest of the inscriptions found here refers to Antoninus and Verus who ruled Rome in colleague from A.D. 161 to 169. The extent of the Roman station has been estimated from existing traces at 160 by 100 yards, nearly in the centre of which is the churchyard. In this area Roman tiles have been found, likewise glass, earthenware, &c. Quantities of slag have been dug up. A few handmills, or querns, and some entire urns were turned up by a person digging behind the church, but, through ignorance of their interest, they have been lost sight of. The name of Olicana is mentioned by Ptolemy in A.D. 140. In "Doomsday Book" it is "Illicleia," when it was a berewick of the Archbishop of York. Ilkley has been noted for its healing springs; but when their virtues were discovered is not recorded. It is likewise renowned for its football play; and formerly cockfighting and badger-baiting were among its popular amusements. Ghosts, wise men (so called), witches, and practical jokers abound in its traditions, and furnish an amusing estimate of canny Yorkshire in the olden time.

Decline of day hastened the return of the excursionists to Leeds, enough light only remaining to show the craggy ridge of Rombalds Moor looming grandly through the gathering mists of an autumnal evening.

The Musical Society of Vienna having resolved that the mortal remains of Beethoven and of Schubert should be placed in more suitable vaults, the two bodies were exhumed on the 13th in the presence of a crowd of medical and artistic notabilities. The skeleton of Beethoven was almost perfect, the bone of the temples alone being wanting. The remains of Schubert had suffered much, but the head and the hair were intact. The bodies of the two celebrated composers were photographed (!) upon being re-buried.

The office of reporter on the Bengali press has been sanctioned by the Government of India. It will be the duty of the official Bengali translator, who is the son of a Serampore missionary, to send in a report to the Lieutenant-Governor every week of the social and political contents of the native papers. In all Bengal, with its 41,000,000 people, there are twenty-four papers edited by natives. Of these six are in English only, four in Hindustani, and fourteen in Bengali.

A new comet was discovered on the 14th at Marseilles by M. Tempel. He describes it as telescopic, its position being right ascension 9 deg. 52 min. 44 sec., and declination 34 deg. 7 min. In the course of an hour it increased a little both in right ascension and declination, so that it seems to be moving in a north-westerly direction. About the same time a comet was perceived at Amiens; but it does not seem to be the same, since it is described as having a tail of an apparent length of two metres, while M. Tempel's is telescopic, with a mere rudiment of a tail.

The last idea of Paris, says one of the correspondents of the daily journals, is a plan in alto-relievo of the whole of Europe, not in maps or models, but actually raised out of the ground. A garden is to be set aside for the modeller, who, taking Mont Blanc, fifteen feet high, as his *point de départ*, is to raise in just proportion around it the rest of the mountains of Europe, pour the seas into their proper places, and intersect the whole with roads, canals, railways, and telegraphs. A steam-engine is to act the part of the moon and regulate the tides!

NAVAL AND MILITARY INTELLIGENCE.

WAR OFFICE.

4th Dragoon Guards: Capt. J. Clerk to be Captain. 5th: H. J. Blumberg to be Cornet.

7th Hussars: Lieut. R. Topham to be Captain; Cornet J. G. W. Le Marchant to be Lieutenant; Ensign G. M. Forter to be cornet. 19th: Cornet E. A. Money to be Lieutenant.

5th Foot: Lieut. W. C. Ormond to be Instructor of Musketry. 6th: Lieut. F. Baird to be Lieutenant. 8th: Capt. Hon. S. R. H. Ward to be Captain. 10th: Ensign E. A. Illingworth to be Lieutenant; Ensign P. T. Maillard to be Lieutenant; Cadet T. Orton and E. W. Austin to be Ensigns. 13th: Ensign J. A. P. K. Harwood to be Lieutenant; A. W. Harrison to be Ensign. 15th: S. B. Astley to be Ensign. 20th: Lieut. H. R. Bowlby to be Instructor of Musketry. 21st: Lieut. P. H. Delamere to be Captain; Ensign E. E. Coote to be Lieutenant; Cadet R. F. Willoughby to be Ensign. 41st: Lieut. R. Taylor to be Lieutenant. 43rd: Staff Surg. A. F. Turner to be Surgeon. 55th: Lieut. A. Teevan to be Lieutenant; T. Drew to be Ensign; Staff Assist. Surg. A. Brebner, M.B., to be Assistant Surgeon. 58th: Ensign W. Wordsworth to be Lieutenant; Cadet W. Hatles to be Ensign. 60th: Capt. W. H. Ivimy to be Captain. 76th: Staff Assist. Surg. W. E. Dudley to be Assistant Surgeon. 83rd: Lieut. F. Karslake and Capt. G. F. Stebelin to be Captains; Ensign G. E. Blunt to be Lieutenant; Ensign W. T. Thompson to be Ensign; Lieut. N. Pennefather to be Instructor of Musketry. 92nd: Staff Surg. A. C. Ross, M.D., to be Surgeon. 101st: Ensign W. Brydon to be Ensign.

Rifle Brigade: Capt. A. G. C. Inge to be Captain.

1st West India Regiment: Major and Brev. Col. G. H. F. Campbell to be Major; Capt. H. G. Panter to be Major; Lieut. H. H. Smith to be Captain; Ensign R. C. Clarke to be Lieutenant; J. E. Bale to be Ensign. 3rd: Ensign F. A. Stewart to be Lieutenant.

CAVALRY DEPOT (Maidstone).—Lieut. J. S. G. Smith to be Instructor of Musketry.

DEPOT BATTALION.—Capt. W. J. Tarte to be Adjutant.

MEDICAL DEPARTMENT.—Surgs. A. Barclay, M.D., and T. B. Reid to be Staff Surgeons; G. Hammond, M.D., to be Staff Assistant Surgeon.

CHAPLAINS' DEPARTMENT.—The Rev. C. A. Wetherall to be Chaplain of the Fourth Class.

BREVET.—Col. B. Cuppage to have the local rank of Major-General while acting as Lieutenant-Governor of Jersey; Major and Brevet Lieut.-Col. H. E. Weare to be Colonel; Brevet Major G. W. Raikes to have the honorary rank of Lieutenant-Colonel; Paymaster H. Morgan and Quartermaster W. Young to have the honorary rank of Captains.

The Field Marshal Commanding-in-Chief will hold a levée at one o'clock on Wednesday next, the 28th instant.

The *Hampshire Advertiser* states that the Government has some idea of making a harbour of refuge at Ventnor, Isle of Wight.

Her Majesty's ship Britannia, which has been stationed for some time at Weymouth, has been permanently removed to Dartmouth.

Major-General Robert Henry Wynyard, C.B., has been gazetted to the colonelcy of the 98th Regiment of Foot, vice General W. L. Darling, deceased.

The 76th Regiment has left Aldershott and proceeded to Portsmouth, where it will embark on board the chartered troop-ships Hornet and Atalanta, en route for Madras.

Mr. J. Stansfeld, M.P., Junior Lord of the Admiralty, has been for some time daily engaged at Portsmouth Dockyard in investigating the dockyard system of account-keeping and the mode of carrying out work in the different departments of the yard.

The half-yearly inspections at Aldershott have been continued during the past week. The inspecting Generals on each occasion expressed their approbation at the appearance and discipline of the troops, and the well-ordered internal economy of the respective regiments.

Captain Spratt, R N., so long employed in surveying the Mediterranean, has resigned. Captain Spratt was actively employed in surveying the Black Sea during the Crimean War, and was made a C.B. and an officer of the Legion of Honour for his services.

A detachment of the Commissariat Staff Corps, numbering 8 sergeants, 73 rank and file, under the command of Deputy Assistant Commissary-General Elkington, is under orders to proceed from Aldershott to New Zealand, and will shortly embark for their destination.

The surviving officers of the battle of Camperdown, in 1797, are seven in number:—Admiral Sir E. Harvey, Vice-Admiral T. Bennett, Retired Admiral W. Slaughter, Retired Captain G. Hillier, and Retired Commanders T. Colby, W. Somerville, and S. Mitchell.

An official intimation has been given that the next examination of candidates for admission to the Royal Military College at Sandhurst will commence on Thursday, the 17th of December next, at Chelsea Hospital, and that for admission to the Royal Military Academy at Woolwich on Monday, the 4th of January, at the same place.

A new class of gun-boats, now under consideration at the Admiralty, to be built of iron and to be armour-plated, will shortly be commenced, to replace the condemned gun-boat fleet at Haslar. In these vessels the twin-screw principle, well known and approved by Mr. Reed and the Admiralty Board, will be thoroughly carried out.

An experimental target, representing a portion of the Warrior's side, has been built at Woolwich, and is ready to be forwarded to Shoeburyness for a trial of the heavy Armstrong guns. The target, measuring 12 ft. 6 in. broad and 10 ft. high, is securely bolted to a huge platform, lined on each side, lengthways, with twelve empty casks, which will be partly submerged during the experiment. About 2 ft. of the target will be also under water. The target is plated with iron slabs of 4½ in. thickness, and is firmly backed by logs of 18-inch teak. The greatest care has been taken in its manufacture to select and test the whole of the materials, so as to render the trials conclusive.

Wednesday last being the fifty-eighth anniversary of the battle of Trafalgar, we subjoin the names of the surviving veteran officers who contributed to the glories of that day—viz.. Admiral of the White, Sir George Rose Sartorius, Knight. Admirals of the Blue, Sir Henry W. Bruce, K.C.B., and Sir James Hanway Plumridge, K.C.B. Retired Admirals, George W. H. D'Aeth, Lewis Hole, Hugh Patton, and Hercules Robinson. Reserved Admirals, the Earl of Egmont, William Walpole, and Sir G. A. Westphal. Vice-Admirals (retired), Sir A. D. T. Arbuthnott, Kt., John Lyons, Robert Patton, and John Drake. Reserved Rear-Admirals, Joseph Gage and R. C. M'Crea. Retired Rear-Admirals, W. A. Herringham, Alfred Luckraft, and William Shepheard. Captains George Bignell, William H. Brand, William Carleton, Richard Douglas; B. M. Festing, K.H.; Charles Hall, G. F. Herbert, Gilbert Kennicott, Rawdon Maclean, William Martin, Henry B. Mason, William Murlin, John Reeve, Spencer Smyth, Mark H. Sweny, John Geary, and John H. Brown, C.B. Commanders Mark Anthony, James Blandford, J. P. Blennerhassett, Emmanuel Blight, Charles Chapell, Thomas Chrystie, T. Colby, B. G. S. Day, Lardner Dennys, P. Deuchar, J. B. Elliott, P. J. Elmhirst, Hugh Entwistle, Alexander Gallaway, Henry Garrett, F. Harris, Charles Haydon, Stephen Hilton; Sir T. W. Holburne, Bart.; A. B. Howe, T. Jackson, John Knapman, Edward Knapman, Vernon Lamphier, John Lechmére, Alexander Martin, Alexander M'Kenzie, James Napier, John Parsons, Henry Parker, George E. Patey, James U. Purches, Henry Rich, J. H. Sanders, R. S. Simmons, James St. Quintin, Dey R. Syer, George Tardrew, William Vicary, William Weavers, Charles Wobridge, John Adamson, and John Carslake. Lieutenants William H. H. Boyle, William Pilch, and John Pollard. General John R. Caryton, R.M. Lieutenant-Generals Sir S. B. Ellis, K.C.B.; and John A. Philips, R.M. Colonel Thomas Lemon, C.B. Captain James Fynmore, R.N. First Lieutenants Thomas Brattle, T. J. W. Vane, and Lewis Rooke.

THE VOLUNTEER MOVEMENT.

The competition for the second silver cup, presented by the Hon. Board of Inland Revenue, to be shot for by members of the Inland Revenue companies of the Civil Service Regiment, took place at Wimbledon on the 15th inst. Private William Oliver, of the second Inland Revenue company, was the winner.

On Thursday week the 1st Regiment of Life Guards, under the command of Lieutenant-Colonel the Earl of Mountcharles, had a field-day at Wormwood Scrubbs, in company with Captain Jay's troop of Horse Artillery. The proceedings passed off with the greatest possible éclat.

The distribution of the prizes to the successful competitors in the annual prize-shooting of the 26th Middlesex (her Majesty's Customs) and the 42nd Middlesex (the St. Katherine's Rifle Volunteers) took place yesterday week in the long-room of the Custom House. The ceremony of distribution was performed by Mrs. Goulbourn, wife of Mr. T. Goulbourn, deputy chairman of her Majesty's Customs. Mr. Gregg, of the Customs, congratulated the battalion on its prosperous condition. When the prizes, he said, were distributed in 1862, the battalion mustered 427; now its numbers were 677. The same progress had been made with respect to marksmen. Last year there had been twelve only, while this year they numbered thirty-four. To reward their skill there were this year twenty-six prizes, against twenty-one last year.

The annual prize-shooting of the 29th North Middlesex was commenced on Monday, at the range, Child's-hill, Hampstead. The first prize shot for was a cup, value ten guineas, presented by Colonel Viscount Enfield, M.P. The winner was Corporal J. Wells. The next prize, which was presented by Quartermaster-Sergeant Dixon, consisted of two fine line and valuable engravings by Creswick and R. Ansdell. Sergeant Humphrey and Corporal Pavey each made 23 marks, and, upon shooting off the tie, Sergeant Humphrey proved the victor. The third prize shot for was the tradesmen's cup. Sergeant Humphrey stood the highest; but, having won another battalion prize, according to the rules of the competition, resigned the cup to Private Kennedy, the next best marksman.

The third and last muster for the season of the 1st Essex Administrative Battalion took place on Thursday week. Colonel Ibbetson, Inspector of Volunteers, was present, and the brigade was under the command of Lieutenant-Colonel Sir Claude de Crespigny. The total force assembled was 434; but an addition of 134 must be made for bands, making an aggregate of 568. Colonel Ibbetson expressed his satisfaction with the readiness with which his commands had been obeyed.

The first battalion 24th Kent, numbering nearly 500 men of all ranks, under the command of Lieutenant-Colonel Parkyn, was drawn up in review order on Saturday afternoon in the Royal Arsenal at Woolwich, together with the local volunteer artillery brigade, consisting of 207 non-commissioned officers and men, in command of Lieutenant-Colonel Ellis, to receive the commandant of the corps, Major-General Tulloh, also Inspector-General of the Royal Artillery. After that officers' inspection, the battalion, in command of Colonel Parkyn, marched to Woolwich-common, to undergo the annual inspection of Colonel M'Murdo, Inspector-General of Volunteers, at the close of the drill season. The battalion received the Inspector-General in review order, marched past in open and close column, and went through many battalion and light infantry movements. At the termination of the inspection, which was kept up until nightfall, Colonel M'Murdo addressed the battalion and complimented Lieutenant-Colonel Parkyn, the officers, and men on the state of proficiency to which it had attained. During Colonel M'Murdo's inspection of the rifles on Woolwich-common, General Tulloh witnessed a lengthened course of battalion exercises in the arsenal by the brigade, under the command of Colonel Ellis, and several rounds of heavy-gun exercises by detachments, called forward and commanded by Captain Grinsell. The brigade, raised under General Tulloh's special supervision, consists of the artificers and men of the Royal carriage department of the arsenal, of which he was recently the superintendent. The General consequently watched their movements with peculiar interest, and, before dismissing them, he informed the Lieutenant-Colonel that, if ever their services should be called into requisition, they would form a most acceptable auxiliary to her Majesty's regular troops. The state of drill, he said, both with the muskets and the heavy ordnance, merited his highest approbation.

On the 14th ult. a match with 24-pounder guns was commenced at Hamble between the 1st Hants Artillery Volunteers (Bittern) and the 3rd Hants Artillery Volunteers (Portsmouth Dockyard). On that occasion the 1st Hants made the greatest number of points. Yesterday week the return-match came off at the practice-battery of the 3rd Hants in Portsmouth Dockyard, when the latter, in their turn, became the victors. A silver goblet, given by the officers of the 3rd Hants to the best shot of both corps, was won by Sergeant Hercules, of the 1st (Bittern). The members of the two corps, at the close of the contest on Friday, dined together in the afternoon at the head-quarters of the 3rd Hants, in the dockyard.——The second annual competition for the Hampshire and Isle of Wight challenge vase took place on Wednesday week at the Southampton range. There were sixty-two competitors. The vase has been a second year carried off by a member of the Fareham corps, having been won in 1862 by Private Parker, of Fareham.

On Thursday week three silver cups were shot for by the 1st (Broadclist) Devon Mounted Rifle Volunteers. The first prize was the ladies' challenge cup, with Lieutenant Acland's Oxford cup, and £2, and won by Private Airs. Corporal Norrish won the second prize, a cup and £1.

The Suffolk volunteers were active during last week. At the annual prize-shooting of the Ipswich company Private G. S. Clarke was the winner of the first prize of £4. In a competition among the Sudbury corps a silver cup, presented by Captain Sir W. Parker, was won by Private Bear. A mess dinner wound up the day.——Several prizes offered to the Bosmere corps have also been shot for. A contest for a gold medal, of the value of £5, offered by Sir G. Broke-Middleton, and competed for by the twelve members of the corps who had attended the greatest number of drills during the year, resulted in favour of Sergeant Salmon. A silver cup, presented by Lady Broke-Middleton, and open to all the members of the corps, was also won by Sergeant Salmon.

The second annual contest for a challenge shield offered to the Isle of Ely battalion by Major Fryer has again resulted in favour of Sergeant Bennett, of the Wisbeach corps.

It appears that £146 was expended in prizes at the late annual contest of the Norfolk Volunteer Service Association, and that the expenses of the meeting exceeded the amount received for entries by about £11, making a total cost to the association of £157.——The 20th Norfolk, or Attleborough corps, has had a contest for a number of prizes. A ladies' challenge cup, of the value of £20, which was won in 1862 by Private H. Ettridge, has this year been carried off by Corporal Cowles, who also gained another prize—a clock.

The annual sword competition by members of the 1st Herts Light Horse took place at Silver Leys, Bishop Stortford, on Saturday last, for two swords, value £10 each, and a silver challenge cup. Regimental Corporal-Major Wake, of the 2nd Life Guards, by permission of the Horse Guards' authorities, attended to award the prizes. He adjudged Private H. White the winner of the challenge cup presented by the officers; and Private Ralph Franklin and Corporal John Miller of the swords, which were given by the ladies of the neighbourhood. Mrs. H. J. Bailey; Mrs. B. B. Colvin, of Pishiobury Park; and Mrs. Robert Gosling, of Hassobury Park, severally presented the prizes.

The annual shooting of the Leicestershire volunteers commenced on Tuesday week at Ashby-de-la-Zouch. Sir Henry Halford gave £20 to be competed for by members who had shot into the first class. The first prize was won by Mr. Taylor, Ashby; second, Mr. Love, Ashby; third, Mr. Dobell, Loughborough. On Wednesday, at Wiston, Mr. Turner's challenge cup, value £25, was won for the second time by Mr. Hithcock. On Thursday the Duke of Rutland's prize, value £25, with a second prize of a Henry rifle, given by Colonel Halford, was shot for. Mr. Taylor took the first prize. On Friday the all comers competed—first prize, 10; second, £5. The first prize was won by Mr. Turner; Captain Bankart took the second prize. Colonel Halford made some splendid shooting with the small bore. At 900 yards he made, out of five shots, four bull's-eyes and one centre.

The Derby battalion was inspected by Colonel Manners on the Siddalls, Derby, last Saturday. At the conclusion of the evolutions, the reviewing officer addressed the force upon the manner in which they had acquitted themselves. He said that during the season he had inspected many corps of volunteers, but he had never witnessed a battalion go through its work more effectually.

A rifle contest for a silver cup, value £5, took place yesterday week between the Mansfield company of volunteers and the Forest company of the Robin Hood Rifles, at the Mapperley butts, Nottingham. The Robin Hoods were the victors.

Last Saturday the marksmen of the 1st Manchester assembled on the ground of the regiment, at Barton Moss, to compete for a challenge cup, value £25, given by Viscount Grey de Wilton, M.P., late Lieutenant-Colonel of the corps. The shooting was very good, Colour-Sergeant Heap and Private Harrison tying for the first prize. On shooting off, Colour-Sergeant Heap succeeded in making a centre with his fourth shot, and won the cup. The second, third, and fourth money prizes, subscribed by the members who took part in the competition, were won by Private Harrison, Corporal Mitchell, Private J. Wrigley, and Sergeant Emery.——2nd Manchester (28th Lancashire) assembled on the ground of the corps, at Astley, on Saturday, to compete for prizes given annually by Lieutenant-Colonel Deakin. There was some good shooting.——The fourth competition for the Manchester Rifle Club challenge cup took place, on Saturday, at the range of the club, at Jackson's Boat, Stretford. The contest was characterised by good shooting on the part of four of the members, Mr. Kemp winning, after a close competition, by three points.——A letter has been received from the War Office uniting the 10th Lancashire (Kirkham) and the 21st Lancashire (Preston) Artillery Volunteer Corps in an administrative brigade, which is numbered the 4th Lancashire.——On Saturday, at the practice-ground of the 21st Lancashire, a match between the first and second companies was brought to a close. Ten men from No. 1 company scored 251, whilst the ten of No. 2 only made 235, and the former were therefore the victors.

The competition for prizes by the Yorkshire volunteers concluded yesterday week, when the fortunate winners received their rewards from the hands of Lady Londesborough in the Guildhall at York.——The annual contest for the Swale and Wensley challenge cup, with money prizes of £10, £8, and £3, given by the Wensleydale Banking Company, was protracted over four days last week by rain and fog. The 12th company (Carperby) won the cup. The chief money prize was won by Private W. Styan (Leyburn). Sergeant Chapman (Carperby) and Private C. Other (Carperby) tied, the latter winning the second prize on shooting off.——The annual prize-shooting of the 3rd West York (Bradford) has occupied several days, on the shooting-ground of the corps on Baildon Moor, near Bradford, and closed on Saturday last. The first contest was for first-class shots, value £5, and third prize, value £3, presented by merchants at Bradford. Distances, 500 and 700 yards; five rounds each; fifty-eight entries. Captain Caygill took the first prize, value £10. For all comers, the first prize was £10, presented by Mr. M. W. Thompson, Mayor of Bradford; 2nd prize, £5. Private Sharman, Sergeant Latimer, and Sergeant Shuttleworth tied, and on shooting off Sharman took the first prize. There was a contest for marksmen. The first prize, a cup, value £10 10s., presented by Mr. J. Foster, Hornby Castle, was won by Corporal Ambler.

Lord Brougham left Edinburgh, yesterday week, for Penrith, by the Caledonian Railway. His Lordship was accompanied to the station by the Lord Provost. There was a large number of ladies and gentlemen on the platform, and the veteran statesman was loudly cheered as the train moved out of the station.

The Peninsular and Oriental Company's steam-ship Poonah, Captain Field, with the heavy portion of the Calcutta, China, and Australian mails, arrived at Southampton on Tuesday. She brings 90 passengers, 11 boxes specie (value not stated), 5 boxes of valuables; precious stones, value 35,000 rupees; jewellery, 500 rupees; 290 packages of general merchandise, and 1725 bales of raw silk (value £170,000 sterling).

The Emigration Commissioners have chartered the Coldstream, 756 tons, Mr. W. J. Kennedy master, for the conveyance of emigrants to Melbourne, at £14 13s. per statute adult. The Coldstream is to receive her passengers at Southampton on the 1st of December next.——The Ocean Empress, 1067 tons, sailed from Birkenhead on the 16th inst., for Sydney, with 341 emigrants, comprising 24 married couples, 136 single men, 116 single women, 34 children between one and twelve years, and 7 infants.——The John Temperley, which sailed from Plymouth on the 25th of April, arrived at Sydney, New South Wales, on the 1st of August, having on board 396 Government emigrants. Four births and one death (a male adult) took place on the voyage.——The Caduceus, which sailed from Southampton on the 5th of May, arrived at Melbourne, Victoria on the 1st of August last, having on board 396 Government emigrants. Three births, and one death only—that of an infant—took place during the voyage.

OBITUARY OF EMINENT PERSONS.

SIR S. G. BONHAM, BART., K.C.B.

Sir Samuel George Bonham, Bart., K.C.B., was a scion of the ancient family of Bonham, long rooted in Essex, and was the only son (by his wife Isabella Baines, only daughter of Robert Woolgate, of Dedham, Essex, and sister of Colonel William Woolgate, C.B.) of Captain George Bonham, of the East India Company's maritime service, who perished in a typhoon in the China seas in 1810, while commanding the ship British, Lord Indiaman. The son, Samuel George Bonham, the subject of this notice, was born at Faversham, Kent, Sept. 7, 1803, and rose to high distinction in the British colonial and diplomatic service. He was, for nearly six years, Governor of Prince of Wales Island, Singapore, and Malacca, and was, Nov. 27, 1841, appointed Governor and Commander-in-Chief in and over the Island of Hong Kong, and Plenipotentiary and Chief Superintendent of British trade in China, which post he held till 1847. In 1844 he was created a C.B. April 19, 1845, a K.C.B. Dec. 24, 1847; received the Freedom of the Borough, Nov. 27, 1852. Sir Samuel George Bonham married, March 15, 1841, Jane, youngest daughter of Thomas Samuel, Esq., late of the Bombay Civil Service, and by her, who died April 3, 1862, had an only son. His own demise occurred at Paddington on the 8th inst., and he is succeeded by his son Sir George Francis Bonham, the second Baronet, who was born Aug. 28, 1847.

LADY KATHERINE STEWART.

This lady, who died on the 16th inst. at her town house, 9, Bryanston-square, was (by the will of her father, Lady Dinley, daughter of Admiral Sir Thomas Boyd, of Great Tew, in the county of Oxford) the last survivor of the four daughters (the others being the Countess of Stamford, Lady Dinley Hicks Beach, Countess of Francis, Lord Ebrington, Lord Fitzhardinge, and Lord Wemyss and March, and was sister of Archibald, seventh Earl of Glasgow, who died in 1849, the eighth and present Earl. Her Ladyship was married, Nov. 19, 1805, to the Hon. Henry Richard Stewart, fourth son of the late Sir Michael Shaw Stewart, Bart., of Ardgowan, Renfrewshire, and by him, who died April 15, 1846, Lieutenant-Colonel of the 13th Light Dragoons, and Groom of the Bedchamber to the late Duke of Sussex, had issue one son, Sir George Francis Bonham, the second Baronet, who was born Aug. 28, 1847.

LADY KATHERINE STEWART.

This lady, who died on the 16th inst. at her town house, 9, Bryanston-square, was (by the will of her father, Lady Dinley, daughter of Admiral Sir Thomas Boyd, of Great Tew, in the county of Oxford) the last survivor of the four daughters (the others being the Countess of Stamford, Lady Dinley Hicks Beach, Countess of Francis, Lord Ebrington, Lord Fitzhardinge, and Lord Wemyss and March, and was sister of Archibald, seventh Earl of Glasgow, who died in 1849, the eighth and present Earl. Her Ladyship was married, Nov. 19, 1805, to the Hon. Henry Richard Stewart, fourth son of the late Sir Michael Shaw Stewart, Bart., of Ardgowan, Renfrewshire, and by him, who died April 15, 1846, Lieutenant-Colonel of the 13th Light Dragoons, and Groom of the Bedchamber to the late Duke of Sussex, had issue one son, Sir George Francis Bonham, the second Baronet, who was born Aug. 28, 1847.

GENERAL WILLIAM LINDSAY DARLING.

This distinguished Peninsula and Waterloo officer, who died on the 8th inst., at Sirois House, Jersey, Surgeon, at an advanced age, entered the British Army as far back as 1801. He was at the reduction of Guadaloupe in 1810, and was present during the last hour of the siege of Copenhagen in 1807. He served in Spain and Portugal in the Peninsula and joined the staff of the Duke of Castelo Branco in May, 1811, and was a supernumerary on the staff of Lord Charlemont, Aide-de-Camp to the Duke of Wellington, at the battle of Castelo Branco, and was employed with his regiment before Burgos. After the retreat from Burgos, was attacked by typhus fever, and was invalided to England in March, 1813. He rejoined the army on the heights of Echalaz in September following, and was at the battle of Nivelle and the actions on the heights of St. Pé. He was Major of Brigade, and afterwards Assistant Adjutant-General to the 5th Division, in April, 1814, and remained in charge of that command until the peace. On the renewed of the war in 1815 he was re-appointed to the Staff as Assistant Adjutant-General, and attached to the 5th Division, under Sir Charles Colville. He was with that division in the operations connected with the battle of Waterloo, and received a medal for that campaign. He left Paris to receive the war medal with three clasps for Guadaloupe, Salamanca, and Nivelle. He became a Lieutenant-Colonel of 1st Foot Guards in 1837; a Major-General in 1846; a Lieutenant-General in 1854; and General, the 15th of December, 1861. He was, in April, 1854, appointed Colonel of the 89th Regiment of Foot.

GENERAL J. D. JOHNSTONE, C.B.

General John Douglas Johnstone, C.B., late Lieutenant-Colonel of the 93rd Regiment, a very gallant Crimean officer, was the descendant of an old Irish branch of the ancient family of Annandale, being the fifth son of the late Samuia, youngest daughter of Samuel Yates, Esq., of Moone Abbey, in the county of Kildare, and of John Douglas Johnstone, Esq., of Rose Hill, in the county of Fermanagh, and the uncle of the present John Douglas Johnstone, Esq., of Rose Hill. He was born in 1809, and entered the British Army early in life, and rose to the command of his regiment—the 93rd. He went with that regiment to the Crimea, whence he was sent home to England on sick leave. Invalided that he was considered to be in a dying state. On his partial recovery he again joined his regiment at the seat of war, with which he was. Captain Johnstone, led in the assault on the Redan, where he lost an arm. He even fully recovered the shock to a highly nervous and sensitive organization, yet he remained in the Crimea till the end of the war, and six months after-wards he went home on leave, in broken health, having by that time incurred reconstituted his regiment, only sixty of the trained soldiers of the 93rd who went to the Crimea having come home with him. On his return from India Johnstone retired on full pay from active service, but never recovered his health. He was made a C.B. in 1855, and a Major-General in 1860. General Johnstone died recently in Dublin, whither he had gone for medical advice. The General married, in 1850, Caroline, daughter of the late Rev. W. O'Beirne, D.D., and leaves (with two daughters) a son, John Douglas Johnstone, who is a Captain in the Artillery regiment, the 23rd, and sustains the military reputation of a line which, in almost every generation since its settlement in Ireland, has given to the service of England a soldier to the British Army.

Marquis Charles MacMahon, nephew of the Duke of Magenta, has just died, aged thirty-five, after three years of great suffering.

Sir Edward Antrobus Antrobus died suddenly at his seat at Eaclesbie, Yorkshire, in his fifty-ninth year.

Mr. Hope H. Pelham died on Sunday at his seat at Lofficen, in Essh Lechlan, aged fifty-five.

James Knightson Jeremy, Esq., one of the members for the city of Oxford, died at Sanden on Monday, in his sixty-sixth year.

Lieutenant-Colonel Henry Talmot Charleton died on the 17th inst. at Ribston, Gloucestershire, aged fifty-eight.

Mr. John Sawyer Nicholl, one of the three registrars of the Literary Fund Society, died on Monday, in the eighty-fifth year of his age. Mr. Nicholl had been for more than forty years one of the members of the Council and proceedings of the House of Commons. He was nearly the oldest member of the Stationers' Company, of which body he was a Past Master.

Mr. David Waddington, who was some years ago and for several years chairman of the Commercial Bank, was the Great Exeter Railway, died on Monday, at the age of fifty-three, after a short illness, at his house at Bicclay.

WILLS AND BEQUESTS.

The will of Admiral Sir Henry Hope, K.C.B., of Hanoverrquare, was proved in London by his brother, General Frederick Hope, the sole executor, the personal property being under £70,000. By the will of the late Sir Hope, the sum of £1,000 is left to charitable institutions, appointing his said brother General Hope, his executor, trustee, and guardian of his children. Hope, R.N., and to his sister Katherine some personal remembrances, who, he states, are provided for by their late father and by his own bounty, and his personal friends, and to his executors. The following are the charitable bequests:—Lifeboat Society, £1,000; Seamen's Hospital Society, Greenwich, £4000; London City Mission, £4000; Society for Promoting Christianity amongst the Jews, £1,000; Church Pastoral Aid Society, £1,000; Sunday Schools, £2000; Irish Church Mission, £1000; Sailors' Home, Well-street, London Docks, £1,000; and to the charitable institutions of Portsmouth, Devonport, Chatham, and Sheerness, £1,000 each. The testator died in March last, executed his will the month previous, which is purely of a family nature. To his wife he has bequeathed an increased annuity beyond her marriage settlement; also one of his residences. His collieries and other mines, together with all his estates, real and personal, he leaves equally amongst his three sons, having provided liberal portions for his daughters.

CHESS.

TO CORRESPONDENTS.

A. W. ESSEX.—In the first place, it is utterly feasible so bring a rightful problem in the next place, it is objectionable as admitting of mate in five instead of seven moves: for example:

WHITE.	BLACK.
1. R takes Q (ch.)	K takes R
2. Q to Q 5th	and give mate with the Queen

W. T. PIERCE.—Very closely conceived; but it allows a second solution by 1. Q to K 8th (ch).

L. G. MILLS.—Very neat, but very simple. It would be improved were the Kt taken away.

J. ROBERTSON.—Most of the two-movers positions we have seen for many a day. I shall be glad to hear from you again.

I. H.—of Bedford—Received with thanks, and acknowledged by letter.

A. ZEPHYR.—Most of the three-movers are excellent.

GIL BLAS.—A chess problem is supposed to represent the termination of a game, and the pieces are accordingly placed as if it composed, in such a manner that no one is entitled to move at the commencement of the game.

FELIX.—You should consult your creative on the point; the reply to your questions would occupy a volume.

HENRY ELGAR, B., and H. L., of Vienna, are thanked for the very beautiful problems they have favoured us with.

A LOOKER-ON.—Two of the London games played by the Parisian and the Chess Congress had poor, which you were good enough to send, there are so many errors in construction that the process would be quite valueless.

PHRYGIAN.—See the laws of the game in "Chess Praxis." 2. The Evans Gambit affords the most interesting variations of any of the open games. 3. Yes.

SOLUTION OF PROBLEM No. 1023.

WHITE.	BLACK.	WHITE.	BLACK.
1. B takes P	1. Any move	to Q 6th (mate); and if 2. B to K 8th, or	
2. Q to K 6th	B to Q 6th	K to Q 6th, mate is given by Q to K 2nd	

If Black for his second move play B to Q 8th, White replies with R to Q 6th (ch), mate; if 2. Kt to Q 5th (ch)—Mate.

SOLUTION OF PROBLEM No. 1025.

WHITE.	BLACK.	WHITE.	BLACK.
1. R to Q 5th	B to K 3rd, or	2. Kt to K 5th	Any move.
2. Kt to Q R 7th	Kt takes R (ch)	3. Kt mates.	
(a) 2.	B to K 3rd or B takes P (ch)	3. Kt takes B	Any move.

PROBLEM No. 1026.
By HENRY KNOX.

BLACK.

WHITE.

White to play, and mate in two moves.

CONTINUATION OF MR. BUCKLE'S GAMES.

A stubbornly-contested Game between Mr. BUCKLE and the celebrated Livonian Player, KIESERITZKY.

(*Queen's Pawn.*)

BLACK (Mr. B.)	WHITE (Mr. K.)	BLACK (Mr. B.)	WHITE (Mr. K.)
1. P to K 4th	P to K 4th	24. Kt to Q B 3rd	Q to Q Kt 5th
2. Kt to K B 3rd	Kt to Q B 3rd	(A clever move: compelling a series of exchanges which White cannot avoid without loss from a very strongly posted and concentrated situation without any loss.)	
3. B to Q B 4th	B to Q B 4th	25. Q to K 3rd	B to K Kt 5th
4. P to Q B 3rd	Kt to K B 3rd	26. Q takes R	Q takes Q
5. P to K 5th	P to Q 3rd	27. R takes Q	R to Q 8th
6. P takes P	B to Q Kt 5th (ch)	28. R takes R (ch)	B takes R
7. P to Q 3rd	P to Q 4th	29. K to B sq	B to K 3rd
(The safer plan is to capture the Bishop at once.)		30. P to K Kt 4th	K to K 2nd
8. B takes B	Kt takes B	31. K to K 3rd	K to Q 3rd
9. B takes R P (ch)	K takes B	32. P to K Kt 5th	P to Q Kt 4th
10. Q to Q Kt 3rd (ch)	P to Q 4th	(The ending of this game is well worthy attention from all players. Nothing can be more great masters in position like the present, and we may add, in the whole game together, they played all they knew.)	
11. P to K 4th	P to K 5th	33. K to Q 3rd	Kt to K Kt 4th
12. Q takes Kt (ch)	Q to Q 3rd	34. K to Q B 3rd	B to Q 2nd
13. Q to Q 3rd	Q to Q B 3rd	35. K to Q Kt 4th	B to K 3rd
14. Q Kt to Q B 3rd	Kt takes Kt	36. K to B 4th	K to K 3rd
15. B takes Kt	B to K 3rd	37. K to Q 5th	K to Q 3rd
16. Castles (K's side)	P to Q B 3rd	38. K to K 4th	K to Q 4th
17. P to K Kt 3rd	P to K 6th	39. K to K 5th	B to K 4th
18. R to K 3rd	P to K Kt 3rd	40. P to Q 4th (ch)	K to K 4th
(Unfortunately mainly consists in the		41. P to Q 5th	K to K 3rd
forcible manœuvre of the Kt to K 5th. The latter respects the game is pretty equal, but this gives him a weighty advantage.)		42. K to Q B 5th	P to Q Kt 5th
		43. K to Q 6th	P to Q Kt 6th
18.	B to K 3rd	44. K to B 6th	K to K 4th
19. Q R to Kq	Q to Q 2nd	And wins.	
20. Q to Q B 3rd	K to Kt sq		
21. B to K B 3rd	P to K Kt 4th		
22. Q R to K 3rd	P to Q Kt 4th		
23. P takes P	B to Q 2nd		

CHESS ENIGMAS.

No. 1038.—By Count PONZIANI and Mr. CUNDALL BAYER.

White: Kt at K 8th, Q at K B eq, R at K 8, B at Q 2nd; P's at K R 5th, K 4th, and K 7th.

Black: K at Q 5th, Kt at K R 2nd and Q Kt 2nd, B at Q B 6th, Kt at K 6th, and P's at 6th and Q R 3rd, Q B 4th, and K 2nd.

White, playing first, to mate in four moves.

No. 1039.

White: K at Q Kt 6th, Q at Q 8, B at Q 8th, Kt at K R 5th.
Black: K at K 4th, B at K 3rd.

White to play, and mate in two moves.

THE GLASGOW CHESS CLUB.—This highly-flourishing society, which meets for play in the Scottish Exhibition Rooms, Bath-street, Glasgow, on Mondays, Wednesdays, and Fridays, from seven to eleven p.m., from September to May inclusive, have just published their annual report for 1862-3. We are glad to find, from this statement, that the position of the club is in every respect prosperous and such as to promise the most satisfactory results for the future. The number of members is now 120, and the fees paid during the year for the attendance during the winter months has been such as to show that the bulk of the members are regular attendants at the meetings of the association. In presenting their report, the directors very properly impress upon the members the importance of their progress being maintained, and the encouragement to be given to the tournament rules unless such one exerts himself to secure for the club that standing and popularity to which, from its purpose, it is so well entitled.

SCIENTIFIC NEWS.

A NEW PLANET (No. 79), of the tenth magnitude, was discovered on Sept. 19 last by Mr. James C. Watson, director of the Observatory at Ann Arbor, Michigan, U.S. It was observed at Leipsic on the 4th inst.

DETERMINATION OF THE LONGITUDE.—M. Le Verrier, at a recent meeting of the Paris Academy of Sciences, announced the termination of the operations carried on by means of electricity for the determination of the difference of longitude between the Observatories of Paris and Madrid. As the distance between the two places is 1,200 miles, even though necessary to establish an intermediate station, the error was stated, from the synchronism of the relays he left nothing to be desired. The exact calculation of the position of the meridian of Madrid, relatively to that of Paris, is now possible. The station at Biarritz is the last of the network of the geodesy of France, and will shortly be connected with that of Spain. The determination of the longitude thus accomplished will then be submitted to a double control.

A REMEDY FOR THE VINE DISEASE.—M. Druelle, of Niort, in the department of Deux Sèvres, has addressed to the Academy of Paris the successful employment of salt as the means of preserving vines from the attacks of the oidium. M. Druelle's process is thus reported:—Spotting about a hundred sea-salt in a small hole at the foot of each vine in November or December. Last year the vines thus treated completely escaped the disease, and bore the great ravages on the other vines. M. Druelle's note has been referred to the consideration of the permanent physiological botanist, MM. Payen and Decaisne, the results of whose report we shall give as soon as it is laid before the Academy.

THE BATHOREOMETER, an electric apparatus for measuring the thickness of very thin substances, is described by its inventor, the Abbé Julien Gloriaux, a professor of the University of Naples, in a memoir recently laid before the Academy at Paris, and which appears in *Les Mondes*, with an engraving of the instrument to make the description intelligible. By the bathoreometer Professor Giordano has obtained the following among other measurements, in the decimal parts of a millimetre:—Soap bubble, common unglazed paper free quality, 0·078; the same after transformation into parchment, 0·042; glazed paper, 0·042; tissue paper, 0·042; French gold leaf, 0·002; Neapolitan gold leaf, 0·006; hair of human adults, 0·045, 0·061; hair of a child ten days old, 0·021; silk of the cocoon, 0·012; the thickness of the web of the wing of the praying mantis (mantis oratoria), 0·013; the scales of the dust of the wings of the moth, 0·001 to 0·002.

MAUVEINE is the name given to a chemical base by Mr. W. H. Perkin, the discoverer of the substance, in a paper read before the *Chemical Society of the Royal Society*, No. 87, but on adding a solution of hydrate of potassium or any other solution of ammoniacal base in excess, it becomes quickly changed in color from purple to a blue violet, and on standing, deposited a crystalline body, which, after being washed with water, has all the appearance of resin itself as a nearly black glistening body, not unlike pulverised specular iron ore. In thin layers it is violet, in violet solution, which considerably assumes a purple color on the addition of acids. It is insoluble or nearly so, in cold water, but dissolves in hot water, and in the ordinary alcohols and ammoniacal salts readily. When heated strongly it decomposes, yielding a basic oil.

THE CHEMICAL ACTION OF THE SOLAR RAYS has been measured by a new method, invented by Dr. T. L. Phipson. Having observed that a solution of chloride of silver, in hydrochloric acid, placed on the leaves of his laboratory, where it received the direct rays of the sun for three hours a day, became blackened, and that the same solution, kept in the dark, remained several experiments, and always found that the saline solution was reduced when exposed to the light, and that the chloride of silver was found in the shade. He believes that during insolation a certain quantity of sulphuric acid loses one atom of oxygen, and becomes sulphurous acid, forming water of hydrogen, and that, during the night, the latter gives up the equivalent of oxygen to the oxide of silver, and regenerates sulphuric; consequently the amount of gas taken place. Dr. Phipson has constructed an apparatus for measuring this action, which is the result of the two actions which occur when observing any coloration. A weak solution of permanganate of potash destroys the blue color, and in the same way quantity (volume) of this solution employed indicates the relative daily amount of solarism.

M. SORET'S RESEARCHES ON OZONE (second series) have been laid before the Paris Academy of Sciences. The principal result of these new experiments has been to endeavour to find out the reason of the extraordinary fact remarked by Schönbein, that the ozone, though decomposed or cooled oxygen increases in volume when brought to the state of ordinary oxygen, showing that the latter has a greater density than ozone. Oxygen, M. Soret has fully confirmed the statements of the above-mentioned chemists. He has seen the oxygen increase in volume when decomposing ozone by heat; and he affirms, moreover, that this increase is proportional to the quantity of ozonised oxygen which has been submitted to the heat, and is constant with it. He is also convinced that ozone is only an allotropic condition of oxygen.

THE INFLUENCE OF PRESSURE ON THE SOLUBILITY OF SALTS is full of interest, not only in respect to physics and chemistry, but also in regard to geology and mineralogy. In fact, rocks and minerals which, in many cases, have been formed under high pressure, and it is important to know how much this has contributed to their solubility, which governs the formation of the crust of the earth. To add to our information on this point has been the object of M. Sorby, of Sheffield. Sorby, a short account of which appears in the *Bibliothèque Universelle de Genève*. He finds that the solubility of chloride of sodium (common salt) is increased by pressure, and consequently increased under pressure; but that the solubility of the hydrated sulphate of soda increases by pressure, and that the solubility of the latter salt diminishes considerably at 15 deg. cent. when the pressure is increased. The sulphate of lime (gypsum), very slightly soluble under ordinary pressure, becomes considerable influence in its solubility by pressure. At 15 deg. 100 parts of water dissolve 0·26 of gypsum under a pressure of one atmosphere, and 0·37 under twenty atmospheres. If we place a solution of sulphate of soda in a receiver, one part of which is heated to 100 deg. cent., another to 0 deg., we observe a salt increase in the heated part at the expense of the cold part. This fact is explained by the greater solubility of the water for this substance, and a richer than at a lower temperature. M. Moaller on this remarks that, since pressure, like heat, enables the effects of solubility to be exerted, it is probable that that the deeper water of the sea contains a larger quantity of salts than the water at the surface.

FULMINAM.—In relation to M. Blondeau's observations on the remarkable compound termed Fulminoss (inserted in our Number for Sept. 26, p. 305), we have received a paper by him on the subject, in the number of the *Annales de Chimie*, on an analogous body, termed by him fulminam. In treating starch with nitric acid under certain conditions, and then carefully adding water to the produce of this reaction, we obtain a white gelatinous substance which has the most remarkable explosive qualities, and is, consequently, "xiolidine." The analogy of composition which exists between cellulose and starch fecula having led M. Blondeau to suppose that by treating cellulose with nitric acid must undergo some modification similar to that which cellulose undergoes when under the influence of sulphuric acid, he endeavoured to ascertain whether this substance existed naturally, and whether it were possible to obtain it by means of nitric acid. He found that it did not produced fulminose. Accordingly, after having placed some starch in a mortar and moistened it with nitric acid of 1·45 density, he obtained a firm and compact paste, which when thrown into water was completely dissolved. When a little alcohol was added to the solution, a white gelatinous substance precipitated, differing from starch by its appearance and its solubility in water. After several washings with water, and drying, it was found to be explosive. Based on examination not a trace of sulphuric acid in its composition. When subjected to analysis, it was found to be composed of C 24·69, H 2·46, and O 72·85. It was decomposed, disengaging steam and leaving a residuum of charcoal very inflammable when dry. Its explosive power is greater than gunpowder, and nearly equal to that of nitroglycerine. Blondeau proposes to name it "fulminam." It is very soluble in water, but is insoluble in alcohol and ether. Under the action of heat it swells up, and presents the appearance of a dry, brittle gum. Its solution is coloured blue by iodine, and it is precipitated by alcohol, ether, and a saturated solution of potassium iodide with starch. Carbon, 44·29; hydrogen, 6·07; oxygen, 49·72.

THE INDIAN METHOD OF MAKING FIRE is described in the *Proceedings of the Asiatic Society of Bengal* by Davidson, who says that on session a pair of sticks used by the Indians on the north-west coast of the United States, which he had an opportunity of examining. The one is 10 in. long, the thicker being 3 in. in circumference, and so cut that a section would give a nearly ellipse with the axes about 1¼ and ¾ of an inch, the smaller stick is 16 in. in circumference. Both are crooked and whittled, so that a section shall give an irregular figure. The smaller stick is cut at the same wood, but more compact in grain, and apparently of a slower growth. Both have been long in possession, and are polished by use. To make fire with the sticks, to prevent the abstraction of moisture; accompanying them was carried a bunch of the inner bark of the cedar, rubbed into a soft fibre. "Now," he says, "the Indian, the larger has a shallow, circular hollow, less than one-eighth of an inch deep, and about 1½ in. in diameter, on the flat side, and a narrow groove or channel cut from this to the side; the smaller stick has one end made very slightly pyramidal. The Indian, kneeling on the larger stick upon the ground with his bare feet, and places under the groove a small bunch of the bark fibre, and then inserts the smaller stick, held upright, in the round cavity, which is quickly seized by the operator and blown into a flame. With his sticks in my possession I have frequently tried to make a fire in about a minute, and have frequently done so myself in three minutes." The Indians will not trust to other materials, and the sticks are only used by Indians unacquainted with white men.

SOCIAL SCIENCE CONGRESS AT EDINBURGH.

We give, on page 416, two Illustrations connected with the recent meeting in Edinburgh of the National Association for the Promotion of Social Science—Lord Brougham delivering the opening Address and his Lordship addressing a large meeting of working men.

The seventh annual meeting of the Social Science Congress opened on Wednesday, the 7th inst. A sermon was preached at two o'clock in St. Giles's Church, before a large audience, by the Rev. Dr. Arnot, and in the evening the general meeting of members and associates took place in the Free Church Assembly-hall. Lord Brougham, president of the association, occupied the chair, and was enthusiastically received by the crowded assemblage. His Lordship delivered the opening address, which commenced with a touching allusion to the great men connected with Edinburgh who had passed away and left their example to guide the survivors. The address took a wide range, including a survey of the political horizon, as well as embracing the several topics of social science. Lord Brougham was received in reading a great portion of his address by Mr. Hastings, the secretary. Upon its conclusion the Lord Advocate proposed, and Mr. Napier seconded, a vote of thanks to the noble president, which was carried. Prince Alfred was present, and was loudly cheered. The correspondent of the *Aberdeen Free Press*, treating of Lord Brougham's personal appearance, says:—"His features are assuming more the form we are accustomed to in the caricatures, and he is bent with age; but there is a healthy glow on the face, good spirits, and the natural force of the mind is not abated. The discourse was written—and, indeed, been put in type—and those in the secret knew that it filled six columns. Of course it was read. The 'old man eloquent,' taking his 'glasses' very deliberately from his pocket and rising, held up the manuscript to his eyes with a firm hand and commenced. The voice, which used to be sonorous, and on occasions to suggest the comparison of thunder, is now mellowed—sweet, in fact—and obedient to the call of emotion, as when the aged man referred to companions of sixty years ago in terms of

Not the least interesting part of the proceedings of the association was a great meeting of working men, presided over by Lord Brougham, held on Friday evening in the Music Hall. The meeting was one of the most numerously attended of any that have taken place for many years in the north. The tickets of admission were left to the distribution of a committee, and the number of applications for tickets exceeded 25,000. The place in which the meeting was held was a building called the Corn Exchange, which would contain between three and four thousand persons. Every nook and corner was crowded, and the scene which was presented by the densely-packed mass of human beings as they rose to cheer his Royal Highness Prince Alfred and Lord Brougham on their entering the hall was a most striking one. The object of calling the meeting was to enable the working men to hear addresses from Lord Brougham, Mr. Fawcett, M.P., Garnier Pagès, Rev. Mr. Channing, and other gentlemen whose opinions are known to be in sympathy with the working-

GATHERING EDIBLE BIRDSNESTS IN JAVA.

looks over the rock, he observes that it is not only 300 ft. high, but that it bends inwards, so that on the top it bestrides over the sea, which rushes in with great force below, and that in the side of the rock facing the sea innumerable fissures, caverns, and clefts reach down, even under the surface of the water. Millions of tiny, greyish birds, a species of swallow, nestle in those interstices of the rocks. They construct their nests, composed of some gluey or jelly-like substance, on the granite walls of those dark—to man almost impenetrable—caverns and fissures. There, untinselled by the ocean, the little creatures may imagine they are safe from the coveting eye and greedy grasp of man. But they greatly deceive themselves, for these nests form a dainty dish, especially in the estimation of Chinese epicures, and are almost worth their weight in gold.

Three times a year the nest-gathering takes place in those caves and hollows. In stormy weather it would, of course, be impossible to enter them, and even when the sea is comparatively calm it is still a very dangerous undertaking. Down a rattan ladder the Javanese birds-nest-gatherer descends to a distance of two hundred feet perpendicularly from the projecting cliff along the granite wall. When he approaches the entrance to the cavern which he has selected as the locality for his researches, he waits till the wave has rushed inward, and then dexterously swings himself after it. In the interior a bamboo scaffolding has been erected, fastened by ropes to the walls of the vault. Standing on this scaffolding, he takes the nests from the walls to which they are attached, or, when beyond his reach, pulls them down with a hook made for the purpose. In the mean time the waves are continually rushing in and out just below him, and, should the sea become suddenly stormy, or a squall arise so that the nest-gatherer cannot escape in time, the unfortunate creature is washed away to certain death.

But other dangers threaten the nest-gatherer. It not unfrequently happens that the fastenings of the scaffolding give way, and he is precipitated into the water and disappears in the surf. Nowhere in this branch of industry very often turn giddy on their first attempt to descend the rattan-ladder, lose their balance, and are crushed against the rocks.

The trade in these birdsnests is not only a source of great gain to the merchants settled in Java, but it is also a source of wealth to the exchequer of the Netherlands, yielding, in the form of duty, about a quarter of a million sterling. But how are the Javanese, whose wants are so limited, who are so easily satisfied, and, in their natural indolence, so contented with their lot, induced to attempt such a perilous enterprise? There is a motive power which it is necessary to bring into action to effect this—namely, superstition. When the period for gathering the nests arrives, feasts are celebrated, and presents are offered to the numerous mountain spirits that are supposed by the Javanese to inhabit those caverns; all, of course, at the public expense. These presents consist chiefly of flowers, fruits, native condiments, meats, and vegetables, which are placed here and there on the mountains so that the spirits, when taking their walks abroad, may not be

NEW WESLEYAN CHAPEL, HUMBERSTONE-GATE, LEICESTER.

compelled to come down to the coast. The Queen of the Southern Ocean—or, as she is called by the Javanese, the Queen of the Green Sea—plays an important part in these ceremonies. At the entrance of the warehouse in which the gathered nests are to be accumulated, a bed is erected to the honour, and on this bed she is supposed to rest her wearied limbs, "in maiden meditation, fancy free." During these preparations, offerings are offered to her every Thursday evening; lamps are lighted that she may not lose herself on her way to the warehouse, and the sweet-smelling incense; and all the usual follies and mummeries of superstition are resorted to in order to give effect to the ceremony and to lead captive the judgment of the deluded idolaters, whose credulity is so philosophically utilised by those whose gains it helps to swell.

But there are other motive powers brought into action in order to induce the Javanese nest-gatherer to brave death—excitement and stupefaction. The last night before the commencement of the harvest is a night of wild festivity. Music, dancing, and other noisy diversions are made available for the purpose of driving away thought from the impending danger. A liberal distribution of opium, that fearful curse of the Javanese, is made by order of the recognised authorities. Under the influence of this opium the victims dance and play till their senses become overpowered by the fumes of the pernicious drug.

EDIBLE BIRDSNEST-GATHERING IN JAVA.

(From a Correspondent.)

In a small island in the province of Bagelan, in Mount Karang-Ballong, the highest point of which is not more than 500 ft., projecting, in the form of heavy grey and black rocks, into the sea. It can be ascended without much difficulty; and if the traveller, catching hold of a rope,

NEW WESLEYAN CHAPEL, LEICESTER.

A WESLEYAN Chapel has recently been opened at Humberstone-road, Leicester. It was designed to accommodate the rapidly-extending population covering the site of the old cricket-ground and the neighbourhood, and will hold about 850 persons. Its galleries circumscribe the external walls on a plan which is a decided advantage over the arrangement commonly adopted. By means of double walls and the use of wrought iron, the obstacles usually offered by galleries to the free diffusion of light and to the convenience of worshippers are avoided. The chapel contains an organ constructed by Mr. Bagle, of Hackney-road. The grey brickwork of the exterior, narrowly gauged in unity with stone decorations, invests the building with an air of sobriety and repose in keeping with its sacred purpose. Mr. Frederick W. Ordish was the architect; and the builders were Messrs. Porter and Clifton.

No. 1229.—VOL. XLIII. SATURDAY, OCTOBER 31, 1863. WITH A SUPPLEMENT, FIVEPENCE

NEW ZEALAND.

ENGLAND has ceased to be a colonising country in the strict sense of the term—that is to say, she has ceased to seek out virgin territory on which to erect her flag and to plant her settlers. As the sun never sets on her dominions, she is apparently satisfied with the extent of her actual possessions; and if the exigencies of her commerce in a manner compel her to push into new markets, she is content with the privilege of free ports, held in common with the rest of the world, and with land enough on which to place her factories, and accommodation adequate to her consular establishments. But, as she is now, perhaps more than ever, an emigrating country, she requires security for that part of her population which is in search of a field for their labour, and the employment of the hardiest of her sons. It is indispensable that in those dependencies in which she is practically founding new nations those of her subjects who accept that duty should be allowed to carry on their arduous work in peace, and undisturbed

THE DUKE OF NEWCASTLE LAYING THE CORNER-STONE OF THE GOVERNMENT SCHOOL OF ART AND DESIGN AT NOTTINGHAM.—SEE NEXT PAGE.

by hostile influences. In these cases the time has past when the question of abstract rights can be discussed and when the theory of treaties can be called in question. Obeying, as it would seem, an inevitable law of their existence, the English race still pushes on, and its ramifications continue to extend. We have to deal with the fact, and must do our best to reconcile it with the principles of moderation and justice. It is in vain to look at the case of New Zealand in any other light, and matters have at length arrived in that settlement at a point when the interests of 40,000 British men, women, and children, firmly and incradicably established in the provinces of that section of the Australasian territory, must be the first consideration. The emigration from this country to New Zealand has peculiar features. The class of persons who have sought those regions are amongst the very best of our emigrants. They differ in all respects from the adventurous class which throws itself somewhat rashly into the seething ocean of American affairs, and they differ in the main from the roughand-ready body which takes to the uncertain and varying pursuit of gold-digging. In most instances the settlers in New Zealand are small capitalists, or else the superior and steadier class of labourers, who can best co-operate with the occupiers of land in the development of the resources of the country. The process of colonisation has been carried on, as a rule, on an arranged system, and with something like a plan; and above all things to these settlers quiet, order, and safety to life and property are indispensable. Everything combines to render it necessary that steps should be taken to turn the present crisis in New Zealand into the channel of permanent settlement.

There are features in the recent outbreak of the native tribes which seem to indicate that they are imbued with the idea that the time has arrived when the question of ascendancy is to be decided. The Maoris, as a rule, control of the natives is in the country about Auckland, one of the earliest settled and most flourishing districts of the islands, and in which for a quarter of a century efforts have been made, and it was supposed not without effect, to Christianise the natives and bring them into relations of amity and good will with the white settlers. The aboriginal inhabitants have always possessed a strong party of sympathisers amongst the European population; and it has been the policy of the Home Government, in a manner, to stand between the white colonists, and to prevent as far as possible any attempts at oppression, while efforts have been made to preserve their rights and cultivate their goodwill. It would almost seem as if it had been our object to bring about a civil, if not a social, amalgamation of the two races, and to form a nationality and natives into one community. There have been times when there were hopes that some such consummation might be effected, and that the progress of English colonisation might be made consistent with the continuance of the natives in the possession of territory sufficient for the wants of their numbers; that they would cuter the pale of civilisation; and that, for once, the notion that wherever the white man came the dark man must disappear would be falsified. At present it would seem that these hopes were visionary, and that, unless the English settlers in New Zealand are willing to forego all the advantages which they possess, and to cede to the natives possessions which, however acquired, are now held by at least prescriptive right, the old struggle must be gone through, and of course with the old result. It is with no feeling of gratification, far less of exultation, that we contemplate the raising of this issue. In the abstract, and on general principles of morality, we contemplate this war of races, which is one to be waged to the uttermost, with regret; and in considering and admitting the necessity of the case, we have many misgivings, and are conscious of wishes that many things which have been done had never been done. But, as we have already indicated, we must face the facts. We have to choose between two interests; interests involving the very existence of a large body of our fellow-countrymen, and no more or less doubtful rights of a race which seems to have relapsed into its primitive savagery.

Looking to the circumstances of the outbreak of the natives, of which we have recently received accounts, it is impossible for English men to have any opinions as to the cause, the origin, and extent. For some time past it has been the object of some of the leaders of the malcontent natives to rouse the Maoris in the neighbourhood of Auckland to an attack on the British settlers. The object was to cause a general rising of the northern tribes, particularly the Waikatoes, a warlike race, whose country is close to Auckland, and then by a sudden movement to exterminate the settlers. The first act contemplated was the murder of some white men on the Waikato river. However, the plan was discovered, troops were sent from the Taranaki district, where they had been watching some ill-disposed natives, and preparations were made for anticipating the outbreak by a movement against the Waikatoes. While this was taking place the natives began the struggle by murdering two settlers at the outskirts of Auckland, under circumstances of peculiar barbarity. They next attacked a small military escort, and, though they were repulsed by the troops, the latter lost four men killed and ten wounded. It soon became evident that the native effort was planned on the most extensive scale, and that the outbreak was destined to spread, if not universal. Preparation was made for war, in the fullest sense of the word; and an obstinate encounter soon after took place between 500 British troops and a native force, in which the latter fought with considerable skill and great obstinacy, although ultimately defeated. The opinion of the colonists with regard to the nature of the contest thus begun may be gathered from the fact that, although a large force of regular soldiery is stationed in the islands, the whole male population has sprung to arms with an alacrity such as is exhibited only by Englishmen when real danger threatens them. Volunteer corps have been embodied, and the militia called out. How the executive authorities of New Zealand view the matter appears by the fact that they have sent for and obtained every soldier stationed in all the Australian colonies, and have applied for reinforcements to India. The Australian volunteers and civilians taking up arms for the occasion are, it is said, going over from all parts of Australia; and, in short, the colonists seem determined to take the matter into their own hands, and to carry on a war which will determine, once and for ever, the question of English supremacy in New Zealand.

Those who have watched the progress of affairs in New Zealand can hardly be surprised at this movement, however they may regret its necessity. Hitherto the colonists have been, if not content, so to speak, compelled to leave the question of the relative position of the native races in the hands of the Government. The Colonial Office has affected to stand as mediator between the two races, and has rather rebuked and repressed the colonists whenever they have attempted to settle their differences with the natives by force, conceiving certain that the colonists will so act as to render the continuance of this policy impossible. They are now in arms to protect themselves against a deliberate scheme for their extermination, and they have no alternative but that which they have chosen. Whether the Home Government will support the warmest sympathisers with the natives have not now a word to say in their defence. In such circumstances there can be but one course to pursue. Let such steps be taken as will secure now and for ever the safety of a large, industrious, and well-conducted European population; and when peace is restored, but when peace and order are effectually restored, much may be done to show the native tribes that the colonisation of New Zealand by Englishmen can be made consistent with a consideration of their rights and a peaceful intercourse between the two races.

THE NOTTINGHAM SCHOOL OF ART.

On Thursday week the corner-stone of the Government School of Art and Design in Nottingham was laid by the Duke of Newcastle. A procession, including the Mayor (Mr. Birkin), magistrates, and members of the Corporation; the Mechanics' Institute; and Masonic Grace being Provincial Grand Master—and subscribers to the institution, was formed at the Exchange-hall, at half-past twelve o'clock, and proceeded to the school, which is partly built and is situated in Waverley-street, where his Grace laid the corner-stone in presence of a large concourse of spectators. The Duke of Newcastle, after some introductory remarks, said that twenty years ago schools of art were founded in Nottingham and elsewhere, but they had not the name of schools of science and art. At the time of the Exhibition in 1851 they were only nineteen in number. At present there were forty or more, and the number of pupils receiving instruction amounted to 70,000. It was not likely that twenty-one additional towns should have followed their example in connection with science and art unless great benefit derived from them. He had read the reports of celebrated Frenchmen of the Great Exhibition of last year, and they spoke in the highest possible terms of what those schools had done. These reports said that they trembled for the future pre-eminence of France as compared with the rising industry of England, and he agreed in this respect, because in these twenty years the English manufactures had made great progress, which was chiefly attributable to the influence of these schools. If these schools had been of such advantage to the country they had been of especial use to Nottingham. He looked upon it as the "Nursery of Science and Art" established in July, and he found that Nottingham took a foremost rank among the schools. He believed it was owing to the zeal of the master and the local committee. The Government had lately been paying £1 for every pupil in schools, and they saw the consequences. This rule had been adopted in schools of art for many years previously, and had been found to work well. His Grace then alluded to the school of art in connection with the Mechanics' Institute, saying that he trusted the school might be a benefit to the enterprising manufacturers of the town, and also to the future workmen. In the absences of the working men of Nottingham, who had, he regretted to say, suffered during the last few years the greatest privations, and had unbounded sympathy with the most exemplary fortitude patience.

The building stands back from the line of the street about 30 ft. It consists, in the centre, of its boast features of a tower, rising two stories high, in the front, with buildings in the rear of one story high. It is built of red brick and stone, and is entered by a flight of a gracefully-designed square tower, 130 ft. high to the top of the vane. The principal façade is pierced with six semicircularly-headed windows, three on the first floor, and three on the second floor, which is finished by an architrave, moulding, frieze, and cornice, upon which stand the figures of Arts, Sciences and Industry, that surrytice the upper part, or first floor. The upper part is divided by eight pilasters, with Corinthian capitals, having carved bases and enrichments, which support arcades of three openings, having moulded archivolts, with keystones, and carved terminals to the label mouldis. The whole is crowned with a moulded cornice, and a carved cornice, which, together with the cornice of the ground floor and all the horizontal mouldings, finish round the tower and the projecting angles of the building.

The front building contains on the ground floor, an entrance hall 8 ft. wide. On the left of the entrance is a library, 20 ft. by 20 ft., and on the right there are committee-rooms, secretary's room, a room for students, and a lecture room, stone staircase and corridor leading to the basement. Immediately in the rear of the front building, and at the back of the lecture room, is the museum, which consists of two flights and leads to the exhibition-room. The rear buildings, which are of one story, are crossed throughout their entire breadth by a gable 6 ft. wide, with a smaller gable on each side, at right angles. On the left side of these buildings is the entrance for the female students, to which are attached the lavatories. On the right of the school, or the Peel-street side, is the entrance for the male students, with the preparatory students' room, of a similar size, and an vanced pupils' room, or painting-room, 69 ft. by 24 ft. On the first floor of the front building, the library, and immediately over the committee-hall and other rooms, is the exhibition-room. This is a noble apartment 72 ft. 6 in. in length by 30 ft. in breadth. The height is 17 ft. 3 in. from the floor to the springing of the ceiling, affording a large area of wall space for picture-hanging. The whole is crowned with a lantern running the whole length of the ridge, and having openings on each side for purposes of ventilation. There are no side-lights nor any projections in the walls, the object in view being to give as much picture-hanging space as possible. The library, and committee and other rooms in front of the two-story building are lighted with semicircularly-headed windows, glazed with plate glass, in moulded, framing, moulded, casements, elementary, and painting rooms, constituting the one-story building already referred to, are lighted by large windows and skylights in combination.

The building is in all its features a specimen of the Venetian school of Italian architecture. The front elevation is 88 ft. in width and 51 ft. in height to the top of the parapet. Mr. Frederick Bakewell, of Thurland-street, was the architect.

The supreme tribunal of Madrid has just given final judgment in a suit which has been under litigation 240 years, and which involved the succession to the inheritance of Francisco Pizarro, the famous invader, conqueror, and first Spanish Governor of Peru.

FOREIGN AND COLONIAL NEWS.

FRANCE.

The Emperor presided at a Cabinet Council on Saturday, at which it is reported M. Fould read his financial statement, and which is expected to appear shortly in the Moniteur. His Majesty presided at another council of Ministers on Wednesday.

The King of the Greeks has left France for his new kingdom. His Majesty embarked on Wednesday at Toulon for Athens, on board the Greek frigate Hellas. The Emperor has given the Grand Cordon of the Légion d'Honneur to the King.

Earl Cowley, the British Ambassador at Paris, has returned to the French capital after an absence of six weeks.

The Government has interned Mr. Dayton, the United States Minister in Paris, that the "antonination" for the construction of certain vessels of war now proved to be building in France for the Confederates, and for certain cannon and munitions for their armament, has been completed, and that the judicial inquiry into the business have been warned of the danger of prosecuting their work.

General Fleury has been appointed Governor of the Invalides, and General Mellinet Chef Commandant of the National Guard of the Seine. M.M. Suin and Villemain and General Herbillon have been appointed Senators and Councillors of State.

The Minister of Agriculture and Commerce has addressed a circular to the Prefects of 17 departments throughout the empire instructing them to place at the disposal of the Committee of Public Salubrity all the information necessary for the general inquiry with respect to canine madness, commenced in the year 1852. All the veterinary colleges and hospitals in France are to address returns, comprising the sex, age, and race of the animals attacked with hydrophobia, and giving the date of the attack, its duration, and the termination, and the mode of treatment adopted in the subjects. The contrary proposal, moreover, to establish an infirmary in each department, where animals, having been bitten by mad dogs, may be taken care of as being suspected of having contracted the disease of canine madness.

The discovery of two original paintings by Murillo is mentioned in the Paris papers.

A Colonel of dragoons has made a speech at Versailles, in presence of several Marshals of France, to express the opinion that at no distant day the Emperor might summon the French army to measure swords "with the oppressors of a people sympathetic with France." This speech was received with "vociferous applause," which the Governor with Russia would be popular with the French army.

The Museum of Natural History in Paris received on Tuesday a male and female elephant about one year old, and a male and female camelopard eighteen months old, sent as a present to the Emperor by the Viceroy of Egypt. The camelopards are very fine, but the coat of the female is greyer than that of the male, which is a bright bay. They are both remarkably docile. The elephants are not larger than young asses, and they are as lively and playful as kittens. The Museum of Paris now possesses five elephants.

THE EMPRESS EUGENIE'S VISIT TO SPAIN.

The Empress of the French left Madrid yesterday week. The King and Queen accompanied her Majesty to the railway station. The Queen, on quitting the Empress, presented her with a bracelet bearing the word "Recuerdo" (keepsake) in diamonds and rubies. The Empress embarked at Valencia on Sunday for France.

The Emperor moved by the cordial reception of her Majesty at Madrid, has thanked the Queen by telegraph, "Vous m'avez rendu very—" The visit of the Empress is destined, both in the present and in the future, to exercise a happy influence upon the relations which unite France and Spain.

We record the chief incidents of the Empress's visit to Madrid.

On the day after the Queen's arrival in Madrid she went to see her mother, the Countess of Montijo, and remained with her for some time. In the evening the Empress went with the Queen in great state to witness the representation of "Semiramide." Her Imperial Majesty sat between the Queen and the King, whilst at the sides were the Infantas Isabella and Don Sebastian, and the Princess Anna Murat. Behind them were the grand officers of the palace and the ladies of honour. The appearance of the theatre was magnificent, all the boxes being occupied by the Ministers of the Crown, the members of the diplomatic corps, the great functionaries, and all the chief nobility and the ladies of the Spanish aristocracy. A curious particularity is related, as attendant on the Empress taking possession of her magnificent box. An old custom of Spanish etiquette requires that, when a foreign crowned head sleeps in the palace, a gala key should be presented to it on its leaving. This ceremony was duly gone through by M. Onate, one of the grand officers of the palace.

The Empress devoted one day to visiting the tomb of her sister, the Duchess of Alba, at Carabanchel, where the Countess de Montijo has a country seat. On Thursday week the Empress went in state in the morning, accompanied by Princess Anna Murat and the persons of her suite, all being in mourning. In the evening the making this visit her Majesty declined attending the grand bull-fight to which she had been invited.

A letter from Madrid of the 22nd gives the following account of the ball at the Palace, in honour of the Empress of the French :—

The Queen and the Emperor entered the ballroom at twenty minutes before eleven, and were followed by the King Consort, Princess Anna Murat, the Infantas Francisco and Isabella, Don Sebastian, the Infanta Christina, the Diplomatic Body, including the Papal Nuncio and his first secretary; Baron Cavalchini, the Count de Rayneval, and the Count de San Martino, who represents the ex-King of Naples. Queen Isabella was dressed in white. Her robe was covered with the richest lace over, of large diamonds, and a necklace of stones just as large were most dazzling. The Empress, who was also in white, wore a rich diamond tiara, necklace and emerald, and a necklace of eight rows of pearls. Their Majesties were the Grand Cordon of the Order of Maria Louisa. The Princess Murat had on a white dress adorned with small leaves in embroidery, a rich pearl necklace, and a headdress composed of a semi-transparent lace with diamonds and some stars of same. It would occupy too much space to describe the splendid toilette displayed on this occasion. It must, however, be stated that the Duchess de Bailen—Colt; her sister, the Marquise de Villasca; Mme. Guillou, wife of the director of the General Credit Mobilier, and daughter of the Duke de Galliera; the General Rios de Olano and the Marquis de Miraflores, shone pre-eminent by the richness of their toilets. The Queen gave the Grand Cordon of the Legion of Honour, and the French Ambassador the Grand Cross of Charles II. Queen Isabella did not dance. Her Majesty sat between the Emperor and the Empress only twice. Princess Murat was as much in the first with Don Sebastian, and in the second with Don Francisco. At midnight Her Majesties withdrew to the grand gallery, where a splendid supper was served, and, souvenirs and trifles of considerable pretensions, the whole of the company invited (1200 in number) took their seats at the table. After supper the Queen and the Empress walked through the rooms, and conversed with a number of persons. At half-past two their Majesties retired, but the grand majority of the company remained until the hour of seven in the morning.

Her Majesty the Empress of the French arrived at Toulon on Thursday morning from Madrid.

THE FRENCH IN MEXICO.

According to the latest accounts affairs in Mexico were stationary. On Aug. 6 a expedition against Tampico had sailed from Vera Cruz. It arrived at and took possession of Tampico on the 11th.

Notification is published of the blockade, by the French naval forces, of the Gulf of Mexico, with the exception of Tampico, Vera Cruz, Alvarado, Goatzacoalcos, Tabasco, and Carmen, such blockade dating from Sept. 25.

On Thursday week the Emperor received the Mexican deputation charged to express the sentiments of gratitude felt by Mexico and the new Government of that country.

ITALY.

The Chambers are summoned to meet on Nov. 17.

M. de Sartiges has been appointed with the Grand Cross of the Order of St. Maurice and St. Lazarus.

General Bixio has been appointed to the command of the military department of Alessandria.

The Italian Minister of the Interior has, by a circular addressed to the Mayors of the kingdom, ordered that non-Catholics shall be buried in the same cemeteries with Catholics if there is not a separate burial-ground for the former. The non-Catholics are to occupy a corner of the common cemetery, separated by a hedge or a wall.

A public has been caused in the Italian army by the trial and degradation of forty officers for being naïvely, contrary to the regulations. It seems there are about 1200 officers in the army married under the same circumstances.

SWITZERLAND.

A storm appears to be gathering in the political atmosphere of Geneva. The elections to the National Council have given a great majority to the Liberal party, which is strongly opposed to the Grand Council.

AUSTRIA.

Every week brings news of the easier working of the Constitution. In Wednesday's sitting of the Reichsrath the Finance Committee proposed to grant to the Minister of Finance a loan of eighty millions of florins.

On the day the Transylvanian deputies took their seats in the Lower House (the 20th inst.) the Parliament House was filled with members and spectators. A letter from Vienna, Sunday, says, "It was the day the entrance of the Transylvanians was taken as an occasion formally to declare the House competent for the whole monarchy. Next to this, the new members were called upon to take the oath. The House rose thereupon, and the form of the oath was read in the German, Magyar, and Roumaic dialects. It was the first time that the Hungarian language was read within those walls. The answers, 'I swear,' were given in the three languages. Konrad Schmidt was the spokesman of the Transylvanians. After some historical remarks, he said :—'The Diet of Transylvania, as our address to his Majesty shows, has with the utmost zeal declared its desire to declare its acceptance of the fundamental laws embodied in the diploma of the 20th of October and the patent of February.' I and my colleagues place ourselves upon the ground of the Constitution. We trust in its vitality. I hope that our entrance here will serve as a new turning-point, not only as regards ourselves, but the whole powerful and fame-covered empire." (Cheers.)

Thus the having taken place in the adhesion to the new order of things, there seems to be a feeling in Hungary in favour of doing likewise. The *Neuczeg*, a Pesth journal, published a leading article in which it openly pronounces itself in favour of the acceptance of the Constitution.

PRUSSIA.

The King arrived at Magdeburg on the morning of the 22nd inst., in order to be present at the Sunday festival in connection with the cathedral. Prince Charles and Frederic Charles of Prussia and Prince Augustus of Wurtemberg accompanied his Majesty to inspect the troops were performed in the cathedral, and towards the conclusion of the proceedings a salute of 101 guns was fired from the battery adjacent. The King then left the cathedral and proceeded to the barracks, and spoke of veterans, who marched past his Majesty. The King was afterwards present at a banquet, at the conclusion of which he left Magdeburg for Berlin by express-train.

On Wednesday the election of Parliamentary representatives in Prussia took place. In Berlin all the candidates of the Progress or Democratic party were returned by large majorities. The telegrams received from the provinces that have as yet voted announce the decided triumph for the Liberals. Some prominent Conservatives have, however, been also elected.

DENMARK AND GERMANY.

According to the *Aftenblad*, of Stockholm, the King of Denmark has declared in the following speech :—"I have every confidence in the victory and the justice of our cause. I know that my faithful Schleswigers are Danish at heart, and that it would be a crime against them to consent to divide Schleswig. History will judge me, and the last of the Oldenburgs parcelled out Denmark. If, however, in the course of time we must succumb, we will fall with honour, and Norway and Sweden permit the most southern provinces of Scandinavia, the old Julland of the north, to share the fate of Gaul—that is, of Poland, and of Northern Italy, by being overpowered and suppressed by German Governments, then I will descend from the throne and will proclaim the Republic. I have spared three years of my youth in Copenhagen. I have studied the laws and institutions of that country and I am convinced that the people in Europe to-day will form the Republican system than my dear Danish people."

The *Berlingske Tidende* mentions that Austria has sent orders to Trieste for the arming of six large large vessels of war in order to protect the coasts of North Germany, in case Denmark should Bockade the Elbe and seize all merchant-vessels. A Danish squadron would ask the Diet to be indemnified for the expenses of the armament.

THE INSURRECTION IN POLAND.

General Berg has issued orders forbidding mourning to be worn after the 15th of November next. Passengers on the railways by ordinance are to be fined 10 roubles; the proprietors of private carriages 100 roubles; any emblems, 100 roubles; persons in hired vehicles, 15 roubles: officials transgressing are to forfeit one month's pay. Mourning for the dead is however, permitted.

An order has been published in Warsaw according to which all persons having had their passports vised must leave Poland in one day, instead of in two days, as hitherto allowed. In another order the inhabitants are directed to carry lanterns in the streets from six to nine p.m. No person is allowed to be out after nine p.m.

Forty members of the municipality of Warsaw have been arrested, and a secret printing establishment of the National Government discovered.

On Thursday morning four Polish gendarmes were hanged on the Cogel-berg, near Warsaw, by sentence of court-martial.

It is stated in a Berlin letter that Professor Kowalewski has recovered many of the contents of his library, which were brought to him by a Jew who had purchased them for a trifle from a soldier. Count Stanislaus Zamoyski, who was arrested with the other inhabitants of Count Zamoyski's palace, was at first sentenced to death, but this sentence has since been commuted to deportation to Siberia for four years.

The *Wiens Courier* announces that several fresh executions have taken place in the government of Grodno by order of General Mouravieff.

Russian official despatches claim a victory over a large body of insurgents in Radom.

New bands of insurgents are reported to have entered the country. Railway communication between Warsaw and Vienna is interrupted, the insurgents having destroyed the bridge at Skiernievice.

TURKEY.

The question of the Budget is still open. The surplus is to remain undiminished. It has been decided that the Imperial Budget will pay the November dividends upon the Consolidés in London and Paris.

A four balance-sheet of the Finances of the Turkish Empire has been published. The sources of revenue are divided into five classes—viz., 1, direct taxes; 2, indirect taxes; 3, postal service; 4, customs; and the profits of Imperial printing-office; 4, rent of Government farms, salt monopoly, mines, &c.; and 5, sales, forests, &c., &c. Egyptian, Wallachian, Moldavian, Servian, &c., are not included. The expenditure is distributed under the heads of foreign debt, home debt, and cost of administration. The result is as follows :—

	Purses.	Piastres.
Total receipts	2,018,339	13,614,271
Ditto expenditure	2,369,004	12,485,177
Surplus	41,654	243 = 189,794

There has been a panic at Constantinople. It broke out in the Café de Balcon, below the Tôté. Pera, and in less than an hour destroyed twenty houses. One of these houses was occupied by the family of Dr. Pfander, one of the leaders of the London Missionary Society, himself temporarily absent at Smyrna. Mrs. Pfander and her daughters remained happily ignorant, but nearly the whole of the furniture fell a prey to the flames.

From Shumla we learn that the Chambers of the Danubian Principalities are summoned to meet on the 15th proximo, and that a new Cabinet has been formed.

AMERICA.

WAR NEWS.—VIRGINIA.

The long-expected advance of the Confederates under Lee once more towards Washington has commenced, the Federals retreating before them without any general engagement.

On the 8th inst. General Lee's whole army crossed the Rapidan, moving towards Madison Courthouse, to turn General Meade's right. Having massed troops at this point on Friday night and Saturday morning, the Confederates advanced in a northward direction. A Federal force, under General Kilpatrick, immediately proceeded towards Robertson River to reconnoitre, but was encountered by the Confederates under General Stuart and driven back with heavy loss towards Culpepper. The Confederates then continued their march from Madison Courthouse, and gained a position considerably in the rear of the Federal right, the result of their strategy being that the Federals evacuated Culpepper, burning everything which could not be readily removed, and that General Meade withdrew his whole line to the north bank of the Rappahannock.

It is believed that, before making his advance, Lee was rejoined by General Longstreet's corps, which had been detached to reinforce Bragg and to take part in the late battles of Chickamauga.

Several severe but partial engagements—chiefly of cavalry—occurred between the contending forces. Southerners will be pleased to learn, on the authority of a Washington despatch, that Stuart's cavalry, in one of these, which took place at Bristow station on the 14th, the Confederates had taken three large guns and a thousand prisoners, 70 guns, two colours, and 450 prisoners, and repulsing the Confederates. In the evening of the 15th, Kilpatrick's brigade of Pennsylvanians attempted to flank Meade by way of Chantilly, and get in his rear through Fairfax Courthouse. To avoid this the Federal General had to fall back on the line of Bull Run. On the 16th, at 4 a.m., the Federals were in line of battle at Centreville, and the Confederates occupied the ground on the left of Bull Run. Two days' severe fighting were held by Confederate troops. A corps of the Southern army, under Hill, has moved from Meade's front in the direction of Leesburg, and a Federal reconnaissance in force has been made, but no general action had occurred. The following is the latest despatch from New York, the morning of the 17th :—"Lee officially announced that General Lee has not crossed the Potomac. There is no further news from Virginia."

TENNESSEE.

The news from Chattanooga is scarcely less important.

From the surrounding armies of Rosecrans and Bragg come reports of harassing movements by the Confederate cavalry. General Bragg had to fall back upon Missionary Ridge, Lookout Mountain, which, however, he still held, and concentrated it upon Missionary Ridge some two miles distant, but equally near to Chattanooga. His cavalry is still operating on the Federal communications, and the Memphis-Charleston Railroad, to prevent reinforcements or supplies reaching Rosecrans. It is reported that no western reinforcements have yet reached Chattanooga. The Confederates are intrenching themselves in force on Missionary Ridge, and Bragg has thrown a force across the Hiawahee River upon Burnside's left, compelling him to fall back to beyond Athens, which the Confederates occupy, thus isolating Burnside from Rosecrans. The Confederate General Wheeler with Burnside has been successful in a sharp action with a considerable body of Confederate cavalry at Blue Springs.

The *Times* correspondent says:—"It is believed to be the plan of the Confederates to keep a powerful army in front of Chattanooga, and, while holding that position in general subjection, by occasional attacks to harass him with their artillery in front, while strong detachments of cavalry are directed to the rear to break up the communications which will ultimately compel him to capitulate or retreat upon Knoxville and Kentucky."

During the last week a train of upwards of 300 waggons containing ammunition and supplies for the Federals, was destroyed near Athens, in Alabama. The Confederates have also destroyed many bridges either on or ahead.

Railroads and telegraphs are continually interrupted at different points between Chattanooga and Nashville.

CHARLESTON.

It was affirmed that on the 18th ult. all was ready for a general attack on the defences of Charleston; but at the date of the latest telegrams the commencement of the action had not been made.

Charleston Harbour was "effectually closed against the entrance of the ironclads."

On the 15th inst. a torpedo, attached to a raft, was floated down from Charleston, and exploded under the Ironsides. A great quantity of water was thrown up, but the vessel received little injury. Engineer Howard was killed and two seamen wounded. According to one account the Ironsides was so badly injured that she would probably have to be sent to the North for repairs.

Two "devils," for removing the harbour obstructions, had arrived from the North.

OTHER WAR NEWS.

In Kansas, Missouri, and along the Mississippi, fighting is reported with varying results.

The repulse of the Federals above Fort Hudson is confirmed. They lost 600 Coloured troops. General Banks is now operating against the Confederates, who retreated.

Galveston, Texas, has been defeated in Missouri, losing all their artillery, baggage, and numerous prisoners.

The steamer Robert Peel (a blockade runner) was captured on the 11th of September, near Abaco, one of the Bio Grande, by the Federal cruiser Seminole. The Captain has protested against the seizure, and has taken the case before Judge Ensign Howard was killed and two seamen wounded. According to one account the Ironsides was so badly injured that she would probably have to be sent to the North for repairs.

The steam-transport Union captured the English blockade-running steamer Spaulding, on the 11th, with a valuable cargo from Nassau. The captured vessel had a crew of twenty-five men and four Confederate officers on board, all prisoners.

A large steamer, deeply laden with cotton, had run the Wilmington blockade on the night of the 14th inst. A Confederate privateer was receiving her armament there, and would soon run out.

MISCELLANEOUS.

President Lincoln has, it is stated, called for 300,000 volunteer.

There has been a draught riot in New Hampshire.

Admiral Milne left New York in the flag-ship Nile, on the 14th inst., for Halifax.

Earl Russell's Blairgowrie speech has been favourably received in the North. The latter attributes his encouragement of England's neutrality to the great display of Federal resources.

The election of Governor Seymour, of New York, resulted in a victory of the Republican party—Mr. Curtin, the Republican candidate, having been elected Governor of Pennsylvania, while Mr. Vallandigham was defeated in Ohio by a majority of more than 100,000 votes.

The Federal General Banton has placed a lien upon the North Carolina railroads, to defray all the claims of the plantation labourers are paid.

Secretary Chase, who was making a tour in the Western States, had not confined himself, in his public speeches, to the consideration of financial measures. In one of his addresses he declared that "the English statesmen who were now encouraging the South to secure United destroyed," and that a foreign intervention was prevented only by the steady display of Federal strength. "He foresaw," he said, "a grand future of power for America; and the time would arrive when England would regret that she had not come with America's enemies. He felt certain that England, after calm reflection, would not consent to pay the penalty for American merchants for the damage done by the Alabama."

After a Message to Congress, he leaves last night for Washington.

The *New York Times* speaks with satisfaction of the fact that the Federals have gained a majority in the Legislature of the State.

"only" twelve hundred million dollars of debt.

The steam-transport Ben Deford, New York, Philadelphia, Boston, and Portsmouth have received orders to prepare for the conversion of twelve fast steam-corvettes of over 200 tons burden, each carrying seven guns, for service in the Gulf of Mexico, in view to pursuit.

Another Russian vessel has arrived at New York, and more were expected. The Russian fleet is visiting the principal ports. Like public institutions in New York, the Russian officers absenting themselves on the occasion.

A volunteer rifle brigade has just been organised in New Jersey, United States. The men are armed with the Springfield rifle, and are instructed in the Hythe system of musketry. It is stated that a detachment proposes to enter the lists at the next Wimbledon meeting against one of the London regiments.

President Davis is making a tour of inspection in the South. The British Consul at Savannah has been calling the Governor of Georgia to account for the enlistment of British subjects. This has given rise to another demand for the expulsion of all the present British Consuls in the South, on the ground that they are accredited to President Lincoln. The *Richmond Dispatch* is irate at the detention of the steamer Giraffe at Nassau, and declares that, if England would stop the Irish emigration, the war would end in three months.

CANADA.

In the Legislative Assembly Mr. Galt moved a resolution expressive of want of confidence in the Ministry; and, after a considerable debate, it was rejected by a vote of—Yeas, 61; nays, 64: the Ministry thus being sustained by a majority of 3.

The Legislature was prorogued on the 15th inst. The following is the speech of the Governor-General on the occasion :—

Hon. Gentlemen of the Legislative Council—Gentlemen of the Legislative Assembly.—The purposes for which you were convened at the second session of the year having been accomplished, I have now to release you from further attendance in Parliament. I heartily congratulate you upon the unanimity which has marked your deliberations with respect to the defence of this portion of the British Empire, and I trust you have reposed with equal confidence in the measures you have for relating to the militia as were necessary, in order to impart to that body a greater degree of efficiency. Provision will have given to the volunteer force of Canada, and the measures you have adopted for the promotion of efficient discipline in the auxiliary force, will, I trust, be productive of the most beneficial results.

Gentlemen of the Legislative Assembly.—I thank you, in her Majesty's name, for the supplies which you have granted for the public service.

Hon. Gentlemen and Gentlemen.—It has been impossible to submit to you during the late period of the session the numerous subjects which have been prepared for your consideration. It will therefore be incumbent upon me at the ordinary period of the next session of Parliament to call your attention again to your advice and co-operation. Meanwhile, in dissolving you upon this occasion I have much pleasure in returning to your homes, in each of you employ the influence which you possess to promote the welfare and happiness of her Majesty's Canadian subjects.

The *Toronto Leader* publishes a long manifesto by Mr. Cornell Dewett to Governor Seymour, of New York, in advocacy of European mediation.

CHINA.

From Pekin and the northern ports there is no news of importance, says the *Overland China Mail*; everything appears to be quiet at the different foreign settlements.

Major Gordon continues to manœuvre against the rebels. He is said to have occupied an island in the Tae-Hu Lake, while Dr. Macartney has taken the city of Kahding, and is expecting the assistance of Gordon's plans. The place taken is a large city, and the drilled troops who defended it were never before under fire; they are said to have behaved well.

The force under Burgevine has not again attacked the Imperialists. It is rumoured that they are to be led against Soochow. Considerable anxiety and a secret desire for the success of the rebels exists even in what would be considered neutral quarters.

As soon as Burgevine deserted to the rebels, $1000 was offered for him, dead or alive. The European Consuls remonstrated with the military mandarin at Ningpo against this proclamation, as against treaty stipulations. The mandarin replied at some length to the protest, and concluded by refusing to withdraw the proclamation.

The Consuls of England, France, America, Prussia, and Russia have conjointly given notice to all persons residing in the rebel ranks or endeavouring to induce others to enlist will be punished with the utmost rigour the law allows. Active steps have been taken to check the arms trade, which is already languishing from the difficulty of approaching Soochow. The French Consul-General has notified that all residents in the French concession are to reside as members of the arms in their possession by a fixed date; and her Majesty's Consul has reminded steamers that are busily plying into the interior that they render themselves liable to confiscation by trading at the Custom-house barriers at the mouth of creeks.

At Ningpo matters remain under a similar order, and the drilled troops are spoken of as being in a good state of discipline.

From the other ports on the south coast we have no news of importance.

All is quiet at Canton and Macao.

JAPAN

The Hong-Kong papers supply us with full particulars of the attack by the British Fleet on Kagosima. We have received also from our Special Artist and Correspondent in Japan a description, accompanied by descriptive details, of the bombardment of Kagosima by the British fleet, which will be given in our next Number.

The Japanese reported that they were returning to their attack and to make their preparations against it. In this they were foiled, and, though they fought for it, they were unsuccessful. Besides the loss of the two gallant officers, Captain Jolling and Commander Talmot, we have had killed and fifty wounded. Batteries of Choosw has taken possession of the forts on the south side of the Straits of Simonseki, thereby holding the key to the inland sea.

Advices received from Corfu state that the Ionian Parliament has been prorogued for six months.

The Count and Countess de Chambord have returned to Frohsdorf from Upper Austria. They have been on the estate requested to the Countess by her aunt, the Archduke Maximilian.

An association of religious reformers is holding sittings at Frankfort, under the presidency of Dr. Strauss, of Zurich, assembly, which is very numerous, has pronounced against concordats, against the dogma of papal infallibility over the lower clergy, and in favour of the marriage of Priests.

Three bells at the church of St. Vincent de Paul in Havre have lately baptised. Mgrs. de Bonnechose, Archbishop of Rouen, presided at the service. The largest of the bells is named Notre Dame de los Beauregardes, and has a diameter of 2 metres 30 centimetres. The service, over, was defrayed by her Majesty, who also presented 1000f. to the poor of the parish on the occasion.

The latest intelligence from San Domingo announces that the Spanish Government has resolved to cede the Bay of Samana and Quite 11,000 have already landed. The Spanish troops at Santiago crushed the rebels. The Chief of San Luis was commander, but the Spanish were victorious. The revolution has been successful in the district of Cibao. Santiago has been taken, and rebels have fled to the mountains.

At Leipsic, on the 18th and 19th, there were great fetes in celebration of the fiftieth anniversary of the great defeat of the French near that city in 1813. Public monuments were inaugurated, theatres and operas lighted, torchlight processions made, open-air poet-songs performed, and illuminations displayed. The weather was the greatest of the fetes days' sighting, and the one which was decisive of the fate of the whole contest, commencing bright with cloudless sunshine, but ending in a heavy rainfall through the principal streets and squares of the city by an immense body of torchbearers.

The slave trade in the Pacific Islands appears to be increasing to a fearful extent. The most unscrupulous means are resorted to, and the fearful traffic been carried on that some of the smaller islands have been entirely depopulated of all their native inhabitants. Even the children even were being carried off. Although "at least 1500 whales have been sold at Lima," it appears that the natives of the islands are not allowed to trade where work they are unsuitable. The Peruvian Government have arrested the perpetrators of a cargo of captives with the trade.

EARTHQUAKE IN NORTHERN ITALY.—By the following letter, in the Augsburg *Gazette*, we learn some particulars of the effects of the earthquake felt at the Lake of Como on the 16th inst. The disaster appears to have been at its height during a thick and stormy wind, which accompanied the earthquake. Suddenly a loud noise was heard, like that of clouds that burst and burst, and opened its floodgates. The waves of the lake burst upon the shore with a loud and hissing noise, and the earth began to move in terrific shocks, that the oscillation of the ground was perceptible to the senses of those of which it was composed had fallen upon the houses built on the slopes, four in number, and had crushed them to the earth. This occurred at midnight, and thus at one moment fifty-five people sleeping in the houses became inmates of the tombs. Only one poor mother, with her infant at her breast, had been rescued alive from the wreck of the houses, her husband and two sons having been killed in their sleep. A crowd of people hastened to the spot as soon as the disaster became known, and they succeeded in so far clearing away the ruins as to be able to extricate ten of the corpses of the slain." The earthquake was felt at Lugano Lake on the same day. Canobbio Lavin, in Lombardy, also suffered from it. At Intra, on the Lago-Maggiore, the Villa Bangalliani was covered with the waves of the lake, garden walls were thrown down, and all the houses on the lake-shore were more or less injured.

CURRENT LITERATURE.

Ingoldsby Legends. (1 vol. 4to. Richard Bentley.) A work illustrated by Cruikshank, Leech, and Tenniel, even if it had no intrinsic merits of its own, would stand a very fair chance of immortality; but when the three great artists combine simply to embellish what would otherwise live as long as the English language, as long as humour and pathos, exquisite versification, and singular felicity as well as facility of rhyme, are appreciated, it seems superfluous to do more than inform the public what a prize is within their reach. And, if this be not enough, there is more to be said in favour of the noble specimen of bibliopolic art which we have been permitted to admire in dishabille—that is to say, ere it has assumed the full-dress binding in which it will make its appearance before those who will be the ultimate arbiters of its fate. It is printed upon the most delicately-tinted paper, and its type is of the most pleasing character: it is, in fact, a gem of elegance. The present edition outshines former editions as undeniably as the bride, magnificent in wedding-dress and fresh from the breeze of mountain or sea, surpasses in loveliness the jaded belle of a protracted season. The pallid, wan, and roughened complexion is exchanged for a sweetly-coloured and satin-like surface. Of the sixty illustrations with which the book is adorned by far the greater number are entirely new. Subjoined the reader will find a specimen of each famous draughtsman's style. In the scene from the "Auto-da-fé" we recognise with a smile of welcome a very old friend, drawn by the cunning pencil of John Leech. Here sits King Ferdinand, as of old, "leaning back in his chair with a satisfied air," whilst "his pounds" hoc goes to-and-fro at his nose," and then throng the "fair ladies from Xeres and Cadiz," to see "the last wretched Hebrew burnt down in his socket" as smilingly as they would crowd to a bull-fight. George Cruikshank's quaint and graphic illustration of a well-known scene from the "Lay of St. Dunstan" is not familiar to us, and will no doubt be equally unfamiliar and equally grateful to the reader. The story is excellently and succinctly told of what befel the unhappy lay brother for daring to conjure with saintly secrets, little dreaming what Clarence-like fate would be his as he shouted, "Broomstick! you lubberly son of a gun! bring ale!—bring a flagon—a hogshead—a tun!" Quite new, also, to us is the specimen of Tenniel's masterly handiwork illustrative of a position in the "Brothers of Birchington." The artist has succeeded admirably in depicting, by the faces and positions of his figures, the double character—the humour and sternness, all in one—of "Thomas Ingoldsby's" words: the obesity and imperiousness of St. Thomas A'Becket, and the mingled surprise, horror, and "funk" of the monks, and tradesman-like complaisance expressed in the countenance of "Auld Hornie" are uncommonly amusing. The moment chosen is that which follows upon the stroke of the pastoral crook upon the pavement, when Rolus shakes, and, "hanging his ears, yet dissembling his fears, ledger in hand, straight 'Auld Hornie' appears, with that sort of half-sneaking, half-impudent look bankrupts sport when cross-questioned by Creswell or Cooke." To conclude, it may be fairly predicted that the superb edition of "Mirth and Marvels" will be inferior to none of those exquisite literary and artistic treasures which come forth at Christmas from the storehouses of publishers.

THE INGOLDSBY LEGENDS: THE AUTO-DA-FÉ.

Battle-Fields of the South. By (T. E. C.) an English Combatant in the Southern Army. (2 vols. Smith, Elder, and Co.) T. E. C. had been for a long time resident in America when the election of Abraham Lincoln to the Presidency was received with a growl of dissent in the Southern States, when the patriotism or treachery of Floyd sent arms southward for the conflict which he knew was impending, when the connivance or vacillation of Buchanan made confusion worse confounded, and when at length the bombardment of Fort Sumter proclaimed to the universe in iron tones that a great people was divided against itself, that the hour predicted by Jefferson was come, and that civil war had crossed the Atlantic to find a new amphitheatre in the New World. Then came the advent of newspaper-writers at the two thousand shots expended against Fort Sumter, at the two days or parts of two days spent in reducing it, and at the bloodlessness of the affair, only four men having been killed, and that by the bursting of one of Major Anderson's own guns as he was performing the ceremony of saluting his flag; but soon the thoughtless mockery was changed to real or simulated horror at the carnage, which seemed to increase with every bloody field from Bull Run to Chicamauga. T. E. C., however, brings down his account no later than the battle of Fredericksburg, when Burnside found himself so unequal a match for Lee, and when the Federal troops, after repeated assaults upon positions which T. E. C. pronounces unscalable, had to take advantage of the darkness and rain of a dreary December night to make good their retreat across the river. T. E. C.'s heart is evidently in the cause, and though, to use his own expression, he has "all to love and nought to gain in opposing the tyranny of Federal rule," he embraced the Southern cause from the very first with an enthusiasm which would have done credit to a scion of one of the "first families of South Carolina." He declares himself that "the impulse by which he was prompted in bearing arms for the Southern cause was simply that inherent love of liberty which animates every English heart," but he writes with a virulence of feeling which would scarcely be greater were the difference between himself and the Yankees social and religious instead of national and political; indeed, he could not hate them more than he apparently does had they once been his best friends. He says that General Scott considered lying an element in strategy, and accounts for the "bounces" of Major-General Pope and others on the ground that they imitated the "old hero." Of M'Clellan, whom no less an authority than General Lee pronounced to be the best officer the Federals had, he asserts that the "young Napoleon" at the commencement of the war offered his services to the South and asked to command a division, but "was answered that, if his heart was in the cause let him join the ranks, like Longstreet and others, and fight his way up to that position." He says, moreover, "I have frequently heard distinguished Southern leaders speak of M'Clellan in the highest terms of compliment. His successful retreat through the Chickahominy swamp is considered by officers to be equal to the best deeds on military record;" but he does not himself speak in very high terms of "little Mac," representing him as but little inferior in power of imagination, exaggeration, misstatement, and downright leasing to the unsurpassable General Pope. T. E. C. served first as a private, and eventually as Lieutenant of Artillery on the field staff, and, in the latter position, had no doubt more opportunity than in the former of observing the tactics and movements of the officers in command; but, as privates and subalterns have usually about as intimate an acquaintance with the plans and operations of commanders of armies or divisions as pawns and knights on the chessboard have of the intentions and movements of those who place them on their particular squares, there is, perhaps, not much more to be learnt, in a scientific point of view, from his volumes than from the accounts which have already appeared in the newspapers. Besides, as he was with the army of Virginia, and the South fought battles elsewhere, he, not having the gift of ubiquity, is forced to rely for events of which he was not an eye-witness upon letters from friends and announcements in newspapers. It is, of course, those parts of his volumes which tend to show the spirit which animates regiments and companies, masters and slaves, officers and privates, and which treat of camp-gossip and of the qualities and personal appearance of now well-known Generals, on which he is most likely to be well informed, and which are most entertaining. It is a matter of regret that his narrative does not come down to the date of the enlistment into the Federal army of black troops, the reported flocking to the Federal lines of escaped slaves, and the asserted bravery of the coloured regiments under fire and in the face of white men; for he leads you to suppose that such things could hardly be.

Wanderings in West Africa. By a F.R.G.S. (2 vols. Tinsley Brothers.) Our "Wanderer" on the 24th of August, 186—, delivered himself into the hands of the A. S. S. Company to be conveyed from Liverpool to Fernando Po. The company do not transport their passengers, as the unfortunate abbreviation of their full style (African Steam-Ship Company) might lead one to suppose, by donkey-carriage, but by the usual modern contrivance for traversing the seas, so that the "Wanderer," having gone on board the good ship "Blackland" at 12.15 p.m. on the day above alluded to, arrived, so far as we can understand, at Fernando Po on the 27th of the next month, that is to say, he had been "wandering" about a month. During this time he spent a day at Madeira, a day at Teneriffe, a day at St. Mary's, Bathurst; three days at Freetown, Sierra Leone; six hours at the Cape of Cocoa Palms, twenty-four hours at Cape Coast Castle, a day at Accra (which he calls the "land of ants"), and a day at Lagos. One would have thought these sojournings full short to give an opportunity of writing "a full, true, and particular account" of the places, together with ethnological, philanthropical, and other discussions upon their inhabitants; but the author wished to show "what a tolerably active voyager can see and do during the few hours allowed to him by the hails of the mail-packet." *Ecce signum!* He can collect sufficient material (tacked on to readings from other authors and disputations, *obiter*, upon innumerable points) to make two really readable volumes. Such bookmaking is worthy of a "go-a-head" Yankee.

THE INGOLDSBY LEGENDS: A LAY OF ST. DUNSTAN.

THE INGOLDSBY LEGENDS: THE BROTHERS OF BIRCHINGTON.

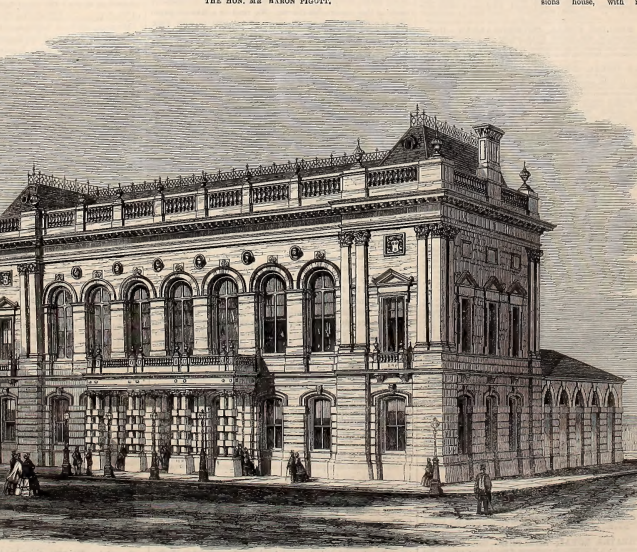
MR. BARON PIGOTT.

We this week engrave a Portrait of the recently-appointed Judge of the Exchequer, Mr. Baron Pigott, selected to succeed Sir James Wilde, now Judge of the Probate Court. Mr. Gillery Pigott is an instance of steady and cumulative success at the Bar, having obtained a fair share of business very soon after having been called (in 1839, at the Middle Temple), and ending his career as an advocate, as the leader, *de facto* as well as *de jure*, of the Oxford Circuit. In 1858 he sought for, and at once obtained—his position at the Bar fully justifying the appointment—the promotion of Serjeant-at-Law; and in 1857 he was granted a patent of precedence. Previous to his advance-

ment to the Bench, Mr. Figott had acquired some experience of the judicial function, having for some years held the office of Recorder of Hereford. Of the value of the training of members of the Bar in the position of Recorders an instance somewhat remarkable was found in the case of the present Lord Cranworth, who, when appointed a Baron of the Exchequer (a common-law function), had always practised at the Chancery Bar. Some surprise was therefore felt at the readiness with which the then Baron Rolfe dealt with cases at Nisi Prius and the criminal courts at the assizes, which was dissipated when it was recollected that until the time of his appointment as Solicitor-General he had been Recorder of Ipswich, and constantly engaged in cases which required a knowledge of the principles of common law evidence and the practice of dealing with it as a Judge. It is probable that the like experience will be of equal advantage to Mr. Baron Figott. In October, 1860, Mr. Figott was elected member for the borough of Reading, the representation of which had become vacant by the appointment of his brother, Mr. Francis Figott Stainby-Conant, to the lieutenant-governorship of the Isle of Man. In Parliament Mr. Figott professed Liberal opinions, being in favour of the ballot, and advocating a moderate and progressive extension of the suffrage. He generally supported the Government of Lord Palmerston. Mr. Figott, while in the House, attempted a reform in the existing anomalous laws of the Island of Jersey, having introduced a bill on that subject founded mainly on the recommendations of two Commissions of Inquiry on that subject; but the measure did not proceed beyond the first, or, at any rate, the second, reading. Mr. Figott is the fourth son of Paynton Figott, Esq., of Archer Lodge, Hants, who assumed the name of Stainby-Conant, and was born in 1813. He was educated at Putney School. In 1836 he married Frances, only child of Thomas Drake, Esq., of Ashday Hall, near Halifax.

Our Portrait is taken from a photograph by John and Charles Watkins, of Parliament-street.

THE HON. MR BARON FIGOTT.



NEW TOWNHALL AT GREAT GRIMSBY.

AMONGST the improvements that have recently been carried out in the rising seaport of Great Grimsby is that of a new Townhall, of which we give an Engraving.

The inauguration of this noble edifice took place on the 15th inst., when the Mayor (Henry Bennett, Esq.) gave a sumptuous banquet, never before equalled in Grimsby, in the large hall, to the members of the corporation, magistrates, and leading merchants of the town, and other gentlemen. On this occasion his Worship was honoured with the presence of the Earl of Yarborough (High Steward of the borough), Edward Heneage, Esq., of Hainton Hall; John Fildes, Esq., of Manchester; and Edward Watkin, Esq., and William Hutton, Esq., two of the directors of the Manchester, Sheffield, and Lincolnshire Railway. This company has, at an expense of ten millions, constructed a line across the kingdom, reaching from sea to sea, and having its terminus on the east in the noble Royal dock at Grimsby. The foundation-stone of this building was laid in 1849 by his Royal Highness the late Prince Consort, and was opened by her Majesty the Queen in 1854, in honour of which occasion the principal street, nearly a mile in length, was named Victoria-street.

The new Townhall, with its suite of offices, is a noble pile of buildings, standing in an excellent position in close proximity to Victoria-street, and comprises all the various apartments required for the transaction of the public business of a corporate town. The style chosen is Modern Italian, well carried out and executed in stone and white brick. The entire front consists of a centre, with pavilion wings, formed by projections, with Corinthian pilasters upon a rusticated basement. In the centre of the front is an open portico of coupled rusticated Ionic columns, forming a capacious covered entrance. The centre main floor is composed of seven recessed arches, in which are circular-headed windows, surmounted by a modillion cornice and an open balustrade. On the wall of the façade, in the spandrils over these arches six circular panels are placed, containing busts of the Queen and the Prince Consort, Archbishop Whitgift (born at Grimsby), King Edward III. (who granted the land to the freemen), the Earl of Yarborough (High Steward of the borough), and Gervase Hollis (historian and Mayor of Grimsby, A.D. 1663).

The ground floor comprises entrance, vestibule, and corridors, with staircases to the public room, or townhall; offices for town clerk, magistrates' clerk, and surveyor; council-chamber and sessions house, with requisite

THE NEW TOWNHALL AT GREAT GRIMSBY, LINCOLNSHIRE.

CRYSTAL PALACE.—Week ending NOV. 7.
Open, 9 to 6; on Saturday, 9 to 2; Admission, Saturday, 1s.; other days, 6d. Children under Twelve, Half-price.
Saturday—The FIRST of a NEW SERIES of WINTER CONCERTS.
Orchestral Band at 12 20 and 4 40 each day. Great Organ Performances at 4 o'Clock.
Gymnastic Exercises, Rifle Gallery and Great Picture Gallery.
Glasses the Great Exhibition of artists for sale, a large proportion of which, manufactured at the Palace, may be purchased at wholesale prices.
Tickets for the Season are now in great favour.

MR. JULLIEN'S CONCERTS, HER MAJESTY'S THEATRE.
MR. JULLIEN has the honour to announce that his Series of Concerts will commence on SATURDAY, NOV. 7. Mr. Jullien has secured the services of the following eminent Artists:—Mlle. VOLPINI (of Her Majesty's Theatre) and Mlle. ANDREOLETTI (Royal Italian Opera, Covent Garden); Mr. SIMS REEVES. The Orchestra of Her Majesty's Theatre, and the Choir of the Royal Italian Opera. Conductors—Mr. JULLIEN and Mr. HARRY JARVIS. Stalls, 10s. 6d.; Pit, 5s.; Gallery, 2s. 6d. Tickets at the usual places, and of the Scenic Pantier Guards, a Grand Chorus—the whole forming an Orchestra of 500 Performers. Commence at Seven o'Clock.

PRINCESS' THEATRE.—HERRMANN, PRESTIDIGITATEUR. Great success of Herrmann's performances. His celebrated FAIRY HAND, EVERY EVENING. Stalls, 3s.; Dress Circle, 2s.; Upper Circle, 1s.; Gallery, 6d. Commence at Eight, half-price at Nine. "It always keeps as close to his public as he can, and is always sure to please."—Times, Oct. 6. "Herrmann is the best of his class."—Times, Oct. 21. H.R.H. First Grand Morning Performance SATURDAY NEXT, at Three.

MR. GERMAN REED'S NEW ENTERTAINMENT, ST. GEORGE'S HALL, Regent Street. Which he will introduce (for the last six nights) his new original Opera, ST. CRISPIN, written by Mr. H. J. Byron, Music by Mr. Alfred Reed. Doors open at Eight. Commence at Nine. Stalls, 3s.; Admission, 2s. and 1s. Visitors' Book. Prospectus, 7, Montague place, Russell square. Admission, 9d.; Annual Subscription, 10s.

NOW READY,
Price One Shilling, beautifully Printed in Colours,
THE ILLUSTRATED LONDON ALMANACK FOR 1864,
containing Fresh Water Fish, from Paintings by H. L. Rolfe, with interesting descriptions; Groups of Dutch Pictures, printed in the highest style of the Chromatic Art by Leighton Brothers; Twelve Fine-Art Engravings; Astronomical Diagrams of Remarkable Phenomena, with Explanatory Notes; and Twelve Original Designs as Headings to the Calendar, by Robert Cruikshank. It contains Lists of the Royal Family of England and Other Courts; Lord's Household; her Majesty's Ministers; and Public Offices and Officers; Law and University Terms; Tables of Parliamentary Representation and Remarkable Events; Times of High Water at London Bridge, Liverpool, and Portsmouth; Jewish, and Mohammedan Calendars; Astronomical Symbols; and Abbreviations; with a Miscellaneous amount of useful and remarkable information, rendering the ILLUSTRATED LONDON ALMANACK as acceptable and elegant companion to the library, boudoir, or counting-house, as, whilst, as regards price, it is the cheapest Almanack published.
The ILLUSTRATED LONDON ALMANACK is inclosed in an elegant cover printed in colours.
Published at the Office of the ILLUSTRATED LONDON NEWS, 198, Strand, and sold by all Booksellers and Newsagents.

THE ILLUSTRATED LONDON NEWS.

LONDON: SATURDAY, OCTOBER 31, 1863.

It appears that, after all, the Eagle of Tartary and the Eagle of Washington understand one another, and that the terrific threats which were discharged at the New York banquet were not merely the extra effervescence of the very objectionable liquid called catawba. Moscow has indorsed the declarations made at that notable dinner. We read in a Moscow paper that the eight Russian frigates were not sent to New York simply because the winter that is approaching would make it convenient for them to be at a station where ice would not impede their movements. This was the amiable solution offered by the British public for the apparently unsmooth course of things, and it was rather readily accepted, for our grand quarrel with Russia was so recently made up that we hate to believe she is inclined to reopen it. And John Bull always believes well of anybody whom John has soundly thrashed. Lycurgus, the Athenian lawgiver, used to say *Nemo ex acerbitate*, that the Russian "fleet" has been sent to New York that it might be ready to aid the Americans, morally at first, but afterwards immorally. It is held by St. Petersburg, first, that England and France will be less likely to do any act unfriendly to the Northern States while a Russian fleet is beside them, and, next, that if hostilities should break out in the Old World the Russian fleet would be able to hold in check the commercial marine of the two nations. So, with this declaration in hand, we may accept the American orators of Sebastopolitanism and deliver ourselves over to all the terrors which the new ornithological alliance must excite in a well-constituted mind.

It may be some time before the "Delight of Mankind"—more usually known as the Emperor of Russia—gives further utterance to his feelings in favour of the Northern States. It is convenient at times to leave matters in such a position that an unofficial intimation can be made either the point whence advance can be made, or that whence retreat is practicable. We do not suppose that Russia has undertaken to give support to Mr. Lincoln under any circumstances, or that she would accept the recognition of the South, by France for instance, as a declaration of war against herself. That would be truly affectionate but rather inconvenient, because in those days there would be nothing to prevent the Russian recognition, and French armies on the road to Warsaw. We may be allowed to suppose that though Russia, in her intense love of freedom, hates the Southern slaveowners much, she must, in her equally intense love of empire, hate the Polish patriots more, and will not play into their hands unless it entirely suits her, and will at all events let European and not American events guide her in her Transatlantic policy. So that the Lincoln Government can scarcely, we imagine, rely upon any immediate aid from Prince Gortschakoff.

To be sure, Mr. Lincoln has just announced that he wants a trifling addition to his armies. He desires 300,000 men. Owing to circumstances, to which it is not now necessary to refer, he does not purpose to raise these soldiers by a conscription, however happy the Irish in New York would be to hear of such an invitation, and however devoutly their Archbishop would persuade them to respond to it peaceably, as before. This time the President asks volunteers to come forward and fill up the ranks which have been so fearfully thinned by the blundering of drunken and incapable Generals, and by the misfortunes of lexi and skilful commanders, who have been driven into these misfortunes by his own maladministration of Mr. Seward's. There appears to be considerable doubt whether this appeal will be answered as Mr. Lincoln desires, although, curiously, he endeavours to raise the martial spirit of the country by an encouraging, official assurance that Lee has not crossed the Potomac. Washington is officially declared to be almost as safe as Richmond. The citizens of the North, though we believe that they naturally desire the success of their own side, consider that they have already made tre-mendous sacrifices in its favour, and may be quite satisfied with the conduct of the war to care about intrusting their lives or the lives of men dear to them to the leadership of tipsy braggarts, or of good soldiers who are under the command of Generals Lincoln and Seward. So long as the scum of the earth was to be bought, the North was quite ready to purchase that article, and perhaps sort it out with a sly hope that it might conquer, if possible, but might, at all events, abstain from coming back. But the lives of valuable, and educated, and sensitive citizens are another matter. Mr. Lincoln has an immense population to appeal to; but it is exceedingly unlikely that he will obtain these 300,000 volunteers, or a quarter of them. Now, could not the Russian friend step in? Could not the volunteering be tried in Russia? Could not Russia, as a friendly lend Mr. Lincoln a few thousands of Cossacks to help him to put down the South. That would be friendly in the highest sense of the term. And these brave Russians have had so much practice in the reducing a free people to slavery that they would come to their work like masters, not like novices. The spirit of the appeal by the North against the South may be the same as that waged by St. Petersburg against Warsaw; but the execution of the work in the New World has been immeasurably inferior to the artistic performance of the agents of Old-World despotism. Butler, poor Mr. Beast Butler (that is a good word to say), approaches somewhat near the Russian model; but he is far short of Mouravieff. He could insult the ladies of New Orleans by menacing them with the treatment accorded to the vilest of their sex, but he never flogged them, so far as we know. He contrived, it is true, and in one case imposed upon the Russian lesson, for he confiscated a good deal to his own use; whereas the cruel but honest Russian commanders burn the property they might appropriate; but Butler never did this sort of thing on a large scale. It was not his task that he did not, and it is clear, from the reward he met with, that he pleased his chiefs; but how much more effectively a Mouravieff would have managed matters. It is impossible to recount all the advantages which the North would gain if the "Delight of Mankind," would only be induced to send Mr. Lincoln a Russian contingent. While waiting for a more legitimate opportunity of joining the President in an offensive alliance, the Autocrat might thus lend all the moral force of his Government to that of Washington—so called after George Washington.

We must, of course, be prepared for the result of the alliance. We certainly think that the Emperor has done an unguarded thing in allowing so many frigates to come out of their safe harbours, because it is quite certain that, if hostilities broke out, not one of them would return to the Northern Sea. Russian soldiers fight well, but Russian sailors are among the most terrible mariners on record; and we are afraid that both the English and the French crews, who have been "snubbed" in New York while the Russians were fêted, may have been irreverent enough to be amused at the idea of the eight frigates being much of a menace. We will probably be able to give a good account of some of these interesting vessels when the time comes, and the French may be trusted to look after the balance. But if all the swagger at New York, and the ship-building, contrary to treaty, in the Mersey, and in the Russian ports really mean what they seem to mean, why, the storm-drum has been hoisted, and we are ready for bad weather.

HER MAJESTY AND THE ESTABLISHMENT OF THE PRINCE CONSORT'S STATUE AT ABERDEEN.—The Lord Provost of Aberdeen has had the honour to receive the following communication from Sir George Grey :—

"Balmoral, Oct. 16, 1863. My Lord Provost,—I have received the Queen's commands to convey to you the expression of her Majesty's entire approval of the arrangements made for the inauguration of the statue of the Prince Consort at Aberdeen on the 26th inst. Her Majesty deems high honour the consideration which was shown for her feelings by those who took part in the ceremony, and by the inhabitants of Aberdeen generally, on an occasion which was one of interest and value to her Majesty, rendered more touching the mournful satisfaction which she derived from the marks of esteem and affection universally shown to the memory of the good Prince, whose loss to herself and to the country is a constant and unfinished cause of the deepest grief to her Majesty. I have the honour to be, my Lord Provost, your obedient humble servant, G. GREY."

THE PRINCE OF WALES PRESIDENT OF THE SOCIETY OF ARTS.—At a meeting of the Society of Arts on Thursday week the by-laws were suspended, in order that the Prince of Wales might be elected, first, a member, and then President of the Society. The meeting by this means had the honour of electing the Prince's father. The following is the reply of his Royal Highness that he would allow himself to be elected, and which was read to the meeting:—"Gentlemen,—I thank you for your address. It is not with out much difficulties that I vent me to take on myself the office that has been offered to me in so flattering a manner, feeling that there are so many better qualified for it than I can pretend to be. But it is the Queen's wish, being herself precluded from taking part personally in the proceedings of your society to mark, through me, the deep interest she feels in a body of which her beloved husband was so long the head. On my part, I am led to entertain the hope that, by accepting the honourable situation of president, I may be better able to carry the great and beneficent objects which my dear father had so much at heart, and in which he was so zealously supported by your society. Encouraged by this hope, and having no doubt even with that to assist in any way in my power towards the success of his great designs, I cannot refuse to accept the position so kindly offered to me." (Loud applause.) The motion to elect the Prince was carried by acclamation.

One of her Majesty's ships has taken up a position in front of Messrs. Laird's docks at Birkenhead; all the workmen have been turned out of the iron-clad ram, and Messrs. Laird, by strong guards of marines. Three men-of-war keep watch in the Mersey.

CALENDAR FOR THE WEEK ENDING NOV. 7.

SUNDAY, NOV. 1.—Twenty-second Sunday after Trinity. All Saints' Day. Great earthquake at Lisbon, 1755. Installation as Windsor of the Knight Knights of the "Star of India," 1861.

THE COURT.

RETURN OF HER MAJESTY FROM SCOTLAND.

The Queen, accompanied by Princess Helena, Princess Louisa, Princess Beatrice, Prince Leopold, and the youthful family of the Crown Prince and Princess of Prussia, arrived at Windsor Castle at nine o'clock on Wednesday morning. The suite in attendance consisted of Lady Churchill, Lady Augusta Bruce, Baroness von Dolzenck, Lieutenant-General the Hon. C. Grey, Lord Charles Fitzroy, and Mr. C. Biff. Sir G. Grey attended her Majesty as Secretary of State. The Queen left Balmoral at half-past twelve o'clock on Tuesday, and proceeded to Aboyne. The Royal train, under the charge of Mr. Cawkwell, left that place at half-past two o'clock, and travelled over the Deeside Railway to Aberdeen; thence the route was continued by the Scottish North Eastern line to Perth, where the stoppage of an hour was made for refreshments. The Royal party resumed their journey at eighteen minutes past seven, travelling along the Scottish Central Railway to Greenhill, thence along the Caledonian line to Carlisle, where the London and North-Western Railway system was entered. After a stay of 20 minutes the royal train proceeded on to Bushbury junction, when the train was handed over to the officials of the Great Western Railway, on which line the journey was continued to Windsor. The distance of nearly 600 miles was performed in twenty hours. The journey was entirely private, the public not being admitted to the stations on the route. The Queen bore the fatigue of the journey remarkably well, and is in the enjoyment of excellent health.

On Tuesday week the Queen, accompanied by Prince and Princess Louis of Hesse, drove by the Paddock to Ascot-heath Church.

On Wednesday week the Queen, the Crown Prince and Princess of Prussia, and Princess Louis of Hesse, went to the Prince's Cairn on Craig Luniekan. The Crown Prince and Princess lunched with her Majesty.

On Thursday week the Queen, attended by Lady Churchill and Lady A. Bruce, drove to the Balloch Buie and Glen Beg. Princess Louis, attended by Baroness von Dolzenck, rode out.

On Friday week the Queen, accompanied by Princess Louisa, and attended by Lady Churchill and Baroness von Dolzenck, drove to the Lynn of Quiech. The Crown Prince and Princess of Prussia dined with her Majesty.

On Saturday last the Queen, accompanied by Prince and Princess Louis of Hesse and Princess Helena, drove to Loch Builg, and returned in the evening by the Shiegan Water and Invercauld. Princess Louisa, attended by Lady Churchill, rode out.

On Sunday the Crown Prince and Princess took leave of the Queen, previous to making a short tour in the Highlands.

On Monday the Queen, accompanied by Princesses Helena and Louise, drove to Birkhall. Prince Louis of Hesse, attended by Count Seckendorff, took leave of her Majesty in the morning, previous to their departure for Darmstadt.

On Tuesday her Serene Highness Princess Hohenlohe arrived at Windsor Castle from the Continent, on a visit to the Queen.

The Lord Provost of Aberdeen has received a letter from Sir George Grey conveying the Queen's entire approval of the arrangements made for the inauguration of the statue of the Prince Consort at Aberdeen.

THE PRINCE AND PRINCESS OF WALES.

The Prince and Princess of Wales continue at Sandringham.

On Thursday week the Prince, Princess, Prince and Princess Christian, and Princess Dagmar drove to Houghton Hall, the residence of the Marquis of Cholmondeley, and inspected the house.

On Friday week the Prince, Princess Christian, and the Duke of Cambridge, with the gentlemen in waiting, went out shooting. The Princess, Princess Christian, and Princess Dagmar walked in the grounds adjacent to the hall.

On Saturday last the Prince and Prince Christian went out shooting. The Princess, Princess Christian, and Princess Dagmar walked and drove. The Duke of Cambridge took his departure from Sandringham. The Prince accompanied his Royal Highness to Wolferton station.

On Monday the Prince and Princess, Prince and Princess Christian, and Princess Dagmar attended Divine service in the church of Sandringham. The Rev. C. E. Keyser officiated.

On Monday the Prince and Prince Christian, attended by Captain Grey and Captain Castenschjold, proceeded to Holkham, and had a day's shooting with the Earl of Leicester. The Princess, Princess Christian, and Princess Dagmar drove out.

On Tuesday the Prince and Prince Christian, attended by Captain Grey and Captain Castenschjold, proceeded by special train from Wolferton station to Newmarket to see the Houghton meeting.

The Prince has been elected President of the Society of Arts, an office held by the late Prince Consort.

The succession of the Prince is expected to take place about the last week in March.

All the tenants and cottagers upon the estate have received a present of game from the Prince.

Mr. C. Fisher, private secretary to the Prince, has returned to Sandringham.

THE CROWN PRINCE AND PRINCESS OF PRUSSIA, AND PRINCE AND PRINCESS LOUIS OF HESSE.

The Crown Prince and Princess of Prussia and Prince and Princess Louis of Hesse, with the infant Princess Victoria, attended by their respective suites, took their departure from Abergeldie Castle at nine o'clock a.m. on Saturday, and proceeded to Ballater. The Royal travellers proceeded by special train to Aberdeen, when Prince and Princess Louis of Hesse left the road for the line of the Great North of Scotland Railway, and continued their route by the limited mail-train to the South.

The Crown Prince and Princess then drove to the Royal Hotel, where they partook of luncheon. Their Royal Highnesses left Aberdeen by the 1.20 mail-train for the North, on a visit to the Duke of Richmond at Gordon Castle, Fochabers. The Crown Prince and Princess were heartily welcomed by the people of Aberdeen.

The Crown Princess Louis of Hesse arrived at Edinburgh at twenty minutes past six o'clock, and were received at the station by Prince Alfred, Prince William of Hesse, and the Lord Provost. The Royal party drove to Slaney's Hotel, where they were warmly welcomed by a crowd of people awaiting their arrival.

The Crown and Princess Louis of Hesse and Prince Alfred and Prince William of Hesse at Holyrood, and afterwards returned to Slaney's Hotel.

The Prince and Princess took their departure from Edinburgh on Monday night, and arrived at Buckingham Palace at half-past ten o'clock on Tuesday morning.

The Duke and Duchess of Cambridge and Princess Mary paid a visit to the Prince and Princess at the Palace.

Their Royal Highnesses the Duchess of Cambridge and Princess Mary left shortly after for Brighton.

His Royal Highness the Duke of Cambridge, the Field Marshal Commanding-in-Chief, held a levee on Wednesday at the Horse Guards. There was about 100 officers present.

His Excellency the Italian Minister has arrived at his residence in Lower Grosvenor-street from a tour in Italy.

The Duchess of Hamilton has left her residence in Arlington-street for Brighton.

The Duke of Wellington left Apsley House on Saturday last for Strathfieldsaye.

The Duke of Devonshire and Lady Louisa Cavendish have arrived at Chiswick Hall, Derbyshire.

The Duke of Rutland left town on Monday for Alexandria.

The Marquis and Marchioness of Salisbury have left Hatfield House on a visit to the Earl and Countess of Carnarvon, at High Clere.

The Marquis and Marchioness of Abercorn and the Ladies Hamilton have left Chesterfield House for Dundesert, Staffordshire.

The Earl and Countess of Shaftesbury have arrived at their residence in Grosvenor-square from a tour in Italy.

Earl and Countess Cowley Grosvenor have left town on a visit to Sir Edward and Lady Caroline Kerrison, at their seat in Norfolk.

Earl and Countess Stanhope and Lady Mary Stanhope arrived at their seat, Chevening Park, Kent, on Saturday, from the Continent.

The Earl and Countess of Craven have arrived at Ashdown Park, Berks.

The Earl and Countess of Fife have left Mar Lodge, Aberdeenshire, on a tour of visits.

The Earl and Countess of Dalkeith left Hamilton-place on Tuesday for Boudoer, en route to Drumlanrig Castle.

Countess Cowper and the Ladies Cowper, Earl Cowper, and the Hon. Henry Cowper returned to town on Monday from West Park, Redbridge, en route to Home.

Earl Brownlow and Lady Marian Alford have left town for Ashridge Park, Berkhampstead. The noble Earl and her Ladyship will be joined on the 7th of next month by Prince Alfred.

Countess Revelstoke has left Kensington Palace for Stoketon.

Viscountess Jocelyn and the Hon. Misses Jocelyn have left Cambridge House on a visit to Viscount and Viscountess Palmerston at Broadlands.

CHURCH AND UNIVERSITIES.

The *Times* states that the judgment of the Privy Council on "Essays and Reviews" is expected to be given towards the end of next week.

On the 12th, the corner-stone was laid of the new Church of St. Wilfrid, at Hayward's Heath, in the parish of Cuckfield, Sussex.

The ninety-fourth birthday of the Rev. J. H. Bromby, Vicar of Hull, was celebrated on Sunday.

The church at West Gilford, Devon, was reopened on the 18th, after considerable work of repair and restoration, which has been carried out through the exertions of the Rector, the Rev. C. W. Sillifant.

Dr. Symons and Mr. Judd's Church, Granby-row, Manchester, was reopened on Tuesday as a free and open church, after undergoing extensive internal alterations.

It is proposed to erect a chancel and stained-glass window in the parish church of Stillorgan in memory of the late Most Rev. Richard Whately, D.D., Archbishop of Dublin, who died in October, 1863.

On Monday the church of St. Michael, Ayrhoe, in the diocese of Peterborough, was reopened by the Lord Bishop of Oxford, after extensive repairs and alterations.

On Tuesday the Archdeacon of Surrey held a visitation of the clergy of the deanery of Southwark at the parish church of St. Saviour, at the foot of London Bridge. There was a large attendance.

The Dean and Chapter of Canterbury have requested Mr. G. Scott to make an examination of the cathedral in conjunction with Mr. T. Pollman, and prepare plans and estimates for its restoration.

On Tuesday the Bishop of Manchester presided at the anniversary of the local branch of the British and Foreign Bible Society. The meeting was held in the Free Trade Hall, and Mr. Tidman delivered a stirring address on the position of the society.

The wife of the Right Rev. the Bishop of Exeter expired at Torquay, Thursday, on Thursday week, aged eighty-two. Dorothea Mary Philpotts, who was four years junior to her husband, was the daughter of the Rev. Barnes, a Devonshire clergyman.

On Tuesday the corner-stone of a new church in the parish of St. Matthias, Stoke Newington, was laid by the Bishop of London. The church is situated in Virginia-row, near Shoreditch Church, in a densely-populated and very poor neighbourhood.

A beautiful and costly service of altar-plate, manufactured by Messrs. Keith and Co. of London, has been presented to the church of St. John the Evangelist, Cowley-street, Westminster, by Miss Caroline Elizabeth Reid, in memory of her deceased father.

Two memorial stained-glass windows have been recently placed in St. Mary's Church, Peterborough. The first is the gift of Mr. S. C. W. Cole, solicitor, and represents the Good Shepherd; and the other, the Lord Shepherd; and the third in memory of the late Earl Fitzwilliam, the founder of Fitzwilliam Hall.

A piece of plate has been presented to the Rev. A. W. Chatfield, Vicar of Much Marcle. The Rev. P. Jones, who has resigned the incumbency of the parish, in consequence of ill-health, has presented to the Prayer Book as a whole, has been presented by his late congregation with a purse containing £170, and a silver tea and coffee service.

The new church of St. Jude's, Grey's-inn-road, an edifice erected to hold 1,000 persons, is completed, with the exception of the back of the new building, was on Wednesday consecrated by the Bishop of London, the building, which is in the Early English style of architecture, consists, as to the Early Geometric style of Gothic architecture. The Rev. J. M. Capes, late rector of Bingham, Notts, is appointed to the incumbency of the new church.

On Monday week the foundation-stone of a new church was laid in the parish of Bulkington, near Wigan. The building is to cost £4000, and the purchase of land will take £1200 more. In addition to this, the Rector of the parish has offered the munificent gift of £4000 for the endowment of the church, and £1000 to be applied to the same purpose. In all, therefore, £9000 is required, of which there remains a balance of £700 to be collected before the consecration. The building will contain accommodation for 700 persons.

Monday week was a day of thanksgiving for the restoration of the late beautiful harvest, and it was celebrated by a district meeting of the Hereford Diocesan Church Union. The part of the service appointed was St Peter and St. Paul's Church was beautifully decorated. At four o'clock the evening song in the choral service was held, and there was a large attendance of persons present. After the service the Corn Exchange was filled with a large number of persons, gentlemen were the ladies.

On Sunday morning a thanksgiving service was performed in Westminster Abbey for the late fruitful harvest. Other such services were held to-day to-morrow in most attentive congregation. The service was conducted by the Rev. Bryan Ferguson, M.A., minister of Crown Church, South Audley-street, and the Rev. Dr. Vaughan preached for his text the 8th chapter of St. Luke's Gospel, verse 21, "Blessed is he that layeth up treasure for himself, and is not rich toward God."

The following preferments and appointments have recently been made:—The Rev. J. Bell, M.A., Rector of Bramley, Surrey, to be Rural Dean to the Vicar of St. Mary-the-Virgin, Oxford; Rev. W. S. Simpson to be Chaplain to the Bishop of Calcutta; Rev. T. Bowdler, the incumbent of St. John's, Cheltenham; Rev. C. S. Harris to be Incumbent of Bottisham Lode with Longmeadow; Rev. Edward Hall, M.A., Rector of Bishopsbourne, to be Chevington, Warkworth; Rev. C. P. Mule to be Perpetual Curate of Cotes Heath, near Stone; Rev. J. Ellis to be Rector of Bishopsbourne.

Knockholt Church, Kent, was reopened on the 8th inst., on which occasion there was a full choral service, and a sermon was preached by the Rev. Dr. Vaughan, vicar of Harrow. The church has been entirely restored, and new oak pulpit, reading-desk, and altar-table provided, as well as a new font, and the whole of the seats renewed. The architects were Messrs. Cox and Son, of Southampton-street, who have also just completed the restoration of the church of St. Mary-the-Virgin, in memory of Miss Thesiger, a lady who has left £160 per annum for the district visiting of the parish. The ornamental work in the chancel floor clothes to the poor. The restoration has been done as a memorial of Miss Thesiger.

The Bishop of London has appointed the following gentlemen to preach in the churches of the parishes situate on the north of November:—Sunday, Nov. 1—The Rev. Herbert Kynaston, D.D., of Christ Church, Cheltenham, late Head Master of Rugby School. Sunday, Nov. 8—The Rev. James Lupton, M.A., of Christ Church, Oxford, Rector of St. Michael's, Queenhithe, and Preacher at the Lord Mayor's Show. Sunday, Nov. 15—The Rev. Henry Coward, M.A., of Pembroke College, Cambridge, Rector of St. Benet Fink, and Preacher at Whitehall. Sunday, Nov. 22—The Rev. Thomas Jackson, B.D., of St. John's College, Cambridge, Rector of Upper Chelsea. The Very Rev. H. H. Milman, D.D., Dean of St. Paul's, will preach on Sunday, Nov. 29, Advent Sunday.

A scheme is on foot for obtaining the erection of the Channel Islands, which are now in the diocese of Winchester, into a separate bishopric; the seat of which will be fixed at Jersey. Guernsey, in each island there is a Dean—the Dean of Guernsey having powers which equal, in many respects, those of a Bishop. The number of Winchester Archdeacons is the smallest portion of the Channel Islands to the Southwark end of London-bridge, containing 1,500,000 souls. Hampshire, including the Channel Islands and the Isle of Wight, but the county of Surrey was added to it after the Diocesan Conference held at the Wells Town Hall, Guernsey, in October, 1861, which had been previously attached to Exeter and Salisbury, were transferred to the Diocese of Winchester. In the Channel Islands there are 75 churches, containing about 40 Incumbents of churches and 25 or 30 Assistant Curates.

On the 15th inst. the Bishop of Lincoln, in the newly-formed parish of Stroud, was consecrated by the Lord Bishop of Lincoln. The munificent founder, the Duke of Newcastle, has, within the last few years, caused the erection of new works at this place which, situated as it is on the Manchester, Sheffield, and Lincolnshire line of railway, is destined at no distant period to be of importance. In order to meet the spiritual wants of those engaged in the works, a church has been built and endowed that most suitable, capable of holding 450 worshippers. The foundation-stone was laid by his Royal Highness Prince Albert Edward Wales two years ago. The Lady's Day, since then an imposing architectural structure has risen, with nave, chancel, vestries, organ-chamber, tower, and spire, and furnished with the appropriateness belonging to the house of God. A noble work, conceived in a noble spirit, has been carried out in a most noble manner.

FREE CHURCHES.—The Archbishop of York laid the foundation-stone of a new church at Meltrey, near Rotherham, on Monday. At a public meeting which was held at the close of the ceremony Lord Wharncliffe said that when Mr. White, the incumbent of the new district, applied to him on the condition that the church was entirely free and open. This condition was accepted by Mr. White, and the church seats will therefore be unappropriated. The Archbishop, who followed Lord Wharncliffe, said that, even on that subject of pews, on which there was great difference of opinion, he felt that the greatest advantage would be derived from the use of a plain unfettered church with appropriated seats. There were social distinctions which were unavoidable and ordained, the rich and the poor, masters, and which were indeed necessary. Let them, then, meet together in the behold at the door of the church, folded up like umbrellas, and all should appear before their Lord and Saviour in perfectly equal circumstances of mercy. Unquestionably the result which Lord Wharncliffe anticipated was taking place. It is in the Church of England that the greatest approach is to be other end of the country and lay the foundation-stone of a church among a population which had been for years sent in which scarcely any perfectly free. He would mention another instance, in the hope that it would possibly bear fruit among the gentlemen present. The property in which his parish had recently resulted his church. He told his people that they but as (and right), were merely a quarterly tenants to their owner, and intended that they should revert to the law, and make the seats in fact, as they were in law, unappropriated. The parishioners agreed, and the first Sunday had had the pleasure of reopening the church, and it was now perfectly free.

THE UNIVERSITIES AND PUBLIC SCHOOLS.—The Prince of Denmark commenced his residence at Oxford on Saturday last. His Royal Highness has taken up his residence at Mr. Price's house, 2, St. Aldate's. The following gentlemen will also be in residence at the College:—Viscount Bury—The Duke of Hamilton, Lord Willoughby-de-Broke, Lord Elton, Lord Dowse, Lord Leslie, Lord Bruce, Hon. G. R. Hamilton, and Hon. R. L. D. Alber.

Lord Powis was on Monday elected High Steward of the University of Cambridge in room of the late Lord Lyndhurst. Lord Lyndhurst was elected without opposition.

Dr. Henry Thompson has been appointed, in the Educational Department, Professor of Practical Medicine at Queen's College, Belfast.

The governors of Charterhouse School have announced their intention to appoint to the election of the Head Master in the room of the Rev. Richard Byron, M.A., who resigns in November.

The interior improvements of the Abingdon Grammar-school was observed with much rejoicing on Thursday. Latin and English addresses were delivered by Mr. Bowyer, the head-master, who has been master for twenty-three years, was presented with a handsome tea and coffee service.

METROPOLITAN NEWS

The London Docks and the St. Katharine Docks are about to be amalgamated. An Act of Parliament to the two companies preparatory to an Act of Parliament having been completed.

Eighty plans for the newly-proposed viaduct and roadway from the level of the steps of the Sepulchre Church, east of St. Andrew, Holborn-hill, have been sent in to the Improvement Committee.

The Royal Lecture Hall, Greenwich, was opened on last Saturday, when, after a pleasant call from Blackwall to Greenwich, a large number of the visitors took their seats in the lecture theatre in the Union Tavern. Mr. Smith, the Vice-Commodore, and owner of the Amazon, was in the chair.

The Sheriffs elect for London and Middlesex, Mr. Hilary Nicholson Hiscox and Mr. Thomas Sidney, entered upon their office by giving a dinner bagnet to the principal municipal authorities, merchants, and others connected with the City of London Union Workhouse. Covers were laid for 200 gentlemen.

Deputy Assistant Judge Payne, of the Middlesex Sessions, while passing up Fleet-street on Wednesday, about half-past two o'clock, was surrounded by a gang of thieves at the corner of Bouverie-street, and quickly taken from the pavement. Pursuit was made after the thief, but it was impossible to catch him. The watch is prized, as being a presentation from the friends of a popular judge.

The barristers practising in the Bankruptcy Court have at last taken decisive measures in reference to what they consider a nuisance, owing to the alterations being made in the building. These complaints have reached the Lord Chancellor, and his lordship has addressed a letter to Lathom asking him for particulars of the inconveniences alluded to. In the course of the letter the lordship observes that the Bankruptcy Bar very highly.

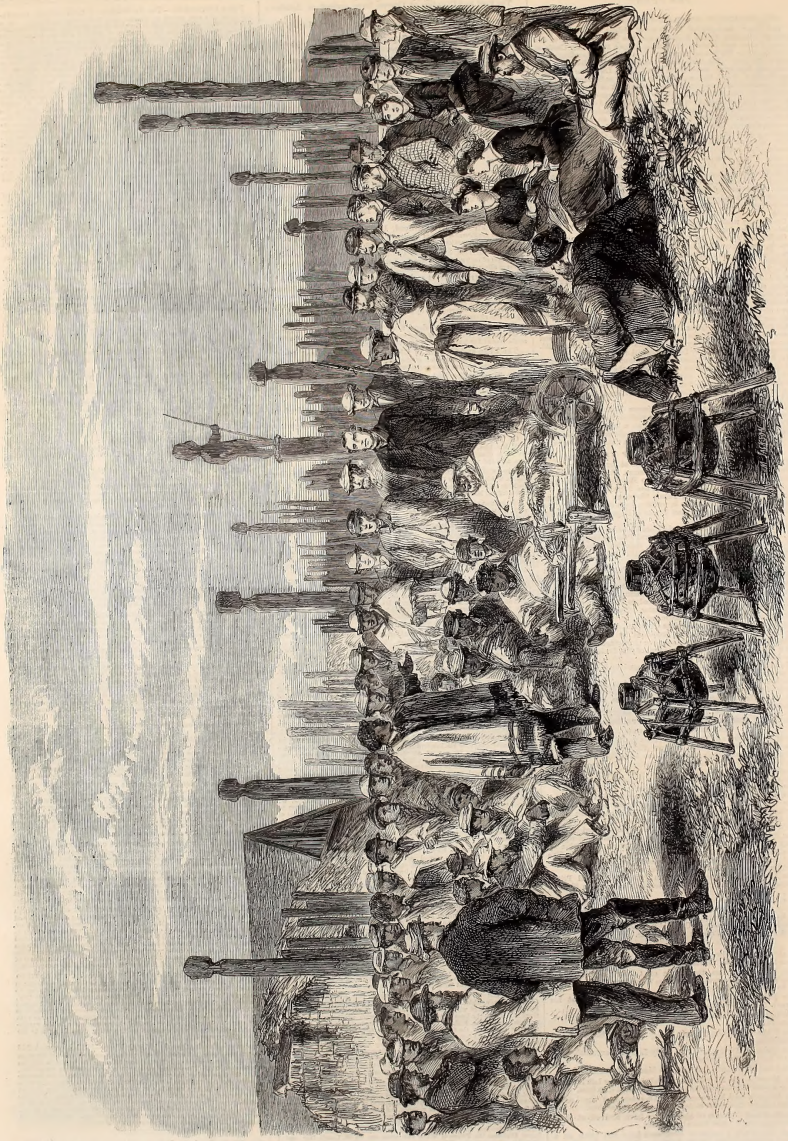
The council of Charing-cross Hospital have, in consequence of financial difficulties, been compelled to temporarily close the wards of the institution. The receipts have not been sufficient to meet the current expenditure, which is £4,500 a year, although in that year they relieved 10,000 patients. The cause of accident admitted during the same period was reduced to 3000, there being an increase of nearly 1000 over the number admitted in 1860.

The occupiers of the almshouses belonging to the Worshipful Company of Salters', situate in Monkwell-street, Cripplegate, have been removed on Tuesday to Watford, Herts, where convenient dwellings have been erected for their reception. The company, in question were founded by Sir Ambrose Nicholas in 1775, for "twelve widows of Salters;" and it is the intention of the company, it is said, to have the old buildings taken down in accordance with the commercial requirements of the City built on the site.

Serious accidents took place on Saturday night in Silver-street, Golden-square, caused by a fight between Scotch journeymen bakers and Irish journeymen tailors. The Scotch bakers commenced operations early in the morning, and the Irish, both to lose their light, kept it up among themselves. On the case was brought before the Magistrate at Marlborough Police Court on Monday, at the end of the hearing of which one man was sent for trial to the next quarter sessions, to a month's hard labour, two others to two months', and two fined £5 each.

Three men—named Knowlden, Oxford, and Dron—were on Wednesday sentenced, at the Central Criminal Court, to several months' hard labour for an offence which merits signal punishment. With the assistance of a female named Ann Hall, they managed to keep out of the way and get up a sham Life Assurance Association, and by a system of specious puffing induced a number of poor people to insure in the "office." The association was advertised as having a paid-up capital of £5000; but a claim for £30, on the death of one of the insured, was the whole affair to a crash.

Stepney New Meeting-house was publicly dedicated to the worship of God on Thursday week. The building is in the Early Decorated style of architect architecture, is 96 ft. long by 37 ft. wide, and affords sitting accommodation for 1,000 persons. The tower is 70 ft. high and contains apartments, rises from a tower in front, on the right-hand side entering the building. After the morning service a public meeting was convened to the schoolroom, where dinner was provided. The chair was taken by Joseph Crane, Esq., formerly one of the members for the borough.



A Coroner's jury have passed a severe censure on the relieving officers of Bethnal-green. The jury had to inquire into the cause of death of a woman named Ann Hall, and the evidence had shown that she was interred by Dr. Moore, the medical officer of Bethnal-green parish, who found her sinking from exhaustion and starvation. He gave an order to the relieving officers for her admission to the infirmary of the workhouse, which order was disregarded. The jury found that immediate cause of death was from consumption, accelerated by want of food, and they added that they considered "great blame is due to the relieving officers in this case. A female

On Tuesday the vestrymen and other officials of the parish of Clerkenwell were afforded an opportunity of inspecting the model main sewer, connected with the main drainage of the metropolis. The visitors, having ascended to the top of the model, entered the boat which is there 30 ft. below the surface and 9 ft. in diameter. They then went eastward for as far as Bow-bridge, and then turned up for the accommodation of parties stuck in the side walls. On the route were seen the ventilating shafts and the inlets placed for the reception of the sewage of the district. The return of the party a dejeuner was provided in the sewer at the cost of the contractors.

The regulations under the new Factory Police Act are about to be brought into immediate operation, so far, at least, as the omnibus traffic is concerned. The Aldermen of the City have announced their intention to give effect to the regulations which prohibit the drivers of omnibuses from driving which all City travellers by those vehicles have to be aware of, and very annoying it is to passengers when the omnibusdrivers are henceforth to be under the direct control of the police. The Act, it will be remembered, is the large omnibus proprietors have appointed their conscience in the regulations, and their desire to aid the authorities in putting them in force to the utmost of their power.

Last week the births of 1051 children—1003 boys and 948 girls—were registered in London, the corresponding number of the years 1853-62 the average number (corrected) was 1803.—The deaths in London last week were 1186. The average number of deaths in this season, viz., the forty third in each of the years 1853-62) in, with a correction for increased and population, 1198. There were, therefore, fewer smallpox, which increases slowly to decline. In two cases it was stated that the persons who suffered had been previously vaccinated. Scarlatina was fatal in 11 cases. A female died at the age of ninety-two years; two widows at ninety years; a third at ninety-six; a fourth at ninety-eight; and a fifth at one hundred years of age. The centenarian lived lived at Chalton-street, Somers-town. Her father died when he was ninety years old; her sister at ninety-eight.

Mr. W. S. Lindsay, M.P., in the course of a reply to Aberdeen "not wishing to enter into any controversy," says Dr. Hodgson, "I have had many lodgements, I never owned a ton of shipping or to the value of one sixpence in any vessel that ever ran or attempted to run the blockade."

LARGE MEETING OF SETTLERS AND MAORIS AT A NATIVE VILLAGE NEAR NAPIER, HAWKE'S BAY, NEW ZEALAND.—SEE PAGE 445.

"THE BATTLE OF AGINCOURT," FROM A DRAWING BY JOHN GILBERT.—SEE PAGE 438.

ECHOES OF THE WEEK.

It was poor John Scott, we think, the editor of the *Champion*, who, in a book once read with avidity but now forgotten, called "Paris Revisited," described the pulling down of Napoleon's statue from the summit of the triumphal column in the Place Vendôme during the first occupation of Paris by the allies in 1814. Scott and Helen Maria Williams, that other noted anti-Bonapartist, concur in stating that the degradation of the hero's statue, as it was hauled down to the pavement with a rope about its neck, was greeted with shouts of applause by the fickle and ungrateful Parisian populace. The high Tory sympathies of these authors must, however, have misled them. A mob of Bourbon partisans and policeagents (who belong to any party that pays) might have cheered the act of profanation; but the real people of Paris bitterly regretted it, and for years afterwards chafed at the sorry substitution of a white flag, with the Bourbon fleur de lis, for the colossal bronze cast in the likeness of Napoleon the Great.

An effigy of the victor of Austerlitz was, as all the world knows, replaced by King Louis Philippe, who made a hundred similarly graceful concessions to French national feelings, for which he received very scant gratitude. It was not, however, the same statue. The first one was in antique garb, after the approved classical pattern of the First Empire. The Government of July elected to treat Napoleon more in the spirit inculcated by Béranger and Emile Desaugiers. They resolved to surmount the famous column with an image of "le petit caporal" in his well-remembered "petit chapeau" and "redingote grise," and accordingly he made his appearance in the well-remembered cocked hat, great coat, and jack-boots. In this semblance the statue of Napoleon I. has been familiar to the star-gazing Parisians for thirty years.

The Emperor Napoleon III., however "faithful to the traditions and reminiscences" of his uncle's career, has determined upon reverting to the original design. The cocked-hat-and-great-coat statue is in process of removal—with all reverence and honour, be it understood—and the summit of the pillar is to be once more occupied by a colossus clad in the classico-heroic garb. A winged Victory which the original figure held in its hand has been, curiously enough, preserved, and now forms one of the accessories of the new statue. As for Napoleon *en petit caporal*, he is not to be melted down, but will be transferred to a handsome pedestal at the Rond Point de Courbevoie, close to the Avenue de Neuilly, and adjoining the spot on the river-bank where the corpse of the first Emperor, on its return from St. Helena, was disembarked in 1840. We doubt if the Parisians will be very much gratified by the change. They had grown as fully accustomed to Napoleon's cocked hat in the Place Vendôme as we have to George III.'s pigtail in Cockspur-street. The modern military costume of the Emperor was said to be dissonant with the classical design of the column itself; but we might be allowed to point out that on the pedestal thereof there are some most wonderful bas-reliefs of military costumes—helmets without heads, uniforms without bodies, gauntlets without hands, and boots without legs—a kind of hotch-potch of martial gear and accoutrements which cannot be said to harmonise with any design, classical or non-classical, antique or modern, at all.

At the next meeting of the National Shakspeare Committee, which is advertised to take place on Monday, Nov. 2, there will be mooted, among other important matters, the propriety of convening at an early date a large public meeting in furtherance of the objects of the forthcoming memorial. It is fully time that such a meeting was held, that the eminent men who have joined the committee, either as vice-presidents or as members, should take an active and not a perfunctory part in its affairs, and that something definitive were fixed upon in respect of the worthy commemoration of the approaching anniversary. If the thing is to be done in a half-and-half manner it would be a thousand times better not to do it at all; and if the public evince any lukewarmness in patronising the scheme, they should be allowed another hundred years to reflect upon the services that William Shakspeare rendered to humanity.

Shakspearean literature and bibliography are not, however, slumbering. Amidst a din of new editions we hear one very pleasant note of announcement to the effect that Messrs. Sampson Low are about to publish an "Enquiry" into the relative authenticity of the portraits of Shakspeare, from the pen of Mr. T. Hain Friswell. This gentleman, than whom there are few better qualified to perform such a task, is said already to have examined something like two hundred and fifty portraits of the bard; and Mr. Friswell's "Enquiry" cannot fail to be a welcome companion to all and every edition of the works of Shakspeare.

The Corporation of London seem to be in right good earnest in their scheme for relieving the City traffic from its intolerable obstructions. Parliament has given them, not without grumbling, the powers, and they have the means and the men (we mean the policemen) to carry out a most stringent code of regulations. The only thing we deprecate is a tendency towards straining at gnats and swallowing of camels. For example, are the railway "van demons" to be banished from the main thoroughfares? We fear not. On the other hand, a dead set is to be made against the "crawling cabs," whose drivers are accused of "touting" for hire at the East-end to the obstruction of the streets. We submit that twenty of the most inveterate "crawlers" are impotent to produce an amount of impediment equal to that which can be brought about by a single van. Moreover, cabs *must* ply for hire in the City streets so long as the City neglects to provide an adequate number of cabstands. There is one in Farringdon-street, one (when, as rarely happens, there are any cabs on it) in St. Paul's-churchyard, and an apology for a stand in King-street, Cheapside. Abating these, you may tramp from Temple Bar to the Mansion House, through wind, rain, or snow, without finding a stand, and your only resource is to hail a passing cab.

The plain truth of the matter is this:—The streets of the city of London will always be more or less obstructed, simply because they are narrow and tortuous. If the Corporation would pull down Temple Bar, or demolish the mean and shabby tenements to the north of St. Paul's Cathedral, an opportunity might arise for forming two splendid public places within the corporate limits in which half-a-dozen cab-stands could with ease be established. But the commercial value of land is in the City so enormous, that no sooner are a few square feet cleared by a fire or the tumbling down of a rotten house than capitalists rush forward to offer so many guineas an inch for the area, which is forthwith reloaded with bricks and mortar. Sir Christopher Wren held different views as to the rebuilding of London; but Sir Christopher Wren was snubbed and put down, and the City was once more piled up on the model of the Cretan labyrinth.

Nor is there much to choose, perhaps, between City and West-end. In Westminster we are almost as destitute of large, open spaces which can be traversed *in their entirety* by vehicles. Trafalgar-square is very big and very grandiose; but you can't drive across it, and, while its outskirts are choked by cabs and omnibuses, the centre of the "finest site in Europe" is fenced off to form an anomalous species of yard—the home of the "squirting dumb waiters" and the cracked asphalt pavement, and a playground for blackguard little boys. Our squares are numerous and magnificent; but nine tenths of their space are jealously railed off to form private pleasure-gardens. The pent-up population of this city require *open* squares—squares that can be intersected at any angle by carriage ways; in fact, a series of Seven Dials, as the "Dials" were originally intended to be—the converging point of many handsome streets, not the core of a cancer of slums.

At this moment an opportunity arises for giving the town breathing room, albeit on an infinitesimal scale. The legislative prohibition of intramural interments has left on the hands of the parochial authorities a vast number of churchyards, now shut up, deserted, encircled by hideous walls or more hideous railings, and given up to rank weeds and vagrant cats. The cracked tombstones, defaced monuments, and dead trees in these disused cemetries are very shocking to behold. Walk as far as St. Giles's-in-the-Fields, and then turn down Drury-lane and gaze into one especially ghastly graveyard on the right-hand side, and two notable examples of our meaning will be manifest. If the walls surrounding these Golgothas out of date were pulled down, the soil levelled, and the surface laid in concrete, dozens of public places might relieve the congested circulation of London, and, what is more, bring out in pleasant relief the noble architectural proportions of many metropolitan churches.

MUSIC.

Mr. Mapleson's series of cheap performances of Italian opera at Her Majesty's Theatre began on Saturday last and ends this evening. It has been attended with complete success, the house having always been crowded. The performers included the chief stars of the company of last season, except Giuglini, now in Italy, whose place as principal tenor has been filled by Sims Reeves. The only opera performed has been "Faust," the great object of attraction at present not only here but in Italy and Germany. On the first night a great disappointment was caused by the absence of Mr. Reeves, who was prevented by indisposition from appearing. Signor Volpini (himself suffering from illness) was called upon to take his place at a moment's notice, and acquitted himself of his arduous task in a manner which did much credit to his talents. On Monday evening Mr. Reeves appeared, and was most warmly welcomed. His performance of the character of Faust displayed great dramatic power, and he sang magnificently. Titien's personation of the heroine was as beautiful and pathetic, and her reception as enthusiastic, as ever; and Santley and Trebelli, who appeared in the same characters as before, were also received with the honour due to them.

We have just said that Giuglini is now in Italy. He is a native of the pretty little town of Fano, near Turin, where a theatre has just been built at the expense of half a million of lire. It was opened a few weeks ago, and the citizens wrote to Giuglini asking how much he would require for singing on an occasion so interesting to his native town. His answer was that, being a singer by profession, he could not sing gratis for any one, not even his fellow-townsmen, and therefore that a regular contract must be entered into by the managers, binding them to pay him *twopence* per night. The document was drawn up and signed by both parties in due form, and Giuglini sang several nights, receiving his ten centimes punctually at the end of each performance. It may be imagined with what Italian furore he was received by his delighted townsfolk.

An entertainment of a novel kind has been announced by Mr. German Reed, to be given on Monday evening next at the Royal Gallery of Illustration. It is called an "Opera di Camera;" and is a piece of a very simple dramatic form, and requiring for its performance a very limited number of vocalists, accompanied only by the piano. It is entitled "Jessy Lea;" written by Mr. John Oxenford and composed by Mr. G. A. Macfarren. The idea of such an entertainment is evidently a happy one; and Mr. Reed could not have chosen a poet and composer more competent to carry it into effect.

The Monday Popular Concerts will begin at St. James's Hall on Monday evening next; and the concerts of Mr. Henry Leslie's Choir will begin on Wednesday evening, Nov. 4. That being Mendelssohn's birthday, the programme will consist of a selection from the works of the lamented composer.

THE THEATRES.

Haymarket.—On Monday Mr. Charles Mathews, "translated from the French," reappeared on these boards, after an absence of two years. The pieces were well chosen for the occasion. "Cool as a Cucumber," recently performed at the Théâtre des Variétés, in Paris, under the title of "Un Anglais Timide," was restored, and Mr. Charles Mathews had the satisfaction of again acting in English a favourite part which he had been so lately performing in another language. There is in this reciprocity of actors of the two countries a righting of the balance which many have thought was disturbed by the recent employment of foreign performers on the London stage. As the links of connection are drawn closer together between the two nations occurrences of the kind may more frequently happen; and justice, it is to be hoped, will hold the scales tolerably even between the artists of both. Planché's classical extravaganza of "The Golden Fleece" was also revived, Mrs. Charles Mathews acting Medea, and her husband the important part of the Chorus. Mr. Compton, as Ægeus and Creon, was very funny, as usual; and Miss Louise Keeley made an excellent Jason. Mr. D. Spillane's "International Overture" was performed with fine effect.

Surrey.—This theatre is laudably pursuing the path of reform, and endeavouring to emulate Sadler's Wells in the production of the legitimate drama. "Wallace" has been succeeded by Shakspeare's admirable drama of "The Winter's Tale," in which, on Saturday, Mr. Anderson performed Leontes, and in the great scene in the last act made a deep impression. Miss Pauncefort, as Hermione, was also, in the same scene, deservedly applauded. The scenery and costumes were appropriate and costly.

Whittington Club.—"Antigone," with Mendelssohn's music, was performed on Thursday week—the parts being recited by Mr. A. Francis and Mdlle. Clarisse St. Pierre, and the chorus sung by the Polyhymnian Choir, under the direction of Mr. Alfred Gilbert. On Thursday "Macbeth," with Locke's music, was performed by the same readers and conductor.

At the Camberwell Hall a society has been specially formed by the Rev. C. W. Meyer, for the purpose of engaging Miss Edith Heraud and Herr Krueger for six readings of the principal plays of Shakspeare, commencing on next Monday.

The Sebastian Cabot, with a valuable cargo from Bombay, has been picked up a "derelict" in the Channel by the Archipelago, of Shields. The salvage claimed is £100,000, and the Board of Trade have ordered a court of inquiry on the abandonment of the ship by the master.

Sir Hugh Nugent, a youth of about eighteen, was out shooting at Stoke-by-Nayland, in Suffolk, the other day, when his gun, which he was holding by the muzzle and in the act of handing to a friend, accidentally exploded. The charge entered his side, inflicting a wound which proved almost instantaneously fatal.

The Distress in the North.—The weekly meeting of the Central Executive Committee was held on Monday at the Townhall, Manchester. The hon. secretary stated that £61 had been received during the week, and that there was a balance in the bank of £269,325. Three packages of clothing and eleven cases of wine had been received, and four bales of clothing had been sent off. Mr. Commissioner Farnall announced that a further decrease of 1862 had taken place in the number of persons receiving parochial relief. Grants were made from the Employment and School Fund to Chorley of £30, and to Tintwhistle of £20 10s. Grants were made from the General Relief Fund:—To Stalybridge, £400; Hurst, £40; Morsley, £80; Broadbottom and Charlesworth, £30; Millbrook, £10; Withnell, £50; St. Matthew's, Chadderton, £15; Bamber Bridge, £75; New Mills, £50; Whitefield and Unsworth, £100; Wigan, £1500; Glossop and Hadfield, £1800; Little Hayfield, £50; Blackley, £50; Salford, £500.

An Ancient Boat, probably of the third century, has been found in a peat moss near Flensburg, in Sleswig, by M. Engelhardt, director of the Museum at that place. An account of it has been inserted by Mr. John Lubbock in the new number of the *Natural History Review*, from which we select a few particulars. This large, flat-bottomed boat is seventy feet in length, three feet deep in the middle, and eight or nine feet wide. The sides are of oak boards, overlapping one another, and fastened together by iron bolts. On the inner side of each board are several projections, which are not separate pieces of wood, but are continuous with the boards, and were therefore left when the latter were cut out of the solid timber. Each of these projections have two small holes, through which ropes, made of the inner bark of trees, were passed, in order to fasten the sides of the boat to the ribs. The rowlocks are formed by a projecting horn of wood, under which is an orifice, so that a rope fastened to the horn and passing through the orifice leaves a hole through which the oar plays. There appears to have been about fifty pairs of oars, of which sixteen have already been discovered. The bottom of the boat was covered by matting. The freight consisted of iron axes, including a socketed celt with its handle, swords, lances, knives, brooches, whetstones, wooden vessels, with, oddly enough, two birch brooms, and many smaller articles. Only those, however, have yet been found which remained actually in the boat, and, as in sinking it turned partly over on its side, no doubt many more articles will reward the further explorations which M. Engelhardt proposes to make next summer. It is evident that this interesting boat was sunk on purpose, because there is a square hole about six inches in diameter hewn out of the bottom, and it is probable that in some time of panic or danger the objects contained in it were hidden by the owner, who was never able to recover them. Some time ago, a few yards from the same spot, at Nydam, were found a quantity of arms and ornaments, and also a collection of fifty Roman coins, ranging in date from A.D. 67 to 217. There is little doubt that these belong to the same period as the boat abovementioned, and, under these circumstances, M. Lubbock thinks that this vessel and its contents may be safely ascribed to the third century.

COUNTRY NEWS.

The Queen has approved of Mr Edmond Pictet as Vice-Consul at Liverpool for the Swiss Confederation.

The foot rot is making its appearance amongst the sheep and lambs in some parts of the south of England, owing to the wet weather.

Mr. F. Lygon, a Conservative, was on Monday elected, without opposition, for West Worcestershire, in the room of his brother, now Earl Beauchamp.

Lord Londesborough and his bride, who have been on a visit to their Yorkshire estates, have received a most enthusiastic reception by their numerous tenantry.

The Hon. Charles George Lyttelton, eldest son and heir of Lord Lyttelton, attained his majority on Tuesday, and the event has been celebrated by a round of feasting and rejoicing in Worcestershire.

The formation of an Oxford Club is proposed in the eastern counties, the object being to reunite gentlemen who have graduated at that University.

The magistrates of the county of Connemara have marked their sense of Earl Leitrim's conduct to the Lord Lieutenant of Ireland by refusing to renew the license of the Maam Hotel.

The Public Health Acts have been adopted at Hyde and Droylsden. The latter board is to consist of nine members and the former of twenty-one.

Twelve hundred pitmen, belonging to a colliery in the north of the county of Durham, have struck work in consequence of a disagreement with their employers on a question of wages.

The Tyndale Memorial, in Gloucestershire, has attained the height of 60 ft., but about 20 ft. above the surface of the soil the stone has given way, causing a long rent, which has so weakened the structure that it must be taken down.

At Birmingham, on Sunday, the annual collection was made in all the churches and chapels in aid of the funds of the hospital in that town. The amount received was over £2600. This year the proceeds will go to the Queen's Hospital.

As the two years' mayoralty of Mr. Brown, Chief Magistrate of Sheffield, will shortly terminate, that gentleman was on Tuesday entertained at a complimentary dinner and presented with his full-length portrait, which is to be hung in the Council-hall. The Cutlers' Hall, in which the dinner took place, was crowded, and men of all classes attended to do honour to the guest.

The Lords of the Treasury have approved of Leeds as an inland bonding-town; and the Commissioners of Customs have promulgated an order that wines, spirits, tobacco, tea, and other goods may be deposited under bond, in premises set apart for that purpose, from Nov. 2, when the new arrangement will take effect.

On Thursday week Provost Dawson, as representing the Royal burgh of Linlithgow, which has become bankrupt, was examined before Sheriff-Substitute Home, in the Sheriff Courthouse, Linlithgow. The liabilities of the burgh, consisting chiefly of law expenses, amounted to £5834, and the assets to £965.

A ball took place in Cork on the 21st inst., in honour of Trafalgar Day, for the benefit of the Cork Sailors' Home. It was unusually brilliant and well supported, owing to his Royal Highness the Prince of Wales having lately honoured the institution with his patronage. Over 300 of the élite of the county and city were present, with the heads of departments, civil, naval, and military. The band of the 11th Regiment was sent.

On Thursday week, as a number of prisoners were being conveyed by railway from Wakefield for trial at Leeds, one of them effected his escape from the train. While going through the Ardsley tunnel he lowered the window of the carriage, crept through, stood on the foot-board until the train came into partial daylight, and, before it emerged from the tunnel, jumped to the ground and made off. He is supposed to have been insecurely handcuffed.

The section of the Aberystwith and Welsh Coast Railway, between Aberdovey, Towyn, and Llwyngwril, north of the Dovey river, North Wales, was opened for public traffic last Saturday. The length of line opened is twelve miles, which runs through one of the most picturesque and beautiful districts in Wales, skirting the coast all the way. The inhabitants of Towyn celebrated the event with great rejoicing.

A handsome drinking-fountain, erected by public subscription as a memorial to the late Prince Consort, was opened at Chatham on Wednesday, the ceremony being witnessed by a vast concourse of spectators. The fountain has been erected on a site near the Military-road, in a central part of the town, on land presented by the Government. It is composed of dark polished marble and Bath stone. On a panel in front are the arms of the late Prince Consort, and on the side are carved the arms of Mr. J. Budden, one of the principal donors.

At the Ashbourn (Derbyshire) Petty Sessions, on Saturday last, Mr. James Clifford, a man of property at Shardlow, was committed for trial on charge of having, in or about the year 1804, at the parish church of Longford, feloniously stolen a leaf from the parish register, containing the entry of the baptism of William, son of Mary Tatlow, of Bentley, dated Nov. 8, 1727. The defendant said the abstraction was "only a trick of youth," but it seems to have had some bearing upon legal proceedings with reference to property left by William Tatlow. Bail was accepted for Mr. Clifford's appearance to take his trial.

The United Kingdom Alliance for the Suppression of the Liquor Traffic held its annual meeting yesterday week, in the Free Trade Hall, Manchester. The Conference was held at ten, and some routine business disposed of. The draught of a permissive bill was read and approved of, and handed to Mr. W. Lawson, M.P., for introduction to the House of Commons. At the evening meeting, Mr. Lawson delivered a speech on the importance of the objects sought to be attained by the alliance, the progress of the cause of temperance during late years, and the prospects of the association. Mr. S. Pope then moved a resolution in favour of the permissive bill. It was seconded by the Rev. Canon Jenkins and carried unanimously. The Rev. H. Gale and Professor Newman also spoke.

The annual meeting of the delegates of the Cheshire and Lancashire Association of Institutions, to the number of about 150, took place yesterday week, in the theatre of the Manchester Mechanics' Institution. Representatives from the various institutions in Lancashire and Cheshire were present. Dr. Watts occupied the chair. In the evening a public meeting was held in the Athenæum. It was expected that Lord Stanley, the president of the association, would take the chair, but in his absence Dr. William Fairbairn was called to the chair. The chairman said he had always taken a great interest in the welfare of mechanics' institutions, and he trusted, as the elementary education of the country progressed, these institutions would become more valued as places of secondary education. The meeting was then addressed by Dr. Watts, Hugh Mason, Mr. Edwards, Mr. Brittain, Councillor Rumney, Mr. Buckmaster, and Dr. Parkhurst.

A graceful and well-merited compliment was paid to the Mayor of Newcastle on Saturday last. The *Newcastle Chronicle* informs us that the consular representatives of foreign nations stationed at that port, to the number of fifteen, waited upon his Worship in the council-chamber and presented him with an address, in acknowledgment of the cordial reception accorded to the distinguished philosophers of their respective countries who attended and took part in the late successful meeting of the British Association. Reference was also made to the hospitalities so liberally dispensed by the esteemed president (Sir W. G. Armstrong) and the inhabitants of the town generally, the Consuls intimating their assurance that the effect of the recent interesting gathering would be to unite the lovers of science in all parts of the world, and thus to advance scientific knowledge. To this gratifying expression of feeling Mr. Bell responded in suitable terms.

A curious case came on for trial at the West Suffolk Sessions, held at Bury St. Edmunds on Tuesday. A man named Bird was charged with breaking open a coffin and stealing a quantity of valuable property therefrom. It seems that the only son of a wealthy couple residing at Mildenhall died some time ago. His parents were resolved that his watch and other property should not come into the hands of any one else, and therefore agreed that whichever of them survived the other should take care that the articles were put into the coffin of the one who first died. Mr. Childerstone, the father, died last January, and, after being dressed in a suit of black, was inclosed along with the property in three coffins, and buried in the family tomb. The sexton, a man named Docking, heard that valuable property had been buried with the deceased, and induced two other men, named Graham and Bird, to join him in robbing the tomb. They did so, and obtained, it is said, about £60 worth of plunder. The fact of the robbery was soon discovered, and Bird confessed to his share in it. The other two men absconded. Bird was brought up for trial and pleaded guilty. Sentence upon him was deferred.

Thursday week was a grand gala day at Abingdon, Berks, the laying of the foundation-stone of the Albert Memorial and the celebration of the Abingdon Grammar School taking place on that day. The Mayor (Mr. Badcock), the Recorder (Mr. Bros), Sir G. Bowyer, Bart., M.P., Mr. Norris, M.P., the Corporation, the old and present scholars of the grammar school, and a great number of the principal inhabitants attended Divine service at eleven o'clock, and afterwards proceeded to the recreation-ground (accompanied by the rifle corps), where the stone was laid by the Mayor, in the presence of a vast assembly. The procession then returned to the fine council-chamber, where a recherché luncheon awaited the company, provided by the Mayor. The Mayor and Corporation, the Recorder, and others next visited the grammar schools, where Latin and English addresses were delivered by the scholars; and Dr. Strange, who had been much esteemed as Head Master for twenty-three years past, was presented with a valuable testimonial, consisting of a tea and coffee service. Dr. Strange feelingly returned thanks, and the scholars adjourned to a neighbouring field for various sports. In the evening a grand banquet took place at the council-chamber.

NATIONAL SPORTS.

THE Newmarket Houghton Meeting of 1863 will stand conspicuously in the annals of the turf. Monday was ushered in in such a dense fog that objects could scarcely be recognised at a distance of fifty yards, and the first race on the card had to be put off for half an hour. As the hour fixed for the Criterion drew on the fog had thickened into almost total darkness, and, after a consultation, Lord Coventry and Admiral Rous determined upon postponing the race until Tuesday. There was nothing in the first day's racing worthy of special comment, the result of the Handicap Plate over the Cambridgeshire course scarcely affecting the betting on the great handicap of the morrow. Tuesday opened cheerily, and a rare day's sport was looked forward to, enriched as the programme was by the addition of the Criterion, there being in all thirteen races appointed. The intended visit of the Prince of Wales and Prince Christian of Denmark and suites was known only to a few, and their arrival was not known until the Royal party appeared on horseback on the heath. The young Prince was booted and breeched as if "to the manner born," and the moment he was recognised by the eager crowd of spectators, as he conversed freely with several noble personages in turn, a long hearty cheer rung out from the dense throng that must have been especially gratifying to himself, as well as to his illustrious relative. Precisely the same animals as were weighed for on the previous day went to the post. The victory of the French-bred mare, Fille de l'Air, was a surprise; for, although she was heavily backed in certain quarters, the exhibition she made of such "cracks" as Coast Guard, Ely, Linda, and even Prince Arthur—the horse that ran second—was a result never dreamt of. It will be remembered that her running with Coast Guard and Ely during the past season has been what is professionally known as "in and out;" but this last performance, while carrying the top weight of 9st., and giving away 1lb. and the sex to Coast Guard, stamps her as the best performer of the year, and that, too, after making due allowance for the capricious running of fillies. Forty animals were saddled for the Cambridgeshire; and, after a few false starts, they were got away. The merry little Borealis, whose peculiar style of going has not inaptly been compared to the bounding of an indiarubber ball, was first off, but in a few strides was lost in the ruck of horses who came sweeping along, led by Merry Hart until halfway within the cords, where Summerside and Catch-'em-Alive pressed forward, and the latter, catching the American mare at every stride, soon got on terms with Lord Westmoreland's horse, and beat him on the post by a head. The result completely stunned the bookmakers, and the scene of excitement that followed is almost without a parallel. But when the clerk of the scales refused to "pass" S. Adams, the rider of Catch-'em-Alive, a counter furore was got up equally boisterous, and the latter announcement was "wired" over the country upon the heels of the winning horse. It required some 10 oz. to make the scale drop to the proper poise; while the jockey of Merry Hart, the second, drew his proper weight. J. Grimshaw, who rode Summerside (third), was next scaled, and he, too, failed to bring the scales level. An examination of the scales took place, when some very suspicious-looking pieces of lead were found attached to the scale adverse to the jockey; but which, on explanation, were said to be necessary in order to equalise the scales. After some further parley, Catch-'em-Alive was proclaimed to be "all right;" but Lord Westmoreland lodged a formal protest against the stakes being paid over in favour of the horse that came in first, and the Jockey Club, by a majority of twenty to three, decided on Wednesday evening that the question was a fit subject for strict inquiry, and resolved to reopen the case on Thursday morning, which was done; and, after a most searching investigation, Catch-'em-Alive was declared the winner of the Cambridgeshire Stakes. Lord Westmoreland withdrew his protest also, and the stakes were awarded to Catch-'em-Alive. It should be mentioned that Fille de l'Air was objected to on the ground of age; but, after due examination by two professionals, she was declared to be a two-year-old and entitled to the stakes. Several jockeys were suspended for refractory conduct at the post previous to the start for the Cambridgeshire, and the starter was fined £25 for permitting a "flying start" for the Private Handicap Sweepstakes, over the last half of the Abingdon Mile, by which old Juliet got off in front of her horses and won by some six lengths. So absorbing was the interest attached to the great event of the meeting, that comparatively no attention was paid to the minor races, which were up to the usual Newmarket form.

NEWMARKET HOUGHTON MEETING.—MONDAY.

Handicap Plate of 50 sovs.—Stockinger, 1. Aurelian, 2. Twilight, 3.
Handicap Sweepstakes of 25 sovs.—Almack, 1. The Principal, 2. Manrico, 3.
Maiden Plate of 50 sovs.—Rothschild, 1. Wild Honey f., 2. Yafa, 3.
Selling Handicap Sweepstakes.—Lady Derby, 1. Damascus, 2. Country Maid, 3.
Sweepstakes of 10 sovs. each.—Lord Burleigh, 1. Zelle, 2. Lady Abbess, 3.

TUESDAY.

Fifty Pounds.—Claxton, 1. Farnhurst, 2. Jeannette, 3.
Criterion Stakes.—Fille de l'Air, 1. Prince Arthur, 2. Evelina, 3.
Selling Handicap Sweepstakes.—Canzonette, 1. Glowworm, 2. Topsy, 3.
All Aged Stakes.—Fairwater, 1. Lady Clifden, 2. Argonaut, 3.
Sweepstakes of 200 sovs.—Mahometan, 1. Dovedale, 2.
Fifty Pounds.—Johnny Armstrong, 1. Croagh Patrick, 2. Onesander, 3.
Cambridgeshire Stakes.—Catch'em Alive, 1. Merry Hart, 2. Summerside, 3.
Handicap Sweepstakes of 10 sovs.—Zora walked over.
Handicap Sweepstakes of 15 sovs.—Teddy, 1. Woodcraft, 2. Breeze, 3.
Optional Selling Stakes.—Voucher c., 1. Dead heat between Drosera's dam c. and Prescription for second.
Free Handicap Sweepstakes.—Fiancée, 1. Merry Maid, 2. Lizzie, 3.
Sweepstakes of 10 sovs.—Airedale, 1. Reindeer, 2. Dolphin, 3.

WEDNESDAY.

Optional Selling Plate.—The Pony, 1. Fontenoy, 2. Lucretia, 3.
Renewal of the Glasgow Stakes.—Miss Sarah c., 1. Caryophylus, 2. Bridle c., 3.
Fifty-Pound Plate.—Senorita c., 1. Croagh Patrick, 2. Lady Abbess, 3.
Private Handicap Sweepstakes of 25 sovs.—Juliet, 1. Paddy O'Rourke, 2. Cassidia, 3.
Private Handicap Sweepstakes of 25 sovs.—Attraction, 1. Soumise, 2. Hypatia, 3.
Subscription Plate.—Countersign, 1. Regina, 2. Diomed, 3.
Sweepstakes of 10 sovs.—Dolphin, 1. Damascus, 2. Typee c., 3.
Sweepstakes of 10 sovs.—Lord Adolphus, 1. Tailor, 2. Verdiere, 3.
Sweepstakes of 10 sovs.—Polonaise, 1. Topsy, 2. Daniel, 3.
Sweepstakes of 50 sovs.—Ely, 1. Beatrix, 2. Mahometan, 3.

THURSDAY.

Subscription Plate.—Wingrave, 1. Sweet Willie, 2.
Sweepstakes of 50 sovs.—Beatrix, 1. New York, 2.
Apethorpe Stakes.—Crytheia walked over.
Handicap Sweepstakes.—Almack, 1. Liston, 2.
Sweepstakes of 10 sovs.—Balderdash, 1. Prescription, 2.
Free Handicap.—Giraffe c., 1. Glenorchy, 2.
Optional Selling Plate.—Edward the Confessor, 1. Brother to Weatherspy, 2.
Handicap Sweepstakes.—Country Maid, 1. Lady Derby, 2.

The information from Caprera shows that Garibaldi can walk a fair distance without support.

Major-General Burke Cuppage has been appointed Lieutenant-Governor of the Island of Jersey, in the room of Sir R. P. Douglas, resigned.

Mr. Cubitt, M.P., died on Wednesday night at his seat, Penton Lodge, near Andover, Hants, in his seventy-third year.

The 45th Regiment, stationed at the Curragh, and the 58th Regiment, in Dublin, are under orders to embark for Canada.

Mr. Layard, M.P., has been treated to a special excavation made in his honour at Pompeii—the house, cleared to the pavement at his visit, revealed among the usual fragments a large wine jar, or amphora, inscribed "Liqvamen flos flos."

The Culloden was lost on her voyage home from Quebec on the 12th ult. She foundered in a heavy gale; but all the hands, thirty-six in number, were picked up by the New Brunswick, of Bristol.

Two Parliamentary papers prepared by the Board of Trade have just been published, showing the duties levied by foreign tariffs on British manufactures, brought into English weights and money. The first part gives the duties levied on each kind of yarn and thread, and the second part the duties levied upon woven manufactures. The information thus furnished will be useful to all shippers.

Messrs. Bacon and Co., of Paternoster-row, have just issued a coloured map of America, in which the boundaries of the respective States and territories are clearly marked, and the Federal States (free and slave) distinguished from the Confederate ones. In addition to its value as a map, it contains some interesting and important letterpress, embracing an epitome of the history of the war, the theory of government, table of distances, statistics of population, a list of forts in topographical order, and other useful matters.

An order was received on Tuesday morning at Chatham garrison for an immediate return to be made to the Horse Guards of the number of effective men at the dépôt of the 2nd battalion 12th Regiment, under orders for service at New Zealand. The regiment is to be made up to 950 rank and file. The dépôt assembled on parade in the afternoon, and about 100 rank and file were found fit for duty, which number will be forwarded to join the service companies at Limerick, on receipt of an order for that purpose. The *United Service Gazette* states that the 1st battalion of the 10th Regiment and the 1st battalion of the 11th Foot will also shortly be placed under orders to embark for service in New Zealand.

A public meeting of the noblemen and gentlemen of the county of Lanark, and of the merchants, bankers, and other citizens of Glasgow, was held on Wednesday week in the Merchants' Hall, for the purpose of taking steps with a view to the erection in Glasgow of a monument to the late Field Marshal Lord Clyde. Among those present were Lord Belhaven, Sir Archibald Alison, Sir James Fergusson, Sir James Campbell, Mr. Walter Buchanan, M.P., the Lord Provost, Colonel Alison, and the Lord Dean of Guild. Sir A. Alison, moved the following resolution:—"That this public meeting, deeply impressed with the loss which the country has sustained in the death of Colin Campbell, Lord Clyde, and anxious to testify their high admiration of his military talents, and gratitude for his illustrious services to his country, resolve to erect a public monument to his memory in his native city." Mr. Walter Buchanan, M.P., seconded the resolution, which was cordially agreed to. On the motion of Sir James Campbell, a number of noblemen and gentlemen were appointed a committee to collect subscriptions and to decide upon the form and site of the monument, and the artist to be employed. The Lord Provost intimated that contributions amounting to upwards of £700 had been made.

MONETARY TRANSACTIONS OF THE WEEK.

(From our City Correspondent.)

THE fluctuations in the value of Home Securities have been trifling, and the business doing in most Stocks, both for Money and the Account, has been very moderate. In the value of the Unfunded Debt scarcely any change has taken place.

Although nearly the whole of the gold at hand has been taken for transmission to Paris, and although the stock of bullion in the Bank of France still continues to decrease, more disposition has been shown on the part of holders of capital to make advances upon commercial paper. The demand for accomodation has somewhat fallen off, and the best bills are now readily discounted as follows:—

Thirty days' bills	3½ ⅝ per cent.	Four months' bills	4½ per cent.
Sixty days' bills	3¾ "	Six months' bills	4½ 5 "
Three months' bills	4 "		

The Continental and American exchanges have become somewhat unfavourable; nevertheless, we continue to import rather large quantities of gold from New York. Apparently, however, some heavy remittances of bullion will be made to France during the next two or three weeks; consequently, we can hardly anticipate any increase in the stock in the Bank of England for some time.

The Board of Trade returns, published on Thursday, show most satisfactory results as regards the extent of our exports this year. The total exports for the nine months ending Sept. 30 were £104,294,713, against £93,672,434, during the same period in 1862.

There has been a moderate demand for money on the Continent. We annex the rates in the leading cities:—

	Bank rate per cent.	Open market per cent.		Bank rate.	Open market.
Paris	5 ..	4¾	Amsterdam ..	3 ..	3
Vienna	5 ..	5	Turin	6 ..	6
Berlin	4 ..	4	Brussels ..	4 ..	4
Frankfort ..	3½ ..	3½	Hamburg ..	— ..	5½
			St. Petersburg	6 ..	9 10

About £500,000 in bullion has arrived from various quarters; yet several parcels of gold have been withdrawn from the Bank for export purposes. The steamer for the East has taken out £90,460 in gold for Alexandria, £70,050 in gold and 375,650 in silver for Bombay.

The capital of the Union Bank of Australia is about to be increased to £1,250,000, by an issue of 10,000 new shares of £25 each, at a premium of £20.

The funds were very inactive on Monday, yet prices were supported:—Consols, for Money, realised 93 to 93⅛; Ditto, for Account, 93⅛ ¼; Reduced and New Three per Cents, 91⅞ ½; Red Sea Annuities, 21; India Five per Cents, 109⅛ ½; Ditto Four per Cents, 100⅞; India Bonds, 18s. to 22s. prem.; Exchequer Bills, 1s. dis. to 2s. prem.; Bank Stock sold at 236. On Tuesday prices ruled about stationary:—Bank Stock closed at 234½; Consols, 91½ ¼; New Two-and-a-Half per Cents, 77½; Five per Cents, 109; India Stock, 226; Ditto, New, 109⅛ ⅞; Ditto, Four per Cents, 100⅞; Ditto, Five per Cent Rupee Paper, 107¼; Ditto Bonds, 22s. prem.; Exchequer Bills, 1s. dis. to 2s. prem. The transactions on the following day were limited:—Consols sold at 93⅛ ¼; New Two-and-a-Half per Cents, 76¾; Reduced and New Three per Cents, 91½ ⅜; India Stock, 226; Ditto Five per Cents, 109¼ ½; Ditto Four per Cents, 100⅞; Ditto, Five per Cent Rupee Paper, 107½; Ditto, Five-and-a-Half per Cent, 116½; Exchequer Bills, 1s. dis. to 2s. prem. On Thursday the market was very flat, and Consols, both for Money and Time, were quoted at 93 to 93⅛; the Reduced and New Three per Cents marked 91⅞ to ½; and Exchequer Bills, 1s. dis. to 2s. prem.; India Five per Cent Stock marked 19s. to 23s. prem.

The Foreign House has ruled flat, and prices have had a downward tendency. The leading changes are in Greek, Spanish, Mexican, and Turkish Securities, but they are not important. The Confederate loan has sold at 65 to 67; Brazilian Scrip, ⅜ to ⅞ prem.; and Portuguese, 1⅜ to ⅞ prem. Brazilian Five per Cents have marked 99⅞ ex div.; Ditto Four-and-a-Half per Cents, 91½; Chilian Six per Cents, 101½ ex div.; Egyptian, 101¼; Ditto, second issue, 101; Greek, 31½; Ditto Coupons, 15; Mexican Three per Cents, 42½; Portuguese Old Three per Cents, 49¾; Ditto, 1862, 49¾; Russian Old Five per Cents, 94½; Ditto, 1862, 93½; Spanish Three per Cents, 55; Ditto, Passive, 35¼; Ditto, Certificates, 13½; Turkish Old Six per Cents, 92⅞ ex div.; Ditto, 1862, 71½; Ditto 1858, 70¼; Ditto, Four per Cents, 102½; Venezuela Six per Cents, 61; Belgian Four-and-a-Half per Cents, 100½; Dutch Four per Cents, 101 ex div.; and Italian Five per Cents, 72½.

Joint-Stock Bank Shares have been in fair average request, and prices, almost generally, have ruled firm. Alliance have realised 25; Australasia, New, 37¼; Bank of Egypt, 27¼; Bank of Otago, 11⅞; Bank of Queensland, 15; Brazilian and Portuguese, 8; Chartered of British Columbia, 17; Chartered of India, Australia, and China, 38½; Consolidated, 10½; English and Irish, 10; English, Scottish, and Australian Chartered, 23½; Hindustan, China, and Japan, 28⅞; Imperial, 23¾; Imperial Ottoman, 18⅞; London and Brazilian, 50; London and Colonial, 8½; London and County, 54; London Joint-Stock, 37; London and Middlesex, 7½; London and South African, 28; London and Westminster, 79¾; Metropolitan and Provincial, 18; National of Liverpool, 19½; National Provincial of England, 128½; Ditto, New, 27; New Zealand, 3¾; Scinde, Punjaub, and Delhi, 6½; Standard of British South Africa, 25; Union of Australia, 60; and Union of London, 38½.

A moderate business has been transacted in Colonial Government Securities:—Canada Six per Cents have sold at 105; Ditto Five per Cents, 93½; Cape Six per Cents, 1890-1, 110; Mauritius Six per Cents, 1878, 109¾; Ditto, 1881, 112; Natal Six per Cents, 108½; New Brunswick Six per Cents, 105; New South Wales Five per Cents, 102⅞; and Victoria Six per Cents, 110⅞.

The Miscellaneous Market has been tolerably firm. Bombay Gas Shares have sold at 3; Crystal Palace, 37¼; Egyptian, Commercial, and Trading, 4; General Credit and Finance of London, 4⅞; General Steam, 28½; Hudson's Bay, 8¾; Italian Irrigation and Canal Six per Cent Bonds, [89½; Joint-Stock Discount, 6½; London District Telegraph, 1⅞; London Financial Association, 1½; London General Omnibus, 2⅜; Oriental Inland Steam, 2⅞; Peninsular and Oriental Steam, 84½; Ditto, New, 51½; Rhymney Iron, 7¾; Rio de Janeiro City Improvements, 27½; Royal Mail Steam, 81; South African Mortgage Investment, 7½; Berlin Waterworks, 9½; Imperial Gas, 86⅞; Phœnix, 124; Indemnity Marine Insurance, 145; London, 47½ ex div.; Ocean Marine, 17⅛; and Thames and Mersey Marine, 6½.

There has been rather more business doing in American Securities, and prices have rather advanced. Maryland Five per Cents have sold at 75; Virginia Six per Cents, 38; Atlantic and Great Western, 76; and Illinois Central, 100-Dollar Shares, 10¾ discount.

Only a nominal amount of business has been transacted in the Railway Share Market. On the whole, however, prices have been well supported. Annexed are Thursday's official closing quotations:—

Ordinary Shares and Stocks.—Great Northern, 128; Ditto, A Stock, 132½; London, Chatham, and Dover, 46⅛; London and North-Western, 104; North British, 51½; North Eastern—Berwick, 101½; Ditto, York, 88½; North and South-Western Junction, 11½.

Preference Shares.—Great Northern Five per Cent, 105; Great Western, Four-and-a-Half per Cent, 101½.

Lines Leased at Fixed Rentals.—Gloster and Dean Forest, 26; Lancaster and Carlisle, 210; London and Chatham, 92¾; Nottingham and Grantham, 95¾; Shrewsbury and Hereford, 136.

British Possessions.—Bombay, Baroda, and Central India, 106½; Grand Trunk of Canada, 22; Great Indian Peninsula, 15⅜; Madras Five per Cent, 107; Ditto, Four-and-three-Quarters per Cent, 102; Scinde, 107½.

Foreign.—Antwerp and Rotterdam, 8⅞; Great Luxembourg, 13¾; Ottoman, 11⅞; San Paulo, 9½; Ditto, 22½.

The return of the Bank of England for the week ending Oct. 23 shows the following results when compared with the preceding statement:—

A decrease of circulation of	£224,058	An increase of other Securities of ..	202,967
An increase of public deposits of ..	24,328	A decrease of bullion of	207,695
A decrease of other deposits of ..	258,134	An increase of rest of	5,203
An increase of Govt. securities of ..	50,000	A decrease of reserve of	2,380

The total circulation is £22,600,408; public deposits amount to £4,462,163; and private deposits to £15,015,128 Securities are £39,785,852; and the stock of bullion is £14,437,574.

THE MARKETS.

CORN EXCHANGE (Oct. 26).—There was only a moderate supply of English wheat on offer in to-day's market. All kinds moved off steadily, at full quotations. Prime foreign wheats were quite as dear as last week; but low and damp parcels met a heavy sale, at barely late rates. In floating cargoes of grain very little was passing. Malting barley was in improved request, and the currencies had an upward tendency. In grinding and distilling sorts, very little was doing, at barely stationary prices. New malt was in request, at full quotations; but old parcels were much neglected. Good sound oats sold steadily, on former terms; but damp qualities gave way 6d. per quarter. In beans very little was doing, at 2s. per quarter less money. Peas were very dull, and rather cheaper. The flour trade inactive, at previous currencies.

Oct. 28.—Wheat and fine qualities of flour were in steady request, at full prices. All other kinds of produce moved off slowly, at Monday's currency.

English.—Wheat, Essex and Kent, red, new, 40s. to 45s.; ditto, white, 41s. to 47s.; Norfolk and Suffolk, red, 40s. to 45s.; rye, 32s. to 34s.; grinding barley, 26s. to 28s.; distilling ditto, 29s. to 33s.; malting ditto, 28s. to 38s.; Lincoln and Norfolk malt, 60s. to 66s.; brown ditto, 50s. to 57s.; Kingston and Ware, 60s. to 66s.; Chevalier, 66s. to 68s.; Yorkshire and Lincolnshire feed oats, 18s. to 22s.; potato ditto, 22s. to 26s.; Youghal and Cork, black, 16s. to 22s.; ditto, white, 16s. to 23s.; tick beans, 28s. to 30s.; grey peas, 32s. to 34s.; maple, 36s. to 38s.; white, 36s. to 37s.; boilers, 36s. to 38s. per quarter. Town-made flour, 40s. to 43s.; town households, 34s. to 36s.; country marks, 27s. to 30s. per 280lb; French, 36s. to 39s. per sack; American, 19s. to 25s. per barrel.

Arrivals this Week.—English and Scotch: wheat, 830; barley, 1010; malt, 2720; oats, 1020; flour, 250. Irish: oats, 1800. Foreign: wheat, 10,260; barley, 3090; oats, 27,870; flour, 460 sacks, 60 barrels.

Seeds.—The seed trade, generally, is in a sluggish state; nevertheless, prices are fairly supported. Linseed and rape cakes maintain their previous value.

Linseed, English, crushing, 62s. to 66s.; Calcutta, 62s. 6d. to 64s. 6d.; hempseed, 44s. to 48s. per quarter; coriander, 14s. to 16s. per cwt.; brown mustard seed, 10s. to 13s.; white ditto, 10s. to 12s.; tares, 5s. 6d. to 6s. per bushel; English rapeseed, 62s. to 65s. per quarter. Linseed cakes, English, £9 10s. to £10 10s.; ditto, foreign, £9 10s. to £11; rape cakes, £5 to £6 per ton; canary, 46s. to 56s. per quarter; red clover seed, 38s. to 78s.; white ditto, 54s. to 72s. per cwt.

Imperial Weekly Averages.—Wheat, 40s.; barley, 33s. 11d.; oats, 18s. 7d.; rye, 28s. 9d.; beans, 36s. 5d.; peas, 35s. 8d.

The Six Weeks' Averages.—Wheat, 41s.; barley, 34s. 9d.; oats, 19s. 7d.; rye, 30s. 8d.; beans, 37s. 7d.; peas, 36s. 3d.

English Grain sold last Week.—Wheat, 104,742; barley, 90,353; oats, 12,185; rye, 179; beans, 4323; peas, 1787 quarters.

Tea.—Several parcels from India have been disposed of, at unusually high prices. Chinese qualities are in moderate request, at about previous rates.

Sugar.—The demand for all kinds has fallen off; and, in some instances, prices have given way 6d. per cwt. Barbadoes has sold at 36s. to 40s.; Tobago, 34s. to 38s.; Demerara, 36s. to 42s. per cwt. Refined goods are in fair request, at 47s. 6d. per cwt. The stock of sugar is now 99,916 tons, against 83,987 tons last year.

Coffee.—Most descriptions have met a slow inquiry; nevertheless, the quotations have been supported. The stock consists of 10,035 tons, against 9381 tons at the corresponding period in 1862.

Provisions.—There is rather an extensive business doing in most kinds of butter, and prices continue firm. Bacon is inactive, and 2s. per cwt. cheaper. Hams and lard move off freely; but all other provisions are a dull inquiry.

Tallow.—The demand is inactive, at barely stationary prices. P.Y.C., on the spot, 43s. 6d. per cwt. Stock, 62,383 casks, against 45,625 ditto in 1862. Rough fat, 2s. 3d. per 8 lb.

Oils.—Linseed oil is selling at £43 per ton. Rape is quiet, at £41 to £44; olive, £53 to £60; cocoanut, £45 to £47 10s.; and fine palm, £38 10s. French turpentine is quoted at 74s. per cwt.

Spirits.—Rum is a slow inquiry, at 1s. 4d. to 1s. 8d. for proof East India, and 1s. 5d. for proof Leewards. Brandy is steady, at from 5s. to 11s. 4d.; Hambro' spirit, 1s. 4d. to 1s. 5d.; English ditto, grain, 1s. 8d. to 1s. 10d.; ditto, rice, 1s. 4d. to 1s. 5d.; and English gin, for export, proof, 2s. 9d. to 3s. per gallon.

Hay and Straw.—Meadow hay, £3 to £4 5s.; clover, £4 to £5 10s.; and straw, £1 6s. to £1 14s. per load.

Coals.—Best house coals, 19s. to 20s.; seconds, 17s. to 18s.; Hartley's, 14s. 9d. to 15s. 9d.; and manufacturers', 12s. 3d. to 15s. 3d. per ton.

Hops.—The supply on offer is moderately extensive, and the demand rules steady, at from 100s. to 160s. per ton.

Wool.—At the approaching sales about 60,000 bales of colonial wool will be offered. Privately, the demand is steady.

Potatoes.—A fair business is doing in most kinds. Prices range from 50s. to 90s. per ton.

Metropolitan Cattle Market (Thursday, Oct. 29.)—The supply of beasts on offer in to-day's market was only moderate as to number, and the general quality of the stock was inferior. The few prime breeds on offer sold readily, at very full prices. Otherwise, the beef trade was in a sluggish state, on former terms. There was a good consumptive demand for sheep—the show of which was rather limited—at fully previous rates. A few very superior Downs realised 5s. 8d. per 8 lb. Calves met a dull inquiry, at about stationary prices. The supply was by no means extensive. In pigs and milch cows very little business was transacted, at late rates. Per 8 lb. to sink the offal:—Coarse and inferior beasts, 3s. 2d. to 3s. 6d.; second quality ditto, 3s. 8d. to 4s. 2d.; prime large oxen, 4s. 4d. to 4s. 8d.; prime Scots, &c., 4s. 10d. to 5s.; coarse and inferior sheep, 3s. 8d. to 4s.; second quality ditto, 4s. 2d. to 4s. 6d.; prime coarse-woolled sheep, 4s. 8d. to 5s. 2d.; prime Southdown ditto, 5s. 4d. to 5s. 6d.; large coarse calves, 3s. 6d. to 4s. 2d.; prime small ditto, 4s. 4d. to 4s. 6d.; large hogs, 3s. 4d. to 3s. 10d.; neat small porkers, 4s. to 4s. 4d.; suckling calves, 12s. to 20s.; and quarter-old store pigs, 20s. to 25s. each. Total supply: Beasts, 964; cows, 130; sheep, 6210; calves, 212; pigs, 400. Foreign: Beasts, 264; sheep, 1090; calves, 195.

Newgate and Leadenhall.—The supplies of meat are moderate, and the trade rules steady, at very full prices:—Beef, from 2s. 8d. to 4s. 2d.; mutton, 3s. 6d. to 4s. 6d.; veal, 3s. 8d. to 4s. 4d.; and pork, 3s. 6d. to 4s. 8d. per 8 lb., by the carcass.

SCOTCH SEQUESTRATIONS.

J. E. ALMOND, Edinburgh, mourning warehouseman.—D. DALGLEISH, Edinburgh, flesher.—G. SHAND, Lossiemouth, Elginshire, shipowner.—W. MATHISON, Stranraer, grocer.

It is arranged that the Channel Fleet will sail for Lisbon about the middle of December.

The colonelcy of the 78th (Highland) Regiment of Foot, or Ross-shire Buffs, has become vacant by the death, on Thursday week, of General Macneil.

Mr. W. H. Cooke, of the Inner Temple; Mr. J. Gray and Mr. J. J. Powell, of the Middle Temple, have been made Queen's Counsel.

THE ISLAND OF DECIMA.

IN the year 1641, after the Japanese had succeeded in exterminating both Christians and Christianity in Japan by one of the fiercest and most brutal persecutions recorded in history, the Dutch traders, who had always been the commercial rivals of the Portuguese, against whom the fanatic fury of the Japanese was specially directed, were compelled by the authorities to abandon their residences in the cities in which they had settled and to remove to the artificial island of Decima. This island, which is only 600 ft. in length and 240 ft. across, had previously been inhabited by the Portuguese; but, as they were forbidden ever again to touch Japanese soil, and the natives had resolved to have as little as possible to do with the "outer barbarians," it was concluded that this prison island should henceforth be appropriated to the Dutch, who, by their zeal in defaming the Portuguese and blowing the flames at which they were so cruelly martyred, had established a claim to special indulgence on the part of the Japanese. The island is built in the bay of Nagasaki, as in England we construct piers and breakwaters. It is connected with the mainland by a stone bridge, which is closed by a gate and guard-house, constantly occupied by a body of police or soldiers, whose duty it is to prevent the Japanese who are not officially connected with the island from having any communication with the Dutch residents. Previous to the recent treaties, which have been so scandalously violated by the princelets of that isolated region, the trade of the Dutch with Japan was of a very limited character, only two ships annually being allowed to be dispatched from Java to Decima. The buildings on the island are either dwelling-houses or warehouses, built by the Japanese on speculation, and let to the Dutch—notwithstanding their somewhat pasteboard character—at exorbitant rentals. The Dutch flag waves,

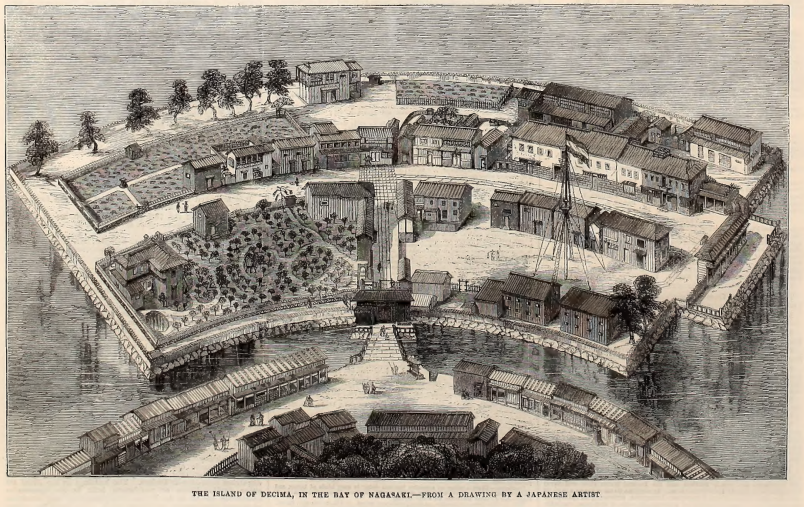
indeed, from a flagstaff, as though the island were a Dutch possession, which it has never been, as not a foot of Japanese territory can be held by foreigners; though it is by no means improbable that an island or two in the Japanese waters will soon have to change hands. The Europeans are now allowed comparatively free intercourse with the residents of the neighbouring town of Nagasaki, who, however, have special orders to be circumspect; while all they say and do in the presence of the Europeans is carefully noted and reported by the spies charged with that inquisitorial duty. The Dutch residents are regularly supplied with provisions by officially-constituted purveyors, at a tariff charge of about fifty per cent higher than the usual market price. These provisions, however, are not paid for in cash—all money transactions between the Dutch and Japanese being rigorously prohibited—but the amount is deducted from the sum due to the Dutch Governor of the island on account of the sale of the two annual cargoes sent from Batavia. The Japanese officials in Decima are obliged, on entering office, to sign with their blood an oath binding them to contract no friendship with the Dutch, and to afford them no information respecting the language, laws, manners, religion, or history of Japan.

In 1808 the English war-frigate Phaeton, under Captain Pellew, anchored in the bay of Nagasaki, while cruising about to intercept the two Dutch vessels with their home cargoes from Decima. This daring exploit, as it was considered, excited great sensation at Nagasaki; but Pellew was compelled to retire, and the Governor of Nagasaki was placed under the unpleasant necessity of ripping up his stomach on account of his having permitted a foreign vessel to anchor in the bay "without having destroyed and burned it according to his instructions from the Emperor." Five years later, when the English had taken possession of Java in their game of "diamond cut diamond" with Napoleon, two English vessels anchored off the island, and the commanders claimed the transfer of all Dutch property on it to the English Governor of Java. The Dutch Governor, Doeff, however, refused to accede to this request, and he was supported in his refusal by the Japanese. The English vessels were compelled to return to Java with their mission unfulfilled; and a second expedition, made a year later under Raffles, for the same purpose, was equally unsuccessful.

Recent events in the history of the Japanese have invested this island with an interest which justifies us in giving our readers this notice of it and the accompanying illustration, which was recently drawn, with the assistance of a Dutch resident, by one of the Japanese officials connected with the island. As the navigation to the bay of Nagasaki is the least unfamiliar of the Japanese waters to European navigators, and much valuable property, well calculated for "material guarantees," is within easy reach from the bay, it is, perhaps, not improbable, owing to recent provocations on the part of the Japanese, that Decima and the neighbouring town of Nagasaki—a brilliant jewel in the Emperor's crown—may be taken possession of for a time by the despised "outer barbarians," by way of teaching the Japanese this salutary lesson—that, in spite of their Tycoon, Mikado, Ilogoons, and damios, they will not escape condign and deserved punishment for the violation of treaties, nor be allowed to butcher with impunity the their butchers Princes, the "barbarians" who, in virtue of treaties, think proper to sojourn amongst them.

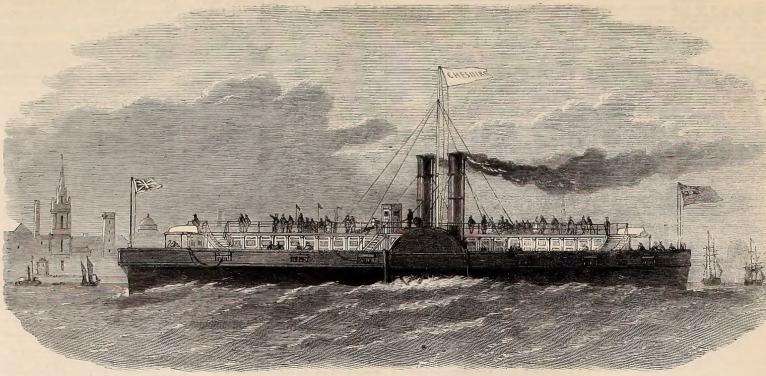
THE LATE M. BILLAULT, FRENCH MINISTER OF STATE.

described by the French official paper as an "irreparable loss" to the Imperial régime, of the advantages of which the deceased politician was one of the ablest expositors.



The last few years of M. Billault's life were the most brilliant of his career, and his eloquence was constantly relied upon by the Govern-

THE LATE M. BILLAULT.



Auguste - Adolphe - Marie Billault was born at Vannes on the 12th of November, 1805. He passed the beginning of his career as a lawyer at Nantes, where he was in practice at the early age of twenty-three, and where he was so highly esteemed that he was called upon successively to occupy most of the posts of municipal honour of that important city. In 1837 he was chosen by the electors of Ancenis as their representative in the Chamber of Deputies, and shortly afterwards made his first memorable speech on the corrupt electional practices at that time existing in France. During the existence of the Thiers Ministry (1840) M. Billault distinguished himself as Under-Secretary for State, an office since abolished; and his progress as an orator became from that time rapid. In 1846 he was elected Deputy for Paris, but he still preferred sitting in the Chamber as representative for Ancenis. Throughout the agitation prevailing in Paris during the early days of 1848 he refused to take any part in the organisation of the Reform banquets, although he had been one of the most ardent denunciators of the corruption "that threatened to annihilate representative institutions."

After the revolution of February M. Billault took his seat among the moderate Democrats, and voted in favour of the banishment of the Orleans family. Subsequently to the coup-d'état he was elected Deputy for Saint-Girons, and was chosen as the first President of the Corps Législatif, in which capacity he contributed greatly to the re-establishment of the empire, remaining from that time one of the most devoted supporters of the Imperial Government. In 1854 he succeeded M. Persigny as Minister of the Interior, and was created Senator in the month of December of the same year. He was also a Grand Officer of the Legion of Honour.

The unexpected death of this talented Minister of State (which occurred on the 13th inst.) is

THE ISLAND OF DECIMA, IN THE BAY OF NAGASAKI.—FROM A DRAWING BY A JAPANESE ARTIST.

THE LIVERPOOL AND BIRKENHEAD NEW FERRY-STEAMER CHESHIRE.—SEE PAGE 447.

ment for answering the small but indefatigable Opposition in the Corps Législatif. His talent will be much missed in the forthcoming Session, wherein his oratorical abilities would have had to combat the arguments of Thiers, Berryer, Jules Favre, and the increased phalanx of the Opposition sent to the Chamber by the recent elections.

A few days after M. Billault's demise a long article in the *Moniteur* ably described the genius and the merits, from an Imperial point of view, of the deceased Minister of State, who was honoured with a magnificent public funeral at the expense of the nation, and interred in the family vault at the cemetery of Montparnasse on the 17th inst.

Our Portrait of the late M. Billault is from a photograph by MM. Mayer Frères and Pierson.

PARIS FASHIONS FOR NOVEMBER.

WITH the termination of the fine season, the round chapeaux Français Premier, Henri Quatre, &c., are now almost abandoned; and the bonnets announced in our last have made their appearance at the modistes' who influence the tone of the Parisian fashions. The chapeaux in question advance a little more in front than hitherto; otherwise the form remains unchanged, and their chief beauty lies in the elegance of their composition. One variety is composed of light satin, with plaid crowns and strings, and a large feather in front outside the bonnet. These bonnets are soft and rich in appearance; as are also another series in amethyst-coloured velvet, ornamented with dark bows and strings and feathers, of which two of different colours are often worn together.

For the remaining days of autumn the cannal is the outer garment most generally worn; those in Scotch plush are much in favour; but this material is not at all *de rigueur*, and the stuff employed may be of the same description as that of the robe, as shown in one of our Illustrations. A considerable number of cloaks and mantles have just made their début, amongst which may be mentioned the Caprice, the Incroyable, the Speranza, the Guise (shown in our second figure), and the Danilo.

The affection of the fair Parisiennes for Scotch patterns has not abated in the least, and plaids of all the clans known are met with at every turn. Poult de soie écossais, cloth écossais, ribbons écossais, plush écossais, and stockings and socks écossais are donned with an ardour that reflects honour on the taste of the Highlanders. It is impossible to make a promenade in Paris without being struck with the preponderance of the Scotch element so much in favour.

Before proceeding with the explanations of our Illustrations, we may refer to the new jupon multiform, of which the shape and size can be varied at will in five different manners, according to circumstances. The possibility of a lady walking arm-in-arm with a gentleman has been brought about by the invention of this complaisant jupon.

THE ILLUSTRATIONS.

Fig. 1. *Promenade Dress for a Young Lady.*—Robe of iron-grey foulard, ornamented with green ribbons disposed according to the design shown in our Engraving. The sleeve is small, but somewhat open, and trimmed on the cuff with narrower green ribbon. The cannal is of the same material as the dress, and the trimmings to match. Duck chapeau postillon, edged with velvet and decorated with a large velvet bow and two feathers, green and black.

Fig. 2. *Walking Dress.*—Slightly-training robe of green moire antique, trimmed merely with a row of black velvet buttons down the front. The principal feature of this costume is the *Montesa* Guise, one of the most elegant of the cloak novelties just brought out by the well-known establishment in the Rue de Richelieu; it is composed of velvet, with lace trimmings, and a passementerie ornament on each shoulder. The bonnet is in amethyst-coloured velvet, ornamented outside with white and amethyst feathers, and inside with white flowers and amethyst foliage.

Fig. 3. *Home Toilet.*—Robe of light grey mohair, having on the skirt a fluted flounce, trimmed with violet silk, and surmounted by a band of the same material. The vest is of violet cloth, ornamented with black passementerie trimmings. The waistcoat is composed of embroidered insertion, the cuffs being narrow, but also embroidered. The little collar is likewise in embroidery. The headdress consists merely of a violet *résille*, with a small bouquet of flowers of the same colour.

PARIS FASHIONS FOR NOVEMBER.

**** The charge for the insertion of Births, Marriages, and Deaths is Five Shillings for each announcement.*

BIRTHS.

On the 27th inst., at The Lowe, Eardiston, Worcestershire, Mrs. Clifford, of a daughter.

On the 3rd of August, at Kamptee, Central India, the wife of Captain F. H., Hanmer, Cantonment Joint Magistrate, of a son.

On the 21st of August, at Kurrachee, Scinde, the wife of Lawrence Mortimer Marescaux, Esq., manager of the Agra and U. S. Bank, of a son.

On the 28th inst., at St. Mary's-street, Bridgnorth, the wife of Charles John Cooper, Esq., of a son.

On the 4th inst., at No. 1, Place Lartigne, Sherbrooke-street, Canada, the wife of Captain Welch (late 93rd Highlanders), barrackmaster, of a daughter.

MARRIAGES.

On the 27th inst., at St. Mary's Church, Sandwich, by the Rev. G. W. Sicklemore, assisted by the Rev. E. N. Braddon, Vicar of St. Mary's, Alfred Gillow, Esq., of St. Nicholas, Thanet, to Eliza Anne, only child of Richard Joynes Emmerson, Esq., of Sandwich, and granddaughter of Admiral Sir Edward Harvey, K.C.B., Walmer, Kent.

DELICATE CHILDREN.—A Lady residing in a very healthy locality, at a short distance from Oxford, wishes to receive into her family TWO or THREE CHILDREN to bring up and educate with her own. They would receive the most careful, mental, and physical training, and their health and happiness would be promoted by every possible means. Their education, with strict reference always to their age and strength, would be systematically carried on under her immediate direction. Children requiring special care, from delicate health, or whose parents are abroad, would here meet with peculiar advantages. Address A. B. C., care of A. MacLaren, Esq., The Gymnasium, Oxford.

PUBLIC SCHOOLS' CLUB. Chairman—Sir C. W. C. De Crespigny, Bart. Members are informed that this Club is NOW OPEN, and the Committee formed.

A pamphlet is published, with 300 Engravings, as a guide to the stock in the Showrooms. It contains the weights and prices of silver spoons, forks, tea and coffee services and table plate, with particulars of ornamental plate for private use or presentation; also, of the best silver-plated manufactures, gold and silver watches, clocks, and jewellery. Gratis on application, and post-free to any part of the British dominions.

For the use of committees, a work is printed with large lithographic drawings of plate kept ready for presentation.

ANTIQUE FURNITURE, for Dining-room and Library, old oak, in good preservation, of a very choice character, suitable for mediæval decorations; the carvings are unique, chaste, and elaborate. The dining-room set consists of ten high-backed chairs, a pair of elbow chairs to match, large set of telescope dining-tables, with extra leaves, dumb waiter, &c., truly beautiful sideboard fitted with plate-glass back. Price of the foregoing, 68 guineas—half its value. The library set comprises an 8-ft. bookcase, six Gothic chairs, and a library table same style. On view at the BELGRAVIA FURNISHING COMPANY, 12, Sloane-street, Belgrave-square.

SECONDHAND FURNITURE.—A very favourable opportunity now occurs to secure TWO SETS of valuable FURNITURE, for drawing-room and dining-room, at a great reduction from its cost. The drawing-room is in handsome walnut, consists of all the necessary articles, including a magnificent walnut cottage piano, of extraordinary richness and brilliancy of tone, almost new; the dining-room set is in mahogany, and covered in morocco. Both in capital order. To effect an immediate sale, the price fixed is only 62 guineas and 33 guineas respectively, or 40 guineas without piano. Either will be separated. For further particulars, and to view, apply to Mr. READ, 12, Sloane-street, Belgravia.

FURNITURE, CARPETS, and BEDDING (CARRIAGE-FREE), see our ILLUSTRATED CATALOGUE, containing Prices and Estimates for Furnishing Houses of different classes, which will be forwarded gratis. JAY'S MANUAL of FASHION.—Messrs. Jay have to express their great regret that the delivery of the "Manual" has been delayed several days later than was promised by their publisher, but they are daily expecting the books from Paris. The addresses of all applicants have been carefully preserved, and Messrs. Jay will have the honour to forward the "Manuals," free of expense, immediately after their arrival in London.
247, 249, Regent-street.

BONNET'S SILKS, à LYON.—Every article of commerce takes its title either from the inventor or manufacturer, and the more perfect the production the greater is the credit which attaches to the originator. Bonnet's Silks are said to be incapable of identification in England; but the fallacy of such an assertion is exposed by the very trade mark of the firm, as exhibited by Messrs. JAY, of Regent-street. The following interwoven mark may be seen at the end of each piece: "Manufacture de C. J. Bonnet et Cie., à Lyon et à Injurieux." Wear guaranteed.

LANA CRAPE.—This Texture is very Delicate, but Strength and Durability are its essential recommendations. For cheapness no other material in Mourning can compete with it.—The LONDON GENERAL MOURNING WAREHOUSE, 247, 249, 251, Regent-street.

MILLINERY for MOURNING.—JAY'S, 247, 249, and 251, Regent-street.

STARCH MANUFACTURERS
TO H.R.H. THE PRINCESS OF WALES.
GLENFIELD PATENT STARCH, used in the Royal Laundry, and awarded the Prize Medal, 1862.

DR. DE JONGH'S
(Knight of the Order of Leopold of Belgium)
LIGHT-BROWN COD-LIVER OIL,
prescribed by the most eminent Medical Men throughout the world as the safest, speediest, and most effectual remedy for
CONSUMPTION, CHRONIC BRONCHITIS, ASTHMA, COUGHS, RHEUMATISM, GOUT, GENERAL DEBILITY, DISEASES OF THE SKIN, RICKETS, INFANTILE WASTING, AND ALL SCROFULOUS AFFECTIONS,
is incomparably superior to every other variety.

SELECT MEDICAL OPINIONS.
Sir HENRY MARSH, Bart., M.D.,
Physician in Ordinary to the Queen in Ireland.
"I consider Dr. DE JONGH'S Light-brown Cod-liver Oil to be a very pure Oil, not likely to create disgust, and a therapeutic agent of great value."

DR. GRANVILLE, F.R.S.,
Author of the "Spas of Germany."
"Dr. Granville has found that Dr. DE JONGH'S Light-brown Cod-liver Oil produces the desired effect in a shorter time than other kinds, and that it does not cause the nausea and indigestion too often consequent on the administration of the Pale Oil."

EDWIN CANTON, Esq., F.R.C.S.,
President of the Medical Society of London, &c., &c.
"For several years past I have been in the habit of prescribing Dr. DE JONGH'S Light-brown Cod-liver Oil, and find it to be much more efficacious than other varieties of the same medicine which I have also employed with a view to test their relative superiority."

DR. DE JONGH'S LIGHT-BROWN COD-LIVER OIL is sold only in Imperial half-pints, 2s. 6d.; pints, 4s. 9d.; quarts, 9s.; capsuled and labelled with his stamp and signature, WITHOUT WHICH NONE CAN POSSIBLY BE GENUINE, by respectable Chemists and Druggists.
SOLE CONSIGNEES,
ANSAR HARFORD and CO., 77, STRAND LONDON, W.C.

ASTHMA SPECIFIC.—DATURA TATULA. By immediate contact with the air cells and passages the fumes of this plant afford instantaneous relief. The remedy is adapted for use by all patients. Introduced into this country, and prepared only by SAVORY and MOORE, Chemists to her Majesty and H.R.H. the Prince of Wales, 143, New Bond-street; 29, Chapel-street, Belgrave-square; and 1, Lancaster-terrace, Hyde Park, London.

PHILOSOPHERS ON LIFE.—Wise men are often impressing upon people the worthlessness of life without health, but having led us into the wood they leave us to find our own way out. Health can easily be preserved and life rendered an inestimable blessing by using DR. LANG'S ESSENTIAL SPIRIT OF MELISSUS. Its restorative effects are unequalled. Sold, in 1s. 9d. and 3s. 6d. Bottles, by all Patent Medicine Venders throughout the country. Directions for use on wrapper.

MORSON'S PEPSINE WINE is a perfectly palatable form for administering this popular remedy for weak digestion. Manufactured by T. Morson and Son, 19 and 46, Southampton-row, Russell-square, W.C., in Bottles at 3s., 5s., and 10s each.

WANTED, LEFT-OFF CLOTHES, Uniforms, Jewellery, Miscellaneous Property, &c., of every description Purchased to any amount by Mr. and Mrs. DAVIS, 2, Crawford-street, Baker-street, W. Ladies and gentlemen waited on, or, parcels sent, P. O. orders remitted. Established 60 years.

BOOSEY and SONS, Holles-street.

THE ST. JAMES'S ALBUM FOR 1864 will be published on the 1st of November, beautifully bound and illustrated, price one guinea. Subscribers to Booseys' Musical Library receive this handsome volume gratuitously.

CLARIBEL.—YOU AND I. The immensely-successful Tenor Song, by Claribel, author of "Janet's Choice," "Maggie's Secret," &c. Price 3s.
BOOSEY and SONS, Holles-street.

CLARIBEL.—FIVE O'CLOCK IN THE MORNING. Ballad. By Claribel, author of "Janet's Choice," "Maggie's Secret," &c. Fourth Edition.
BOOSEY and SONS, Holles-street.

BOOSEYS' 250 CHANTS (Single and Double) for Voice, Pianoforte, Organ, or Harmonium. Price 1s.

BOOSEYS' 50 SHORT VOLUNTARIES for the HARMONIUM from the works of the great Masters. By NORDMANN. Price 3s. 6d., cloth.

BOOSEYS' SHILLING TUTORS for PIANOFORTE, Ladies' Voices, Male Voices, Harmonium, English Concertina, German Concertina, Flute, Violin, Cornet-à-Pistons. All full size, 24 to 36 pages each. These works, of unprecedented utility and popularity, are edited by the most eminent living professors—viz., J. L. Hatton, George Mount, George Case, Stanton Jones, R. S. Pratten, and R. Nordmann. Also Czerney's 50 Best Exercises, 1s. each; Czerny's 101 Exercises, two books, 1s. each; Czerney's Etude de la Vélocité, in three books, 1s. each; Bertini's 25 Celebrated Studies of 29½ books, 1s. each; Herz's Exercises, Scales, and Chords, 1s. each. All post-free, 1s. 1d. each.
BOOSEY and SONS, Holles-street.

BOOSEYS' MUSICAL LIBRARY.—The Subscribers to this Library have a larger and a better supply of Music than is to be obtained at any similar establishment in London, besides receiving gratuitously at Christmas the St. James's Album—a guinea illustrated album of new music. Subscribers paying Two Guineas per annum have the use of 12 pieces or books in town, or 20 pieces in the country. Full particulars gratis from
BOOSEY and SONS, 28, Holles-street, London.

SYDNEY SMITH'S THREE NEW PIECES.

Fandango	4s.
Danse Napolitaine	4s.
Chanson Russe	4s.

ASHDOWN and PARRY, 18, Hanover-square, London; and may be had of every Musicseller in Great Britain and Ireland, India, and the Colonies.

SYDNEY SMITH'S LA HARPE EOLIENNE, played by the Composer at his pianoforte recitals at the Crystal Palace upwards of 400 times with enormous success. Price 4s.
ASHDOWN and PARRY, 18, Hanover-square.

SYDNEY SMITH'S LE JET D'EAU, played by the Composer at the Crystal Palace with unbounded applause. One of the most popular pieces of the day. Price 4s.
ASHDOWN and PARRY, 18, Hanover-square.

SYDNEY SMITH'S FAIRY WHISPERS, played by the Composer at the Crystal Palace. A remarkably finished, pleasing, elegant, and effective piece. Price 4s.
ASHDOWN and PARRY, 18, Hanover-square.

SYDNEY SMITH'S MORNING DEWDROPS, played by the Composer at the Crystal Palace. A most charming composition, rich in beautiful and luscious melody. Price 4s.—ASHDOWN and PARRY, 18, Hanover-square.

SYDNEY SMITH'S DEUXIÈME TARENTELLE. Played by the Composer at the Crystal Palace. A thoroughly vigorous, dashing, brilliant, and telling piece. Price 4s.—ASHDOWN and PARRY, 18, Hanover-square.

SYDNEY SMITH'S GAIETÉ DE CŒUR. Grand brilliant Waltz. Played by the Composer at the Crystal Palace. A spirited, exhilarating, and exceedingly graceful composition. Price 4s.—ASHDOWN and PARRY, 18, Hanover-square.

SYDNEY SMITH'S MASANIELLO. A clever, bright, attractive piece for the Piano, on the best Airs in Auber's picturesque and splendid Opera. Price 4s.
ASHDOWN and PARRY, 18, Hanover-square.

SYDNEY SMITH'S FEU DE JOIE. One of the most recent and successful pieces by this unrivalled Pianoforte Writer. Price 4s.
ASHDOWN and PARRY, 18, Hanover-square.

SYDNEY SMITH'S UNE PERLE DE VARSOVIE. Polonaise. A perfect specimen of the quaint and thoroughly characteristic Polish dance. Price 4s.
ASHDOWN and PARRY, 18, Hanover-square.

SYDNEY SMITH'S L'OISEAU DE PARADIS. A most original and admirable piece. "Elegant, brilliant, refined, and beautiful." Price 4s.
ASHDOWN and PARRY, 18, Hanover-square.

GANZ'S QUI VIVE! Grand Galop. "One of the most popular and brilliant pieces of the season." Illustrated London News. 12th edition. Price 4s.
ASHDOWN and PARRY, 18, Hanover-square.

KUHE'S "BRITANNIA" and "VICTORIA." Two new grand brilliant Fantasias on the National Airs of England, "Rule Britannia" and "God Save the Queen." The best and most successful pieces by this popular Composer. Price 4s. each.
ASHDOWN and PARRY, 18, Hanover-square.

SING, BIRDIE, SING. GANZ'S popular Song, sung by Mdlle. Parepa at the Crystal Palace and other concerts, with unparalleled success. Price 3s.
ASHDOWN and PARRY, 18, Hanover-square.

TO THEE ALL ANGELS CRY ALOUD! A Sacred Rêverie for the Piano. 2s. 6d. "Eva's Dream." A Nocturne. 2s. "Can'st thou, O Harp." A Song. 2s. By C. O'GRADY. JEFFERYS, 21, Soho-square.

NEW MUSIC.

NEW SONG, THE OAK AND THE SAPLING, composed by HENRY SMART. Price 2s. 6d. (sent at half price). This is one of the most successful songs of the season it is universally admired. Compass from D to E.
DUFF and HODGSON, No. 20, Oxford-street.

W. VINCENT WALLACE'S SONGS. "Old Friends and Other Days," "Thou wilt come back again," "Remember and Forget." Price 2s. 6d. each (sent at half price). The gifted Composer of "Maritana," "Lurline," &c., has added to his fame by the production of the above three Songs, which are perfect gems. DUFF and HODGSON, 20, Oxford-street.

BOOSEYS' MINIATURE PIANOFORTE, price 17 guineas, in walnut, French polished:—"We have had occasion to examine a new description of Pianoforte manufactured by Boosey and Sons, which combines quality and cheapness in a degree which has not previously been ever attempted. When heard it creates such surprise as would be caused by a child 'discoursing most eloquent' music with the voice of a full-grown man. It has a rich, brilliant tone, quite strong enough to fill the largest drawing-room; and the whole mechanism of the instrument seems to be firm and durable. No piano at so small a price has ever before been presented to the public."—Vide ILLUSTRATED LONDON NEWS, Feb. 28, 1863. This Piano is well adapted for the cabin of a ship or an extreme climate.—Boosey and Sons, 24, Holles-street, London.

PRATTEN'S SEVEN-GUINEA PERFECTED CYLINDER FLUTE, old system of Fingering. This Instrument, the result of many years' experiments, possesses all the reputed advantages of the Cylinder Flute on Boehm's and other principles, without changing the familiar Fingering of the old 8-keyed Flute, in addition to which, through Mr. Pratten's ingenious improvements in its construction, the manufacturers are enabled to produce this instrument at one third of the expense of any cylinder flute hitherto sold.
An Illustrated Prospectus may be had on application to the manufacturers, BOOSEY and SONS, 24, Holles-street, London, W.

SECONDHAND PIANOFORTES. CHAPPELL and CO. have a large Stock of SECONDHAND PIANOFORTES for Sale, by BROADWOOD, COLLARD, ERARD, &c., &c., that have been hired for the season, at very reduced prices. Also, new Instruments of every description.—Chappell and Co., 50, New Bond-street.

PIANOFORTES at CHAPPELL'S.—The largest Stock in London, by Broadwood, Collard, Erard, &c., for Sale or Hire.—50, New Bond-street.

CHAPPELL'S FOREIGN PIANINO (the only Pianino to which the Prize Medal was awarded).—A very elegant Pianoforte, of small size, the full compass, check action, and most perfect touch, admirably adapted to small rooms, yachts, boudoirs, &c. Warranted to keep in tune, and to be the best and cheapest Pianoforte, with check action and all the latest improvements.
Price, in mahogany, rosewood, or walnut, 25 and 26 guineas. A great variety may be seen at
Chappell and Co.'s, 50, New Bond-street.

CHAPPELL and CO.'S ENGLISH MODEL COTTAGE PIANOFORTE.—To amateurs preferring the pure English tone of the Broadwood or Collard quality, the English Model will be found the most perfectly satisfactory instrument, at a moderate price. The action is of the same simple description as the above makers', and therefore especially adapted to the country, where the more complicated actions are objectionable to many of the tuners. In elegant rosewood case, with full fret, similar in every respect to other instruments at 50 guineas, price 35 guineas; in walnut, 40 guineas.
Chappell and Co., 50, New Bond-street.

CHAPPELL'S FOREIGN MODEL PIANOFORTE, price 50 guineas in rosewood; or in walnut, 60 guineas. This Instrument has Three Strings and the fullest grand compass of Seven Octaves. It is strengthened by every possible means to endure the greatest amount of wear, and to stand perfectly in any climate. The workmanship is of the best description; the tone is round, full, and rich; and the power equal to that of a Bichord Grand. The touch is elastic, and the repetition very rapid. No pianoforte, in all respects comparable, has hitherto been made in England at the same price. Every instrument will be warranted, and (if desired) exchanged within six months of the purchase.
Chappell and Co., 50, New Bond-street.

BROADWOOD, COLLARD, and ERARD. The best Pianofortes of every description, including all the newest kinds by these celebrated makers, may be tried side by side (and hired with option of purchase) at the new Showrooms of
CHAPPELL and CO., 50, New Bond-street.

ALEXANDRE'S DRAWING-ROOM MODEL HARMONIUM, the best that can be made, price 60 guineas; other varieties at 25 and 35 guineas. Illustrated Catalogues of Pianofortes and Harmoniums upon application to
CHAPPELL and CO., 50, New Bond-street.

SIX-GUINEA HARMONIUM by ALEXANDRE, with five octaves, two footboards, and in oak case. These instruments are lower in price and superior to all other cheap harmoniums. Descriptive lists on application to
CHAPPELL and CO., 50, New Bond-street.

SECONDHAND HARMONIUMS, by ALEXANDRE, nearly (if not quite) as good as new, at greatly-reduced prices, at CHAPPELL'S, 50, New Bond-street.

ALEXANDRE'S PRIZE EXHIBITION MODEL HARMONIUM, for the CHURCH, 13 stops, 4 rows of vibrators, and Venetian swell, worked by the heel of the right foot, in oak case, 32 guineas. A large assortment may be always seen at CHAPPELL and CO.'S, 50, New Bond-street.

CRAMER'S PIANOFORTE GALLERY, 207 and 209, Regent-street (the largest in Europe). The most varied selection of Pianofortes are to be found in this Gallery.
The quality of every instrument may be relied upon as at least equal to representation. Pianofortes of the very inferior class are carefully excluded from the stock. Every facility is afforded to exchange, without loss to the buyer, any time within six months, should an instrument of a higher class, or by a different maker, be thought desirable.
Pianofortes by every maker of eminence will be found in the Gallery.

CRAMER'S NEW 7-OCTAVE SEMI-OBLIQUE PIANOFORTES. Price 45 guineas in Rosewood, and 50 in Walnut.
In introducing this Instrument prominently to the notice of the public, Cramer and Co. may be permitted to observe that it is alike remarkable as regards power and quality of tone, firmness and elasticity of touch, durability of tuning, and the capacity to develop its resources. The tone may be forced by the powerful finger of the artist, or drawn out by the less-accustomed hand of the amateur; in the one case there is no harshness, and in the other its charmingly vocal qualities are produced with little effort.
The action, or mechanism, is of the very best description, being somewhat similar in its principle of construction to that of the semi-grand. The stringing is complete, there being three wires to each note, like the full grand.
Cramer and Co. guarantee these Instruments for any reasonable length of time, and forward them to all parts of the country without risk to the purchaser and at a very trifling cost.
Pianoforte Gallery, 207 and 209, Regent-street
(the largest in Europe).

CRAMER'S ENGLISH PIANETTE 22 guineas.—Cramer and Co. manufacture this capital small instrument. It has all the requisites of the best Pianoforte—check action, solid touch, agreeable tone. The case is of polished ash or pine. In practising on this Pianoforte the fingers of the player will be strengthened much more rapidly than on an old instrument, loose in the key and worn in the hammer. In rosewood, 25 guineas; in walnut, 26 guineas.
Purchasers are particularly requested to observe that this instrument has not the common or single action, but the double or check action; and that Cramer and Co. are the only manufacturers of it in England.—207 and 209, Regent-street.

CRAMER'S INDIAN PIANOFORTE. CRAMER and CO. manufacture for India a superior COTTAGE PIANOFORTE, in solid Mahogany, with metallic bracings and all other appliances necessary to resist the effect of extreme climates. Nothing has been left solely to the glueing. The mechanism of the Instrument as well as the Case has been secured throughout by screws. Unusual skill and attention have therefore been bestowed upon the manufacture, and they have obtained the highest commendations for their excellent quality of tone and durability.
Cramer, Beale, and Wood deliver these Instruments f.o.b., packed in cases lined with zinc, at any home port, for 50 guineas. Size:—Height, 3 feet 11¼ inches; width, 4 feet 4¼ inches; depth, 2 feet 1¼ inch.
Universal Pianoforte Gallery, 207 and 209, Regent-street, London.

CRAMER'S ARTIST'S CONCERTINA, selected by Richard Blagrove. In purity of tone, delicacy of touch, noiseless rapidity of articulation, and general perfection of mechanism these instruments are altogether unrivalled. The vibrators are of tempered steel, and retain their perfect tuning in any climate. Price 12 guineas, including case.
J. B. Cramer and Co., 201, Regent-street.

ENGLISH CONCERTINAS, by LACHENAL, Full Compass, with all the latest Improvements, warranted for Hot Climates, and to keep well in Tune, from Two guineas, with Case, Lock and Key, &c.
HOPWOOD and CREW, 42, New Bond-street.

THE WEDGWOOD MEMORIAL INSTITUTE IN COURSE OF ERECTION AT BURSLEM, STAFFORDSHIRE.

On Monday the Chancellor of the Exchequer laid the first stone of the Wedgwood Memorial Institute, at Burslem, Staffordshire. The right hon. gentleman delivered an elaborate address, in which he eloquently expounded the lesson of Wedgwood's remarkable life, and urged a more thorough association of art with utility, especially in ceramic manufactures. We give in our present Number a View of the intended building, and next week we shall illustrate and describe the ceremony of laying the foundation-stone.

The building is intended for the use of a school of art, a free library, and a museum, and was designed by Mr. G. B. Nichols, architect, of Westbromwich, under whose direction and superintendence the works are being carried out. The situation of the building is in Queen-street, opposite the pottery works of Messrs. Cork, Edge, and Co., the main front extending to about 100 ft.

The style adopted by the architect is Italian, of the Renaissance

VIEW OF MURREE, ONE OF THE SANITARIUMS IN INDIA, FROM THE OBSERVATORY HILL.—SEE NEXT PAGE.

period. The main front is divided into three portions—a centre, with two corresponding wings. The centre, by its construction and ornamentation, gives a clear, distinct expression to the building that its purpose may be observed at a glance. While, however, the external appearance has been the object of careful study, in no case has it been suffered to interfere with the convenience or harmonious working of the interior. The purposes of the museum or exhibition-room, requiring a top light, the lateral walls thus occurring in the centre has been rendered subservient to the general effect by a judicious and liberal employment of ornamental features.

The central portion of the building is subdivided into three portions by two coupled columns. In the centre is the principal entrance, deeply recessed and boldly moulded, and flanked on each side by three-quarter columns. The other compartments are occupied by coupled pilasters with carved capitals. Above these is placed the cornice dividing the two stories of the building. Surmounting the doorway is an arched tympanum, with a full-sized coat of arms, sculptured, and carved imposts and key.

The system is intended to illustrate the potters' art, for which Burslem and its locality has obtained such celebrity. In the side compartments are two panels and medallions; the former to contain figures and arabesques in relief; the latter to be heads of Michael Angelo and Shakspeare, as representatives of Literature and Art. These compartments are divided by pilasters terminating in Corinthian capitals, and enriched with festoons of fruit and flowers. Upon these pilasters rests the main cornice, which has a bold projection so as to cast a broad shadow over the frieze. Above the centre of the cornice is a pediment in which is placed a large medallion of Wedgwood, of whose useful life the building is a memorial.

The general arrangement of the plan, considering the position and limited area of the site, reflects great credit upon the skill and ability of the architect.

The building, though exceedingly handsome, is likely to be still further decorated and beautified by a more extensive introduction of mosaics, della robia, terra-cotta, &c., than at present proposed in the architect's design.

MURREE, INDIA.

THE sanitarium for our troops is pleasantly situated on a hill between the Rivers Indus and Jhelum, in the Punjaub. It was established in 1851, and has already attracted a considerable population. The elevation of the station above the sea is 5000 ft., or, according to another authority, 7000 ft. It is resorted to in the hot weather by the lieutenant-Governor and most of the higher officials in the Punjaub, besides numbers of the military. Numerous visitors pass through it en route to Kashmere, and it is on the high road to Cabul Proper. Its scenery is very beautiful, and the wild flowers in the spring are lovely, especially the wild roses, which, after a shower, spring up under the sky. Black Rock, a short distance from it, is famous for bear-shooting. Murree boasts of a club, reading-room, and public ballroom, and in the season is very gay—archery, picnic, concert parties, and balls being the prevailing amusements. It has also a pretty English-looking church, besides a chapel which has been erected by subscription chiefly for the use of the soldiers. There are barracks for about four hundred British soldiers, which are occupied during the hot season by invalids from the various Royal regiments quartered in the Punjaub.

Our view of Murree is from a photograph taken from the Observatory Hill.

The Lawrence Asylum, of which we gave an Engraving last week, is built on a spur of the hill on which Murree stands.

MEETING OF SETTLERS AND MAORIS AT HAWKE'S BAY, NEW ZEALAND.

THE Engraving on page 436 represents a large meeting of the European and Maori inhabitants of the province of Hawke's Bay, New Zealand, held at the Pah Whakairo, a native village, about ten miles from Napier, on the 20th of July last. It is taken from one of the views of the meeting photographed by Mr. Charles H. Robson.

Mr. Governor Gouverneur Cornwall Browne has obligingly furnished us with some particulars of the meeting, and of the condition and general conduct of the Maoris in that settlement, at the junction of the two interests.

Throughout the whole of the disturbances, so frequent of late years in New Zealand, it says that the natives of that part of the province have always maintained the strictest neutrality and evinced an earnest desire to cultivate the goodwill and friendship of the settlers. Even in times of strife and bloodshed their conduct has ever been marked by an anxiety to respect the lives and property of their white neighbours. This feeling was strongly evinced in the year 1857, when, during the feud between the Hapukn and the Moonauui, two rival chiefs in that province. At the period alluded to the contending parties were often hard-pushed for provisions, the sheep and cattle of the settlers grazed quietly in the vicinity of the fighting-ground, and not a single one was ever known to be missing; and the settlers themselves were earnestly warned to avoid approaching too near the contending parties while engaged, lest some one might be hurt by a stray bullet. This feud quarrel had its origin in disputes and jealousies arising from the sale by one of the chiefs in question of blocks of land to the Government, which, according to native custom, implicated the Government also, as the purchasing party. The enmity, however, towards the settlers on that occasion certainly evinced a remarkable degree of forbearance for men of untutored minds.

At a later date, when the Kauaka King movement was fast gaining ground, and many tribes were pledged to its support, these people, although professedly in favour of the movement, generally maintained their resolution to preserve peaceful relations with their European neighbours. And at the present time, when the Waikato, whilst the powerful and warlike tribes of the Waikato, with whom the King movement originated, are at war with the Government, and their emissaries continually traversing the country, exciting and urging the tribes to revolt, the people of Hawke's Bay remain steady to their resolution to preserve peace in their own district, and publicly declare that, although morally supporting the confederation of the tribes for the maintenance of their nationality, they will, if necessary, resist by force any attempt of other tribes to disturb the peace of the province.

The meeting represented in our Engraving was called for the purpose of celebrating the completion of a large flour mill erected by the natives of the district, with the assistance of the Government, at the Pawhakairo village. The Europeans were invited to attend so as to afford each party an opportunity of expressing to the other their doubts and fears in the present aspect of affairs in the country. A large company assembled, amongst whom were many ladies and gentlemen from the town of Napier, and Donald M'Lean, Esq., the Superintendent of the Province. This gentleman was for many years at the head of the Native Department, and is a most popular Government of the colony, and is a man of great experience in all matters affecting the natives. Possessing the entire confidence of both races, and a perfect knowledge of the Maori language and character, no man could be better adapted to allay the feelings of distrust naturally awakened in the minds of such a brave and warlike people by the stirring events passing in other parts of the colony.

Many chiefs, representatives of various tribes, addressed the meeting, and all expressed their unaltered determination to live in peace and amity with their white neighbours. The steps and the measures then being taken by the local Government gave them much uneasiness. "Why," said they, "are stockades being erected and men being drilled? There can be no necessity for these preparations here. We have always your friends, and you ours. Why then should you cause to be suspicious of us, nor have we ever mistrusted you; but now we are in doubt as to the meaning of these proceedings." They were answered by his Honour the Superintendent, who informed them that the militia were called out pursuant to instructions from the Governor; that this was usual amongst Englishmen in every country, even in times of peace; that it had already been done in every other province in the island; that warning letters were continually being received from loyal natives in other districts of pre-dilated attacks upon the town of Napier by the Waikatos, now in arms against the Government, together with other disaffected tribes; and that the stockades, therefore, and all the other preparations, had no reference whatever to them, but were merely precautionary measures to guard against threatened incursions of hostile tribes. His Honour spoke at some length on the subject, and said that the natives were fully satisfied, and a paper was subsequently drawn up by them, the speeches of the chiefs, was afterwards published in a local newspaper, printed in the Maori language, called the *Waka Maori o Ahuriri*, or the "Maori Canoe of Ahuriri."

The gentleman near the centre of our Engraving, with his head uncovered, is Mr. M'Lean, the Superintendent of the province, and his first address to the meeting. Mr. M'Lean is seated in a wheelbarrow, in which he had been conveyed to the spot, being unable either to walk or to stand from the effects of rheumatism. He is about to address the meeting, and, in doing so, expressed his heartfelt pleasure at seeing so many of his white friends assembled on that occasion, in a spot which he opened his speech, that the Maoris had only a few years ago been considered as the head-quarters of rebellion. He then proceeded to say that the object of the meeting was to celebrate the completion of a flour mill, which had been preserved from total extinction as a people by the introduction of the wheat, and the consequent cultivation of calabashes containing "this"—small birds, cooked and preserved in their own fat. These birds are considered by the natives as an article of diet. They are very rich and luscious. The pillars in the background are specimens of uncouth carving, common in all forest houses around the settlement.

During the course of the day the meeting adjourned for the purpose of partaking of the refreshments provided by the natives for their European friends.

The proceedings of this meeting cannot be too highly estimated at the present juncture of affairs in the colony. There can be no doubt it had its due effect upon other tribes. Some examples of the tribes in rebellion were present, and it is to be hoped that the report which they made to their own people of the peaceful resolves of the Hawke's Bay native had the effect of somewhat damping their ardour of rebellion.

The province of Hawke's Bay is one of the principal grazing districts in the colony: it possesses abundance of fine agricultural land, and has a climate proverbially mild and healthy. Its native population is about 3600, and the European population about 2000.

THE ALEXANDRA PARK COMPANY'S SEAL.

OUR Illustration represents the Seal of the Alexandra Park Company, from a design by Mr. John Gilbert. In addition to the several features which have been already described to the public in the interior of the building, we understand that they are about to construct a capacious cricket-ground, with suitable pavilion, archery-ground, tricket and tennis courts, and a large gymnasium after the plan of the celebrated M. Triat, of the Avenue Montaigne, at Paris. A thousand-yard volunteer range is also contemplated. We are not understand why the directors have adopted as the motto of their seal—"Health and rational recreation,"—which words, if we mistake not, were used by Sir Charles Phipps in a letter which he recently wrote by command of the Queen when expressing the Royal approval of the movement to amend Prince Consort had in opening the park for the people at Aston Hall.

"THE BATTLE OF AGINCOURT."—BY J. GILBERT.

THE drawing we have received, although designed expressly for this Journal, may be taken as a pendant or companion to the Engraving we gave some time since from the remarkably impressive drawing by the same accomplished artist, "The Burial of the Black Prince," exhibited in the last Winter Exhibition of the Society of Painters in Water Colours. This is the triumphant sequel to that gorgeously-sombre, cold, grim October dawn, breaking upon the little English band, apparently marked for the carrion crows sailing overhead, and discovering every man anxious and prayerful, but stanch and resolute, though it may be with the resolution of despair. This is the solemn moment of thanksgiving for a victory which, with Crecy and Poictiers, Blenheim and Ramillies, Trafalgar and Waterloo, will be for ever memorable in English annals.

Mr. Gilbert obviously conceived this subject from Shakspeare's "King Henry V.," the play from which the artist adopts a portion of his motto. No more especial illustration is to be found in the former drawing. We, therefore, give a part of scene 7, from the same drama, descriptive of the incident for the commemoration of which the French herald, "enters" a third time to the King and his Captains; having before the commencement of the battle twice been sent by the Constable of France, and in the name of Charles VI. (though neither the French King nor the Dauphin ventured to join the army), insolent demands to surrender, and for the payment of ransom.

Exeter.	Here comes the herald of the French, my liege.
Bedford.	His eyes are humbler than they used to be.
King Henry.	How now! what means this, herald? know'st thou not That I have fined these bones of mine for ransome? Com'st thou again for ransome?
Montjoy.	No, great King: I come to thee for charitable license, That we may wander o'er this bloody field To book our dead, and then to bury them; To sort our nobles from our common men; For many of our Princes (woe the while!) Lie drench'd and soaked in mercenary blood So do our vulgar drench their peasant limbs In blood of Princes; and their wounded steeds Fret fetlock deep in gore, and, with wild rage, Yerk out their armed heels at their dead masters, Killing them twice. O, give us leave, great King, To view the field in safety, and dispose Of their dead bodies!
King Henry.	I tell thee truly, herald, I know not if the day be ours or no; For yet a many of your horsemen peer, And gallop o'er the field.
Montjoy.	The day is yours.
King Henry.	Praise be God, and not our strength, for it!

This is the moment chosen by the artist. Overhead with the fearful odds of one to six must, indeed, have appeared even to the great grandson of Edward III. something almost miraculous.

It is but natural that French historians of all ages should explain the victory of Agincourt, the anniversary of which took place on the 25th inst., in a way to give the slightest wound to the national vanity of our always brave allies: and much of the apparent marvel of it is certainly to be explained away. Nevertheless, only the victorious pen of a Thiers will ever add Agincourt to Waterloo as among the number of what should properly be considered French victories. In the mean time we are content to accept the particulars of the "*Histoire d'Aincourt*" from existing Gallican authorities. Henri Martin, in his "Histoire de France," says that the English Army numbered from thirteen to fourteen thousand; the French, without the *valetaille* or grooms, &c., fifty thousand, of whom fourteen thousand were knights or "lances nobles;" the rest—and Martin quotes the "Religieux de Saint Denis"—were but a pack of bandits and "batards." These estimates are the highest for the English and the lowest for the French hitherto recorded. Various causes are assigned for the disaster. Although the English had been long famishing, they had on the night immediately preceding the battle better shelter and better fare in a neighbouring village than the French in the open plain. John Bull has the reputation abroad of being to this day unable to fight unless he is well fed. The field of Agincourt was a narrow plain with woods on each side, and the French, unable to deploy their immense force, could not charge in close order, but were obliged to form three lines of battle—one behind the other. The Constable's authority was merely nominal. Few of the Captains preserved any traditions of the tactics of the Du Guesclins and Clissons of a past age. When the young nobler, certain of victory, cared neither to command nor obey but rushed madly to the charge. The gentry of the French cavalry, which was to have decided the fate of the day by taking the English in flank, were stopped from the soft state of the ground: the horses could only wade slowly through the mud; many fell in heaps, and when down were unable to rise in the furrows of the newly-ploughed ground. Archers, crossbowmen, and hardly-armed footmen of the French centre could hardly move for the same reason. Exposed to the volleys of arrows poured upon them by the English archers, they were obliged to lower their heads to prevent the arrows penetrating the holes in the visors. The front rank of the compact mass of men that gained the English line were impaled on the stakes pointed at each end, which the archers carried and planted before them; or, too much terrified to face the long arrows, struggled back upon their comrades, among whom their wounded and furious horses spread a frightful disorder. The English archers, without the same overwhelmance of armour, for many of them were half-naked, advanced steadily, shooting as they went, and using the cutlasses that hung at their enemies, fell upon them with sword and battle-axe, fighting, killing, and taking prisoners, at in reality a great advantage, notwithstanding the immense disparity of numbers. All advantage from similar causes befel the second and the third line of the French, notwithstanding that they fought bravely and obstinately. At the English were preparing for the charge of the third line the alarming intelligence arrived that a powerful force was approaching the rear of our army. In this hurried emergency Henry instantly gave orders that all the prisoners should be put to death; orders which were, unfortunately, too promptly executed before it was discovered that the supposed force was only a few hundred neighbouring villagers, who had collected to plunder the slaughtered French.

During the day the King's life was frequently in imminent danger. Seeing his brother, the Duke of Clarence, wounded and lying on the ground, he stood by him, and with his battle-axe severely repelled each of the assailants till the Prince was safely removed by his own servants. Soon afterwards he was struck by eighteen French knights, who, according to St. Remi, as eye-witness, had bound themselves by oath to strike off the crown which the monarch wore on his casque or die in the attempt. They so far succeeded that one of them struck off one of the fleurons of the crown, but they were all slain. The Duke of Alencon, the constable of the French line, fell by the hand of the Royal standard. With one stroke he beat to the ground the Duke of York; and as he stooped to complete his work, with a second he severed the crown on the King's helmet. Every arm was instantly upraised against him. "Kill not the King," he cried, exultingly; "I yield: I am Alencon." Henry held out his hand, but his gallant enemy had already fallen. There should be some notable personages among the slain near the King in our Engraving.

Never has the French noblesse sustained a disaster comparable with Agincourt. Orcy, Fourciers, Courtrai were all surpassed. Among the 10,000 slain were numbered the Dukes of Brabant, Bar, and Alencon, the Archbishop of Sens, the Constable and Admiral of France, thirteen earls, ninety-two barons, and 1500 knights, esquires, and gentlemen. Among the 14,000 prisoners (a larger number than the whole army of the English) were the Duke of Orleans and Bourbon, the Counts of Eu, Vendôme, and Richemont, the Marshal Boucicaut, and the Sire de Rambures (who commanded 6000 of the principal cavalry. The English lost, according to St. Remi, the most credible authority 1600, including the Duke of York, the Earl of Suffolk, and some twenty other nobles.

FINE ARTS.

THE second number of the *Fine Arts Quarterly Review* is of much more general interest than the first. The article by Mr. Scharf upon is specially worth reading at the present moment, as it draws a comparison between the management of the Parisian Salon of 1863 and that of our exhibition, the Royal Academy, very much, certainly, to the disadvantage of the latter. In France the Government charges the artist for the space allotted to his pictures, and the sale results are the rendering the utmost possible justice to the artists. All have an equal chance of being seen, and the Emperor, the Minister, and the receipts, after the payment of expenses, do not go to swell the savings of a small corporation, but are devoted to the purchase of pictures from the current exhibition, and to the formation of a gallery for the French National Gallery. The Rev. C. Kingsley has an article on Mdme. Heuriette Browne's picture of "The Sisters of Charity," which is perhaps more worthy for the general remarks on high art and the disputes between the "realists" and the "ideals" than for the criticisms on the picture of the Royal Academy Commission, and Mr. Palgrave one on "The Pretty and the Beautiful." The first is useful, though trimming; the second suggestive, though constantly inclining to exaggeration. A notice of Mulready, a curious paper on Francesco da Boiogna (transcribed from Vasari), and a correspondence (London), together with a memorial of contemporary art, reviews of books and prints, and instalments of *Notes-and-Queries* of Royal and other collections complete the present number.

A meeting was held some days since in the Merchants' Hall, Glasgow, for the purpose of taking steps for the erection in that city of a monument to the late Lord Clyde. A committee was formed to collect subscriptions, and to determine the nature and size of the monument, and the artist to be employed. £700 was at once collected.

Mrs. Elizabeth Murray, the member of the Institute of Painters in Water Colours, some of whose exquisite productions we have engraved, has left Tenerife, where she long resided, and whence she derived the subjects of her pictures, for Madeira, where she has purchased a villa in that island, and has taken up her residence in the Northern American States, in consequence of the death of her husband as Consul for Tenerife.

A few years before his death, the late Frank Stone discontinued the painting of the drawing-room joys and sorrows by which he obtained his early reputation, and devoted himself, with great advantage to his art, to the healthier atmosphere of the breezy French coast, near Boulogne, Wimereux, and Calais. One of the best of his pictures from this district represented a cartload—oh! such a cartload!—of coquettish-looking peasant girls returning from some village or town of the Pas de Calais, and exchanging a cheery "Bon jour," with—himself, the spectator might in vanity fancy, did he not know the painter's modesty surmounted by the outline of a kép, thrown from some unknown figure athwart the foreground of the dusty road. Mr. Frank Stone's widow has, for the present, more than usually natural picture, which, having been exhibited in the Royal Academy, will be remembered by many of our readers, has been carefully and admirably engraved by Mr. H. Robinson, and recently published by Mr. M'Lean, of the Haymarket.

Mr. Hogarth, the publisher of the Spanish tours, has recently issued a new series of photographs from pen-and-ink sketches by Colonel Cresiack, whose sketches of the last Italian campaign are well known. The new pictures represent, with all this clever amateur's spirit and force of characterisation, and with greater regard for minute proportion than is exceeding efforts, the common incidents of a Spanish full-fight. The noble courage and terrific strength of the bull are indicated with surprising vigour; but the Colonel has very properly also given the sickening and revolting circumstances which always attend this sanguinary spectacle. Mr. Hogarth has likewise published a set of caricature sketches, lithographed on a long strip of paper, entitled "To the Pyramids," and representing, humorously enough, the difficulties and other incidents attending the ascent of the Great Pyramid.

Mr. J. Rubens Powell, in a letter to the *Athenæum*, makes a communication which—if true, and there seems no possibility of doubting it—so clearly proves the folly of pretending to speak authoritatively

and dogmatically upon the genuineness of pictures ascribed to "old masters," that we think the statements should be widely circulated. Mr. Powell, who is known as an excellent copyist of old pictures, draws attention to the review in the fourth or supplemental volume (of Dr. Waagen's "Art-Treasures of Great Britain") of Lord Normanton's Secretary gallery of pictures; in which copies, painted for Lord Normanton by Mr. Powell, of two Claudes, a Greuze, and three pictures by Sir Joshua Reynolds, are substantially spoken of by Dr. Waagen as "genuine," "rare," and "deserving to take a prominent place among the originals of the respective masters." Dr. Waagen, the director of the Royal Gallery of Pictures, Berlin, can make many mistakes in a single gallery, what, it may reasonably be asked, must be the mass of error in all the works of all the principal galleries and cabinets of Great Britain? And if a modern copyist can so successfully imitate old paintings, what are the evidences of age think upon it, how large may the proportion be of contemporaneous, or imitations, at least in style, by pupils and followers, that we now accept as "genuine originals by the master."

THE FARM.

THE remainder of the late Mr. Anthony Maynard's herd were sold by Mr. Strafford at Stokesley on Thursday, the 10th inst. The 30 averaged £18 0s. 6d.; the cows and heifers, £23 17s. 8d.; and the steers, £14 9s. The best price of the day was 50 gs. for the Young Duchess. The total sum realised by the herd at both sales, including the steers, was £1418 15s., and the 113 bulls, cows, and heifers averaged just £32.

Messrs. Graham's twenty-first annual sale took place at Sittyton lately. Of the 80 bull-calves in the catalogue one was not and offered, and another was withdrawn. The rest averaged £34 18s., a very good price when it is considered that the bulls are not primed with "the flowing bowl" previous to the roup, and buy not so much from buffalo consideration as for crossing with the Aberdeen "doddies" and half-bred cows. The Fancy by Baly (3151) tribe sold well, and the six averaged £37 2s. The highest price, 97 gs., was given by Mr. Bruce, of Auchindoir, for "Victorious," by "Champion of England;" and "West Australian" by the Czar (30 gs.) was knocked down to the Duke of Richmond's agent for Gordon Castle. One of them went to the Orkneys, one to Ross-shire, one to Forfarshire, one to Morayshire, and the rest to Aberdeenshire. There were nine roans, eleven reds (the favourite colour this year), red and whites, and four whites. The ages ranged from Nov. 1st to May 1st. The yard of living stock at Sittyton has now been sold off, and the owners expect to complete their nine dozen.

The Royal Dairy herd of Messrs. Gillett, Penn, previously composed of about a score of females from the herds of Messrs. Morgridge, Davey, Reeves, Lee, and Mr. Baines, has received a considerable accession of strength. Among them are Princess, one of the gold medallist Duke of Picton ex Mr. Mereton's Lovely (1461), the first-prize cow at Warwick; Pique (3351) of the same family, first at Preston Pet 2nd (2229), and Minnie (2126a) (which has been purchased from Mr. Stone's herd in Berkshire), by Mr. Phillip Hale's herd; and Picture 5th (2225); and Curly 2nd (1886), first at Warwick last. New model buildings, after a design by Mr. Robert Smith, are in course of erection, but the roof will be supported on iron columns; and the 200 animals which it is intended to accommodate will be all tied up at once time.

Mr. Robert Smith's sale of Exmoor cobs and galloways is postponed until the spring, when the Exmoor ponies will have further attained their four-year-old teeth, and be ready for summer use. They are chiefly bays, with a little the old horse, and from selected Exmoor pony mares. Two of these, Chieftain and Master Bobby, which have been kept as sires, are going on well, and will probably make their début, along with a couple of Bobby mares, at the Newcastle Show.

Forty new members have joined the Acclimatisation Society, and nearly forty more names are on the list for election the next month. The practical experimental operations have acted as a great attraction, and Lord Walsingham has sent a donation of £10 extra in aid of them. The society have consigned some pheasants' eggs to Australia, and are endeavouring to procure, with the aid of the Government, some Indian jungle game. The Hon. Mr. Strutt, M.P., Derby, has withdrawn his name from the list of vice-presidents; and the secretaries have been directed to write to the editors of the *Zoologist*, *Ibis*, *Chronicle* and contradict the statements made by the honorary gentleman in that journal with reference to the society.

The great Monmouthshire and Herefordshire sale on Thursday week. The day was delightfully fine, and the attendance was one of the largest we have ever seen, notwithstanding the heavy expenses and annoyance caused by the non-appearance, for nearly an hour and a half, of a special train advertised to leave Ross, to be at the Crown Arms for the convenience of persons going to the sale. The first piece of promise caused a delay in commencing the business of the day, and rendered it impossible to complete the sale before the darkness made by the sunlessness to do so, and we ourselves had to leave without attending the full attendance we wished to do. The two hundred females were lots 42 and 44—Diana the 2nd and Spangle the 2nd, both Highfields (1111), winners of a first at Worcester; the former goes to Mr. Parr, Fourthlas, for 50 gs.; and the latter to Mr. Baldwin, Loddington, at the same price. The seven months old bull-calf Sunbeam, by Sunbeam (2006) got by the famous Sunbeam sire, to Mr. Jackson, for 37 gs.; whilst that from the latter, five months old, by Sunbeam (1842), was purchased by Mr. Wyndham Tenbury, for 77 gs. Lot 26, Sunflower the 2nd by Grenadier (961), with her bull-calf born, is gone to the Royal herd at Flemish Farm for 45 gs. Eglantine, Cranina, and Sweet Briar are bought for the Duke of Bedford's Woburn Park herd; and so are the only pair of two-year-old bulls, lots numbered 61 and 62, by Grenadier (961), from Hulton in Ireland Softy the 2nd, Sultana 2nd and her bull-calf, Forgetme-not the 2nd and bull-calf, Winifred 3rd, Sylph and heifer-calf, and Cherry Blossom, Mr. Green, of Marlow, bought Cherry Blossom and her heifer by Sir Benjamin (1387) for 86 gs. Of the bulls, lot 57, Sir Richard, was bought by Mr. Burlton for 75 gs.; lot 58, Prince, is gone to Mr. Davies, Brecon, for 70 gs.; and lot 60, Deception, by Sir Benjamin (1387), goes to the Royal herd for 80 gs. Lot 59 is bought by Mr. Duckham for that purpose. The lots were principally purchased by Mr. Clarke, Bodenham; Rose; Mr. Appesley, Hall Court, Ledbury; Mr. Coleman, for the Duke of Bedford's Woburn Park; Town Farm, Shillinfleet, Ireland; Mr. Powell, Kilwys-y-wayed, Glamorganshire; Mr. Farr, Stanton; Mr. Phillips, Llanwarne; Mr. Dew, Craddock, Ross; Mr. Cadle, Westbury-on-Severn, Gloucestershire; Mr. Jackson, Beachamwell, Swaffham; Mr. Burlton, Huntley; Mr. Green, Marlow; Mr. Stallard, Brockhampton; Mr. Weaver, Willey; Mr. Parr, Pennyridge; Mr. Passmore, Dinedor; Mr. Smith, Upton, Tenbury; and Mr. Duckham, for the Royal herd.

The Court of Exchequer has appointed the 12th of November for the nomination of the Sheriffs for England and Wales for the next year.

The expenses incurred in providing for and entertaining the German Sovereigns and Princes who attended the congress recently held in Frankfort, including the compensation given to the caterer's decoy's cook caused by the fireworks, amount to 51,314 florins (about £5600).

It is stated that the Austrian authorities object to give up the man Blenchkow, who absconded from Vienna with £10,000, the position of a fresh claim to be made upon the Austrians. They say that he is wanted there for trial as a fraudulent bankrupt, his bankruptcy having been declared in Vienna. The question of the Austrians is not, however, yet answered.

Despatches forwarded to the Colonial Office from Sir George Grey, Lieutenant-General Cameron, commanding the troops in New Zealand, were published in last Friday's *Gazette*. The documents are substantially the same as those addressed to Sir George Grey by the same gallant officer, the substance of which has been given.—Tuesday's *Gazette* contains another despatch on General Cameron acknowledging the assistance received from the naval force under Captain Sullivan, R.N., Commander Mayne, R.N., and Deputy Quartermaster General, in the recent operations in New Zealand.

A prospecting party to the Bear river, in British Columbia, reports that, while on their way down the river, they saw a shirt and a head floating by to a bush, and, upon proceeding to the spot, were surprised and grieved to find lying beneath it the dead body of a white man, wrapped in a blanket and only allowed on a log. The body was in an advanced state of decomposition, and near at hand lay a tin cup, on which appeared state of decomposition, and near at hand lay a tin cup, on which appeared state these words: "Bend Brown; lost in the wood; is from Inverness, Scotland, Born June, 1825." Finding death inevitable, the deceased, before lying down to die, had scrawled these lines, probably with a pin.

MEMBERS OUT OF PARLIAMENT.

If the earthquake had not—in its greatest severity—preceded them, the Herefordshire members would probably have made a greater sensation than they did last week at Hereford. As it was, however, they made a fair attempt, although two of the county members were unavoidably absent. As we are vain enough to think that we do a little to draw members out of Parliamentary mist out of the shade, be it ours now to say that, knowing Mr. King-King (one ought never to pronounce to give emphasis to a doubled name) only from his speech at Hereford, we shall be glad to know more of him. A magnificent bore "where hitherto his voice has been either not heard, or in such an infrequent murmur, as not to have reached the most remote channels of fame," he is a member go nowadays, getting towards veteranship, as he has sat in his county seat since 1832. When canvassed we have heard Colonel Clifford address the House, in a quiet, sensible, and not unentertaining manner, looking to the subject on which he generally dictates, as belonging to his function, we have wondered why he was appointed a Commissioner in Lunacy. There is no "honorarium" attached to the office in this case, and we can but attribute his acceptance of it to pure philanthropy, and that patient gain continue from a recollection of his demeanour and the usual expression of his countenance, although essentially a country gentleman, he is a very advanced Liberal in politics, favouring all sorts of extensions of the franchise, ballot, retrenchment, removal of church rates, abolition of unpaid magistracy, and, in fact, everything that would make a country gentleman's life a burden. Whether he would be more pleased with such a consummation we do not presume to say which—an excellent member, an experienced one, as he is in the fifteenth year of his membership. Mr. George Clive is much more of a personage than either of the members for the late Hereford meeting. A gentleman who in his time has shown a curious felicity for holding many offices, though not the highest in the State, must have some special qualities about him. A Vice-Lieutenant of Cheshire, Clerk of the Peace for Flint, a County Court Judge in 1849, and Under-Secretary for the Home Department in 1850, would be, in nearly a common man. In truth, during his Parliamentary career—he was returned for Hereford in 1847—he was rather prominent on one or two occasions. Very soon finding his way into the House of Commons, he chanced to be somewhat involved in a dispute with some parties to a railway bill, and had to bring the matter before the House. Some one, however, broke the powers of punishment on persons who had taken some liberties with the House. Mr. Clive and Palmerston last came into office, no one was surprised at Mr. Clive's appointment to the Home Office. He was followed by Sir Cornewall Lewis, himself a Herefordshire man, so that the department for the county was well represented. Mr. Clive's friends in Clive away from his post, after Sir Cornewall Lewis had left for the War Office, and the country was broken up by causes less melancholy than would have brought it about if Mr. Clive had been released in their original offices. Mr. Clive is a fair, though somewhat heavy speaker, but he is a thoroughly good man of business. Hereford the other day.

Mr. Cobden has made an autumnal appearance, and in a new character—that of chairman at a public dinner. Why it is one cannot exactly say, but we have a notion that Mr. Cobden would be more out of place at a semi-convivial meeting than at any other allusion in which he could be possibly placed. One fancied "cabining, cribbing, confining" he was, in the same manner as the despair of forms, and such nearly frivolous customs as the surrendering of the chair to another. We have a distinct recollection of a case in which he showed himself distinctly showed his contempt for such observances, we thought that he would decline to endue himself in our ordinary evening dress, but he went one step greater mistake. He appeared on this occasion in a *soupe* and cornet suit, a dress more suitable for a ball than a public meeting, and with white cravat. He drank his wine exactly as a chairman should do; but he really did not seem in the least bored by the toastmaster's duties. He conversed from over the shoulder of the victimised "Chair." A pleasanter, more genial companion than Mr. Cobden at the foregone his usual habits—which is to avoid the discharge of such duties as he has undertaken—was never complete; and when he identified himself with the class for whose benefit he was speaking, he was sure to cause a sensation and a hit. If there be any persons who, judging from the somewhat severe tone of his speeches on public occasions, are disposed to rate low his sociable qualities, it would have been well if they had been with him on the day of the dinner, on the occasion in question, and they would have come away with the persuasion that a more genial man than he they could not wish to meet, and they would fully understand the power he would exercise over his constituents.

The Essex Conservative mine (they used to be ten until the Marshals had to be called in to keep the peace) at Maldon seems to have been getting themselves. The week before last some of them took, together, to fighting, and the remainder of those who were available foregathered at Colchester, on Thursday, to settle matters politically; for it was at a meeting of a Conservative association, that a row occurred, and that the Hon. Mr. Finch-Hatton, supported Mr. Parry Watkinson and—oh, terrible loss!—Mr. Du Cane were unable to be present. Mr. Du Cane, however, was represented by Essex members only mustered three, and Mr. Miller and Mr. Papillon were obliged to be their own whips enough, which was perhaps not much; and if it had not been for Captain Jervis the Conservatives of the county would have now come very smartly off. But the gallant member for Harwich is a host in himself. He is a host in himself in the matter of ordnance, say a brass six-pounder—in the House. At Colchester he came out as a host in himself, and Essex Conservatism no inconsiderable portion of modest assurance, and with a half-rollicking manner, more the kind of a sailor than a soldier of one of the scientific corps, Captain Jervis is said to bring a considerable amount of practical knowledge of professional matters to bear very effectively in the House. He is bold in his speech, and he exercised himself in Colchester with considerable effect. His recent public appearances in Essex, laying the critical lash smartly on the backs of the party leaders as well as on his opponents. It would seem as if he had been out as a kind of Conservative Cossack of the Essex marshes, and Mr. Bentinck is a representative, and does not own any special contingent of the Essex militia. Captain Jervis may be, perhaps, Captain Jervis would have some office—perhaps Under Secretary for War.

The election—if it can be so termed where younger son succeeds to elder son of the same family in regular order—for West Worcestershire has taken the House. Frederick Lygon from Westminster to Pall Mall could not, as he said, resist the spontaneous (?) urgent call of the electors of the county who thought that it was time for a change, and a special specimen of these whom we have often designated as the electioneering constituency of members, Mr. Lygon has adopted a peculiar mode of distinguishing himself by taking the chairmanship of a nonchalance and a self-confidence which are the result only of want of thought. Mr. Lygon is a handsome man, and has a fine military appearance, he comes down into every night of the Session, and, at the last moment of the sitting, he stands in the lobby in a brief place in the front Opposition bench—a position to which he thinks himself entitled from his connection with the Lord of the Admiralty when Lord Derby's Government was in its last throes—and it was of no consequence who was put into the post, and with boundless effrontery opposes obstacles to the passage of the Government measures, particularly when anybody devotes himself to bazing about (he tries to sting, but fails, of course) the Chancellor of the Exchequer. That right hon. gentleman actually condescends to notice him, and so the same irritating process—how irritating it is only those who witness can tell—goes on night after night, amidst the muttered ambitions of secretaries and under-secretaries, who are obliged to stay, and who will have to be up early next day and be at work, while the manikin member who is teasing them will be enjoying the day-dummers which are indulged in by Her Majesty's Ministers. The Worcestershire election this smallest of Tittlebats amongst the very least of the minnows of the party has vindicated the Parliamentary character he has gained, and which we have depicted for the benefit of talking in the country, of the characters and the duties of public men, and was so condescending as to say "that Lord Palmerston had done more to degrade and demoralise public opinion than any other statesman."

It may be remembered that Mr. Hoby, when he was the Emperor of London boot-maker, desired his assistants to shut up his shop as he required their business because Ensign Bellwhite, of some matching anecdote should have come into one's head as one was dwelling on the fact that the Hon. Frederick Lygon had utterly crushed Lord Palmerston.

What in this place can one say now of the Chancellor of the Exchequer? He has made a public appearance, and one cannot ignore him. A feature, however, is noticeable, and that is that the most rapid, fluent, and copious orator of the day should absolutely have read a discourse on the occasion when he was called on to address an expectant audience. Curious it is, too, to observe how incredibly he contrived to expand a couple of notes into several columns of newspaper, and yet he wrote his speech with the design of putting a check on any tendency he might have experienced towards undue length.

NEW FERRY-STEAMER ON THE MERSEY.

MANY of our readers will scarcely understand the important light in which the ferries of the Mersey are regarded by residents in the north; but when we mention that over 7,000,000 persons are carried every year between Liverpool and Birkenhead, and that a toll of a penny per head yields a revenue of £30,000 per annum to the Woodside Ferry Commissioners, they will be better able to appreciate the magnitude of the traffic and the demand made upon the trustees for adequate accommodation. We are very happy to find that these gentlemen are alive to their responsibilities and the claims of the public. Indeed, we could not meet with a better illustration of careful attention to the increasing desire for comfortable means of transport than the additional steamer the Cheshire to their fleet of steamers. She is in many respects a novelty, both in form and equipment; and, judging from the performances which has attended her introduction on the Mersey, we venture to hope that her type will be universally adopted. Her length over all is 150 ft., and her beam 30 ft. at the water-line; but the latter is increased out to fourteen of the paddle-boxes, the breadth of her main deck is 48 ft. She is 12 ft. deep, and draws 7 ft. 6 in. of water. Her deck being on a level with the stages at which she lands and unloads her passengers. The Cheshire was designed by Mr. Thomas Vernon, managing director of the Millwall Ironworks and Canada Works, Birkenhead, the gentleman has been chairman of the Woodside Ferry Committee for the last ten years, and has had considerable share in the management of the ferry traffic. His great object was to construct a vessel that could ply in all weathers, and carry some 2000 passengers each journey. Even when the fogs to which the Mersey is liable as well as the Thames, the whole traffic of the Mersey does not cease, as the vessels are provided with lights to guide their course. Each boat is provided with a powerful steam-whistle, specially available for this service, as in the event of collision, her spacious afterdeck would be crowded with passengers in a few minutes. At the same time she is equally adapted for conveying the thousands of summer visitors to the parks and other attractions of Birkenhead; and we cannot but congratulate Mr. Harrison on the success which has attended his efforts to take the pioneer of the new class of vessels, for we understand there are other boats on the same principle now being built. One of the most prominent features of the Cheshire is her splendid saloon on the deck, 100 ft. long and 16 ft. wide, panelled and lighted with large plate-glass windows from end to end. About 20 ft. of the saloon has been set apart for ladies, and is tastefully painted and grained in imitation of satinwood, upholstered in green American cloth, the windows being hung with curtains of the same colour. The addition of a lady's cabin forward will no doubt be regarded as an item of some importance by the fair sex. The main saloon is painted white, with the ceiling in panels of light blue arabesques. Besides this, there are two large cabins below, entered from each end of the saloon by a short flight of steps. These cabins are of great height, and are admirably lighted and ventilated. The latter is also provided with a copper cylinder for heating by steam during the cold weather, and with ornamental bronze gratings. Great deck space is obtained by carrying the vessel's width of 48 ft. nearly the entire length. The engines are direct-acting, and simple. The arrangement there is, on an average, nearly 6 ft. between the saloon and bulwarks on each side. In addition to which the saloon deck forms a very pleasant promenade in fine weather. The engines are of 180 (nominal) horse power collectively, each paddle-wheel being propelled by a pair of cylinders working independently of the other. The boilers are placed one on each side of the vessel, and the funnels are on each side of the saloon deck. The engines and boilers are entirely covered in under the main deck, the saloon, on the saloon deck, directing the engineer by means of two bells of distinct tones, one for the engines and the other for the steering. This system, adopted some years since by Mr. M'Wie, the energetic manager of the Isle of Man Steam Packet, to answer well at the same time, it is so simple that there is scarcely a possibility of error. The vessel has a rudder at each end, and the man at the wheel is provided with a little house on the saloon deck between the funnels. By means of rods he can look either rudder without leaving his post. There is also a steam-whistle provided for signalling in foggy weather. At one end of the boat is a compartment for the chain cables, windlass and stoves. At the other end, below deck, and at the other end a commodious forecastle for the crew.

The builders of the Cheshire are Messrs. J. M. Lawrence and Co., of Liverpool, who also make the machinery; are entitled to great praise for having completed a steamer in every respect so well fitted for the enormously increasing requirements of the Mersey traffic.

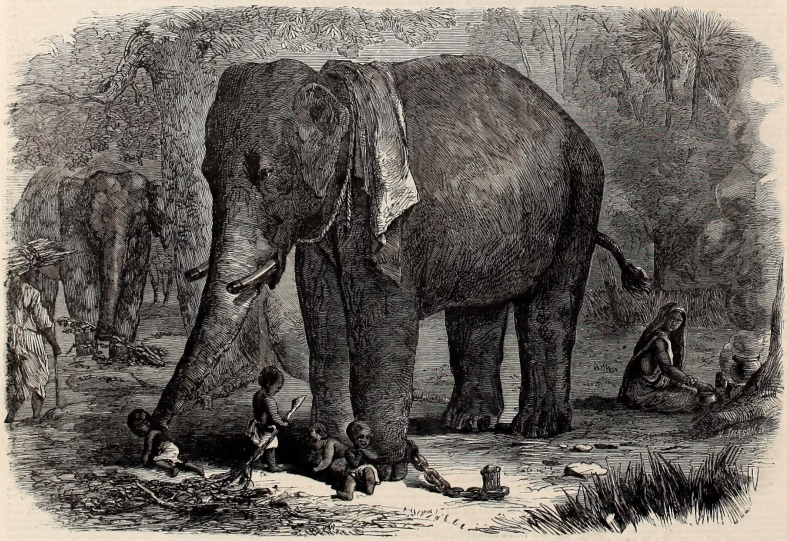
It may be interesting to mention that the Cheshire was launched little more than a month ago, and that her steam trials on leaving the building yard were performed with Mrs Harrison, and almost immediately afterwards started upon the river on a trial-trip, with a numerous company of ladies and gentlemen.

We are indebted for the drawing from which our Engraving is taken to Messrs. Lawrence, Mr. R. E. Rogers, Mr. E. Rogers, who had had the construction of the Cheshire under his superintendence.

The *Edinburgh Review*, in noticing the triangular survey, instances the following careful measurement:—"The computed height of the mountain Ben Nevis (4406 ft.) above the sea level, as determined by spirit-levelling up the western side was 4260·76, and by the barometer on the eastern side 4296·76. Thus the difference between the two independent modes of calculation did not differ in measuring one of the highest mountains in Scotland by more than the thickness of an ordinary foot-bed."

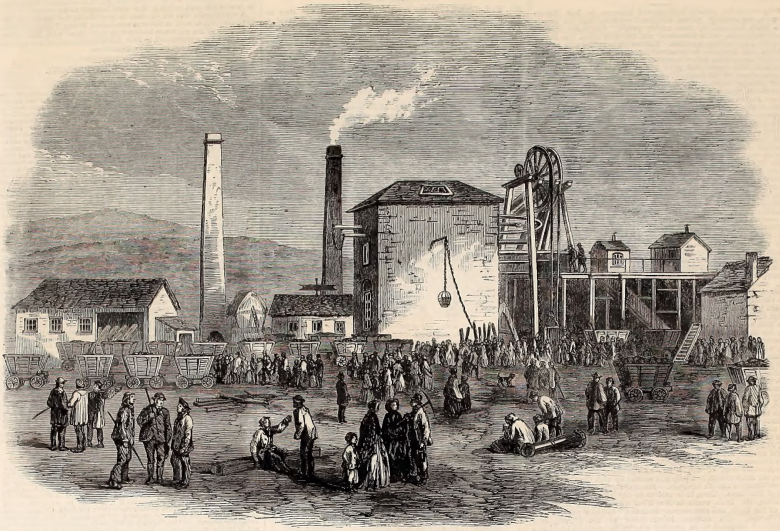
FIRE-WORSHIPPERS OF INDIA AT THEIR DEVOTIONS.

THESE votaries of the sun, termed Gubers, or Parsees, form a considerable portion of the population of Bombay, especially on the western side, where they adhere strictly to their religious and social ceremonials. The effect of large crowds of Guebers standing on the seashore and praying with their faces turned to the very striking. The murmur of their voices is powerful and constant, and has a singular effect when heard amid the darkness of night. During sunrise and sunset they line nearly the whole shore; and, from their dress, attitudes, and occupations, form an impressive spectacle. They stand with their faces directed towards the sun, and the first moment they turn from it till they have finished their religious duties, the performance of which occupies a considerable time, none of which their prayers are not repeated distinctly, but are muttered through the teeth, with a kind of inarticulate noise, without moving the lips.



AN ELEPHANT NURSE.

WE have seen the elephant engaged in many occupations that would seem to require a quality of instinct bordering upon reason—such, for example, as laying water pipes of great weight in their respective trenches with wonderful precision, lifting guns over bad roads, and pushing their brother elephants behind them in the timber trade, or drivers, by thrashing them with a heavy chain wielded with tremendous force, if they refuse to work. But the accompanying sketch of our page shows it in a character which will be novel to most of our readers. The sketch was taken at a halting-ground on the high road to Benares, where a party of mahouts, with their families, had encamped for the



GUEBERS OF INDIA WORSHIPPING THE SETTING SUN.—SEE PRECEDING PAGE.

night. The wives, engaged in preparing the evening meal, had confided their offspring to the care of one of the huge quadrupeds of the party, and it was curious and interesting to observe the anxiety of the brute to perform the office intrusted to it conscientiously. Two of the babies, more nimble than the others, caused it great anxiety, for they were constantly trying to crawl beyond the limits of the chain tether, and more than once had nearly succeeded; but the watchfulness of the nurse was not to be eluded, and with the utmost gentleness it would lift its tender charges with its huge proboscis slowly within the limits assigned for them, generally between its fore legs. The mothers the while seemed perfectly confident as to the children's safety, seldom turning their eyes from the pot of rice bubbling in the chula.

COLUMN FOR THE CURIOUS.

Gloucestershire, already rich beyond compare in late Roman remains, has recently yielded additional evidence that the county was much occupied by that mighty people. Cirencester was the great metropolis, while Gloucester and the hills about the Severn were the great military positions. Thither the beautiful vale and its equable and agreeable temperature doubtless attracted our Roman colonists for centuries before its saline spring gave the place its modern celebrity. The recent *find* is in a field named Wickham, in the neighbourhood of Cheltenham, and now in course of excavation a short distance beyond the Andoversford Inn. For many years coins found upon the above spot had furnished literal evidence of a Roman station having existed in this locality. To test the truth of this belief the above excavations were commenced, under the personal superintendence of the owner of the field. According to the report in the *Cheltenham Tower*, "several acres have been found covered over with the substantial foundations of buildings, some of which must have been of great size. The ground already opened has furnished abundantly the usual refuse of Roman sites, the so-called Samian ware, both black, red, or brown pottery fragments, bones, and horns of oxen and deer; teeth of sheep and horses; large oystershells; coarse pottery; iron implements, as bronze and in querns, window glass, &c. Among the most curious and instructive of these discoveries yet made in this field is a piece of wood, about a foot in length, of the oak, showing three full-length figures in high relief. Coins have also been found, ranging over the period between Domitian and Valentinian inclusive. These latter would denote that the remains belong almost to the very close of the Roman dominion in Britain, that is, to the beginning of the 5th century. The extent of the locality to one of the great centres of Roman civilisation renders these discoveries of great interest. However apt the workmen of the Roman shore in taste for the ornamental arts, it was well followed up: for the country round Cheltenham is rich in medieval architecture, by which the Romans being not only surrounded, but for many architectural features, but also for valuable specimens of decoration, painted glass, tiles, woodwork, and monumental brasses. See p. 1 of volume for the *Archæological Journal*, June, 1847.)

In the adjoining county of Wilts we suspect that an antiquarian chicken has been counted before the requisite process. At the little village of Enham, on the Roman road from Silchester to Old Sarum, have been discovered the walls of a Roman villa on the site of more than one Roman villa, with coins of the Emperors Antoninus and Constantine, pottery, &c., all leading to the conclusion that here, where six Roman roads intersect, may be placed the missing Roman town of Vindomora, which, however, has been claimed for other places:—at Whitchurch and East Sherborne; by Horsley, at Farnham; and in the "Itinerary of Antoninus" as Vindomis, near Andover!—a very doubtful identification. These Roman headaches are more puzzling than those of our day. In support of the above theory as to Enham, Enham is thought to be a corruption of *Anton*, which, however, is imputed to be not older than the seventeenth century. (Wilts "General History of Hundreds.") The "Itinerary of Antonius" has been assigned to three persons, and is still unsettled. A Correspondent of the *Athenæum* says:—The old name of Bonfire would appear to be *Ane*, as in Abbot Ann, Little Ann, Ampott, Andover. Andover may be a corruption of Anthum. Several ancient wells have, at various times, fallen in near the field where the remains have been found."

Lord's wall, of old, is how composed of ale and roasted apples, the latter beaten to a pulp and worked up with the ale till the mixture formed a smooth beverage. Fanciful etymologies have been given of this name. Thus, it is said to be derived from the 1st of November, the Irish words in *Mere Wod* signifying the feast, or day, of the apples; and pronounced "lamass," and corrupted into "lamb's-wool," the mixture being drunk on the evening of November 1, supposed to be presided over by the guardian angel of fruits and trees. Thus far the derivation of the compound is plausible! "Cups and their Customs," and one of his reviewers: but we scarcely consider the above peculiar to November, as agreeable to the Irish, and opine, with Nares, that the name was derived from the smoothness and softness of the drink, resembling the wool of lambs.

Some curious details of the contents of the depôt of the War Department at Paris have just appeared. The depôt is in the Rue de l'Université, No. 116, and has a large gateway, at which a sentinel is stationed; it was formerly the Hôtel de Noailles-Mouchy. The depôt was established by Louvois, in the reign of Louis XIV., two hundred years since. Here are preserved documents relative to the ancient wars, a larger number of maps, and plans of sieges and battles than any establishment in Europe possesses. The historical archives, commenced in 1630, have since been successively enriched with despatches from Vincennes and Schomberg relating to the campaigns of the French armies until 1789; they fill 5000 volumes. The documents received from 1789 to the present time fill 2240 drawers. The number of letters alone fill 300 ; among them is the following, addressed to M. Lesueur, a first clerk in the Artillery and Engineer Department at the War Office :—

Sir,—A stranger in Paris, without any acquaintance, my only hope is in you. The friendless expressed for me interest, and I hope you will use it for me.

I find that I am about to be removed from my regiment to another, which affects me in every point of view . . . while there are some officers who follow me immediately in the list would regret without difficulty . . . I am, therefore, with me who is intended for the regiment. I have undertaken his education, which would be impossible in another regiment.

If the arrangements had been published I would not have troubled you, because, in that case, there would be nothing for me but to submit. But as the matter rests, I flatter myself that you will please to interest yourself for me.

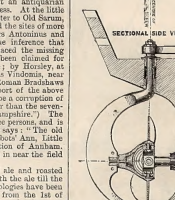
I will remain, with profound respect, your humble servant,

With respect, Sir, your very humble and very obedient servant,

BUONAPARTE, Lieutenant in the Regiment of Loire.

ANXONNE, June 3, 1791.

Another letter, dated Sept. 1, 1792, petitions the Administrators of Versailles in favour of the writer's sister, Marianne Bonaparte, of whom he is the guardian, and who, being without an asylum, through the dispersion of the establishment in which she was educated, and the allowance of twenty sous a league, to which she is entitled, to take her to the municipality of Ajaccio, the place of her birth. On the first sitting of the depôt as arranged under the superintendence of the private individuals, the collection being especially rich in records of the eminent men of France.



The restoration of the large and curious church of Higham Ferrers, one of the finest of the Northamptonshire churches, is now nearly completed. The pious work was commenced by subscription in 1858. The church was formerly collegiate, and is one of the noblest in a district remarkable for the splendour of its ecclesiastical edifices. The Early English character of a portion of its tower spires, its two naves, Perpendicular and Decorated English windows, and its richly sculptured western entrance, its ancient font, wooden screen and stall work, and painted glass, will be carefully preserved and restored. The church is also rich in monumental brasses, and has an example of tile pavement, which is valuable from the few which remain of original structure. The edifice was thoroughly investigated by Archbishop Chichele, who built the fine late Perpendicular belfry-house, and who is described by Leland as "the greatest ornament" of Higham Ferrers. The church is carefully described in 1846 by Mr. Freeman, in the work published by the Archæological Society of the Archdeaconry of Northampton; and the author's researches must have been valuable in the recent work of restoration.

The Merchant Taylors' Company, which, as City guild, aids the art and mystery to which its title nominally refers, allows but one livery dinner in the year, which is held on the festival of St. John, the patron saint of painters; but the feast (Oct. 18) falling this year on Sunday, the banquet took place on Monday, when the holders of prizes awarded for excellence in works of decorative art in June last received their rewards, and afterwards dined with the court and livery. The loving-cup presented to the company by Camden, whose father was a painter-stainer, was produced at the feast. Inigo Jones and Vandyck were asked together to the dinners, as appears by an entry in the company's books; and Canton, the heraldic painter, was one of the company in 1784. Among their good deeds is assisting diseased and paralysed painters in going to Bath to drink the waters. The tradition that St. Luke was a painter is now little credited; though we do not grudge the nightcap of the saint and the ox's head—which, by-the-way, we now rarely see.

STEERING SCREW.

MR. W. J. CURTIS, C.E., has invented a screw which will steer as well as propel a vessel. The peculiarity of this screw is that a universal joint is placed within the hollow boss of the screw, which is the only connected with the main shaft, the centre of gravity of the screw and the centre line of the rudder intersecting the centre line of the main shaft, and thus the entire weight of the screw is borne by the shaft; and by means of a tail or spindle to the screw projecting from the boss working in the rudder, as iron carrier in tube or rudder, whatever may be the movement of the tiller or wheel, it communicates an equal movement to the screw, which becomes not only the propeller, but the steering power, as fully as the rudder mentioned.

Her Majesty's gun-boat Charger, of 60-horse power, having been fitted, by Messrs. Young and Magnay, of Limehouse, with one of these screws, several experiments were performed to test the power of the screw to steer in the absence of the ordinary rudder, which, however, the result being highly satisfactory, and demonstrating that it is no longer necessary to apply cumbrous hydraulic steering apparatus, or to add any other extra complications to the machinery of a steamer, and that the screw is its own power to motion can be regulated and controlled at will. Revolving turrets will become obsolete if our present colossal screw line-of-battle ships can, by the application of this original contrivance, be made to revolve upon their centres, and deliver their entire broadsides alternately as fast as the guns can be loaded, and in as short a time as the cumbersome turret with its single gun can be revolved and trained to the required position." The invention appears to have attracted the serious attention of the Admiralty, as is evidenced by the grant of the gun-boat for the experiment. Admiral Belcher, who witnessed the trial in the Thames, expressed his satisfaction at the performance of the boat on a portion of the day being solved in so simple a manner, and appeared highly pleased at the result of the experiment.

CURTIS'S PATENT STEERING-SCREW.

The Charger in her passage from the Thames to Portsmouth encountered a severe gale, during which the Government pilot stated that the improved screw acted most admirably; it was the means of keeping the vessel up to the wind, and caused the gun-boat to turn round more quickly than any vessel he had ever seen. Once a complete circle was made on the top of a sea as readily as it could have been made in smooth water.

SCENE FROM "THE DESERT FLOWER."

OUR Engraving represents the situation—act ii. scene 1—in Mr. Wallace's new opera, "The Desert Flower," in which Captain Maurice (Mr. Harrison) and Princess Amina (Mdlle. Parepa) as a young Arab He is singing the beautiful ballad "Though Born in Woods, rude Nature's Child," while she, listening with surprise and emotion, is saying to herself, "None of my countrymen ever spoke to me thus! The forest scenery is one of the happiest efforts of Mr. Grieve's pencil.

THE FATAL COLLIERY EXPLOSION IN SOUTH WALES.

AN explosion, which has resulted in the loss of thirty-nine lives occurred on Saturday week at the Ferndale Colliery, Margam, Glamorganshire, three miles from the Port Talbot station on the Great Western Railway and eight miles from Neath. It is situated on the estate of Mr. Talbot, the Lord Lieutenant of the county, and is worked by the Messrs. Vivian and Co. Generally, there are from 800 to 1000 men employed in the pit, or dependent on work connected with it. The workings extend for miles, and every day about 600 tons of coal are worked and sent shipped either at Port Talbot, Briton Ferry, Neath, or Swansea. The coal is bituminous, being similar to that found in the south Yorkshire and Vale of Neath coal basin. The pit is between 110 and 120 fathoms deep, some of the levels being driven to the distance of a mile. The colliery is ventilated by means of a furnace. There are two shafts, the up and the down shaft; and, in order to add still greater security, the colliery was worked on the principle of safety-lamps. At the time the accident occurred there were about 400 workmen in the colliery. The immediate cause of the explosion was the sudden fall of a mine-foot seam, which is about 500 yards from the bottom of the shaft. There were fifty-three men working at this heading at the time of the explosion. It was soon known that a serious accident had happened in the pit, and long before any of the workmen were safe above ground the pit's mouth was surrounded by anxious relatives and friends had assembled around the mouth of the pit. The first thing done was to bring the explosion to a place in the one to which the most damage is done; the other parts of the pit not being so much affected. The fire in the furnace in the nine-foot vein doors and airways were found to be blown down, while there was such extensive falls of roof and rubbish as to render it exceedingly difficult to get to the scene of the explosion—in fact, the whole of the timber in this heading had to be reset before the bodies could be got at. The foul gases or chokedamp having been partially cleared off, a number of workmen volunteered to go down the pit to render assistance to the sufferers, if any remained, and risked their lives to rescue the nearly expiring sufferers: in one or two instances their exertions were crowned with success. Mr. William Grey, the manager, was in the heading when the explosion occurred. He was rendered insensible by the gas; but in a few moments recovered consciousness, and laboured to bring some of the workmen to a place of safety. Mr. Thomas Evans, the Government Inspector of South Wales, was on the spot within a few hours of the explosion, and instantly descended the pit and rendered valuable aid. No cause can be positively assigned for the accident, but there is every reason to believe it arose from the criminal act of one of the workmen picking his lamp for the purpose of getting a light.

While the men were working at the bottom of the pit's mouth the search for the missing ones was being pursued, and collies were in readiness in an adjoining building, as shown in our Engraving, to receive the dead bodies as they were brought to the surface.

A subscription was set on foot to provide for the families of the sufferers; but as soon as this was ascertained Messrs. Vivian and Sons, the lessees of the pit, made known that they, along with Mr. Talbot, the proprietor, are prepared to take the whole burden of the support of the widows and children upon themselves.

OBITUARY OF EMINENT PERSONS.

SIR RALPH A. ANSTRUTHER, BART.

Sir Ralph Abercrombie Anstruther, fourth Baronet, of Balcaskie, in the county of Fife, was the grandson of Sir Robert Anstruther, 2nd Bart., the third Baronet, and heir to the family estates, his wife, only daughter of Lieutenant-General Hamilton, Governor of Canada, and granddaughter of James, fourth Duke of Hamilton, and the elder son of the famous General Sir Ralph Abercrombie, who so distinguished himself in Egypt and Holland, and especially at the battle of Victoria, and who, with extraordinary exertion, brought the British army of Portugal at the memorable retreat to Corunna on the 12th of January, 1809, but died of injuries he had received two days afterwards, and was buried in the north-east bastion of the citadel of Corunna; his body being there laid, that his illustrious companion in arms, Sir John Moore, was, portion of the following week, buried by his side. Sir Ralph Abercrombie Anstruther, the subject of this brief notice, was born on the 1st of March, 1804, and was educated at Trinity College, Cambridge, where he graduated M.A. 1825. He

was also an LL.D. of St. Andrew's University. He succeeded his grandfather, Sir Robert Anstruther, in the baronetcy, dated on the 2nd of August, 1818. Sir Ralph was for some time in the Grenadier Guards, where he attained the rank of Captain, but he was a man of considerable ability, and, until latterly enfeebled by illness, he displayed much energy of character and action. He took a formant part in politics. He was a Conservative and opposed to concessions on side, but more recently his opinions were much modified in favour of the liberal party of the day. Sir Ralph Anstruther died on the 24th, and has only returned to the hereditary politics of his family, his predecessor in the baronetcy having, we believe, been a friend of Charles James Fox, and one of the "managers" of the impeachment against Hastings. Sir Ralph married, Sept. 1, 1831, Mary Jane, eldest daughter of the late Major-General Sir Henry Torrens, K.C.B., and has three sons—Robert, his successor; Henry, a lieutenant in the Scots Fusilier Guards, born on the 2nd of August, 1838. Sir Ralph was for some time in the Grenadier Guards, where he attained the rank of Captain. He was a man of considerable ability, and, until latterly enfeebled by illness, he displayed much energy of character and action. He took a formant part in politics. He was a Conservative and opposed to concessions on side, but more recently his opinions were much modified in favour of the liberal party of the day. Sir Ralph Anstruther died on the 24th, and has only returned to the hereditary politics of his family, his predecessor in the baronetcy having, we believe, been a friend of Charles James Fox, and one of the "managers" of the impeachment against Hastings. Sir Ralph married, Sept. 1, 1831, Mary Jane, eldest daughter of the late Major-General Sir Henry Torrens, K.C.B., and has three sons—Robert, his successor; Henry, a lieutenant in the Scots Fusilier Guards, born on the 2nd of August, 1838; and Hamilton; and two daughters—Lucy Charlotte, married to Alexander Ramsay, Esq., and Mary Anstruther, married to Alexander, son of Sir David Kinloch, Bart.; and Mary. Sir Ralph, who was at one time Convener of the county of Fife, and a Deputy-Lieutenant, was succeeded in his title and estates by his eldest son, Robert Abercrombie Anstruther, the fifth Baronet, a lieutenant-colonel in the Coldstream Guards, born on the 4th of Aug. 29, 1834, and married, July 31, 1857, Louisa, eldest daughter of the Rt. Hon. William Knox Marshall, Prebendary of Hereford and Vicar of Weobley, and Rector of Eastnor, Herefordshire, and has issue one son, Robert Abercrombie Anstruther, which, by its alliances, its talents, conduct, and military fame, the name of which, by its high ancestral connexion, is a very popular one, and that the Anstruther, of Anstruther, that ranked for upwards of seven centuries among the Barons of Scotland. Its representative was Sir John, the 1st Lord Anstruther, of Anstruther, a zealous Cavalier and a prisoner at the Battle of Worcester, who created a Baronet in 1694; and his son, Sir Philip, 2nd Baronet, who married Catherine, granddaughter of John, first Marquis of Tweeddale, was great-grandfather of the present baronet (not deceased.

G. W. HOPE, M.P., OF LUFFNESS.

George William Hope, Esq., of Luffness, Haddingtonshire, M.P. for Windsor, was the second son of General the Hon. Alexander Hope, G.C.B., M.P., by his wife, Georgiana, daughter of George Bowes, Esq., and was grandson of John, second Earl of Hopetoun, and brother of James Robert Hope-Scott, Esq., Q.C., of Abbotsford. He was born in 1808, and was educated at Eton and Christ Church College, Oxford, and graduated B.A. in 1831. He was called to the English Bar in 1841, and to the Scottish Bar in 1848; but devoted himself chiefly to political life. He was returned for Weymouth, in 1837, and subsequently sat for Windsor till 1841. From 1842 till 1847 he represented Southampton, and in 1859 he was returned for Windsor, which place he continued to represent till his demise. Mr. Hope, who was a Conservative, was, from 1841 to 1842, Under-Secretary for the Home Department in Sir Robert Peel's Administration, and he considered to have performed the duties of that office with much ability and judgment. Mr. Hope married, in 1837, Georgiana, youngest daughter of George and co-heir of Henry James, but Lord Montagu, and granddaughter of Henry, third Duke of Beaufort, by whom he has left an only surviving son, Alexander, and two daughters. Mr. Hope, who was a J.P. and D.L. for Haddingtonshire, died at Luffness on the 18th inst.

MR. WELD, OF LULWORTH CASTLE.

Joseph Weld, Esq., the head and representative of the ancient Catholic family of Weld, which, during the last century, has been created a peerage, shire, for more than two hundred years, was (by his wife, Mary, eldest daughter of Sir John Bamfylde Throckmorton, Baronet, of Weston, Warwick, and one of the sixteen children of Thomas Weld, Esq., of Lulworth Castle, and was younger brother of the late Cardinal Weld, and uncle to the present Mr. Weld of Lulworth, Lucy daughter of the Hon. Thomas Clifford, took holy orders in the Church of England, and was a beneficed clergyman in England for many years, the ill-health of his only child, Mary Lucy, wife of Hugh Charles Lord Clifford, of Chudleigh, induced him to leave the Church of England in the year 1839, Pope Pius VIII., made Bishop Weld a Cardinal, and he was the first English Catholic who had a seat in the House since the pacification of 1688. He Cardinal Weld died in 1857, but he had previously transferred his estates to his brother, Joseph Weld, Esq., who died on the 19th inst., at his seat, on the 27th of January, 1777. Mr. Joseph Weld was a very sensible and intellectual man, and, as might be inferred from his much beloved and revered wife, He was an excellent landlord, and kind and liberal to his tenantry, being towards them, also, in his religious persuasion. In his long course of hospitality at Lulworth, he had the honour of receiving on several occasions, the Queen and the Royal family. Mrs. Weld died in March of 1860 sent them in exile to these shores. Mr. Weld took great interest in painting, and his gallery contained a few capital works among the heterogeneous mass of that craft. Mr. Weld married, on Nov. 25, 1802, the Hon. Elizabeth Charlotte, second daughter of Edward, first Lord Arundell, Wardour, by whom he had three sons—Edward Joseph, Thomas, and Joseph—and two daughters—Mary, wife of Edward Constable Maxwell, of Everingham, in the county of Monmouth, and Mary Anne, deceased. He died on the 19th inst., and was succeeded by his eldest son, Edward Joseph Weld, Esq., now of Lulworth Castle, who was born in 1836, and married, on Aug. 9, 1858, Ellen Caroline, eldest daughter of the late Nicholas Wadham Wyndham, Esq., of Dinnington, in Cornwall. At the county of Somerset, and has issue one son, Thomas, in-Tribich, in the county of Cornwall. Mr. Joseph Weld's second son, Thomas, inherited, by the will of his uncle, Cardinal Weld, Esq., of Lulworth Castle, Lancashire, and thereupon assumed the additional surname of Blundell, and is the present Thomas Weld Blundell, Esq., of Ince Blundell.

SIR JOHN SPENCER LOGIN.

This gentleman, who was the eldest son of John Login, Esq., of Stronmore, Isle of Orkney, passed many years of his life in political and military duties in India and Persia. He was born in 1820, and, having become an M.D. of the University of Edinburgh, entered the Bengal Army as assistant-surgeon and assistant-surgeon in 1832. He was the same year with the Bengal Horse Artillery serving with the Nusseree Battalion in Scinde, and in 1838 was with Lieutenant-Governor Lord Metcalfe. He had medical charge of the Horse Artillery attached to Afghan Auxiliaries, and afterwards of the Shah's Artillery to Herat, where he also acted in a political capacity. He subsequently filled with credit various other civil and political offices, during his long service in the Guzerat and Superintendent of Maharajah Dhuleep Singh. He was knighted in 1858, and married, May 5, 1859, Miss Louisa Spencer, only child of the late John Campbell, Esq., of Kinloch, Perthshire. He died suddenly, on the 16th inst., at Fetteresso, Kincardine.

GENERAL RODERICK MACNEILL.

Roderick Macneill, of Barra, in the county of Inverness, Chief of the Clan Macneill, a General in the Russian service, and a Colonel of the 78th Highlanders, was the eldest son of Roderick Macneill, Esq., of Barra, by his wife, Jane, second daughter of Alexander Baillie, Baronet of Dochfour, Inverness-shire. He entered the Army early in life, in the spring of 1808, and immediately went into active service, landing in Portugal in time to participate in the retreat to Sir John Moore. He was in the famous retreat to Corunna, and subsequently was present at the Walcheren expedition in 1809, and in 1814 he served in Sweden, Pomerania and in Holland, and was present at Bergen-op-Zoom. He was also in the campaign of 1815, and was at the battle of Waterloo, for many years he commanded the 78th Highlanders, and accompanied that distinguished regiment to India. After the Sikh campaign of 1845-6 he left the regiment, in which he had commanded for many years, and entered the Army in the Madras Presidency, where he served five years. Macneill became a Lieutenant-General in the Russian service in 1854, and was subsequently Colonel of the 8th (King's) Foot in March, 1858, and was made Colonel of the 78th (Highland) Regiment, June 3, 1860. The gallant General, who died on the 22nd inst., married, June 20, 1818, Isabella Caroline, daughter of Lieutenant-Colonel Charles Brownlow, of Longueu, and sister of Charles, first Lord Lurgan, and has had an only child, Caroline Elizabeth Florence.

J. H. LANGSTON, ESQ., M.P.

James Haughton Langston, Esq., M.P., of Sarsden House, in the county of Oxford, whose death has recently occurred, was the son of J. Langston, Esq. He was born in 1797, was educated at Christ Church, Oxford, and was an hon. D.C.L. of Oxford University. He was distinguished in his county as an enterprising agriculturist, and was a magistrate and deputy-lieutenant for Oxfordshire. He was, as a politician, strongly and consistently attached to Whig principles.

He first sat in Parliament for Woodstock, and represented that borough from 1831 to 1852, when he was elected M.P. for Oxford. Mr. Langston, as the general election in 1835, withdrew from the representation of Oxford; but in 1841 he was again returned for that borough, and has since been his representative until his death. Mr. Langston married, on the 6th of July, 1824, Lady Julia Moreton, second daughter of Thomas, first Earl of Ducie, and fourth Baron Ducie; their daughter Julia is the wife of her cousin, Henry John, third and present Earl of Ducie.

COMMANDER EDWARD WILMOT, R.N.

Edward Wilmot, who, in his thirty-first year, a Commander in the Royal Navy, fell a victim, on the 15th of August last, on board her Majesty's ship Perseverance, before Kagoshima, in Japan, was the third son of Sir Henry Eardley Wilmot, fourth Baronet of Osmaston, in the county of Derby, and was the scion of a family of note since the time of the Saxons. He entered the Royal Navy when quite young, and since that time his career may have been passed in the devoted exercise of his profession. He was mate of the Princess Royal screw-gunboat on particular service from 1854 to 1856, and was appointed to the Royal yacht Victoria and Albert, and remained in her until he obtained his promotion. He was advanced to the rank of Lieutenant Sept. 16, 1853, and after a few months passed in the Excellent gunnery-ship at Portsmouth, joined the Royal Albert, Aug. 24, 1854, and was employed in the Mediterranean until August, 1858. He was Lieutenant of the Indus (7), flagship of Admiral Sir Michael Seymour, Bart., K.C.B., on the North American and West Indies station, from November, 1858, until the spring of 1859; and was Lieutenant in his vessel, Donne Alcock, Esq., Captain, R.N., C.B., in the Hannibal (91), in the Mediterranean, from May, 1860, until he was invalided to the Nile, at Constantinople, Dec. 24, 1861. As Lieutenant he served in the Agamemnon (89), on the North American and West India station from January, 1862, until paid off on the 6th of May. He was appointed to the Euryalus duke Jan. 29, 1863, and on this vessel his promising career has been brought by a glorious death. Commander Wilmot, the only surviving brother, Major Henry Wilmot, late of the Rifle Brigade, has the Victoria Cross.

CAPTAIN JOSLING, R.N.

Captain John James Stephen Josling, R.N., who gallantly fell in the same engagement in Japan, on board the same ship, the Euryalus, with Commander Wilmot, was the son of the late T. Josling, Esq., of London. He was thirty years of age, and had been over nineteen years in active sea service. He was Lieutenant of the Leander (14), Commander Loring, in the Baltic, 1854-5, and Senior of the Thetis (36), Captain Soper, C.B., in the Pacific, from July, 1859, to the end of 1861, when he joined the Euryalus, then fitting for Commissioner, in the White Sea, and remained in her until promoted to be Commander, Dec. 1, 1862. As Commander he served in the Leander, at Devonport, from May, 1858, until June, 1857; in the Princess Royal (91), in the Mediterranean, from February, 1858, until May, 1859 (part of the time as Queen's Harbour-Master at Malta); and in the Victoria and Albert (2), in the Channel, from 1859 until 1861.

WILLS AND BEQUESTS.

The will of the Right Hon. Sir Cresswell Cresswell, Kt., of Princes Gate, Hyde Park, Judge of her Majesty's Court of Probate and Judge Ordinary of her Majesty's Divorce and Matrimonial Causes, was sworn to by the principal registry by his brother, William Cresswell, Esq., Charles John Middleton, Esq., one of the Registrars of the Court of Probate, and John Talbot Airey, Esq., one of the Masters of the Court of Common Pleas, the executors, by the personalty was sworn under £35,000, the deceased attained the age of 76. The family name was Easterby, which his father exchanged for Cresswell in 1811. The testator was called to the Bar at the Inner Temple in 1819; appointed a Judge in the Court of Common Pleas in 1842; transferred to the Court of Queen's Bench in January, becoming a Privy Councillor in 1857; and sat for Liverpool in 1857. Sir Cresswell executed his will in 1861, which is entirely in his own handwriting, and has been proved by his sister Emma an annuity of £250, together with an immediate legacy of £500, and leaves her all his furniture, &c., except his library (which he directs to be sold), and the shares in the Rock Assurance Office, and the proceeds, together with all other investments and securities to be held in trust. Legacies are left to his relatives, to each of his godchildren, to some personal friends, and to his executors. The residuary estate is subject to contingencies, and is bequeathed to the twin children of Commander Wm. Arthur, R.N.

The will of Stewart Marjoribanks, Esq., of Bushey-grove, Hertford, was proved in the London Court by Edward Marjoribanks, Esq.; Dudley Coutts Marjoribanks, Esq., M.P.; and William Marjoribanks, Esq. The personalty was sworn under £100,000. The will is dated March, 1859; and bears date the day before the last dated December, 1861. Legacies are left to his brother, his sister-in-law, his nephews and nieces, and to his executors. He gives to his wife an annuity, and to Sir Dimsdale Harvey and elsewhere, as well as the residue of his personal estate, he leaves to his nephew and executor, Edward Marjoribanks, Esq., absolutely, he trusts as his successor, and to whom he leaves his breed of pure-bred short-horned cattle; and when and the latter in charge to receive £5,000. To his executors he leaves all the horses all the horses he had under his care, together with the harness, &c.; liberal legacies to all his servants; and an annuity of £50 to Mary Mountjy, for a legacy of £500, to that "most excellent person, Mary Mountjy," for her tremendous attention to the testator's wife, Lady Dimsdale.

The will of John Humphery, Esq., of Clapham-common, one of the Aldermen of the City of London, was proved in her Majesty's Court of Probate by the oath of his widow, by three of his sons, Thomas Humphery, Esq., and Messrs. Arthur and Charles Arthur Humphery, Esqrs., and by Thomas Lloyd Hillier, Esq., solicitor, one of the executors. George Wm. Price, Esq., of Gloucester-row, Addison-road, Kensington, the other executor, was under £150,000. This respected Alderman executed his will, with a codicil, on the same day, in March of last December last, but the latter has reference to his decease. He divides his property, real and personal, into eleven equal parts, and bequeaths to his relict one-half, beyond all right to dower, and during her favour, leaving her also the selection of furniture for a residence, and an immediate legacy of £1,000; the other half share he bequeaths to his children. To each of his ten sons he leaves an eleventh share in his entire property. There are bequests to his executors, to clerks, and to other persons, as also to his servants.

In the will of Thomas Powell, Esq., of the Gaer (given last week), the amount of personalty (£200,000) was stated to be stated.

The Commissioners of the National Debt have announced that a balance of one quarter's revenue of £4,894,315 will be applied to the reduction of the National Debt.

The council of the Royal College of Surgeons, as custodians of the Hunterian Museum, lately received a curious contribution from China. It was a box of Chinese food, "chopped sea slug," mushrooms, and the hair tops of the celestial beauties, and are now exposed to the vulgar gaze, as the charming food is supposed at an early age to be. The box, it is said, must have suffered very much, for, independently of the compressing process, there appears to be not fort two decided specimens of hair, and that of artificial pressure. Another preparation, for there are no fewer than eleven, shows the celestial mode to get to cement degree, the fine hair, compressed and bent upon itself by an exaggeration of the natural arch, the last and distal end of the muscular bone being turned over and compressed, whereas the lower tarsal bones being forced up, so as to make a considerable prominence on the instep. The upper part are doubled under the sole. The length of the foot from the heel to the great toe is just four inches and a quarter.

The Lord Bishop of Oxford had two farewell breakfasts last week—one in London on Friday, and another in Oxford on Saturday. At both his lordship made the very gentleman made speeches. He told his London friends that after his labours in the diocese of Oxford were over he completely retire, and he was anxious for the possibility of being obliged to give up his Easter Hall engagement. One reason for this was that he found himself "more frequently discovered that his voice was not the voice of a whistle." He was thus enabled to resume his speech-making, and although "sometimes he say that his voice was not the voice of a whistle," he was pleased to think that in their use he had the direct interposition of the Almighty. On Thursday Mr. Beecher was entertained at a public address by 200 students of the Metropolitan Nonconformist Colleges at a social meeting, among which is the library of the Rev. Samuel Martin, of Hadley, the Rev. T. Binney, Dr. Spence, and other ministers addressed the students, and expressed warm regards for the great Oxford Bishop.

CURIOSITIES OF THE CENSUS.—Much has been said respecting occupations open to women; the Census has its discourses upon that subject. The enumerators had, in 1861, among the women and children of England, 7 money-lenders, 274 commercial clerks, 26 commercial travellers, 34 brokers, 1 bill-discounter, 5 bankers, 413 printers, 3 newspaper proprietors, 1 publisher, 1 bookbinder, 3 ladies' maids, 2 dressmakers, 3 needle-women, 6 were reporters or shorthand writers, 1 accountant, 2 clerks, 4 chemists, 1 assayer of gunpowder, 2 dentists, 2 Chinese interpreters, 1 astronomer, 8 "naturalists." Some of the other sex gave rather ambiguous descriptions of their occupations. Some classed themselves as philosophers; one described himself as a lexicographer, another as a chronologist, and another as a mathematician. Others called themselves as "gentlemen of independent means." There were glyrographers, 2 geometers, 9 pianoforte manufacturers, 1 bellows-maker, 1 bagpipe-player, 2 pen makers, 1 engraver, 413 printers, 3 newspaper proprietors, 1 publisher, 1 bookbinder, 3 ladies' maids, 2 dressmakers, 3 needle-women, 6 were reporters or shorthand writers, 1 accountant, 2 clerks, 4 chemists, 1 assayer of gunpowder, 2 dentists, 2 Chinese interpreters, 1 astronomer, 8 "naturalists." Some of the other sex gave rather ambiguous descriptions of their occupations. Some classed themselves as philosophers; one described himself as a lexicographer, another as a chronologist, and another as a mathematician. Others called themselves as "gentlemen of independent means." There were glyrographers, 2 geometers, 9 pianoforte manufacturers, 1 bellows-maker, 1 bagpipe-player, 2 pen makers, 1 engraver, 413 printers, 3 newspaper proprietors, 1 publisher, 1 bookbinder, 3 ladies' maids, 2 dressmakers. In the workhouse were a half-pay officer, a clergyman, 10 solicitors, 10 surgeons, an author, 18 schoolmasters, and 79 schoolmistresses. Not merely poor, but in prison for debt, were 12 officers in the Army, 2 in the Navy, 9 clergymen or ministers of religion, 32 solicitors, 2 physicians, 13 surgeons, 2 authors, 17 schoolmasters, 2 schoolmistresses, 10 professors. Still worse off, in humble circumstances, were 60 clergymen, 10 ministers, 103 half-pay officers, 22 barristers, 60 solicitors, 9 physicians, 44 surgeons, 34 authors, 14 schoolmasters, and 10 schoolmistresses.

CHESS.

TO CORRESPONDENTS.

ANOTHER SOLVER, SOUTHSIDE.—Are you not in error? Suppose, in reply to your move of 1. Q to Q 5th, Black plays 1. P to Q 4th, what then can White do?

S. A. HARRISON.—The diagram numbered 13 is correct, though deficient in interest; that marked 37 would be all the better for another move.

C. C. ADAMS, Smith Street, Warwick.—Copies of the first-named gentleman is thirty-three; that of the second and third about forty-five and forty. 2. Won by Harrwitz and Kling, 3. Won by Anderssen and Kling, against Harrwitz and Horwitz.

A. WILLIS, Lambeth.—The match in games is very closely during the months of November and December, 1851. 2. Your second game with the Brighton brooks drawn after the 30th move, owing to some mistake. Two moves on each side appear to have been forgotten. 3. Yes, a photographic portrait of Mr. Cochrane would afford pleasure to his many friends and admirers. 4. Mr. Staunton's "Handbook" is out of print, but we know of none in this country.

W. PIERCE, CHIPPY, PEMBROKESHIRE, and others.—In proposing as the key-move to Problem No. 1027 1. Q to Q 3rd, you have overlooked the obvious reply of 1. P takes Q (best). R to Q 5th and B takes P (ch)! It does not appear to us that mate can be accomplished in three moves by any other method.

HERBERT.—We fully agree with you, we fear, that the Problem is not up to the accustomed board. No. 2 has yet to be examined.

J. W. D. P., Dublin.—Your solution is correct, and we suspect, have mistaken the intention of the composer. Black can play 1. Kt to Q 4th, and White fails to force the advance King four moves. See No. 2 Knight on the right side of the field in two moves.

A. BARTLEY.—Correct. For the present we have no use for the Game.

CRIPPS.—The solutions are not at hand. You shall have them next week.

J. P. TAYLOR.—Your solution of Problem No. 1027 is correct. 2. Author of the problem, Mr. Bernhard Horwitz, of Berlin. 3. Your solution of No. 1028 is correct.

MATEO DE RAMIREZ, Almeria.—1. Your solution of the problem, as the foregoing, is perfect. 2. The answer is Kt moves to Q 3rd. 3. Kt takes K P., which was given in the Number for Jan. 4, 1862, appears to us quite free from blemish.

J. LOVELL.—You are wrong, as regards the last move. Let those before writing.

I. G.—The charming little two-move problem which appeared in our Number of the 26th of September, among the "Chess Enigmas," is by Mr. Bernhard Horwitz, of Berlin. The gentleman known as "I. A. of Stockport," to whom the chief work owes a debt of gratitude for the pains he has taken in the correction of the proofs, is Mr. Isaac Arnold, of Stockport. The "Chess Player's Chronicle" is not a work we can recommend to the notice of our readers.—White: King at Q Kt sq., Q at K B 7th, R at Q 3rd, Kt at K 5th and Q B 4th. Black: King at Q B 5th, Q at K Kt 8th, R at K 4th, B at K 3rd, and P at K 3rd. White to play, and mate in two moves.

SOLUTION OF PROBLEM No. 1027.

WHITE.	BLACK.
1. Q to Q 5th (ch)	R takes P (best)
2. Kt from B 7th to Q 6th (ch)	K to Q B 3rd (best)
	K to R 3rd
	Any move

PROBLEM No. 1027.
By Mr. F. HEALEY.
BLACK.

WHITE.
White, playing first, mates in four moves.

MR. BUCKLE'S GAMES CONTINUED.

A well-contested *Partie* between MR. BUCKLE and MR. WILLIAMS.

BLACK (Mr. B.)	WHITE (Mr. W.)	BLACK (Mr. B.)	WHITE (Mr. W.)
1. P to K 4th	P to Q 4th	17. Kt to K 5th	Kt takes Kt
2. P to K 4th	P to Q 4th	18. B takes Kt (ch)	B takes B
3. P takes P	P takes P	19. P to Q 6th	B to K 3rd
4. Kt to K B 3rd	Kt to K B 3rd	20. P to Q 3rd	Q R to K B sq
5. Kt to Q B 3rd	B to Q Kt 5th	21. Q to Q 2nd	Q to K 2nd
6. Kt to Q B 3rd	Castles	22. R to K sq	R to K B 4th
7. Castles	Kt to K B 3rd	23. R to K 3rd	R to K Kt 4th
8. B to K 3rd	Kt to Q B 3rd	24. P to K 5th	B takes K B P
9. P to Q 5th	Kt to K 5th	25. B takes B (ch)	

(Seeing White would drive away his well-posted Bishop by playing P to Q Kt 3rd.)

	Kt to K 2nd	25.	
10. Kt to K 4th	P to K 4th	26. Kt to Q 7th	K to Q sq
11. Kt to K 3rd	Kt to K 4th	27. Kt takes R	Kt takes Kt P (ch)
12. B takes Kt	P takes B	28. K takes B	Q to K 5th (ch)
13. Kt to K B 3rd	P to K B 3rd	29. K to K 2nd	Q to K 7th (ch)
14. P to K 4th	P to K 5th	30. R to K 7th (ch)	K to Kt sq
15. P to K 6th	P to K 6th	31. Kt to K 7th (ch)	Q takes Kt and wins.
16. B to K 4th	Kt to K B 3rd		

Another fine Game between the same Players.
(*Irregular Opening.*)

WHITE (Mr. Buckle.)	BLACK (Mr. Williams.)	WHITE (Mr. W.)	BLACK (Mr. B.)
1. P to Q 4th	P to K 3rd	17. On taking of this Pawn, though justified by the position, it is not considered free from objection.	P takes P
2. P to K 4th	P to Q 4th	18. B to K 7th	
3. P takes P	P takes P	19. Q to K 2nd	Q to K 2nd
4. Kt to Q B 3rd	Kt to Q B 3rd	20. Kt to K R 5th	(Had he taken the Bishop the following move with the Knight, Black would have played Kt to K 5th (ch) K to K Kt sq, and White must have lost the Queen.)
5. B to Q Kt 5th	B to Q Kt 5th		
6. P to Q 5th	Castles		
7. Castles	Kt to K 2nd		Q R to K B sq
8. B to K 3rd	Kt to Q B 3rd	21.	
9. P to K R 3rd	B to K R 4th	22. Kt to K B 4th	P to K Kt 3rd
10. K to R sq	Kt takes B	23.	P to Q B 4th
11. Q takes Kt	P to K 4th	24.	P to K B 5th (ch)
12. P to K B 3rd	Kt to K R 4th		K to K Kt sq
13. P to K 5th	P to K B 3rd		R takes K P (ch) and Black must lose.
14. P to K 6th	Kt to K B 3rd	25. K to Kt sq	K to Q B 2nd
15. B takes Kt	Q takes B	26. K to K to 2nd	B takes K B P
16. Kt to K 2nd	P to K 5th	(This well-judged manœuvre was very well conceived.)	
17. P to K 4th	Q to K B 5th	27. P takes P	Q takes P (ch)
18. K to K 2nd	P to K 6th	28. K to K 3rd	R to K B 5th
19. Q P takes B	P to K B 2nd	29. P to Q B 4th	Q takes P
20. P to Q 6th	P takes P	30. K to K sq	Q to K 5th (ch)
21. R takes P	R to Q 2nd		and Black resigns.
22. Q to K 3rd	R takes B P		

CHESS ENIGMAS.

No. 1160.—By Mr. T. SMITH.

White: K at K B 6th, R at K 4th, B at K Kt 3rd, Kt at Q B 4th; Ps at K B 2nd, K 6th, and Q 4th and 5th.

Black: K at Q 4th, B at Q Kt sq, P at K 2nd.

White to play, and mate in four moves.

No. 1161.—By Q. W., of Banbury.

White: K at Q Kt 8th, Q at Q R 5th, Kt at K 6th and Q Kt 3rd, Ps at Q 3rd and Q B 4th.

Black: K at Q Kt 3rd, Q at K Kt 7th, B at Q R 6th, B at K B 6th, Kt at Q B sq and Q B 7th; Ps at K Kt 4th, K B 5th, Q B 4th, and Q 4th.

White, playing first, to mate in four moves.

No. 1162.—By Mr. T. SMITH.

White: K at K B 5th, R at K Kt 4th and Q R 8th, B at K Kt 5th, Kt at K 4th and Q B 3rd; Ps at K 3rd, K B 2nd, and Q Kt 4th.

Black: K at K 6th, Kt at K B sq and Q B 8th; Ps at K R 6th and K B 3rd.

White to play, and mate in three moves.

SCIENTIFIC NEWS.

SHOOTING STARS.—On Aug. 10 last M. Julius Schmidt, while gazing from the lofty of Castle to Ithaca, counted the greatest number of the meteors which he has yet observed—115 in an hour, between one and two a.m.

A NEW COMET, the fourth of 1863, was discovered on the 9th inst. by an amateur astronomer, M. Buscher, a clockmaker at Baden, near Berlin, who also discovered independently the third comet of the year, seen a day previously by M. Respighi. The new comet was observed at Naples on the morning of the 12th by M. Bruhns. Its diurnal movement was four minutes right ascension and half a degree of north declination. It presented the aspect of a badly-defined nebulosity, with an eccentric nucleus. M. Tempel discovered his comet independently on the 13th, at Marseilles. He likewise, like Mr. Buscher, is a watchmaker.

THE EARTHQUAKE PENDULUM employed by MR. E. J. LOWE, as to the observations recently made at Nottingham in the Town Arboretum of a wooden rod, 80ft. long, freely hung in a tube of 6in. diameter, which extends from the summit to the base of the mound on which it is placed. It is loaded with a brass ball, about the size of an ordinary orange, with a steel index below, is attached. The index bar will move in any direction, and its record is of great value, after having been idle except for once, is exceedingly satisfactory. An earthquake, by moving the mound, will cause the pendulum to vibrate, according to the blak—the length of the chalk removed registering the displacement of the mound, and the direction of the vibration and the direction of the shock.

IODIUM AND WASIUM, THE NEW CHEMICAL ELEMENTARY BODIES.—The recent "Bulletin Scientifique" of M. Corenwinder, Professor in the arsenical pyrites of Fresbyne, received its name because its spectrum does not present any green but, also an indigo-blue ray not hitherto mentioned, which is very brilliant, clearly defined, persistent, and with a refrangibility sensibly greater than the blue ray corresponding to the strontium lines. In isolating the new body in very small quantity, in the forms of chloride and hydrochloride, and even in the metallic state. The latter metal, however, was discovered by M. Bahr, a Swedish chemist, who has named it after the litterious house of Wasa of that country. It is a white, a silicone resembling cobalt, soluble, found in the isle of Roenshulm. The oxide or wastum has a royal-blue colour. When heated it gives off a violet vapour, crystallizing, and, indeed, it assumes the form of a yellow-ish-brown gummy powder, which disengages reddish vapours. Its specific gravity is 4·948. Its equivalent is 1,472, and its oxide is 1·726. It does not appear to give rise to any characteristic spectral rays.

SOLAR SPOTS.—The Rev. F. Howlett has sent to the Royal Astronomical Society a paper on these phenomena, which appears in the last number of the "Monthly Notices." His observations, for the last eighteen months' labour, are contained in about 54 sheets, comprising 128 whole disks, and many hundreds of sketches of single spots and groups. Each whole disk is a rare occurrence when observations as possible. He states that, as a general rule, the spots are confined to two zones, one on each side of the sun's equator, and never exceed 35 degrees of latitude; and these limits are not affected, as yet not be expected before 1865 or 1866, reckoning from the date collapsed by M. Wolf, of Berne. He considers the arrangement to be analogous to that of patches of penumbrion which Mr. Howlett frequently noticed, and also a highly interesting fact, that the sun's surface, it seem to him to bear no trace of cyclones upon the sun's surface. By the use of a screen he obtained a far better insight than by the ordinary method into the minute structure and general disposition of those remarkable solar phenomena—the faculæ. As is well known, they occupy the same zones as the spots, but in high solar northern latitudes, though they abound commonly in the zones occupied by the spots. Their forms are very various, and they are often of considerable large extent in small amorphous patches, sometimes they are resistate; at other times they assume a kind of reticulated or interlaced appearance (as the Professors Spencer observe), that of the circular lunar craters. Not unfrequently Mr. Howlett noticed them in the form of elongated ridges, thought of a wire, or even grotesque attenuated human figures. The faculæ (he says) are not only to be seen when near to the edges of the sun's disk, but often, also, when quite upon the central portions of the disk. He alludes to the frequently remarkable persistence of the faculæ when seen isolated upon the whole situated either more remote from or nearer to the sun's exterior. In conclusion, he says, "On the 24th of Jan., in the 'Times,' I read, he observed a curious phantom-looking group of spots, which exhibited an appearance so wonderfully like a human face, that I could not help calling it Shakespeare's face." Should the nineteenth century, its portentous shape might easily have raised considerable apprehension in the minds of the multitude.

THE UTILISATION OF WASTE IN THE IRON MANUFACTURES, which has long occupied the attention of metallurgists, is the subject of recent communication from Professor Fleury to the French Institute at Philadelphia, U.S., in which he has demonstrated that the oxide-deposits of tons of cinders drawn from the puddling and re-heating furnaces, which at most rolling-mills are thrown away as useless, contain frequently from 30 to 50 per cent of metallic iron, combined and mixed with sulphur, silica, lime, and alumina. Professor Fleury has successfully adopted the most ingenious devices of our ironmasters to separate. Professor Fleury states that, near the Tyre Forges, in Pennsylvania, he has found that the cinders a good quantity of cast steel. Two great difficulties had to be overcome. 1st. The oxides are highly refractory, and require powerful reducing agents, and other substances in such a peculiar way that, by remelting the same in the puddling, copper, or other furnaces, the iron is found perfectly and easily extracted; the combination withstands even the high heat in a steel crucible. 2nd. By re-heating the oxides for a long time alone, or with lime mixed with charcoal and clay, the product is red short, and often red and cold short. The sulphur, silicon, and phosphorus combine with the oxygen of the ores; all attempts to extract good materials from the puddling-cinder by dry admixture of lime are useless. Professor Fleury has discovered that the whole working of vitrifiable ores, and can be performed in the puddling, copola, or blast furnace. The preparation of the cinders is as follows:—1. Grind, and sift through a coarse sieve. 2. Mix with a solution of chloride of lime, and, if properly worked, the result is invariably a good quality of iron. Several furnaces for this purpose are in operation in the United States and in Europe.

THE BRAINS OF A BUSHWOMAN and of two idiots of European descent have been examined by Professor J. Marshall. From an abstract of the paper, in the "Proceedings of the Royal Society," No. 57, we select the following notices:—The bushwoman was aged, and about five feet in height, and in form of her cranium presented a Gradation of the Cephalic (longheaded) than the negro skull. The actual weight of the preserved brain was 49 oz. 6 drs., which is about 4 oz. less than the average weight of the brains of European females of the same age. The general result of the inquiry is that the brain of the Bushwoman's brain are rather more complex than in the brain of the Hottentot Venus, but much less complex than in the brain of the European. Compared with the Man on the right side of the brain. They are widely separated from those of the ape's brain. Professor Marshall concludes that "the lowest human proper to man are present; but, as compared with the European brain, are much more simple, and approach in this respect to the brains of the lower apes." It is in the occipital and orbital convolutions. 2. That the convolutions, taken generally, are rather more complex in the brain presented as Gradation of the Hottentot Venus's brain, which may be partly due to the obliteration of details by the greater amount of fluid which is found in the latter. 3. That the convolutions, being more simple, can be more easily counted and described than those of the European brain. 4. That there is evidence of the symmetry characteristic of man. 5. That there is a greater difference between the two sides of the Bushwoman's brain than usual. 6. That the Bushwoman's brain presents a greater difference between it and the European than between the chimpanzee and the negro; and, of course, between the Bushwoman and the lower quadrumanous brains. There is, however, less difference between the Bushwoman and the highest ape brain than between the lowest quadrumanous animals. 7. The general results justify the expectation that characteristic differences of degree of cerebral development may hereafter be found in the several leading races of mankind. The idiots' brains examined were those of a woman, aged 30, who died in Feb., 1862, and of a boy, aged 16, who died of a wall, rather badly; drew a dull, and say a few words. The latter could neither read, handle anything, or count beyond ten. In both the convolutions of the general convolutions arrived at.—1. The idiots' cerebra are not merely diminutive organs, but are also imperfect in their development. 2. Some parts are fewer in number, less complex, and different in relative proportion and position. 3. Some parts, which in the brain of the Bushwoman presents proper to the human cerebrum are represented in the idiots, but are very remarkably simplified.

The Emigration Commissioners have chartered the Fusilier, 1,000 tons, to convey emigrants to Adelaide, South Australia, at £18 3s. 3d. per statute adult. The Fusilier is appointed to receive her passengers at Plymouth on Saturday, the 31st inst., and to proceed to her destination direct. The Fusilier sailed from Plymouth on the 11th of April, arrived at Brisbane, Queensland, on the 10th of August, and left Moreton Bay on the 20th of August, the cargo consisting of wrought-piece, 100 bags rice, 73 single women. Of children between one and twelve years of age, 5 died on the voyage. Two births and two deaths (infants) took place during the voyage.

NEW BOOKS.

THE NEW NOVELS.—Now ready, at all the Libraries,

QUEEN MAB. By JULIA KAVANAGH. Author of "Nathalie," "Adele," &c. 3 vols.
THE BROWNS AND THE SMITHS. By the Author of "Anne Dysart." 3 v.
GOOD SOCIETY. By Mrs. GREY. 3 v.
FLORIAN'S HUSBAND. 3 vols.
HURST and BLACKETT, Publishers, 13, Great Marlborough-street.

ZOOLOGICAL SOCIETY'S LATEST PUBLICATIONS.
PROCEEDINGS OF THE SOCIETY FOR 1863. Part 2, containing the Papers read this year at the Scientific Meetings up to the end of June. Price 2s. Also, the Same, with seventeen Illustrations, mostly coloured. Price 15s.
INDEX TO THE PROCEEDINGS OF THE ZOOLOGICAL SOCIETY FROM 1848 TO 1860. Price 6s.
TRANSACTIONS OF THE SOCIETY. Vol. V., Part 2, containing Professor Owen's Paper on the "Aye-Aye," with fourteen Plates. Price 25s.
LIST OF VERTEBRATED ANIMALS living in the Gardens of the Zoological Society of London. (Second Edition.) Price 1s. 6d.
These may be obtained at the Society's Office, 11, Hanover-square, W.; at Messrs. LONGMANS', Paternoster-row; or through any Bookseller.
The subscription price of the Society's Publications in the case of Fellows and Corresponding Members of the Society is now reduced to the sum of £1 1s. per annum, provided such subscription be paid in advance before the 29th of April in each year.

Price 6d., Monthly,

THE ENGLISHWOMAN'S DOMESTIC MAGAZINE. Contents of No. XLIII. (NOVEMBER). 1. Beechwood Manor. 2. Concerning Precious Stones. 3. The Englishwoman's Conveyance Company. Stage IV. Illustrated by Adelaide Claxton. 4. The Two Balls. A Tale of Society. 5. The Advantages of the Rising Generation. 6. The Book of the Month. Jean Ingelow's "Poems." 7. The Fashions. 8. The Englishwoman's Conversazione. A Coloured Fashion-Plate and a Coloured Pattern for Carriage Foot-Warmer. A large Sheet of Patterns of the Newest and most Fashionable Winter Mantles. A Supplement of sixteen large pages is also published, price 6d., containing—1. La Moda. 2. Operas, Oratorios, and Musical Entertainments. 3. An Autumn Invitation. (Poetry.) 4. Captain Masters's Children. By Thomas Hood. 5. The Foot of Clay. By Charles de Bernard. 6. A Voice from the Exodus. (Poetry.) 7. A Folly of the Day. 8. Music of the Month. 9. Answers to Correspondents. Illustrations of Winter Toilets; new stitches in Knitting and Crotchet; Round Cushion or Footstool; Silk Waistband; Netted Toilet Cushion; Cashmere Hood; Merino Bodice; Marguerite Pouch; Châtelaine Bag and Band; Chinese Bodice; Tulle Fichu; Pompadour Porte-jupe; Jacket Bodice; Carriage Toilets; full-page Engraving of new Cloaks and Mantles, Bonnets, Caps, Coiffures, Sleeves, &c. Also a large Fashion-Plate and a Coloured Pattern for a Curtain or Table-cover Border.
London: S. O. BEETON, 248, Strand, W.C.

Price 6d., Monthly,

THE BOY'S OWN MAGAZINE. Contents of No. XI. (NOVEMBER).
1. Cressy and Poictiers; or, the Story of the Black Prince's Page. By J. G. Edgar. 2. The Zoological Gardens: The Cat Tribe. By the Rev. J. G. Wood, M.A., F.L.S., &c. 3. The Adventures of Reuben Davidger, Seventeen Years and Four Months a Captive among the Dyaks of Borneo. By the Author of "Wild Sports of the World." 4. The Young Norseman. By W. B. Rands. 5. The Boy that Loves a Baby. By W. B. Rands. (Poetry.) 6. "Lucknow" Kavanagh and the Victoria Cross. By an Army Chaplain. 7. Adventures with the South African Elephant. By Captain A. W. Drayson. 8. Midshipmen Afloat. 9. Chemistry. By W. G. Howgrave. 10. How to Make a Small Organ. 11. The Story of the British Navy. By Edwin F. Roberts. 12. Up in the Alps. By Sir Lascelles Wraxall, Bart. 13. Fishing. 14. Puzzle Pages. By T. Hood, &c.
Every article Illustrated with splendid Engravings from Designs by eminent Artists.
A number sent post-free for seven stamps.
London: S. O. BEETON, 248, Strand, W.C.

Demy 8vo, extra cloth, 6s. 6d.; half morocco, 12s.; morocco, 15s.,

(from 75, Strand, and Coventry-street). Established nearly a Century. List of prices free. Old Watches, Gold, Silver, Diamonds, &c., purchased or taken in exchange. Merchants and Captains supplied on liberal terms. Watches and Clocks repaired. A new assortment of large Musical Boxes with all the late improvements.

DENT'S CHRONOMETERS, WATCHES, and CLOCKS.—M. F. DENT, 33, Cockspur-street, Charing-cross, Watch, Clock, and Chronometer Maker by special appointment to her Majesty the Queen, 33 and 34, Cockspur-street, Charing-cross (corner of Spring-gardens).

BENSON'S WATCHES, adapted for every class, climate, and country, wholesale and retail. Chronometer, Duplex, Lever, Horizontal, Vertical, Repeating, Centre Seconds, Keyless, Astronomical, Reversible, and Chronograph Watches, from 200 guineas to 3 guineas each. An Illustrated Pamphlet and price-list of every description of Watch post-free for two stamps.—J. W. Benson, Manufactory, 33 and 34, Ludgate-hill; Branch Establishments, 46, 47, and 63, Cornhill.

BENSON'S CHURCH, TURRET, and STABLE CLOCKS.—Clergymen, Architects, Committees, &c., can be furnished with Estimates and Specifications for every description of Horological Machine, especially Cathedral and public Clocks, chiming tunes on any number of bells. A short pamphlet on Church and Turret Clocks post-free on receipt of one stamp.—J. W. BENSON, maker of the Great Clock for the Exhibition, 1862, 33 and 34, Ludgate-hill, E.C.

CAUTION.—THE CELEBRATED LORD BURY TELESCOPE can only be had of J. H. STEWARD, Sole Maker, and his Agents. Will read the name of a light-ship at eight miles. Price £3 10s. complete. Address, 406, Strand London. Catalogues, with testimonials, post-free.

THE PLANETS and DOUBLE STARS seen distinctly by a new Telescope for £5, which will also distinguish the face of a sheep and features of a man four miles, the sign of a public-house five miles, shot marks upon a target two miles, and time by a church clock ten miles. This instrument is guaranteed in writing to perform the whole of the above, and to be equal in the most important respects to telescopes costing £70. It has a 3-in. superior achromatic object-glass, two eyepieces, &c., with portable metal tripod stand with jointed claw feet.—S. and B. SOLOMONS, 39, Albemarle-street, Piccadilly. Persons are invited to apply for a diagram with full particulars, sent free. Powerful small pocket telescopes, opera, field, and general outdoor glasses.

POCKET BAROMETER, COMPASS, and THERMOMETER, all in one, the size of a watch, for telling the weather, the heights of mountains, direction of winds, and temperature of the air. Guaranteed for 12 months. Price £4 15s., sent free.—S. and B. SOLOMONS, Opticians, 39, Albemarle-st., Piccadilly.

ACHROMATIC MAGIC and DISSOLVING LANTERNS.—The advantage of achromatic lenses over the common lenses now in use is brilliancy and beautiful definition. No additional charge is made upon this improvement, as a large sale is anticipated. Catalogue sent free.—S. and B. SOLOMONS, Opticians to the Government, 39, Albemarle-street, Piccadilly.

SPECTACLES "PERFECTLY ADAPTED" by the only safe process—that of the VISOMETER, an instrument for exactly determining the strength of each eye, and which has received the encomiums of the leaders in science, including Sir David Brewster, Sir P. Crampton, &c. Correspondence conducted with parties desirous of being properly suited with spectacles or eyeglass free of all charge.—SALOM and CO., Opticians, 98, Princes-street, Edinburgh. No agents nor branches in or out of London.

DEAFNESS.—The SOUND MAGNIFIER and INVISIBLE VOICE CONDUCTOR, for Deafness. It fits into the ear not perceptible, removes singing noises in the head, and enables deaf persons to hear distinctly at church and at public assemblies.—S. and B. SOLOMONS 39, Albemarle-street, Piccadilly.

OSWEGO

PREPARED CORN,
for
Puddings, Custards, Blancmanges, &c.
Manufactured and Perfected by
T. KINGSFORD and SON,
of Oswego, State of New York.
It is the original preparation from the farina of maize, established 1848, commands the highest price from the trade, and offers the best value to the consumer.
It is a quarter stronger than any of the imitations, has a finer grain, and is more delicate.
The Oswego has the natural golden tinge, and not the chalk white produced by artificial process.
KEEN, ROBINSON, BELLVILLE, and CO.,
Garlick-hill, London.

LETTERS PATENT 1823. PRIZE MEDAL 1862.

ROBINSON'S PATENT GROATS is the most valuable preparation for making pure and delicate gruel. Modern chemistry has shown that this food is easy of digestion and rich in nutriment.
ROBINSON'S PATENT BARLEY makes a delicious custard pudding, directions for which have been given by Mons. C. E. Francatelli. It is appreciated as a non-inflammatory drink, is excellent for mothers nursing, and has long been used with great success for rearing children by hand.
KEEN, ROBINSON, BELLVILLE, and CO., London.

KEEN'S GENUINE MUSTARD.
There are many qualities of Mustard sold.
Obtain Keen's Genuine Mustard and full approval is guaranteed.
FIRST MANUFACTURED 1742.
Sold by most Grocers from the Cask, and in 1lb. and ½lb. Canisters.
KEEN, ROBINSON, BELLVILLE, and CO.,
London.

NOTICE.—We have now supplied the larger portion of the Family Grocers of England with our
ONE HUNDRED AND TWENTY-FIRST ANNUAL DELIVERY OF

KEEN'S MUSTARD. Purchasers of this valuable table condiment will, upon obtaining our manufacture, award to it the character of superior quality which it has maintained during the
SALE OF MORE THAN A CENTURY.
KEEN, ROBINSON, BELLVILLE, and CO., London. Oct. 3, 1863.

PRICE'S CHILD'S NIGHT LIGHTS are perfectly safe, and burn their time. The quality of these Night Lights can now be relied on.

SHERWOOD BED LIGHTS, Sixpence and Eighteenpence a Box. These candles are made to supply a want very generally expressed—a cheap, really good chamber candle. They will be found inferior only to "Price's Candles, which will not drop grease when carried," which are sold in Boxes, One Shilling and Three Shillings each.

STARCH MANUFACTURERS
TO H.R.H. THE PRINCESS OF WALES.

GLENFIELD PATENT STARCH,
used in the Royal Laundry,
and awarded the Prize Medal, 1862.

COALS.—COCKERELL'S COALS, price 26s., cash. Central Office, No. 13, Cornhill, E.C.

GLYCERINE, which very simple tests show to be impure, is being sold on the statement that it is "in every respect equal to Price's." Most medical men prescribe PRICE'S GLYCERINE. Where purity is of importance, patients can ensure it by desiring to have their Glycerine in 1lb., 8oz., 4oz., or 2oz bottles, with capsules over the stopper, marked "Price's Patent." Belmont, Vauxhall.

HAIR-DYEING ROOMS.—UNWIN and ALBERT'S, 24, Piccadilly, are as private and replete with every convenience and comfort as a lady's dressing-room; where hair can be coloured the lightest flaxen or darkest brown or black.

PESTACHIO-NUT TOILET-POWDER imparts to the skin a natural whiteness, youthful delicacy, and softness attainable by no other means. 2s. 6d. per Box. Sold everywhere.—PIESSE and LUBIN, 2, New Bond-street, London.

PIESSE and LUBIN'S SWEET SCENTS, Magnolia, White Rose, Frangipanni, Geranium, Patchouly, Ever Sweet, New Mown Hay, and 1000 others. 2s. 6d. each. Sold everywhere.—Laboratory of Flowers, 2, New Bond-street.

JAMES LEWIS'S MARROW OIL, prepared from finest clarified marrow, 1s. to 5s. James Lewis's Cape Jasmin, 2s. 6d. Iodine Soap, 6d. Prize Medal, 1862.
Manufactory, 6, Bartlett's-buildings, Holborn.

WHITE and SOUND TEETH are indispensable to personal attraction, and to health and longevity, by the proper mastication of food.
ROWLANDS' ODONTO, OR PEARL DENTIFRICE, preserves and imparts a pearl-like whiteness to the Teeth, eradicates tartar and spots of incipient decay, strengthens the gums, and gives a pleasing fragrance to the breath. Price 2s. 9d. per box. Sold at 20, Hatton-garden; and by Chemists and Perfumers.
Ask for ROWLANDS' ODONTO.

ARTIFICIAL TEETH, exquisitely enamelled to nature, detection impossible, purest materials and best work, on Mr. ESKELL'S patented and painless plan of self-adhesion. His Treatise free for seven stamps.—8, Grosvenor-st., Bond-st., W.; and at 39, Bennetts-hill, Birmingham. Consultations free.

TEETH,—Messrs. GABRIEL'S INVENTION, OSTEO-EIDON (by her Majesty's Letters patent). Artificial Teeth, from one tooth to a complete set, without pain or extracting stumps, at half the usual charges, by Messrs. Gabriel, Dentists.
London: 27, Harley-street, W., and 34, Ludgate-hill, City (over Benson's); 134, Duke-street, Liverpool; 63, New-street, Birmingham. References to patients. Gabriel's "Treatise on the Teeth" gratis, or free by post. Diploma 1815. Consultation free.

ALL afflicted with WEAK EYES may obtain instant relief by using Dr. WARNER'S EYE WATER; it removes all inflammation arising from cold, dust, or constitutional causes.—Sold in bottles, 2s. 9d., 4s. 6d., by Sanger, Oxford-st.; Prout, Strand; Barclay, Farringdon-street; Hooper, London-bridge.

DENTINE, prepared only by ARMAND et FILS (under the direction of one of the most eminent living Dentists), prevents Toothache, renders the Teeth a pearly white, sweetens the breath, and leaves in the mouth the pleasant flavour of Eau de Cologne. In metal case, 1s. 6d., through all Chemists and Perfumers. Wholesale only, 75, Milton-street, E.C., London.

DINNEFORD'S FLUID MAGNESIA is an excellent remedy for Acidity of the Stomach, Heartburn, Headache, Gout, and Indigestion, and as a mild aperient for delicate constitutions.—172, New Bond-street, London; and all Chemists.

WANTED, LEFT-OFF CLOTHES, Uniforms, Furniture, Miscellaneous Property, &c. The highest price given. Ladies or gentlemen waited on by addressing to Mr. or Mrs. G. HYAM, 10, Beak-street, Regent-street, W.; or, Parcels being sent, the utmost value in cash immediately remitted. Established 1820.

---

THE ILLUSTRATED LONDON NEWS.

No. 1230.—VOL. XLIII. SATURDAY, NOVEMBER 7, 1863. TWO SHEETS, FIVEPENCE

THE PRUSSIAN ELECTIONS.

A SHIP swept out of her course and driven upon a lee shore by the force of a hurricane too sudden to have been foreseen and too furious to be withstood is a sight which may well fill the breast of a spectator with mingled awe and pity. There is one, however, more melancholy still. He who from a place of safety has ever watched a gallant bark dancing proudly before the wind, steered by a self-confident and ignorant helmsman, and who knows that right ahead of her, as the white foam of the broken waters too plainly shows, a ridge of low rocks, upon which no vessel that strikes can hold together for many hours, will shortly bring her up, but in all probability too late for escape, can hardly fail of having been agitated by a greater conflict of emotions than any with which he might have witnessed the

EARL DE GREY AND RIPON AT HULL: INAUGURATION OF THE STATUE OF HER MAJESTY IN THE PEOPLE'S PARK.—SEE PAGE 470.

first catastrophe. Both, indeed, are appalling. In both, the suddenness and certainty of destruction convulse the soul with an agony of apprehension. But, in the one case, the distress is partially subdued by that submissiveness of spirit with which men bow to an inevitable and an irresistible necessity; while, in the other, it is increased by the conviction that the foreseen calamity will be due, not to the *fiat* of the Almighty Ruler, whose heavier judgments are often forms of mercy, but to the self-complacent obstinacy of a blundering pilot, who seeks to gratify, at any amount of risk, and in the face of clear and repeated warnings, some trumpery and selfish whim which happens to have established an ascendancy over his will.

The terrible tempest which took Poland unawares, and which is bearing her before its irresistible strength towards national annihilation, cannot be contemplated without a shudder; but the heedlessness with which Prussia, under the sway of a self-willed Monarch, and the mad schemes of an audacious and ill-qualified Minister, drives on towards those shoals which are thickly strewn with the wrecks of many dynasties, rouses our indignation as well as touches our pity. The perils into the midst of which she has thrust herself have been so gratuitously sought; the Constitutional course which she has quitted was so plain, offered such easy sailing, and conducted to a haven of such prosperity and glory; the hallucinations of her King are so puerile, and the objects of the faction who support him so antinational and unpatriotic; the voice of history is so loud and emphatic in its premonitions to her, and she is fraught with so many and such heavy responsibilities to Europe, that anger gets the better of compassion as we watch her career: and while we deplore the fate towards which she is hastening we feel that, so far, at least, as the King and his Government are concerned, it is self-chosen, and will, therefore, be richly deserved.

The third general election of representatives to the Prussian Chamber, since the kingly power passed into the hands of William I., has just closed. A third time within that brief period the Prussian people have constitutionally expressed their decisive judgment adversely to the Government of the King ophobia. We must recall the conditions under which this national verdict has been delivered before we can fairly appreciate its solemnity. We have to take into account, first, that the population of Prussia have been most assiduously, and we may add, successfully, humbugged by the Press of the House of Hohenzollern—that attachment to the Throne constitutes the basis of their political system—and that, to place themselves in antagonism to the Royal will is generally regarded as the last resort to which political malcontents will have recourse. It is to be borne in mind, in the next place, that the Prussian Chamber is the outcome of a double process of election, the members having been chosen by constituencies which are themselves the elect of the people—a powerful guarantee against any headlong current of popular enthusiasm. In the present instance, moreover, the issue submitted for decision was so unscrupulously misstated by the Government, and the personal influence of the Monarch was so openly brought to bear upon constituencies, that the Throne itself, rather than its advisers, might seem to have been put upon its trial. The Press, which was not, either adroitly managed, or, most opportunely for M. von Bismarck and his colleagues, it fell out, that the national ambition of the Prussian people to take the lead in German international politics appeared to demand, for the time being, that their zeal for the Constitutional rights should be merchanted for their passion for supremacy. All these were potent influences in favour of the Crown, and their combined operation would probably have been too strong for any merely superficial popular feeling.

What, nevertheless, has been the actual result? Of the three hundred and fifty-two seats, to refill which an appeal had been made to the people, six sevenths have been allotted to Liberal Constitutionalists; and of the remaining seventh it is doubtful whether more than half have been gained by partisans friends of the present Government. A fluctuating minority, ranging from five-and-twenty to fifty votes, confronted by a compact majority of three hundred—the product, moreover, of a third general election turning, for the most part, upon the same leading questions as the two preceding ones—will not be regarded by any Minister less reckless than M. von Bismarck as a political force utterly insufficient to justify persistence in any course against which the country has so authoritatively pronounced; nor, perhaps, is there another Sovereign in Europe besides King William I. of Prussia who would not see in this disproportion of parties a good reason for foregoing schemes to which his subjects had offered such a decided resistance. But there is no probability that such will be the case. The last thing thought of in Prussia is the resignation of the Ministry. "Hostility to my Ministers," says the Monarch, "is incompatible with fidelity towards myself." He goes out of his way to identify himself with a clique whom his subjects have all but unanimously repudiated. He still clings to measures which have received the same condemnation. "The work, the carrying through of which," he declares, "I, above all, have committed to my Ministers, is the establishment of that organisation of the army which I have recognised as necessary to the security of the country, and of equal use just in respect of lightening the burden of the older men liable to military service. I should violate my duty towards my people did I not, in the most decided manner, strive for the attainment of that end." But it was chiefly upon this project of reconstructing the military force of Prussia that he got into collision with his last Chamber, and that the country has pronounced an adverse opinion through the general election. The two estates, therefore—the Crown and the Representative House—stand face to face, each determined to assert its will. The appeal to the country has resulted in the return of a slightly less numerous, but also a much less moderate and forbearing majority than before; and the King is less likely than ever to gain by constitutional means the object upon which he seems to have set his heart.

The Chambers will probably meet some time during the present month. The course to be pursued by the Liberal majority is not yet known, if, indeed, it has yet been decided upon. There can be little doubt, however, that they will arraign, without loss of time, the "press ordinance" decreed by the Ministry immediately after the abrupt prorogation of the last Parliament as a breach of the Constitution, and that they will pass a vote of censure on the advisers of that arbitrary measure—that is, on the entire Cabinet, every member of which signed the obnoxious decree. What will follow can only be matter of conjecture. It is rumoured that M. Bismarck will urge upon the King another dissolution; but he will not repeat the process until he has convinced his Majesty that the safety of Prussia requires the abolition, by a coup-d'état, of the Constitution to which he has sworn, and the assumption by himself of absolute power. Or possibly M. Bismarck, independent of sovereignty as Napoleon III., may persuade his master to substitute for the existing political institutions of Prussia a régime copied from that of Imperial France. But no one seems to imagine that he will retire from the contest, at any rate for the present. When the designs of Austria have assumed a more serious shape, and Prussia finds herself finally shut out from the hegemony of the German States; or when approaching war exposes her trans-Rhenish provinces to the ill-concealed cupidity of France—when, in a word, the Ministerial personal position of the moment is one of visible and proximate danger, and the patriotism of her people gets the better of their dreamy inaction, M. von Bismarck and his colleagues will be swept aside with little ceremony, but too late, it may be, for the safety of the Throne, which no medieval dogma of Divine right will avail to secure against the wrath of a people dragged by the audacious self-importance of a miserable faction to the very brink of national ruin. The helmsman may snap his fingers at the elements whilst yet their awful power slumbers, but what will he do and where will he his assurance when the ship is among the breakers?

FOREIGN AND COLONIAL NEWS.

FRANCE.

On Thursday the Session of the Legislature was opened by the Emperor in person. We give the Imperial speech in another column.

The Empress, as mentioned in our last Number, arrived at Toulon on the morning of Sunday the 25th inst. After breakfast she visited the vessels of war at anchor in the roadstead, commencing by the steamline Ville de Paris, bearing the flag of Vice-Admiral Rigault de Genouilly. At the arsenal of Toulon her Majesty visited the building-yard of Mourillon, where a magnificent frigate had been erected for her to witness the launch of the iron-clad frigate the Provence, which took place with perfect success. The Empress appeared much gratified at the sight, and congratulated the workmen on the result of their labours. The Provence is a fine vessel, and will carry thirty-eight guns, with an engine of 1000-horse power. Her Majesty afterwards visited the Imperial dockyard, and the establishment for casting cannon. The Empress gave a grand dinner on board the Aigle to all the high civil and naval authorities. After dinner she reviewed the troops, and went through the evolutions of a combat by night, which produced a striking effect. At nine o'clock her Majesty proceeded to the Prefecture, and, having arrived at the railway station, and started for Paris, where she was met at the station by the Emperor.

The statue of Napoleon I., as Emperor, in the Place Vendôme, on Wednesday raised to the top of the column in the Place Vendôme.

General Prudhomme, formerly President of the Legislative Assembly of 1848, died yesterday week at Nantes. General Lamoricière, long his companion in arms in Algeria and in exile at Brussels, was with him during his last moments. M. Dufaure and M. Lanjuinais, deputy for Nantes, attended his funeral.

General Prudhomme has left for Egypt on a mission connected with the Suez Canal.

Transactions in the stock market at Paris by the assessors, or principal clerks of the stockbrokers, have been forbidden. All such transactions must be conducted by the agents de change themselves.

A great number of persons visited the Catacombs on Friday and Sunday and Monday to pray and to deposit garlands on the graves of their friends on the occasion of All Saints and All Souls' Days.

It appears that the long-projected plan of making Paris a seaport by cutting a canal from Dieppe to Dieppe-dale has been revived. The definitive plan has been deposited with the Minister of Public Works. The line to be followed is nearly the same as that laid down in a plan prepared in the year 1825, with the difference that the termination of the canal is to be sufficiently deep and wide to permit the largest ships to come up to Paris.

The *Epoc* announces the arrival at Cherbourg of the Confederate steamship of war Georgia, commanded by Lieutenant Maffitt, she had taken in coal. The Georgia is a ship of 800 tons burden, with an engine of 700-horse power. She carries five guns. This ship, which is said to have been built in England, is now to Cherbourg to have her armament changed.

Stormy weather appears to have been universal throughout France.

The *Moniteur* of yesterday week contains a short official report from Prince Napoleon on the operations of the Imperial Commission appointed to conduct the French section of the International Exhibition in London. The report is given in another column.

MEXICAN AFFAIRS.

We learn from the *Moniteur* that numerous adhesions to the French intervention in Mexico are being given in, and that the organisation of the royal army is being developed.

Great disorders are said to have existed among the adherents of Juarez, the majority of the Governors disowning his authority.

Marshal Forey has addressed a letter to the Emperor, describing the present state of affairs, including separation of the Republican of the Archduke Maximilian, that he will only definitively accept the crown upon the adhesion of the majority of the Mexican States. Marshal Forey says this vote, perhaps, be considered already accomplished, the populations of all places from which the adherents of Juarez are absent having spontaneously recognised the French intervention.

Marshal Forey had given up his post to General Bazaine, and had left Mexico for Vera Cruz.

General Bazaine had received instructions from the Emperor to cancel the decree issued by Marshal Forey sequestrating the property of those who refused to recognise the new order of things.

M. de Saligny, lately the French Minister, will no longer pay political pensions to Mexicans, and remains there solely on private business.

SPAIN.

The opening of the Cortes took place on Thursday. The Queen's speech states that friendly relations continue with foreign nations, and that the project of Constitutional reform is definitively resolved upon. The position of Senator will in future be hereditary. The speech announces that no diminution will be made in the Budget. Her Majesty deplores the insurrection which has broken out at St. Domingo, and hopes for the assistance of the Spanish nation in its repression.

PORTUGAL.

The Queen has taken carriage exercises on several occasions.

The King has distributed the prizes at the Polytechnic Institution, on which occasion his Majesty made an impressive speech to the members.

The Royal family visited the opera in state yesterday week. The city was partially illuminated.

The Italian residents in Lisbon are raising subscriptions for the erection of a monument to commemorate the marriage of Dom Luiz and Princess Mary of Savoy.

The subscription in Lisbon for the loan amounts to £2 830,000, and in Oporto to £500,000.

The weather is wet and stormy.

ITALY.

Letters from Naples state that the inauguration of the Foggia Railway is fixed for the 8th inst. The King will leave the same evening for Avellino and Melo. He will return to Naples on the 9th. Two hundred carriages with public functionaries and Neapolitan nobles will go out as far as Melo to meet his Majesty. Great preparations are being made for the reception of the King of Naples. The review of the troops will take place on the 10th. Twenty-five vessels will be present in the bay. The Ministers of the Interior, Foreign Affairs, Justice, and the Marine will accompany the King during his journey to Naples. Upon his return his Majesty will remain a few days in Tuscany.

The Minister of War has ordered the line of the Volturno to be placed in a state of defence, and the provisioning of the fortress of Gaeta.

The meeting of the Italian Parliament, shortly about to take place, will be merely a continuation of the Session of 1863. There will therefore be no speech from the Throne.

The Strasburg Mint has just struck off copper coin for the Italian Government to the amount of 8,000,000f. The number of pieces of money coined was upwards of 81,000,000, and the operation was completed in less than two months.

Tuesday's *Gazette* publishes, in Italian and English, the text of the Treaty of Commerce and Navigation between her Britannic Majesty and the King of Italy, signed in London on the 26th of October last. The conditions are of the most liberal order, each of the high contracting parties binding themselves to impose no duties on the goods or produce of the other country than such as are payable by their own subjects; and that in all such matters as transit, warehousing, drawbacks, &c., English and Italian merchants shall enjoy the same privileges in the respective kingdoms. There are other clauses, placing England and Italy on the footing, in every commercial point and freedom of trade, under all circumstances, "on the footing of the most favoured nation." Sir Alexander Hudson's nephew, Mr. Chevalier G. Manna appear as signatory plenipotentiaries to this almost last official act of our regretted Italian Minister at Turin.

AUSTRIA.

In Tuesday's sittings of the Reichsrath the Finance Committee recommended a loan of 60 million florins to cover the deficit of 20 millions of the loan to be devoted to relieving distress in Hungary, and 20 millions to the redemption of the floating debt.

The Austrian reply to Prussia relative to the German reform question has been despatched, accompanied by a memorandum completely refuting Herr von Bismarck's arguments. The preliminary proposals of Austria will be found satisfactory.

An increase of six millions of florins has taken place in the bullion of the Bank of Austria, owing partly to the payment of instalments in specie.

PRUSSIA.

A Royal decree published in the *Gazette* on Monday, summons both Houses to meet on the 9th inst.

The *National Gazette* thus analyses the results of the elections, allowing for three doubtful ones, and a few cases in which the choice remains yet unknown—Progressists, or Radicals, 140; Bockum-Dolffs party, Liberals but opposed to Herr Vincke, rather weaker, 30; party is reduced to 6; newly-chosen Liberals, 19. The Roman Catholics are returned from 31 to 40; Conservatives, 37; Poles, about the old number, 27. Perhaps the most striking fact about the election is that the moderates of both sides seem to have been discarded.

The result of the elections has had the effect of irritating the King. In a public festival which has just taken place at Magdeburg his Majesty expressed himself as follows:—"I have the strength, weight of the struggle which God has imposed upon me; but I know also that my duty is to transmit to the crown of Prussia intact which has been transmitted to me as an heritage, is to sustain it to the end. Let what may happen, I will persist without flinching to what I have considered necessary for the welfare and independence of the country."

The members of the Zollverein are to meet in a general conference at Berlin to pronounce on a new customs' tariff submitted to them by the Prussian Government. The Treaty has been drawn up according to the stipulations of the France-Prussian treaty of commerce. Its adoption would involve the definitive adoption of that treaty, and, as a consequence, the acceptance of the Zollverein by all the nations would lead to the non-acceptance of the treaty and the dissolution of the German customs' union.

DENMARK AND GERMANY.

At Monday's sitting of the Rigsraad the fundamental law was discussed. The President of the Council was opposed to all the proposed amendments, which, however, after calm, and, indeed, dispassionate discussion, were rejected by 40 votes against 14.

An official Berlin journal has published relative to the resolution of the Federal Diet of the 1st of October, as follows:—"All that the Federal Diet will effect by federal execution in Holstein can be more easily and completely effected by a calm understanding. The Danish Government is willing to meet the wishes of the Federal Diet in all points which, in the opinion of the latter, are equal rights of Holstein, which belongs to the German Confederacy, are considered to be insufficiently guaranteed. As soon as it is also certain that the fulfilment of all the other points required by the Federal Diet in Holstein would not be obtained by Federal execution."

At the sitting of the German Federal Diet on Thursday week the representative of Denmark announced that, though his Government maintained its former ground, it was yet open to negotiation.

A third note from Earl Russell was laid before the Diet, in which his Lordship endeavours to form a basis upon which a mediation can be established.

THE INSURRECTION IN POLAND.

It is stated that the Grand Duke Constantine will be relieved from his functions as Governor of Poland shortly, and will succeed General Berg is to be appointed his successor.

Several engagements between the Russians and the Poles have taken place, in some of which the latter were successful.

A Lomberg despatch states that one Polish insurgent corps has retreated to Austrian territory, and that the Russian advance has left a larger body entered Volhynia on Sunday.

The *Lemberg Gazette* mentions a new plan adopted by the Russians against the Poles. The patrols charged to scour the forests take with them a number of large dogs of different breeds to assist them in discovering the insurgents concealed there. Many are succeeded among the low brushwood. These animals cause great alarm to the Poles.

An Imperial ukase, dated from Livadia, assigns pensions to the widows and orphans of officials assassinated in Poland.

General Berg is increasing the severity of his system of terrorism in Warsaw. Upon the 22rd ult. a razzia was made upon the young men of the Polish capital. Several hundreds were seized, searched, and stripped to the skin. The same operation was repeated at night, 130 young men being arrested and carried off to the citadel. The authorities are enforcing the order against wearing mourning with so much vigour against the women that the Polish town explain has thought it necessary to advise his countrywomen to cease wearing the forbidden apparel, in order to avoid the indignities they expose themselves to. Upwards of forty ladies have been arrested and sent to the citadel. More than 900 prisoners have just been sent from the citadel to Siberia. The consternation of the people is said to be very great.

General Trepow, the chief of the gendarmes, was wounded in the

head on Monday with an axe, in the Senator-street. The guilty person was arrested.

The *Times'* correspondent at Warsaw writes:—"The one great subject before which every other fades into insignificance is the French Emperor's speech of the 5th of November. Princes, Counts, shop-girls, shoeblacks—men and women, in short, of all classes and conditions are looking forward to the expected declaration of the Emperor's policy in respect to Poland with a keen anxiety, such as is only felt in our peaceful and prosaic London on the subject of the Derby when the race has been run, and thousands of persons are waiting to know what good or bad fortune the telegraph will bring them."

An address to the French nation has just been published by the National Government at Warsaw. In the address they exclaim that the blood that has been shed is a proof of the vitality of the country which had been said to be dead, for they say blood will not flow from a corpse, and the sympathetic cry of France, "She is not dead!" has sounded in their ears like the signal of deliverance. We said to our brothers in arms, "The love of Poland has at all times been the moral nobility of France; she can only be deprived of that distinction at the cost of her downfall as an initiating nation in progress and liberty." We all, sons of that suffering Poland, children of that land bathed in the tears of old men and mothers, and the blood of martyrs and heroes, embrace you cordially for your sympathetic participation in our struggles. Friends of Poland, receive the salute of those who are about to die!" (Here follow 20,000 signatures of landed proprietors, members of the clergy, Jews, and peasants.)

GREECE.

King George, Sovereign of the Hellenes, has arrived in his new capital. Yesterday week his squadron reached the Piræus, and the King proceeded on the following day to Athens, where he was received, we learn, with much enthusiasm. He attended the performance of a Te Deum immediately upon his arrival. All the Ambassadors of foreign Powers were present at the ceremony.

The majority of the members of the Ionian Parliament have protested against any violation of Parliamentary privileges, and declared any act illegal during the Parliamentary recess which may be prejudicial to the interests and rights of the Ionian Islands.

A Vienna newspaper declares there is a hitch in the arrangements between the Ionian Islands, Greece, and the protecting Powers. The Ionian Senate demurs to granting £10,000 a year to the Greek civil list, but joins with Greece in protesting against the destruction of the fortifications of Corfu. Turkey, in particular, protests against the preservation of these defences; and "several Powers," says the journal from which this intelligence is quoted, are alarmed at the influence of England being withdrawn from the strong position of Corfu.

AMERICA.

WAR NEWS.—VIRGINIA.

The news from Virginia is as perplexing as it is important. Our last Number announced the advance of the Confederates under Lee towards Washington. By intelligence subsequently received we learn that Lee's forces beat a hasty retreat, and still later information notifies their re-advance.

On the 18th ult. the Confederates surprised and took possession of Charleston, eight miles from Harper's Ferry, and to the 19th the Confederate cavalry continued to operate on the rear of the Federals, till General Meade was pushed to the front of the defences of Washington. At this point, where a battle was considered as imminent, General Lee suddenly commenced a retreat, and the Federal cavalry advanced as far as Warrenton Junction without meeting the Confederates, and it was found that General Lee had re-crossed the Rappahannock, having first entirely destroyed the railroad from Manassas to the latter river. This retrograde movement of General Lee took every one by surprise, and gave rise to various conjectures as to the object and motives for it. One supposition was that General Lee contemplated another raid into Pennsylvania; a second, that he was sending his army along the East Tennessee and Virginia Railroad to confront and crush Burnside; while a third was that the latter General, having gained some success over the Confederates at Greencastle, was advancing to Lynchburg, the base of General Lee's supplies, and that Lee was falling back to protect it. On the 24th, however, General Lee's army suddenly crossed to the north side of the Rappahannock, repulsed some Federal cavalry with heavy loss, pushed back two brigades of Federal infantry, and advanced to Beaton station, on the Orange and Alexandria Railway, where there was another engagement with the Federal cavalry. At the date of the latest accounts the left of the Confederate army was said to rest near Beverley Ford, while its line crossed the railway near Beaton station and extended towards Stafford Courthouse.

General Meade has visited Washington for a consultation concerning the future of the North.

TENNESSEE.—RECALL OF ROSECRANZ.

General Rosecranz has been superseded in Tennessee, and his special command given to General Thomas, who fought so doggedly at Chicamauga, while to General Grant is committed the supreme command of the armies of the Cumberland, the Tennessee, and the Ohio.

In regard to the removal of General Rosecranz the Washington correspondent of the *New York Times* says:—"The removal of Rosecranz is the subject of much and contradictory comment. The more correct understanding of the causes that led to it is that charges were preferred against him by Generals M'Cook and Crittenden, of unofficer-like conduct on the battle-field; of a panic-stricken flight from the field to Chattanooga while the battle was in its crisis; and of his unsoldierly and mischievous conduct in publicly reporting on reaching Chattanooga, to both officers and men, that the day was lost. Superadded to this is alleged Government resentment of his disobedience of positive orders not to risk a general engagement by advancing beyond Chattanooga before he was reinforced; also its impatience of his disposition and handling his troops on the field."

President Jefferson Davis has visited the Confederate armies near Chattanooga, for the supposed purpose of allaying the disputes between General Bragg and several of his principal officers.

It was reported that General Bragg had been reinforced by the remainder of Longstreet's corps, and that he had withdrawn the corps of General Breckenridge and General Hindman from the front of the Federal position at Chattanooga. These two corps were said to be "moving in force on the Federal left," and it was likewise asserted that the Confederates had made "another incursion" into Kentucky. It was rumoured that the Federals had made "an attack upon the rear" of the Confederate positions at Rome and Atlanta, in Georgia.

The *Memphis Bulletin* states that General Joe Johnston, with his entire force, except one division, has gone to reinforce Bragg, and that there were not over 10,000 Confederate troops in Mississippi.

CHARLESTON.

The siege of Charleston still flags, but it was again asserted that General Gilmore's batteries were nearly ready to open fire on the city.

A grand review of the Southern troops by General Beauregard took place on the 16th ult., that being the ninety-eighth day of the siege.

The *Richmond Examiner* contains the following, under date Oct. 20:—"The Yankees are hard at work constructing another battery east of Gregg, fronting the sea. A large number of tents has disappeared from Morris Island. Our batteries kept up a brisk fire upon the Yankees, who appear in much larger numbers than usual at Gregg and Wagner. General D. H. Hill has been relieved of his command. Breckenridge takes command of his corps."

Advices from Folly Island and Morris Island to Oct. 18, in regard to affairs at Charleston, are to the following effect:—"Nothing of interest has occurred during the past week. There has been little firing on either side. The Confederates appear to be awaiting the opening of General Gilmore's guns on the city. In the meantime they are not idle, a new battery having belched forth its thunder from James Island, proving that they are still adding to the number of the fortifications. It is stated that the Confederates have several rams in Pocotahgo River, which cause no little uneasiness in regard to our vessels in Port Royal Harbour. It is proposed to place a number of torpedoes across the stream to prevent their egress. Admiral Dahlgren, a short time since, expressed his determination to an officer high in rank to go up to Charleston on the next trial, or else assure himself that the ironclads are unequal to the task. This will enhance the excitement of the conflict, and do much towards settling the dispute as to the amount of work the ironclads are capable of performing. It is believed that James Island is occupied by 5000 Confederate troops. Sullivan Island is supposed to be occupied by about the same number, and in the immediate vicinity of Charleston are quartered 10,000 men, making an aggregate force of about 20,000."

PRESIDENT LINCOLN'S CALL FOR VOLUNTEERS.

The following is President Lincoln's proclamation, calling for 300,000 volunteers:—

Whereas, the term of service of part of the volunteer forces of the United States will expire during the coming year; and whereas, in addition to the men raised by the present draught, it is deemed expedient to obtain 300,000 volunteers to serve for three years or the war, not, however, exceeding three years: now, therefore, I, Abraham Lincoln, President of the United States, and Commander-in-Chief of the army and navy thereof, and of the militia of the several States when called into actual service, do issue this, my proclamation, calling upon the Governors of the different States to raise and have enlisted into the service of the United States, for the various companies and regiments in the field from their respective States, their quotas of 300,000 men.

I further proclaim that all the volunteers thus called out and duly enlisted shall receive advance pay, premium, and bounty, as heretofore communicated to the Governors of States by the War Department through the Provost-Marshal General's office by special letters.

I further proclaim that all volunteers received under this call, as well as all others not heretofore credited, shall be duly credited, and deducted from the quotas established for the next draught.

I further proclaim that if any State shall fail to raise the quota assigned to it by the War Department under this call, then a draught for the deficiency in said quota shall be made in said State, or on the districts of said State, for their due proportion of said quota, and the said draught shall commence on the 5th day of January, 1864.

And I further proclaim that nothing in this proclamation shall interfere with existing orders, or with those which may be issued for the present draught in the States where it is now in progress, or where it has not yet commenced.

The quotas of the States and districts will be assigned by the War Department through the Provost-Marshal General's office, due regard being had for the men heretofore furnished, whether by volunteering or draughting, and the recruiting will be conducted in accordance with such instructions as have been or may be issued by that department.

In issuing this proclamation I address myself not only to the Governors of the several States, but also to the good and loyal people thereof, invoking them to lend their cheerful, willing, and effective aid to the measures thus adopted, with a view to reinforce our victorious armies now in the field, and bring our needful military operations to a prosperous end, thus closing for ever the fountains of sedition and civil war.

In witness whereof I have hereunto set my hand and caused the seal of the United States to be affixed.

Done at the city of Washington, this 17th day of October, in the year of our Lord 1863, and of the independence of the United States the 88th.

By the President. ABRAHAM LINCOLN.

Wm. H. Seward, Secretary of State.

Governor Seymour has issued a proclamation calling upon all classes in New York State earnestly to assist in furnishing the States' quota of volunteers. He asserts that the Federal military situation in Virginia and Tennessee was most critical; that the armies were threatened with serious disaster for want of adequate force; and declares that it was the duty of all citizens, and that he should expect it of them, as well as of all State officials, to give efficient and cheerful aid in the furtherance of the appeal of the President.

The Governor of New Jersey has urged the people to respond to President Lincoln's call for volunteers.

BANQUET AT NEW YORK TO RUSSIAN OFFICERS.

The New York city banquet to the officers of the Russian fleet took place on the 20th ult., at Astor House. Governor Seymour sent a letter of apology for his absence. Mr. Seward did the same, but promised that, should the Russian fleet come to Washington, he would show that he sympathised with the feelings of respect and good-will entertained by the Common Council and people of New York towards Russia. He suggested, as a toast,

"Health and Honour to Prince Gortschakoff, the Russian Minister of Foreign Affairs—not more able in defending the policy of his own country than just and liberal in conducting its relations with the United States."

In the speeches that followed the similarity between the Russian and American empires was dwelt upon, and acts of good-will performed by the officers of the one empire to the other were narrated. Of course, Poland was not mentioned.

BRITISH CONSULS DISMISSED THE CONFEDERATE STATES.

From the South there is one item of intelligence, proving at least that the sympathy with the Confederate cause, of which England is accused by the North, is not rated very highly by the Government of Richmond. President Davis has suspended the British Consuls from their functions, and ordered them to quit the territory as soon as possible. There has long been a popular agitation with this object, which the departure of Mr. Mason may have strengthened. As the Consuls were originally accredited to the Federal Government, it has been a great Southern grievance that they were permitted to discharge their duties in the Southern ports. The plea on which they are now removed—that they had counselled British subjects conscripted into the Confederate armies to throw down their arms whenever they might be brought into action—is immaterial, the act itself having long been foreseen as unavoidable; but it adds one more complication to the general entanglement of American affairs.

MISCELLANEOUS.

President Lincoln has replied to the Missouri delegation that he refused to remove General Schofield. "The commander in Missouri," he said, "is responsible to the President, and not to the Radicals or Conservatives."

There are now twenty-seven journals in Missouri which advocate immediate emancipation.

Secretary Stanton has gone to Tennessee on a tour of inspection.

The New York Supreme Court had refused the motion to remove the action against Mr. Seward for false imprisonment to the Federal Courts, and had denied President Lincoln's power to authorise arbitrary arrests.

Mr. Chase has made a speech in Ohio, in which he declared that Mr. Vallandigham's defeat branded with the lie the saying of the rotten old European monarchies that the American people had no capacity for self-government.

Eighty national banks, with an aggregate capital of 10,340,000 dols., have already been authorised to commence operations in the United States.

The Southern journals are dissatisfied with Earl Russell's speech at Blairgowrie, and exhibit firmer confidence in a friendly interference on the part of France.

According to advices received in Liverpool from New York on the 10th ult., three steamers arrived at New Orleans, all laden with cotton—viz., The Empress, with 2711 bales; the New Orleans, with 444 bales and 804 bags; the Benjamin Franklin, with 170 bales and 40 bags; and the Meteor, with 45 bales; making a total of 3370 bales, and 844 bags. The most important piece of intelligence, however, is that several of the most influential and wealthy planters of Mississippi had taken the oath of allegiance.

The steamer Douro, which was captured last spring by the Federal steamer Quaker City, condemned, sold, and taken to the British provinces, was run ashore on the North Carolina coast, and burnt on the 11th ult., by the Federal steamer Mansemond. The Douro was endeavouring to run the blockade from Wilmington, with a valuable cargo of cotton, tobacco, turpentine, and resin.

A meeting of the local committee of the Social Science Association was held at Edinburgh last week for the purpose of receiving the report of the honorary local secretaries and winding up the affairs of the late congress. Professor Archer read the report, which refers to the gratifying way in which the people of Edinburgh had sustained their reputation for hospitality, and to various bodies and persons to whom the thanks of the association are due—including the hon. general secretary, Mr. G. W. Hastings; and the assistant secretaries, Miss Isa Craig and Mr. Randall. It stated that the working-men's meeting was a feature of special interest, no fewer than 34,960 applications having been received for admission, of which only about 8600 could be gratified, and the order of the meeting, and deep interest taken in the proceedings, were such as to excite the admiration of all. The report concluded by adverting to the great success which had attended the excursions. Mr. Curror, City Treasurer, read the financial report, which stated that the revenue of the general fund from the sale of tickets was £1747 14s.; and the disbursements £208; leaving a balance of £1539. The local subscription fund amounted to £905; and the disbursements to £802; leaving a balance of £102. It was proposed to transmit immediately the sum of £1500 to the association in London. The reports were approved, and votes of thanks were tendered to all who had given their services or in other ways promoted the success of the meeting, special notice being taken of Professor Archer, on whom the great bulk of the work, as the acting local honorary secretary, had devolved. A vote of thanks to the Lord Provost for presiding closed the proceedings.

LATEST NEWS FROM ABROAD.

The following telegrams have been received through Mr. Reuter's office:—

FRANCE.—Paris, Nov. 5, Evening.—It is asserted that the tax upon carriages will be abolished, and will not be inserted in the Budget for 1865.

THE SPANISH CORTES.—Madrid, Nov. 5.—Senor Rios Rosas has been elected President of Chamber of Deputies by 160 votes. Ninety votes were given for Senor Mon. Twelve votes were neutral.

WILLS AND BEQUESTS.

The will of the Right Hon. Henry Beauchamp-Lygon, Earl Beauchamp, of Powyke, and Madresfield Court, Worcester, was proved in her Majesty's Court of Probate by his son, the present Earl, power being reserved to his younger son, the Hon. Frederick Lygon, M.P., the executor. The personalty was sworn under £180,000. The deceased nobleman was a General in the Army, Colonel of the 10th Hussars, and Deputy-Lieutenant for Worcestershire. He died on the 8th of September last, at the age of seventy-eight. His Lordship married, in 1824, a daughter of the second Earl of St. Germans, G.C.B. She died in 1835, leaving two sons and two daughters. His son, heretofore Viscount Elmley, of the 1st Life Guards, was M.P. for West Worcestershire, which the deceased Earl had represented for twenty years, and previously member for the county of Worcester twenty-five years. The first Earl represented Worcestershire for thirty years. The testator executed his will in 1861, and two codicils in 1862. To his son and successor he leaves the residue of his personal estate. To his son Frederick he leaves a third of the large sums under his (testator's) marriage settlement, over which his Lordship had the power of apportionment, and bequeaths to his said son Frederick the sum of £46,000, also the plate which his Lordship purchased of the executrix of his brother, the second Earl Beauchamp. To each of his two daughters he has left a third of the property under settlement, leaving also to his daughter, Lady Raglan, the further sum of £10,000 and a like sum of £10,000 to each of her Ladyship's two sons. To a former governess in the family a legacy of £500; also legacies to his coachmen, grooms, and indoor servants.

The will of the Rev. John Duncombe Shafto, M.A., of Buckworth Rectory, Huntingdonshire, Honorary Canon of Durham, was administered to in the London Court on the 10th ult. by his son, John Edward Duncombe Shafto, Esq., no executor being appointed under the will, which is entirely in the testator's handwriting, and was without his signature thereto, saving in the attestation clause. The will bears date April 1, 1863. The personal property was sworn under £20,000. To his wife he bequeaths his furniture, carriages, horses, farming stock, and certain investments and securities, dividing the remainder of his property between her and his children. There is an interesting request in his will as to his burial, in these words:—"It is my wish to be buried in my own churchyard, on the left-hand side as you enter the rectory; to be carried to the grave by six of the oldest and most respectable of my dear parishioners, who are to receive £1 each and their dinner."

The will of James William Casterton, Esq., of Bexley Heath, Kent, and Dalston, Middlesex, was proved in the London Court on the 21st of October, by James Tyrie, Esq., of Bexley Heath, the sole executor, the personal property being sworn under £160,000. The testator died on the 2nd of October last, having executed his will the day previous, bequeathing the whole of his property, of every description, to his sister Alice, the wife of Dr. Nathaniel Rogers.

The will of George Peters Price, Esq., of Oak Hill, Surbiton, Surrey, and of the Stock Exchange, was proved under £50,000 personalty.

THE DISTRESS IN THE NORTH.

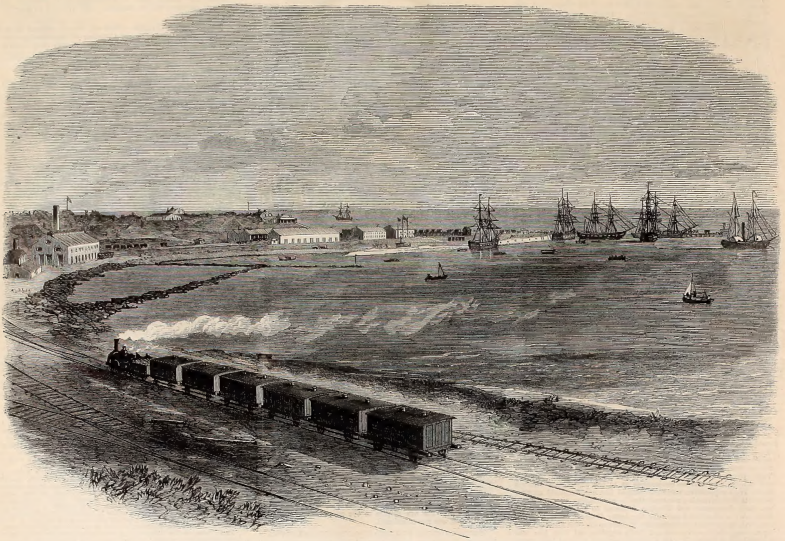
The usual weekly meeting of the Central Relief Committee was held on Monday at the Manchester Townhall—Sir James K. Shuttleworth, Bart., in the chair. The honorary secretary reported that £1146 had been received during the past week; and that the balance in the bank was £264,466. One parcel of clothing, two bags of coffee, and one bag of sugar had been received. One bale of clothing had been sent off. Since the statement had been made up £245 had been received from Edinburgh and £278 from Staffordshire. The comparatively large receipts last week were accounted for by a balance of £904 (exclusive of two previous remittances of £500 each) from the Hon. A. Kinnaird, M.P., the treasurer, and the other members of the committee of the Water Colour Painters' fund. Grants to the amount of more than £4000 were made from the general fund. Mr. Farnall's weekly report stated that on the 24th ultimo there was a decrease in the number of persons receiving parochial relief in twenty-seven unions in the cotton-manufacturing districts, as compared with the number so relieved in the previous week, of 1255; and, since the 6th of December last, a total decrease of 142,474 has taken place. There were, on the 24th ult., 129,509 persons receiving parochial relief in the twenty-seven unions; in the corresponding week of 1861, 47,014 persons were so relieved. The total weekly cost of outdoor relief, on the 24th ult., was £8041; in the corresponding week in 1861 it was £2379.

The Mansion House Committee held a meeting yesterday week. The Lord Mayor was in the chair. Mr. Alderman Lawrence, the Lord Mayor Elect, was introduced to the committee, and at their request consented to act as president of the committee of the fund for the ensuing year, and the present Lord Mayor was requested to continue on the committee, and for the future to act as treasurer to the general fund, as well as to the emigration fund, in room of the late Mr. Cubitt, to which he consented. The committee then proceeded to the ordinary business, and made grants amounting to £2130. After the conclusion of the regular business a resolution was passed to the following effect:—"That the committee, having heard with sincere regret of the death of their treasurer, W. Cubitt, Esq., M.P., take that, the first, opportunity to record the high sense they entertained of his business capacity, his goodness of heart, and the earnest attention he at all times gave to the interests of the Mansion House Relief Fund since its formation under his auspices; and that a copy of the above resolution should be presented to his family, as a token of the sympathy of the committee in their deep affliction."

A meeting was held at Edinburgh, on Monday, to wind up the accounts of the Lancashire fund, the Lord Provost presiding. The account submitted showed that the total sum collected by or remitted through the Edinburgh Committee was £35,010, of which £19,045 had been collected within the city of Edinburgh, or £24,519 within the county and city, the amount sent from other parts of Scotland through this committee being £10,491. There had been remitted to the Central Committee in Manchester £34,265, and the expenses of management had been £766, of which £629 was for advertising. Thanks were unanimously tendered to the honorary office-bearers, the speakers expressing gratification with the results of the subscriptions in the district, which had been larger and more universal throughout the community than those to any other benevolent fund ever instituted there.

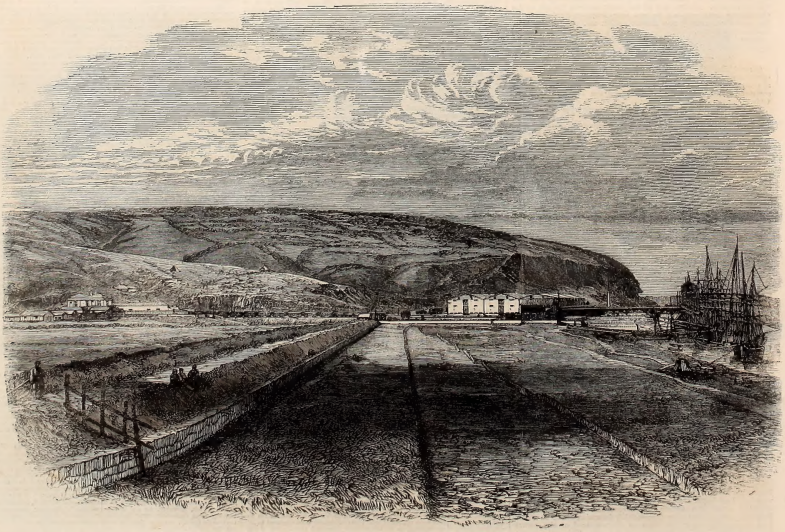
The Far East, the first vessel of her class having the new system of propulsion by two screws, was launched at Millwall on Saturday.

The expected début of the Countess Batthyani, of the well-known Hungarian family, whose beauty and talent have been for some time the theme of conversation in Paris, took place a few days ago at the Théâtre de la Tour d'Auvergne. She selected Racine's tragedy of "Phèdre" for her first appearance, and assumed the principal character. The Countess seeks in a theatrical career a compensation for the loss of a splendid fortune. This circumstance attracted a most fashionable audience.



An English gentleman declares the following incident occurred at the station of the Painbuza Railroad:—"A Mexican girl—pretty and well dressed—was preparing to alight from the carriage, when a French officer and a Mexican officer in a spic-and-span new uniform, offered their hands to assist her in alighting. The lady said, 'Between an invader and a traitor I prefer the invader,' and gave her hand to the Frenchman. The Mexican started as if he had been shot, his hat fell off, and he stood for some seconds perfectly stupefied."

The crypt of Santa Maria Maggiore, when completed (says a letter from Rome), will be one of the finest in Rome, or the world. Egyptian alabaster, *rosso* and *verde antico*, lapis lazuli, and the richest marbles and metals are employed in the completion of this work, in which it is said the Pope takes an especial interest, as he has decided that his own mortal remains shall be deposited on this spot.



Mr. Daniel Darby, who died a few days ago at Rowley, has bequeathed £10,000 to the Birmingham General Hospital. He couples the gift with the condition that the hospital is to give seventy-five in-patient tickets yearly to the poor of the parishes of Rowley and Hales Owen. The money also comes to the hospital in the shape of £300 a year in Consols, for the purchase of which Mr. Darby left £10,000; the surplus, which will be about £800, to go as an unconditional legacy to the hospital. Besides this £800, the hospital will gain about £100 a year, the difference between the cost of receiving the seventy-five in-patients and the £300 a year thus left to defray the expenses of their maintenance.

The Vicar of Roxwell, Essex, in writing to the *Times*, says:—"In the notice of Miss Yonge's book, in your Impression of the 22nd of October, your reviewer expresses his belief that a Meshach and Abednego might somewhere be found to supplement his 'Shadrach.' Give me leave to inform him that in the registers of this parish I find one Henry Brocas and Sarah, his wife, whose eldest son, Shadrach (1743), was followed in due course by Meshach (1745) and Abednego (1747). Having completed the triumvirate the wife seems to have 'left bearing.' I can trace no record of any further issue. 'Abednego' Brocas grew up to manhood, and married, in spite of his name, which, however, he did not perpetuate." Another correspondent, writing from Openshaw, near Manchester, says:—"With reference to your reviewer's remarks on Miss Yonge's book on "Christian Names," I forward you the names of Shadrach, Meshach, and Abednego, sons of Meshach Ashton, of Clayton, near Manchester. The whole have worked for our family the last forty or fifty years, at the Clayton Colliery. Shadrach and Abednego are still there. Meshach was killed in the pit."

THE NEW LORD MAYOR.

THE accompanying Portrait of the Right Hon. William Lawrence, the Lord Mayor of London for the ensuing year, is from a photograph taken by the London Stereoscopic and Photographic Company. Annexed are some particulars, extracted from the *City Press*, of Mr. Alderman Lawrence and his family:—He is the eldest son of the late Alderman William Lawrence, the founder of the well-known firm of Messrs. William Lawrence and Sons, builders and contractors, of which the Lord Mayor Elect is now the senior partner, the second partner being his brother, Alderman James Clarke Lawrence, elected by the ward of Walbrook in 1860, who has just served the office of Sheriff of London and Middlesex, with so much satisfaction to his fellow-citizens. When Cannon-street, Cannon-street West, and New Earl-street were laid out, the firm took a large portion of the ground, upon which they erected extensive buildings, and the Lord Mayor Elect and his family possess valuable properties in these streets. The late Alderman Lawrence represented the ward of Bread-street from the year 1848 until his death, in 1853, and served the office of Sheriff of London and Middlesex in 1849-50; and he was a magistrate for the county of Middlesex. Upon his father's death the Lord Mayor Elect was selected to fill the vacant gown, and he has won the esteem and regard of his constituents by the excellent manner in which he has discharged all the duties of his office. He was elected Sheriff of London and Middlesex in the year 1857; and during his shrievalty the marriage of the Prince of Prussia with the Princess Royal was solemnised, and he was present at the ceremony. In politics he is a moderate Liberal, and the great influence possessed by himself and his family has always been strenuously used in support of the Liberal interests. He has been for some years a magistrate for the county of Middlesex, and was selected by the Court of Common Council as one of their representatives on the Metropolitan Board of Works. We believe that the history of the City affords no other instance of a father and two sons having filled the office of Alderman and having served the office of Sheriff of London and Middlesex, the eldest son being about to fill the high office of chief magistrate of the ancient Corporation of London. The Lord Mayor Elect is a bachelor, and his sister, Miss Lawrence, will be the Lady Mayoress. Remembering the way in which Alderman Lawrence has hitherto discharged his public and private duties, we have no doubt that he will so acquit himself of the duties of his new position as to retain and increase the esteem and regard of his fellow-citizens and uphold the privileges and hospitalities of this ancient Corporation.

THE RIGHT HONOURABLE WILLIAM LAWRENCE, THE NEW LORD MAYOR OF LONDON.

THE DANUBE AND BLACK SEA RAILWAY.

THE harbour of Kustendjie, on the Black Sea, and the railway connecting it with the Danube—of which Illustrations are given on the preceding page—are examples of British enterprise, having been constructed by an English company for the purpose of opening up the trade of the Danube by giving it a safe access to the sea which should avoid the dangers of its notorious mouths.

For this purpose advantage has been taken of a bend in that river two hundred miles above its mouth, where it approaches within forty miles of the sea. Across the isthmus thus formed a railway has been constructed, and thus a safe and rapid transit of forty miles has been substituted for two hundred miles of tortuous and dangerous navigation through the Delta and seventy miles of sea passage. The line has now been open for about three years, and a considerable portion of the Danube trade, besides all the passengers and the mails for Constantinople, pass over it, Constantinople being thus brought within a week's journey from London. That this railway will become the great channel of trade for the countries bordering on the Danube, and will develop the resources of these important districts, may be confidently predicted. Its position, indeed, is such as to render it the main link in a chain of steam communication connecting western and central Europe with the whole south-western part of Asia.

It will be seen from the View given, which is taken from a photograph, that the port of Kustendjie now admits vessels of large size to load alongside quays. This port was, until the company commenced its improvement, little better than an open roadstead. What would not have been the value of such a port in the Crimean War!

Kustendjie is highly interesting to the antiquarian. The name, which is a corruption of Constantia, indicates that it was a Roman colony of the time of the Byzantine Emperors. It was, in

CATASTROPHE AT A VILLAGE ON THE LEFT BANK OF THE LAKE OF COMO.—SEE NEXT PAGE.

fact, a place of great military importance, forming the eastern terminus of a rampart ascribed to the Emperor Trajan L. (which was carried across the Dobrudscha, famich in the line of the present railway) as a defence against the Scythian hordes. Its former importance is shown by the blocks of marble columns, friezes, &c., remains of temples and basilicas, which strew the ground. It derives additional interest from occupying the site of Tomi, the place chosen for Ovid's banishment.

The second View represents Tchernavoda, the terminus on the Danube, with the warehouses built by the company for the reception of grain, the steam elevators on the American principle for hoisting the grain out of the vessels, and the crowd of river craft, a picturesque medley of old-fashioned Turkish and Greek sailing-boats and kirlanches, with smart Austrian brigs and schooners.

The railway runs from this point for forty-two twenty-five miles along a valley which was formerly flooded by the Danube whenever the water stood high. This contingency is now prevented by the construction of the dam from which the View is taken. This dam is built with a stone scarp, like a rampart, and is about three quarters of a mile in length.

The operations of the company have, therefore, had the effect of rendering habitable a large tract of formerly useless land. Already the district has recovered has been in part occupied by large bodies of Tartars from the Crimea fleeing from Russian rule with their cattle, sheep, and camels. Such are the immediate results of the introduction of British capital and enterprise into a new country: such the advantages which Turkey is now reaping from the confidence which her policy inspires.

CATASTROPHE IN A VILLAGE NEAR THE LAKE OF COMO.

A DISTRESSING accident took place, on the 16th ult., on the left bank of the Lake of Como, at a village just opposite Carate. The constant rains which fell during the fifteen previous days caused all the streams to be unusually swollen. A spring suddenly burst forth high up on the mountain, at a distance of about 500 feet above the level of the lake, and, rushing down, swept away everything in its course, burying four houses and part of a fifth near to the edge of the water. This occurred soon after midnight, and the disaster was rendered more terrible by the darkness. No time was lost in searching for the unfortunate sufferers, and many were rescued from their terrible position. Among them were found a mother clasping her infant to her breast, and other children, some of whom were dead, and two other children, who were afterwards found crushed to death. The exact number of the dead has not been ascertained, but it is believed to be about forty-five persons. Carabineers are at once energetically pursued by a company of the Bersaglieri: (or Italian Rifles). A large house standing on the opposite side of the lake recently occurred has remained uninjured, as will be seen by the accompanying Engrav ing.

CALENDAR FOR THE WEEK ENDING NOV. 14.

SUNDAY, Nov. 8.—Twenty-third Sunday after Trinity. Death of Milton, 1674. Execution of the heroic Madame Roland at Paris, 1793.

MONDAY, 9.—R.H. Albert Edward, Prince of Wales, born, 1841. Lord Mayor's Day, London, 1863.

TUESDAY, 10.—Reformed Parliament, 1570. Establishment of the French Consulate: Bonaparte, Dunce, and Sieyès, 1799. Result defeated by Hill and Beresford at St. Jean de Luz, 1813.

WEDNESDAY, 11.—Martinmas. Magna Charta signed, 1215. Accession of Amadeus, King of Portugal, 1861. Half Quarter: New Moon Th. 50m. a.m.

THURSDAY, 12.—Retribution of the Spanish Armada, 1588. Opening the establishment of an Italian Confederation headed by the Pope, 1848.

FRIDAY, 13.—Britius, or Brice, Bishop of Tours. Edward the Confessor Dane to England by order of Ethelred II., 1013. Henry VIII., of his "Royal liberality and generosity," permits Malmesbury Abbey to be sold to the townsmen, 1544. Submarine telegraph between Dover and Calais opened, 1851.

SATURDAY, 14.—Death of the Emperor Julian, "apostate and philosopher of the tottem," 363. Defeat of the French at Witepsk by the Russian General Wittgenstein, 1812. Achille Fould made the French Minister of Finance, inaugurating a new system, 1861.

NOW READY,
Price One Shilling, beautifully Printed in Colours,

THE ILLUSTRATED LONDON ALMANACK FOR 1869,

containing Fresh-Water Fish, from Paintings by H. L. Rolfe, with interesting descriptions, by James G. Bertram, printed in the highest style of the Chromatic Art by Leighton Brothers; Twelve Fine Art Engravings; Astronomical Diagrams of Remarkable Phenomena, with Explanatory Notes; and Twelve Original Designs as Frontispiece to the Calendar, by W. Kelly.

It contains also Lists of the Royal Family of Great Britain; the Queen's Household; her Majesty's Ministers; and Public Offices and Officers; Law and University Terms; Fixed and Movable Festivals; Anniversaries and Remarkable Days; Lists of Fairs; Tables of Interest and Discount; Commercial Statistics; Taxes, Customs, and Stamp Duties; Moslem, Christian, Jewish, and Mohammedan Calendars; Astronomical Symbols and Abbreviations; and a variety of other useful and interesting information rendering the ILLUSTRATED LONDON ALMANACK an acceptable and elegant companion to the library, boudoir, or drawing-room; whilst, as regards price, it is the cheapest Almanack published.

The ILLUSTRATED LONDON ALMANACK is inclosed in an elegant cover printed in colours.

Published at the Office of the ILLUSTRATED LONDON NEWS, 198, Strand, and sold by all Booksellers and Newsagents.

THE ILLUSTRATED LONDON NEWS.

LONDON: SATURDAY, NOVEMBER 7, 1868.

MR. CHASE, the American Finance Minister, may have his own private ideas as to the state of the war—we know that Finance Ministers have occasional crotchets—but it is very difficult for a person who does not read telegrams in a non-natural sense to coincide with that gentleman in the statement that the Confederates are vanquished, or, as he puts it, that "the rebellion is virtually crushed." That he intends it shall be, if possible, is conceivable, although the tortuous course of several leading politicians in the North makes it almost dangerous to assert positively that they desire anything except a continuance of a state of things that keeps them in office and enriches the most worthless, greedy, and ignorant part of the mercantile community. But, assuming that Mr. Chase would like to see President Davis and Mr. Benjamin in Le Fayette, and the South electing carmelees to be sent to Washington under escort with orders to shoot a deserting legislator, we can justify his declaration only upon the principles of our courts of equity—namely, that a man is held to have done that which he intended to do. In this sense Mr. Chase, like Tom Thumb, may be allowed to say,

Rebellion 'a dead, and now I'll go to breakfast.

But, regarded from the ordinary point of view, "rebellion" does not seem to be so dead as Mr. Chase may wish it. In "Cymbeline" the boastful Prince Cloten says that his antagonist would not stand his prowess, "if his head were turning, aside: "but he fled forward, and towards your face." This is something like the way in which General Lee is flying before the retiring Federals. Early in the week the Federal organs in England were proving in the most triumphant manner that Lee had entirely failed in all that he undertook to do, of which there had much better information than either Rosecrans, or, indeed, himself, and that his retreat across the Rappahannock must be held to be a throwing up of the sponge. But Lee seems not to have been completely in accord with his friends here, for the latest news, at the time at which these lines are written, is that he has again come over the river, beaten the Federal cavalry with heavy loss, and then advanced to attack them again. "The object of his movement," says the New York message pitcously, "is unknown." This is probably enough, but if one may hazard a guess, the object is not that of throwing down his arms and asking terms a little milder than those clerical ones which menaced two kinds of fires to the Confederates and their leaders. Moreover, Longstreet has reinforced Lee, from which news he is expectable to General Meade; and it is said that the Confederates have made an incursion into Kentucky. Now, Mr. Chase may say that rebellion is dead, but "three great oaths (and the Northern clergy are so strong in this department that I did not know they were anything but would think they were swearing) will scarcely make that believed," if we may quote from the adventures of Parolles, a gentleman whose name constantly occurs to us in connection with Federal narratives. When we have added that two Confederate divisions had been sent to Georgia, and that Longstreet's men were moving on the Federal left, we have made a slight and unnecessary addition to the difficulty which we seem to see in the case of the great manufacturer of greenbacks.

But what the Federals cannot do in the field they certainly effect at the voting-booth. We are desirous here, in a friendly way, the curious admission by the Federal press that the vaunted "secrecy" of the ballot system in America is all nonsense, and that the ballot is simply a machine for enabling voters to be counted. We are prepared to maintain this point which will be useful to Mr. Berkeley in his next monologue, We proceed to allow that at certain elections, especially that one which terminated in the signal defeat of Mr. Vallandigham, the Government has obtained victories of a very complete nature. Ohio, Indiana, and Illinois, three of the most important States in the price which the newspapers say has been paid—viz., the sending away enormous bodies of soldiers from the army to the poll, and thereby making it easier for the Confederates to beat the crippled leader of the North—is a question for Mr. Lindsay himself, who was engaged to look into the point which will be useful to Mr. Berkeley in his next monologue. We proceed to allow that at certain elections, especially that one which terminated in the signal defeat of Mr. Vallandigham, the Government has obtained victories of a very complete nature. Ohio, Indiana, and Illinois, three of the most important States in the price which the newspapers say has been paid—viz., the sending away enormous bodies of soldiers from the army to the poll, and thereby making it easier for the Confederates to beat the crippled leader of the North—is a question for Mr. Lindsay himself, who was engaged to look into the point which will be useful to Mr. Berkeley in his next monologue. We proceed to allow that at certain elections, especially that one which terminated in the signal defeat of Mr. Vallandigham, the Government has obtained victories of a very complete nature. Ohio, Indiana, and Illinois, three of the most important States in the price which the newspapers say has been paid—viz., the sending away enormous bodies of soldiers from the army to the poll, and thereby making it easier for the Confederates to beat the crippled leader of the North—is a question for Mr. Lindsay himself, who was engaged to look into the point which will be useful to Mr. Berkeley in his next monologue.

As for the Russo-Yankee alliance, the subject is too terrible for calm contemplation. The speeches at the New York banquet have been indorsed by a Moscow journal, which states that the Russian fleet has been sent to America in order to be ready to menace the commerce of France and England, in the event of hostilities. We can only be pleased with the modesty which limits the menace to the mercantile marine, and does not presume to say that the Russian fleet has the slightest idea of coming into collision with our ships of war or the Emperor's. Nevertheless, the Russian fleet is not to be trifled with. The Russian Minister of Marine has arrived at the discovery that the prime object of a ship is not the being sunk with expedition. But it will be time enough to talk about this sort of thing when hostilities do break out; and then, as we have a few vessels in the western waters, it will be for the Commanders on those stations to decide which ship he can best spare to tow the Russian fleet into Portsmouth, to be refitted for her Majesty. Englishmen are the last people to swagger, but a menace from Russia on the seas is almost too ludicrous. The hen in the fable, who insisted on swimming because she had wings and feathers like ducks, and urged that—

If my beak be pointed, and their beaks are round,
It that any reason why I should be drowned?

but cause of grief, notwithstanding this irrefragable statement, is the only illustration that occurs to us of Russia taking command of the seas. We hold her myriads of whiskered Pandours and of fierce Hussars in due respect, and we unaffectedly admire the courage of her soldiers; but she is not, to use Mr. Lincoln's elegant image, "webfooted," *and we are*.

Leaving Mr. Chase and his peculiar views of death, and the terrible alliance between the Czar Lincoln and the President Alexander, we must note that the South has been taking action in a way which Mr. Benjamin has justified at enormous length, and which really does seem to require a good deal of defending. The South has pressed—observe—pressed, a great many subjects of the Queen and of the Emperor of the French into the Confederate ranks. This act is notoriously an offence against us and the French. But, as we do not as yet recognise the authority which has committed it, we have no one to remonstrate with, except that, by Mr. Chase's logic, we should have a right to demand satisfaction of Mr. Lincoln, ruler of the South as well as the North. No, we have not done this; and, as our Consuls and those of the French have advised the pressed men to take the oath before Mr. Lincoln's officials, but to throw down their arms, Mr. Davis has ordered the Consuls to leave the Southern Confederacy directly. These gentlemen are accredited to President Lincoln, not to Mr. Davis, of course, and can be thrust out only by the strong arm. That no one be justified by those who lay no claim to impartiality, but it appears to us to be a vicious consequence of a vicious principle. But, as in the case of the "pressing," to whom is Earl Russell to appeal? Mr. Lincoln is not chargeable with the blame, and we do not see how any person of the name of Davis at present, though he is most anxious for an introduction. Of course, if we pleased, we could, with the full concurrence of Washington, reinforce the besiegers of Charleston, and serve out a little Japan justice; but we apprehend that Earl Russell will not see the justice to this elimination of our Oriental habits, though the cases are curiously alike, and the Mikado Lincoln has no more command over Prince Davis than the spiritual Japanese Emperor has over President Satsuma. We imagine that the Consuls will remain where they are, and that a hiatus quence until larger matters are settled. There is an Imperial speech to be made in a few hours from our writing, and that will give France and England something else to think about than their Consuls.

THE COURT.

The Queen continues at Windsor Castle in good health.

On Saturday last her Majesty, accompanied by Princess Helena, walked and drove in the grounds adjacent to the castle. On the same day the Queen received the visit of non-commissioned officers and soldiers of the Ceylon Rifle Regiment, previous to their return to Ceylon. Colonel Cameron, C.B., Brigade Major in Brigade Office, attended with the soldiers at the castle.

On Sunday the Queen, Princess Helena, Princess Louisa, Prince Leopold, and the Princess of Hohenlohe, attended Divine service in the private chapel. The Very Rev. the Dean of Windsor officiated.

On Monday the Queen, accompanied by Princess Helena, Princess Beatrice, and Prince William of Prussia, attended by Baroness Von Tuckmantel and Major-General the Hon. A. A. Hood, drove.

On Wednesday Prince and Princess Christian of Denmark and Princess Dagmar visited the Queen at the castle. Subsequently her Majesty, attended by the Countess of Caledon and Major-General the Hon. A. A. Hood, went to London and honoured the Duchess Dowager of Athlone with a visit at Cumberland Lodge. She stayed with a visit at their respective residences, returning to Windsor Castle in the afternoon.

The Queen and the members of the Royal family take daily walks and drives in the vicinity of the castle. The Court will continue at Windsor Castle until the 16th of December, when the Queen will leave for Osborne, where her Majesty intends to remain about three weeks and afterwards return to Windsor.

The Countess of Caledon has succeeded Lady Churchill as Lady in Waiting, Hon. Horatia Stopford and the Hon. Harriet Phipps are the Maids of Honour; Lord Rivers the Lord in Waiting; and Colonel F. Seymour the Groom in Waiting. Major-General the Hon. A. A. Hood and Colonel H. F. Ponsonby have succeeded Lord Charles Fitzroy and Colonel the Hon. A. Hardinge as Equerries in Waiting to the Queen.

Lady Bloomfield has arrived at the castle.

Viscount Palmerston had an audience of the Queen on Wednesday.

THE PRINCE AND PRINCESS OF WALES.

The Prince and Princess of Wales continue at Sandringham.

On Saturday last the Prince, Prince Christian, the Duke of St. Albans, Earl Granville, and the gentlemen in waiting went out shooting. The Princess, Princess Christian, and Princess Dagmar walked and drove out. Prince Frederick, attended by Captain Lund, arrived at Sandringham.

On Sunday the Prince and Princess, Prince and Princess Christian, Princess Dagmar, the Duke of St. Albans, Earl Granville, Admiral Seymour, and the ladies and gentlemen in waiting attended Divine service in the church of Sandringham. The Rev. G. B. Moxon and the Rev. E. W. Pearse were the officiating clergymen. Subsequently the Duke of St. Albans, Earl Granville, and Captain Grey left Sandringham for London.

On Monday the Prince, Prince Christian, and Prince Frederick went out shooting. The Princess, Princess Christian, and Princess Dagmar walked in the grounds adjacent to the hall.

On Tuesday Prince and Princess Christian, Prince Frederick, and Princess Dagmar, attended by Count Gisbert Stolberg, Captain Lund, and the Countess Revantlow, took leave of the Prince and Princess, and left Sandringham for London. The Prince and Princess accompanied their Royal Highnesses to Wolferton station.

On Wednesday the Crown Prince and Princess of Prussia arrived at Sandringham, as the guests of the Prince and Princess.

Major Teesdale has succeeded Captain Grey as Equerry in Waiting on the Prince.

THE CROWN PRINCE AND PRINCESS OF PRUSSIA.

The Crown Prince and Princess of Prussia arrived at Inverary from the north, at five o'clock on Friday afternoon, on a visit to the Duke and Duchess of Argyll. Their Royal Highnesses, on their way from Dalmally, were met by the Marquis of Lorne and Lord Walter Campbell, who conducted them to the castle, where the Royal guests were warmly welcomed. The Crown Prince and Princess remained the guests of the Duke and Duchess until Monday, when they took their departure for Edinburgh, proceeding by the route through Glen Crow. Tarbet, on the banks of Loch Lomond, and Balloch. Thence they travelled by carriage to the Bridge of Allan, on the Dumbartonshire Railway, and arrived at the Waverley station shortly after seven o'clock, where they were received by Prince Arthur, Prince William of Hesse, and the Lord Provost. The Royal party immediately drove to Slaney's Hotel.

The Crown Prince and Princess left Edinburgh by the Scottish North-Eastern Railway at a quarter-past ten o'clock on Tuesday night, en route for Sandringham. Shortly after leaving the North Bridge station the train narrowly escaped an accident. A goods-train had got off the line, and a portion of the footboard of the carriage containing their Royal Highnesses' attendants was broken off. Fortunately the train was going at a slackened speed. The train was, in consequence of this circumstance, delayed two hours. Upon the arrival of the train at Peterborough the Crown Prince and

Princess proceeded to the Great Northern Hotel, and, after partaking of refreshments, their Royal Highnesses walked into the city and inspected the cathedral and other places of interest. The Crown Prince and Princess resumed their journey by the half-past eleven train on the Great Eastern Railway, and arrived at Wolferton at twenty-five minutes past one. Their Royal Highnesses were met at the station by the Prince and Princess of Wales. The Royal party proceeded to Sandringham in a waggonet and pair of greys, driven by the Prince of Wales.

It is expected that the visit of the Crown Prince and Princess to Sandringham will extend to about a fortnight.

THE PRINCE AND PRINCESS OF HESSE.

The Prince and Princess Louis of Hesse and the infant Princess Victoria left Buckingham Palace on Saturday last for Dover, en route for the Continent.

PRINCE ALFRED.

Prince Alfred continues at Holyrood. His Royal Highness attended Divine service on Sunday in the High Church, Edinburgh. The Rev. Dr. M'Letchie officiated.

Prince William of Hesse attended the anniversary services in connection with the German Church, in the Upper Queen-street Hall. The services were conducted by the Rev. J. Blumenreich.

It is understood that Prince Alfred will form a matrimonial alliance with a Princess of the House of Oldenburg.

Prince and Princess Christian and Princess Dagmar, after paying a visit to the Queen at Windsor Castle, left the Victoria station at half-past three o'clock on Wednesday, and proceeded by the London, Chatham, and Dover Railway to Dover, where their Royal Highnesses immediately embarked on board a special steamer (the Breeze), en route for Denmark.

His Royal Highness the Duke of Cambridge and the Earl of Mountcharles have left town to join the shooting party at Major-General Hall's seat, in Cambridgeshire.

Their Serene Highnesses Prince and Princess Edward of Saxe-Weimar arrived at their residence in Portland-place a few days since, from a tour of visits in the North.

His Excellency the Belgian Minister and Mdme. Van de Weyer arrived in town on Wednesday from New Lodge, Windsor Forest.

The Duke and Duchess of Manchester have left town for Hitchingbroke House, Huntingdonshire, on a visit to the Earl of Sandwich.

The Duke of Montrose has arrived at his residence in Belgrave-square, from Buchanan House, Dumbarton, N.B.

The Marchioness of Londonderry arrived at her mansion in Grosvenor-square on Saturday last from St. Leonards-on-Sea.

The Count and Countess de Flahault returned on Thursday to Coventry House from visiting the Marquis and Marchioness of Abercorn at Beaudesert.

The Earl and Countess of Dartmouth left town on Saturday last for their seat, Patshull Hall, Birmingham.

The Earl of Listowel has arrived in Belgrave-square from visiting Lord and Lady Alfred Paget, at their seat in Norfolk.

Viscount Palmerston arrived in town on Wednesday from his seat, Broadlands, Hants.

Great preparations have been made at Thornham Hall, Suffolk, for the coming of age of the Hon. John Major Henniker, eldest son of Lord and Lady Henniker, which will take place this day (Saturday).

Marriages in High Life.—The marriage of the Marquis of Tullibardine, only son of his Grace the Duke of Athole, and Louisa, eldest daughter of Sir Thomas Moncreiffe, Bart., of Moncreiffe, was celebrated on Thursday week at Moncreiffe House, Bridge of Earn, the residence of the bride's father. Among the bride's presents was a magnificent Indian shawl, the gift of the Queen.——Count Kisseleff, Envoy Extraordinary and Minister Plenipotentiary of Russia at Rome, will shortly repair to Paris, where his marriage will take place with Mdme. the Princess Ruspoli, of Rome, widow of the Duke Marino Torlonia.——The marriage of the Hon. Robert Bourke, son of the Earl of Mayo, with Lady Susan Ramsay, will take place on or about the 20th inst. at the chapel in Lambeth Palace.

The Cambridge authorities have determined to admit women to the competitive examination for the degree of A.A. in that University.

The authorities of the Royal Academy have determined that female students shall not be admitted to their schools.

The letter in the *Observer*, purporting to have been written by the Earl of Leitrim, of which the substance was given in a small portion of our Impression this week, is declared by the *Dublin Mail* to be a forgery.

The 101st Regiment is now encamped at Abbottabad, India (of which an Engraving is given in our present Number), having been sent up from Rawul Pindee and placed under the orders of Sir N. Chamberlain on account of the recent disturbances on the frontier by the "Sitanis."

The ordinary session of the Assembly des États of the Grand Duchy of Luxembourg was opened on the 28th ult. by Prince Henri of the Low Countries, the Lieutenant representative of the King Grand Duke.

Accounts from San Domingo received in Paris assert that the insurgents have actually proclaimed a republic, and already requested the recognition of England, France, and their neighbour Hayti.

The Elector of Hesse-Cassel has displayed his wonted insolence towards the representatives of his unfortunate subjects. The Hessian Diet was closed on Saturday evening, after the members had been kept waiting for some hours because the Elector refused to sanction the customary message giving the Sovereign's assent to the bills passed during the Session. The Elector coolly went to the theatre, where his Ministers tendered him their resignations, and where he at length consented to give his assent to the bills, but persisted in declining to make the usual speech.

Two hundred and thirteen millions of eggs have been brought into this country in the nine months terminated on the 30th of September this year, against one hundred and seventy-seven millions in the corresponding period of last year. By the end of the year, according to a fair estimate, the supplies will have reached two hundred and seventy-five millions, a number 250 per cent in advance of the importations in 1852, when only 108¼ millions were entered at the various custom-houses of the United Kingdom.

The proprietors of the Great Eastern have made up their minds to give their noble ship another opportunity of paying her way. At a meeting held on Tuesday it was decided to make an effort to raise a further sum of £60,000, and to send the ship on a long voyage—to India or Australia—which, it is hoped, will prove more remunerative than the ruinous trips to New York.

At the meeting of the Metropolitan Board of Works, yesterday week, it was resolved to contribute half the cost of an improvement in Mansion House-street from the funds of the board. It was proposed that two thirds of the cost should be contributed, but that was overruled. At the same meeting several communications in reference to the metropolitan sewage were referred to the Drainage Committee.

On Monday the department of the Post Office Savings Banks devoted to the transaction of the general business and correspondence of the Post Office Savings Banks in the metropolis and provinces, now amounting to upwards of 2800, was removed, by order of the Postmaster-General, from the Money Order Office in St. Martin's-le-Grand, which was found inadequate for the increasing business, to new and extensive premises in St. Paul's-churchyard, on the south-west side of the cathedral.

The Act for the Regulation of Bakehouses has come into force, and Dr. Letheby, the medical officer of the city of London, has just made a report to the Commissioners of Sewers of the results of an inspection which he has made of the bakehouses in the City. He finds that within the City limits there are 140 bakehouses, in which 364 boys and men and one woman are employed. Of the bakehouses, 101 are underground, the others being on a level with the street; 57 were in a filthy condition, these being mainly in the eastern and northern districts. In only one case was the bakehouse used as a sleeping-place. The young people under the age of eighteen employed were not in any case allowed to work between the hours of nine at night and five in the morning. Steps were ordered to be taken to enforce compliance with the regulations of the Act of Parliament where they are infringed.

The Lord Lieutenant of Ireland has returned the following reply to the address presented to him by the gentry at Galway:—"Castle Howard, Oct. 30.—My Lords and Gentlemen,—I cannot fail to feel deeply touched and gratified by the terms of the address which you have been pleased to transmit to me. Any want of hospitality was certainly the last contingency to which I could expect to be exposed upon the soil of Ireland. Nor could I doubt the high spirit of loyalty which pervades the genial and generous county of Galway. I have only to regret that I felt myself bound, in my representative capacity, to notice the occurrence to which you refer more seriously than might otherwise have been necessary. I feel glad to have this opportunity of stating that some accounts I have seen of the event in question scarcely do justice to the persons who were assembled at the hotel. I could discern, on their part, no demonstration of any feeling but of respect, and, I will add, of regret. I have the honour to be, my Lords and Gentlemen, your very faithful and grateful servant.—(Signed) Carlisle.—To the Marquis of Clanricarde, K.P., &c."

OPENING OF THE FRENCH CHAMBERS.

THE EMPEROR'S SPEECH.

(By Telegram through Mr. Reuter's Office.)

The French Chambers were opened at one o'clock on Thursday, by the Emperor, who delivered the following Speech:—

Messieurs les Senateurs,
Messieurs les Deputes.

The annual assembling of the great bodies of the State is always a happy occasion, which brings together men devoted to the public welfare, and permits the manifestation of the truth to the country. The freedom of our mutual communications calms anxieties and strengthens our resolutions. I give you, welcome, then. The Legislative Body has been renewed for the third time since the foundation of the Empire; and for the third time, in spite of some local disagreements, I have only to congratulate myself upon the result of the elections. You have all taken the same oath of allegiance to me. It answers for your concurrence. Our duty is to do the business of the country promptly and well, remaining faithful to the Constitution which has given us eleven years of prosperity, and which you have sworn to maintain.

The exposé of home affairs will show you that, in spite of the forced stagnation in certain branches of labour, progress has not slackened. Our industry has contended with advantage against foreign competition, and the fears excited by the Treaty of Commerce with England have vanished before undeniable facts. Our exports in the first months of the year 1863, compared with those of the corresponding months of the year 1862, have increased by 233,000,000f. During the same period the movement of maritime navigation has exceeded the figure of the preceding epoch by 175,000 tons, 136,000 of which were under the French flag. The abundant harvest of this year is a blessing of Providence which ought to ensure a cheaper subsistence to the population. It shows also the prosperity of our agriculture. Public works have been pursued with activity. About 1000 kilometres of new railway lines have been opened. Our ports, our rivers, our canals, our roads, have continued to improve. The Session having commenced sooner than usual, the report of the Minister of Finance has not yet been published. It will be shortly. You will see from it that, although our hopes have not been completely realised, the revenue has followed an ascending course, and that without extraordinary resources we have met the expenses occasioned by the wars in Mexico and Cochin-China. I must point out to you several reforms considered necessary—among others, the decrees relative to the liberty of the baking trade, that which makes the maritime inscription less onerous to the population of the coasts, the project which modifies the law as to coalitions of the working men, and that which suppresses the exclusive privileges of theatres. I have also directed a law to be prepared destined to increase the privileges of the general and communal councils, and to remedy the excesses of centralisation; in fact, to simplify administrative formalities and to soften the legislation applicable to classes worthy of all our solicitude. This will be a progress with which you will desire to associate yourselves. You will also have to occupy yourselves with the sugar question, which requires to be decided by firmer legislation. The project submitted to the Council of State has for its object to grant to indigenous products the facility of exportation enjoyed by other productions. A law as to registration will abolish the double decime, and will replace that surtax by a more just imposition. In Algeria, in spite of the anomaly which subjects the same populations, the one to the civil power, the other to the military power, the Arabs have understood how much the French domination was restorative and equitable, without the Europeans having had less confidence in the protection of the Government. Our ancient colonies have seen the barriers restricting their transactions disappear; but circumstances have not been favourable to the development of commerce. The recent establishment of a credit institution will, I hope, bring about the amelioration of its condition. In the midst of these material cares nothing that concerns religion, the mind, or morality has been neglected. Religious works of benevolence, the arts, the sciences, and public instruction have received numerous encouragements. Since 1848 the children at school have increased by one fourth. At present nearly five millions of children (a third gratuitously) are received in the primary school; but our efforts ought not to slacken, seeing that 600,000 are still deprived of instruction. An impulse has been given to high-class studies in secondary schools, in which special education is being reorganised. Such is, gentlemen, the summary of what we have already done, and what we still intend to do.

Assuredly, the prosperity of our country would make more rapid progress if political anxieties did not trouble it; but in the life of nations unforeseen and inevitable events happen, which ought to be looked at without fear and supported without weakness. Of this number are the American war, the forced occupation of Mexico and Cochin-China, and the insurrection in Poland. Distant expeditions, the objects of so many criticisms, have not been the execution of a premeditated plan; the force of events has brought them about, and yet they are not to be regretted. How, in fact, should we develop our commerce if, on the one hand, we renounced all influence in America; and if, on the other, in the presence of the vast territories occupied by the Spaniards and the Dutch, France alone remained without possessions in the seas of Asia. We have conquered in Cochin-China, which, without tying us down to the difficulties of local government, will permit us to develop the immense resources of these countries and civilise them by commerce.

In Mexico, after an unexpected resistance, which the courage of our soldiers and sailors has overcome, we have seen the population receive us as liberators. Our efforts will not have been in vain, and we shall be largely recompensed for our sacrifices when the destinies of that country, which will owe to us its regeneration, shall have been placed in the hands of a Prince whose intelligence and qualifications render him worthy of so noble a mission. Have, then, faith in our enterprises beyond the sea. Commenced to vindicate our honour, they will terminate by the triumph of our interests; and if prejudiced minds cannot discern how much fertility is contained in the seeds planted for the future, do not let us allow them to defame the glory acquired, so to speak, at the two extremities of the world—at Pekin and at Mexico.

The Polish question demands more explanation. When the insurrection in Poland broke out the Governments of Russia and France were on the best terms. Since the peace the great European questions have found them in agreement, and I do not hesitate to declare that during the Italian War, as in the annexation of Nice and Savoy, the Emperor has given me the most sincere and cordial support. This good understanding demanded caution; and it has been necessary for me to believe the Polish cause very popular in France, so as not to hesitate to compromise one of the first alliances of the Continent, and to raise my voice in favour of a nation rebellious in the eyes of Russia, but in ours the heirs of a right inscribed in history and in treaties. Nevertheless, this question touches upon the most important European interests. It could not be treated singly by France. An offence to our honour or a menace to our frontiers only imposes upon us the duty of acting without previous concert. It became thus necessary, as at the epoch of the events in the East and in Syria, to come to an understanding with the Powers which had to pronounce upon reasons and rights like our own. The Polish insurrection, upon which its duration impressed a national character, awakened sympathies everywhere; and the object of diplomacy was to draw to this cause as many adhesions as possible, in order to bring the whole weight of the opinion of Europe to bear upon Russia. This almost unanimous concurrence of desires appeared to us the most proper means to persuade the Cabinet of St. Petersburg.

Unhappily, our disinterested counsels have been interpreted as an intimidation, and the course of England, Austria, and France, in place of putting a stop to the conflict, has only embittered it. On both sides excesses are committed which in the name of humanity are equally to be deplored. What remains to be done? Are we reduced to the only alternative of war or silence? No. Without resorting to arms, and without being silenced, one means remains to us. That is, to submit the Polish cause to a European tribunal. Russia has already declared that a conference, in which all the other questions which agitate Europe would be discussed, would in nothing wound her dignity. Let us take note of this declaration. May it serve to extinguish, once for all, the ferment of disorders ready to burst out on all sides; and from the disquiet of Europe, everywhere agitated by the elements of dissolution, may there spring a new era of order and peace! Is not the moment come to reconstruct upon a new basis the edifice undermined by time and destroyed piecemeal by revolutions? Is it not urgent to reorganise by new conventions what is irrevocably accomplished, and to carry out by common agreement what the peace of the world demands? The treaties of 1815 have ceased to exist. The force of events has overturned them, or tends to overturn them, almost everywhere. They have been broken in Greece, in Belgium, in France, in Italy, as upon the Danube. Germany agitates to change them; England has generously modified them by the cession of the Ionian Islands, and Russia tramples them under foot at Warsaw. In the midst of this successive alteration of the fundamental European pact ardent passions are excited, and at the south, as at the north, powerful interests demand a solution. What, then, can be more legitimate and more sensible than to assemble the Powers of Europe in a Congress in which self-interests and resistance would disappear before a supreme arbitration? What more conformable to the ideas of the epoch, to the wishes of the greatest number, than to address the conscience, the reason of statesmen of all countries, and say to them:—"The prejudices, the rancour which divide us, have they not already lasted too long? Shall the jealous rivalries of the great Powers hinder for ever the progress of civilisation? Shall we always cherish mutual distrust by exaggerated armaments? Shall our most precious resources be indefinitely exhausted in a vain display of our forces? Shall we eternally maintain a state which is neither peace with its security nor war with its chances of success? Let us no longer give a factitious importance to the subversive spirit of extreme parties in opposing by narrow calculations the legitimate aspirations of peoples. Let us have the courage to substitute for a diseased and precarious condition a stable and regular situation, although it should cost us sacrifices. Let us meet together without a preconceived system, without exclusive ambition, animated by the sole thought of establishing an order of things founded henceforth on the well-understood interest of Sovereigns and peoples?" This appeal, I believe, will be understood by all; a refusal would lead to the supposition of the existence of secret projects which shun the light of day. But although the proposition should not be unanimously agreed to, it would have the immense advantage of having indicated to Europe where lies danger, where lies safety. Two paths are open. The one conducts to progress by conciliation and peace, the other, sooner or later, leads fatally to war by the obstinate maintenance of a past which is rolling away.

You know now, Gentlemen, the language which I propose to hold to Europe. Approved by you, with the sanction of public assent, it cannot fail to be listened to, since I speak in the name of France.

[The above telegram was transmitted by the Submarine Telegraph Company in the short space of one hour.]

CHURCH AND UNIVERSITIES.

The church of All Saints, Renhold, Beds, was on Thursday week reopened for Divine service after undergoing a complete restoration.

On the 27th ult. the church of All Saints, Allesley, in the diocese of Worcester, was reopened, after having undergone a thorough restoration and considerable enlargement.

The consecration of the new Garrison Church at Woolwich was performed on Monday by the Bishop of London, who also preached. We shall illustrate the ceremony next week. An Engraving of the church has appeared.

The new chapel at the workhouse of the Woodstock Union, Oxfordshire, lately built by the subscriptions of the guardians and others, from the gratuitous designs of Mr. Street, diocesan architect, was consecrated yesterday week by the Lord Bishop of the diocese.

The Bishop of Oxford laid the foundation-stone of the new church (All Saints') in the parish of St. Mary the Virgin, Reading, on Saturday to be erected by subscription. The site is the gift of the Conservative Land Society, and the architect is Mr. J. P. St. Aubyn.

On Tuesday week the parish church of Kington, Herefordshire, was reopened for Divine service. The church, which has been under repair for the last two years, consists of a nave and chancel in the Early English style. The restoration has been done at a cost slightly exceeding £2000.

The valuable service of plate for the Church of St. John the Evangelist, Broughton, Manchester, referred to in our last Number, was presented by Miss Harter (not Carter, as the name was misprinted), of Broughton Hall, in memory of her deceased father.

On Tuesday evening the leading members of the congregation of St. Bartholomew's Church, Gray's-inn-road, presented a testimonial of respect to the Rev. John Green, M.A., upon his retirement from the curacy after six years of labour. The testimonial comprised a handsome medallion clock, with perpetual calendar, a silver communion-service, and a gold watch.

On Tuesday a portion of the Royal Chapel in Windsor Great Park was consecrated by the Bishop of Oxford, assisted by the Rev. J. J. Blount, Vicar of Old Windsor. The chapel has been enlarged and renovated, a magnificent stained-glass window, in memory of her late Royal Highness the Duchess of Kent, having been placed over the altar by command of her Majesty.

In consequence of the dangerous condition of St. David's Cathedral it has been inspected by Mr. Gilbert Scott, the architect, who has prepared a report, in which he estimates the cost of its restoration at £30,000. This report has just been laid before a public meeting of the inhabitants of Carmarthenshire held at Carmarthen. The Bishop of the diocese presided, and a committee was appointed for the purpose of raising subscriptions.

The newly-restored church of Welton, Yorkshire, was reopened on Wednesday week, when prayers were said by the Vicar, the Rev. T. B. Paget, and the service, at which there was no sermon, was followed by a confirmation by the Archbishop of York. The cost of the restorations, which have been carried out by Mr. G. G. Scott, architect, amounts to about £6000, the whole of which, with the exception of certain presents, has been defrayed by Miss Bradley.

The parish church of Westbury, having been thoroughly restored, was reopened for Divine service yesterday week. The work of restoration (which comprises new roofs and paving to the whole church, new windows, altar, font, and stone pulpit, and open seats, all free and unappropriated) was carried out under the superintendence of Mr. G. E. Street. The church will hold 230, fifty sittings being gained by the substitution of open seats in the place of high pews.

In the Townhall, Newport, on Wednesday week, the Lord Bishop of the diocese presided at a meeting of the Llandaff Church Extension Society, the funds of which have been inadequate to meet the increasing necessities of the various populous districts in the diocese. In the course of an address his Lordship said he had written to General Knollys, trusting that the society would be brought under the notice of his Royal Highness the Prince of Wales, and he was happy to say that he had received a most satisfactory reply, which not only expressed a gratifying amount of interest in the society, but was evidently the deliberate expression of the Prince's personal feelings. The letter was then read, promising a donation of fifty guineas, and stating his Royal Highness's anxious desire to assist the objects of the Landaff society in any way that lay in his power.

Preferments and Appointments.—The Rev. J. Bateman, Rector of North Cray, to be Hon. Canon in Canterbury Cathedral. *Rectories:* The Rev. W. Bartram to Shaincote; Rev. T. G. Beaumont to Chelmondiston; Rev. B. King to Avebury, Wilts; Rev. J. H. Pullen to Ryton-upon-Dunsmore; Rev. J. B. Reade to Bishopsbourne, Canterbury; Rev. J. L. Ross to St. George's-in-the-East; Rev. C. G. Wodehouse to Larling, Norfolk. *Vicarages:* The Rev. T. Bull to Sibbertoft; Rev. R. W. Hiley to Weighin. *Incumbencies:* The Rev. G. Hervey to St. Chad, Haggerston; Rev. A. Hill to St. George's, Leicester; Rev. W. G. Horton to St. Andrews, Wilmcote; Rev. S. W. Mangin to St. Columba, Haggerston; Rev. F. A. Rodd to Hayfield; Rev. W. R. Sharpe to St. Augustine, Haggerston; Rev. J. Swinbourne to St. Paul, Bethnal-green. *Chaplaincy:* The Rev. C. Penny, D.D., Head Master of the Grammar School, Crewkerne, and Domestic Chaplain to Earl Poulett, to be Domestic Chaplain to Lord Raglan. *Curacies:* The Rev. W. P. A. Campbell to Beaudesart, near Henley-in-Arden; Rev. J. Farmer to Aston Episcopi and Broughton Hatchett; Rev. H. S. Fullagar to Packington, near Coventry; Rev. F. G. Griffiths to Bredicot with Tibberton; Rev. C. G. Hutchins to Holy Trinity and St. Mary's, Guilford; Rev. W. Langley to Wymondham, near Oakham.—*Guardian.*

The Universities and Public Schools.—At Cambridge on Wednesday the Rev. Dr. Cookson, Master of St. Peter's College, was elected (*nem. con.*) to the office of Vice-Chancellor for the ensuing academical year. The Lord Bishop of Lincoln (D.D. Oxon) was admitted *ad eundem gradum.* At a congregation, on Thursday week, a grace passed the senate establishing the new professorship of political economy, and endowing it with a stipend of £300 a year. It was non-placeted, but carried by 98 to 40. At the same congregation the Vice-Chancellor, the Master of Sidney, the Master of Caius, Professor Thompson, Professor Liveing, Mr. C. Babington, St. John's; Mr. Fuller, Emmanuel; and Mr. E. H. Perowne, Corpus Christi, were appointed a syndicate to consider whether the University shall accept the conditional offer of the magnificent collection of coins of the late Mr. Leake, of St. John's, and to devise means by which the price of the collection (£5000) may be raised.

The winter session of the University of Edinburgh was publicly opened in the Music Hall on Monday, with an inaugural address by Principal Sir David Brewster. The learned Principal was accompanied on the platform by their Royal Highnesses Prince Alfred and Prince William of Hesse, the members of the Senatus Academicus, and the University Court. Their Royal Highnesses, who received a most enthusiastic welcome from the audience, occupied seats at the right hand of Sir David Brewster during the delivery of the address. Among those on the platform were Lord Llanover, Lord Elcho, Major Cowell, and Captain Zangen.

The boys of Westminster School on Tuesday held their annual athletic sports at their cricket ground, Vincent-square, Westminster, when, despite the unfavourable state of the weather, the various amusements were gone through with much spirit.

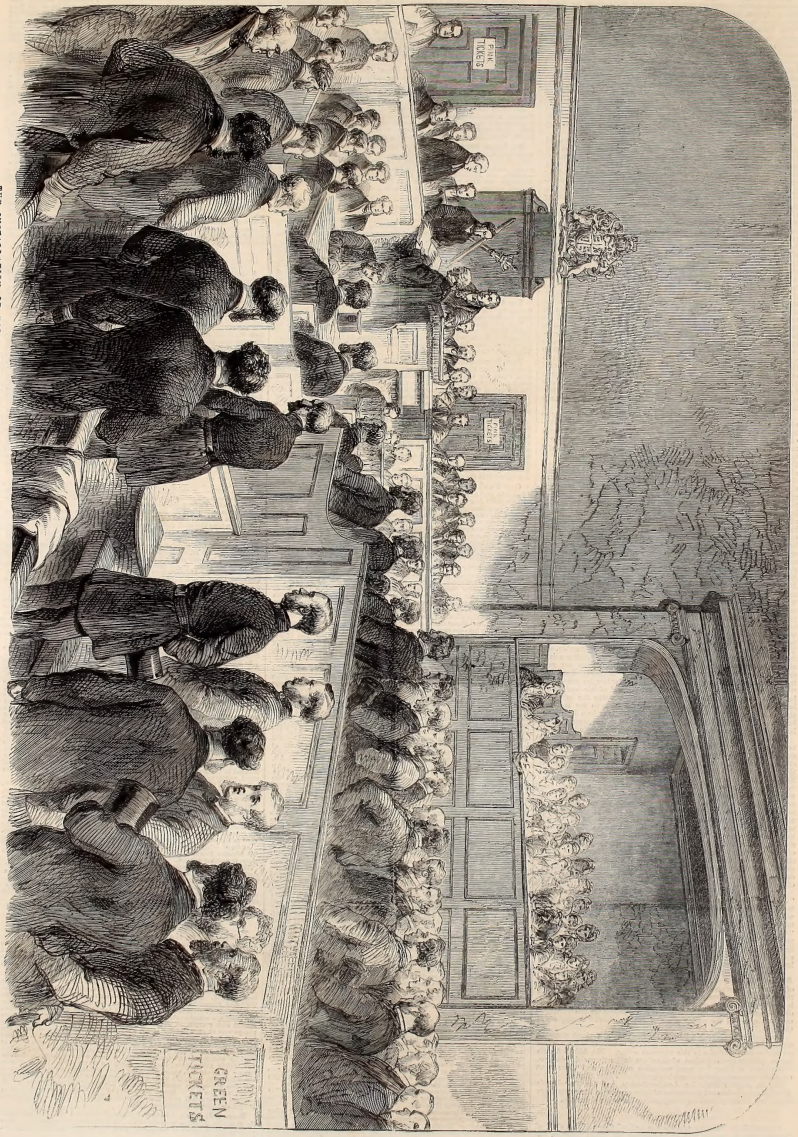
The chapel erected at the Grammar School, Oswestry, through the exertions of the Head Master, Rev. W. F. Short, was opened on Wednesday week by the Bishop of St. Asaph, who, at the conclusion of the Litany, which was sung by the Head Master and choir, administered the right of Confirmation in the chapel, and delivered an impressive address to the boys.

Mr. William Hulton Keeling, B.A., Hody Exhibitioner of Hebrew at Wadham College, Oxford, has been appointed, by the Rev. Dr. Collis, Composition Master at Bromsgrove School.

The Queen has approved of Mr. John Forbes White as Consul at Aberdeen for the King of Hanover.

The Panama, a vessel sailing from the Mersey, has been burned by Chinese pirates, and her captain and crew murdered. No particulars have been received.

By the explosion of a boiler at Longfield, near Todmorden, on Tuesday, a cotton-mill was seriously injured, one half of it being blown; a woman was killed and four workmen were severely hurt.



A letter in the *Frankfort Journal* says that the Queen of England has promised to reside again next year at Coburg. Her Majesty hopes to be present at the inauguration of the statue of Prince Albert on the 26th of August, 1864.

The Queen has approved of Mr. T. W. Ploos van Amstel as Consul-General at Melbourne, of Mr. Henry James Duncan Padday as Consul at Penang, and of Mr. J. A. Baesjou as Consul at Albany, Western Australia, for the King of the Netherlands; and of Don Carlos Garcimartin as Vice-Consul at Gibraltar for the Queen of Spain.

A letter from Soukum Kalé says:—"You are of course aware that Schamyl some years back, forgetting his brilliant career, accepted a seraglio and a pension of 1500 roubles per month from Russia, which he now enjoys at Kalungo. He had then as Lieutenant Mohammed Emin, who has been at St. Petersburg, where he was well received by the Emperor. He is now in the Turkish territory, and the chief mountaineers, having heard that he wishes to return to Circassia, have intimated to him that if he does so it will be at his own peril, as they cannot consider him anything but a Russian employé."

LAYING THE FOUNDATION-STONE OF THE WEDGWOOD MEMORIAL INSTITUTE AT BURSLEM: THE RIGHT HON. W. E. GLADSTONE DELIVERING THE ADDRESS.—SEE PAGE 476

THE INSTALLATION OF EARL DE GREY AND RIPON AS LORD HIGH STEWARD OF HULL, IN THE SESSIONS-COURT, TOWNHALL.—SEE PAGE 470.

THE MAGAZINES.

Blackwood offers a fair average number this month, without any particular feature except an extremely pretty little poem by Sir E. Bulwer Lytton, written with far more purity and simplicity of style than have been usually encountered in his poetical compositions. "The Chronicles of Carlingford" are continued with undiminished spirit—so delicately balanced between the tragic and comic as to afford a continual stimulus to the curiosity of the reader, apart from the interest of the incidents themselves. The other story, "Tony Butler," promises to be a real acquisition to the magazine. The scene is laid in Ireland, the action bids fair to be pretty equally partitioned between love and war, and the present instalment introduces us to a really humorous personage in the shape of an Irish Major, who apologises for a wholesale destruction of furniture as a "*plaisanterie* of a young gentleman from Louth, who was going into holy orders, and might not have another such spree in his life again." The only other papers of much interest are "The Fall of King Otho," apparently the production of some one well acquainted with Greek politics; and a very fair and genial criticism on Mr. Hawthorne's last work.

Fraser is good this month, and the contents are of rather a solid character. The most interesting article is, perhaps, that on the Lithuanian insurrection, almost unique among similar contributions in being written from a Russian point of view. It is rarely that both sides of a civil contest do not present something worthy of admiration; and, much as Europe sympathises with the Poles, it is difficult to entirely withhold sympathy from the representation here given of the stout old General Mouravieff going forth in the certainty of earning the character of "the sanguinary satrap," but careless of what might happen to his fame as long as his unsparing severities availed to preserve his government for his master. Several instances of his coolness and energy are given, and the impression is certainly communicated that the Poles have found more than their match in him. After all, not more than eighteen executions have taken place at Wilna, mostly deserters. Miss Cobbe pleads the claims of the animal creation with the warm feeling, controlled by good sense, that characterises all her essays. The paper on "German Federative Reform" is sound and sensible. The writer perceives that English public opinion is once more falling into the error of deriding the sincere and patriotic aspirations of a great people, because, as in the case of Italy, the first attempts to realise them have been marked with the follies and feebleness incidental to inexperience. The time will soon arrive, he ventures to predict, when German unity will be something else than a butt for the facetiousness of smart journalists. "Laurence Bloomfield" is concluded, and must constitute, we should think, a unique instance of a novel in verse continued through twelve consecutive numbers of a periodical. Editors would mostly be aghast at the idea of conceding an equal scope to the Muse; and, though "Laurence Bloomfield" is by no means devoid of effective passages, we fear that the success of the experiment can hardly have equalled its audacity. The continuation of "Late Laurels" evinces considerable literary power, but the author seems to be deviating from his original conception of the principal personage in the story.

Nothing in the magazine literature of the month is so likely to attract attention as "Jacob Omnium's" paper on the Mhow court-martial in the *Cornhill*. We must say that we regret the publication of this able essay, holding it most reprehensible to comment upon matters that must shortly come under the congnizance of a legal tribunal, especially when the party principally concerned is already the object of strong popular odium. It is true that the terrible Jacob, altogether bad, and it is no excuse to say that his object is to denounce the radical vices of the present administration of military law, since this might have been done just as well after the trial, with the advantage, it is too probable, of large additional materials for illustrating the subject. The continuation of Mr. Trollope's fiction evinces how emphatically Crosbie is on "his native heath," where alone we may all things considered, does his spiriting gently; but the principle is hope to meet him in his full strength. Though nothing can be more quiet, nothing can be more forcible than the description of Crosbie's loveless and joyless wedding; the rest is amusing enough, but weak and sketchy by comparison. All the papers have copied Mr. Thackeray on Lord Clyde and the Athenæum note-paper, so we will only say that it is the best specimen of his peculiar humour that we have seen for a long time. Two new novelties are started—one, "Margaret Denzil," wild and wierd; the other, "Cousin Phillis," simple and natural—both full of promise and performance in their respective ways. Remembering how successive editors of this magazine have come forward to claim our sympathy on the score of the enormous piles of MSS. submitted to them—all of which, they would have us to believe, are conscientiously scrutinised at the cost of incredible labour—we are not a little surprised that their stores should have yielded nothing better than the poor stuff entitled "Unctuous Memories." The Scotchman in Holland, however, writes a very clear, graphic, and interesting description of that singular country. The writer is a man of letters as well as an observer, and his descriptions are rendered doubly pleasant by touches of scholarly allusion. Speaking, for instance, of the statue of Erasmus at Rotterdam, he remarks:—"The people say that Erasmus turns over a leaf of his book when he hears the cathedral clock of St. Laurence strike the midnight hour; and anciently they added that when he came to the last leaf the end of the world would be at hand. There may be a deep symbolism in this belief; for, after the world has turned over the last leaf of the Reformation, what will there be left for people to do?"

Readers of *Macmillan* will look impatiently at Mr. Henry Kingsley's new story, and will be gratified to find it full of promise, distinguished by all the hearty, careless vigour characteristic of the author at his best, and with more of the material of a telling story than was the case with "Austin Elliott." The scene alternates between England and Australia, and Mr. Kingsley is equally at home in both. "Vincenzo" is finished in a lame, unsatisfactory way; nor is the "Competition Wallah" so entertaining as usual. There is nothing else very noticeable except Mr. Dicey's narrative of his week's experience in Russian Poland. This gentleman is the very stormy petrel of revolution. Last year, as he reminds us, he was in Nashville, and we only hope, for his sake, that the next war of world-wide interest may not break out in Papua or Patagonia, since he will certainly think it his duty to be on the spot. His account of Warsaw is most dismal. Everyone wears black, nine tenths of the shops are closed, there are as many soldiers as ablebodied inhabitants, and the traveller walks like a spectre in the universal night of gloom despondency, and dismay. So far as he could gather, the prospects of the insurrection were not encouraging.

The *Victoria* boasts the finest paper of any of the magazines—"Matthew Arnold on Marcus Aurelius." Mr. Arnold could not have found a more congenial subject for his refined analysis, which glows with a vivid sympathy, and is distinguished by even more than the usual lucidity and dignity of his admirable style. The second part of "Grapes and Goblets" is as pleasant as the first was, and we are not yet tired of "Mr. Senior's Journal." Miss Faithfull contributes a thoughtful and valuable paper on the employment of female labour—a question towards the practical solution of which she has herself so largely contributed.

The two novels which this month form the leading feature of the *Dublin University* present a strong family likeness, with curious points of diversity. Both are highly "sensational," but "Bella Donna" is the consistent development of a single idea, while "Wylder's Hand" is confused in exposition and tantalising with mysteries yet to be cleared up. The most readable of the other papers are the discursive essay on wills and the pretty piece of fancy entitled "Starlight and Gaslight."

Temple Bar displays Mr. Sala to advantage in a ghost story—a remarkable example of the power of making much out of little which we so frequently admire in this vigorous writer. Mr. Alfred Austin writes forcibly on the subject of marriage in its financial relations. "Bluebeard at Home" is good magazine reading; and there is an excellent summary of the recent biography of Victor Hugo.

The *St. James's Magazine*, *London Society*, and the *Churchman's Monthly* are all pleasant repertories of light reading in their respective styles, but do not present anything calling for especial remark.

A letter from Teheran reports the arrival there of the staff of English officers and sappers who are to construct the Indian telegraph line through Beloochistan.

METROPOLITAN NEWS.

The first meeting of the Institution of Civil Engineers for the session 1863-6 will be held in Great George-street on Tuesday evening, the 10th inst., at 8 p.m., when the following paper will be read:—"Description of Lighthouses lately erected in the Red Sea," by Mr. W. Parkes, M.I.C.E.

The embankment of the north side of the Thames has at last been begun. One of the caissons, within which the river wall is to be built, is fixed in its place, and it is to be hoped the work will now go on continuously. The portion of the embankment from Waterloo Bridge to Blackfriars has still to be contracted for.

A collision took place on the Great Eastern line, near the Brick-lane goods station, on Monday evening. The Woodford train ran into a goods engine. The collision appears to have arisen from some misapprehension as to the signals. The guard of the passenger-train was seriously hurt, and some passengers were injured.

At the weekly meeting of the City Commission of Sewers, on Tuesday, it was stated that the markets and slaughter-houses had been duly inspected, and the officers had condemned 3589 lb. of meat as unfit for human food. It consisted of 15 sheep, 2 calves, 11 pigs, and 27 quarters of beef; 2724 lb. were diseased, and 495 lb. were from animals that had died.

Mr. James Bunstone Bunning, the architect to the Corporation of the City, died on Monday, at his residence, in Gloucester-terrace, Regent's-park, after a lingering illness. He had held the office of City architect for twenty years, during which time he erected several important public buildings—namely, the Freemen's Orphan School, Billingsgate Market, the Coal Exchange, the New Cattle Market, the City Prison at Holloway, and the Lunatic Asylum. Mr. Bunning was upwards of sixty years old.

On Monday a new and commodious pier, constructed by the conservators of the River Thames, was opened for the landing and embarking of steam-boat passengers. It communicates with Emerson-street, Southwark, and is nearly opposite St. Paul's Pier, Queenhithe. It will open up the river communication for a long time required between the north and south side of the Thames, and supply the deficiency of accommodation caused by the removal of the pier at Southwark Bridge.

The Bethnal-green Board of Guardians are put upon their defence. Some time ago they passed a resolution making several charges against Dr. Moore, and asking the Poor Law Board to sanction his removal from office. The Poor Law Board now ask them for a specific statement of the charges. They also ask the guardians to furnish information in respect of the charge of inhumanity against one of their relieving officers which a Coroner's jury has indorsed.

The first meeting for the season of the Royal Geographical Society will be held at Burlington House on Monday, the 9th of November next, at half-past eight p.m., when the following papers will be read:—1. "On the Snowy Mountains of Eastern Equatorial Africa," with map, by Baron Charles von der Decken. 2. Last letter of the late Mr. Richard Thornton to Sir Roderick Murchison, from Shapunga, on the Zambesi. 3. The Niger Expedition; latest intelligence of Dr. Baikie. 4. Letters of the late Dr. Vogel from the interior of Africa.

The Westminster Working Men's Club and Reading-room, Duck-lane, near Victoria-street (in union with the Society of Arts), having been closed for alterations and enlargement, was reopened on Thursday evening. The cost of the alterations and fittings exceeds £500, towards which the Marquis of Westminster has contributed £100, and £200 are still required. This institution includes a social clubroom for coffee, smoking, &c., a penny bank, a loan society, a temperance society, a sick fund, a barrow club, a cricket club, educational classes, lectures, draughts and chess, a library, &c.

A meeting of the committee appointed at the Mansion House to raise a memorial to the late Prince Consort was held yesterday week—the Lord Mayor presiding; when a report was read from a sub-committee stating that the sum raised and in their hands for the purposes of this memorial amounted to upwards of £54,000, a large portion of which had been raised, in small sums, from the middle and working classes. As it appeared by a communication from the Queen that her Majesty desired all money so raised to be handed over to certain trustees whom she had appointed for that purpose, it was agreed that the subscriptions should be paid to them.

Guy Fawkes Day, on Thursday last, was duly kept. The Pope, who used to be the person most in request at these exhibitions, seemed to be entirely forgotten. The Emperor of Russia might be seen everywhere, in some cases flourishing a tremendous knout, in others with his foot on the necks of some queer-looking persons supposed to be Poles, but who were more like very poor Africans. The American struggle naturally suggested some of the Guys—the sympathisers with the North exhibiting various phases of slavery, while those whose views were favourable to the South paraded Mr. President Lincoln in all sorts of vicious shapes. Cardinal Wiseman was exhibited on a truck near the Houses of Parliament. There were of course many minor exhibitions having no political, religious, or any other significance.

The ceremony of presenting the Lord Mayor Elect for her Majesty's approval took place at the Lord Chancellor's residence, Upper Hyde Park-gardens, on Monday, with the customary honours. The procession consisted of Mr. Under Sheriff Nicholson, Mr. Under Sheriff Gammon, Mr. T. Chambers, Q.C., Mr. Sheriff Cave, with his Chaplain, Mr. Sheriff Nissen, with his Chaplain, Alderman J. Lawrence, Alderman Gibbon, Alderman Waterlow, the Comptroller, the Town Clerk; Alderman William Lawrence, the Lord Mayor Elect, with his Chaplain, the Rev. S. Simpson, M.A., Rector of St. Matthew's, Friday-street, and Minor Canon of St. Paul's Cathedral. On the admission of the civic party into the reception-room, they were met by the Lord Chancellor, who gave them welcome. The Common Serjeant presented the Lord Mayor Elect to the Lord Chancellor, who announced her Majesty's full approval of the citizens' choice. The "loving cup" went round, and the proceedings, which lasted only a few minutes, terminated.

Last week the births of 1835 children—962 boys and 873 girls—were registered in London. In the ten corresponding weeks of the years 1853-62 the average number (corrected) was 1882.——The number of deaths registered in London last week was 1252, which is almost the same as that of the previous week. The average number of deaths in ten corresponding weeks (viz., the forty-fourth in each of the years 1853-62), with a correction for increase of population, is 1224. Smallpox declines by slow degrees; it was returned in 19 cases in the week. The mortality from measles is not high at the present time; the deaths from it were 16. By far the most destructive of the epidemic diseases at the present time is scarlatina, which carried of 117 children and 3 adults in the week. The most recent returns indicate a slight reduction in the mortality from that disease. Pulmonary complaints are on the increase. The deaths from phthisis rose to 161 in the week, those from bronchitis to 116, those from pneumonia to 85. A widow died aged ninety-five.

The president of the Royal Institute of British Architects delivered an address to a large number of members and associates on the opening of the session on Monday last. His observations had principal reference to the heavy loss the association had sustained by the death of Mr. C. R. Cockerell; its similar deprivation by the decease of Mr. Joseph Gwilt; the opposition the institution had shown to the purchase of the International Exhibition building of 1862; the condition of architectural education in this country at the present time; the progress of publications on architecture during the last few years; the scale of professional charges which had been drawn up by the institution for the protection both of employer and employed; the embankment of the Thames about to be commenced between the Temple and Blackfriars Bridge; the sacrifice of architectual beauty by the erection of railway bridges over London streets; and the dwellings of the poor in the metropolis. A vote of thanks to the chairman, proposed by Mr. G. Gilbert Scott and seconded by Mr. Digby Wyatt, brought the proceedings of the meeting to a termination.——The Architectural Association celebrated their twenty-first anniversary, and the opening meeting of the session, yesterday se'nnight, by a conversazione, at their rooms, Conduit-street, Regent-street. Distinguished from the Institute of Architects, which is a society of architects in practice, the Architectural Association consists of students, whose advancement in their profession the organisation seems well calculated to promote. It has recently established examinations for architectural students, of which the first was held last session. Several of the members then passed, and this year a large number are preparing to undergo the ordeal of a searching inquiry into their attainments. To fit them to do so creditably a class has been formed for the express purpose of preparing young men for the examination. Several architects of eminence have kindly engaged to read papers during the ensuing session, including Mr. Scott, Mr. Burgess, Mr. Hayter Lewis, and Mr. Wyatt Papworth. Several other gentlemen of standing have agreed to assist the president, Mr. Rogers Smith, and the committee in the task of examination. Some very excellent drawings, both as regards design and execution, were exhibited. During the evening prizes were awarded to Mr. Baynes and Mr. John Johnson for drawings, and to the author of "An Essay on Architecture," sent in under the signature of "Delta." A large number of ladies and gentlemen were present, including some architects of eminence.

LAW AND POLICE.—Monday was the first day of term, and the usual formalities connected with the opening of the courts were duly observed. At eleven o'clock the Lord Mayor Elect was presented to the Lord Chancellor, at his residence, by the Recorder, and the learned Lord signified her Majesty's cordial assent to the choice of a chief ruler that the citizens had made. At noon the Judges breakfasted with the Lord Chancellor, and then proceeded in State to Westminster to open the respective courts.

Mr. Baron Pigott sat at the Judges' Chambers on Thursday week, for the first time since his appointment, and disposed of a number of summonses. His Lordship took his seat on the bench on Monday in the Court of Exchequer.

Sir J. P. Wilde took his seat on Tuesday as Judge of the Divorce Court. The Queen's Advocate, at the sitting of the Court, passed a high eulogium on the late Judge, Sir Cresswell Cresswell.

The case of the Alexandra, seized at Liverpool on suspicion of her being intended for a Confederate cruiser, came under the consideration of the Barons of the Exchequer on Tuesday. The Attorney-General wants to have a new trial, but a curious difficulty has occurred. At the close of the first trial the Lord Chief Baron, who tried the case, told the late Attorney-General he would sign any bill of exceptions the attorney might lay before him; but when the actual exceptions were tendered for his signature he declined, on the ground that they ascribed to him an exposition of the law to the jury which he said he did not hold and did not lay down to the jury. A course has, however, been taken which will enable the Crown to appeal against the decision of the jury in this case. The Attorney-General on Wednesday applied to the Court of Exchequer to make such rules as to practice on the revenue side of the court as would enable him to appeal. After some discussion the Judges promised to give the matter their consideration, and, later in the day, they consulted and framed the required rules; and on Thursday the Court granted a rule to show cause.

Mr. William Savage Poole, an attorney of Kenilworth, was on Wednesday struck off the rolls, by order of the Court of Common Pleas. He had been intrusted by an illiterate client with moneys to invest, and had abused his trust.

On Monday the Lord Chief Baron, with several other of her Majesty's Judges, met the Lord Mayor, with Alderman Copeland, Alderman Wilson, and Alderman Finnis, at a conference at the Central Criminal Court, and fixed the days for holding the sessions there during the ensuing mayoralty—namely, Monday, Nov. 30; Monday, Dec. 14; Monday, Jan. 4, 1864; Monday, Feb. 1; Monday, Feb. 29; Monday, April 11; Monday, May 9; Monday, June 6; Monday, July 4; Monday, Aug. 15; Monday, Sept. 19; and Monday, Oct. 24.

At the Central Criminal Court yesterday week the prisoner George Turner, who escaped conviction on the previous day for having falsely pretended to have authority to sell an advowson, was found guilty of defrauding a tradesman of some silk, and, other convictions having been proved against him, he was sentenced to penal servitude for seven years.

At the Sheriffs' Court, Red Lion-square, yesterday week, before Mr. Under-Sheriff Burchell and a special jury, a compensation case, "Ladbroke and the Corporation of London," occupied several hours. The claim was in respect of some premises at the corner of Charterhouse-street, occupied by the London Printing and Publishing Company, at £740 year. The premises had cost upwards of £10,000, and were held by trustees for the benefit of poor clergymen, their widows and orphans, under the will of a benevolent lady named Cart. Mr. Lloyd stated that at the present time thirty poor clergymen and thirty widows and orphans were depending on the fund. In the course of a long investigation it appeared that a claim of £21,400 had been made. It was stated that the Corporation was willing to give a liberal sum, but as trustees of the public they could not sanction that amount. The Under-Sheriff left it to the jury to fix the amount of compensation to be awarded, and they gave a verdict for £18,000.

THE GALE.

A hurricane burst out on Thursday week, continuing, with undiminished violence, for several days. It raged around the whole of our coast, and dreary lists of shipwrecks have been received. Happily, the loss of life has not been great, in consequence of the admirable manner in which life-boats have been stationed all round the island. There is hardly a place where a shipwreck occurred that has not some stirring tale to tell of the gallantry and daring of the life-boats' crews and of their services in saving life. Much damage was also done in many parts inland by the hurricane.

A severe storm, which began on Thursday, raged over London on Friday. Rain fell in torrents, and for a short time the wind blew a hurricane. Considerable damage was done. At the New Cross station of the London and Brighton Railway an engine-shed was blown down. One man was killed, and three others were seriously injured. The property destroyed is valued at several thousand pounds. Three houses were unroofed in the Old Kent-road. The large forest trees in Hyde Park, St. James's Park, and the Green Park were much damaged; and in Victoria and Battersea Parks the damage is very great. The wind continued high during the whole of Saturday, and on Sunday there were several strong gusts, accompanied by showers. The shipping in the London, St. Katherine's, the East India, and West India Docks was much damaged, and many of the vessels were driven from their moorings. In a squall on Thursday evening a vessel moving from one dock to another was thrown on her beam-ends, off Wapping, and afterwards filled with water. Her crew were saved.

At Rochester the gale swept away a portion of New Barn farmhouse, at Cooling; eight horses were buried in the ruins, five of which were killed. A windmill in the Borstal-road was blown down, and a portion of the roof of St. Peter's Church was stripped. In Chatham Dockyard a portion of the galvanised plating covering some of the building-sheds was lifted bodily up, but, happily, was not carried away. It blew exceedingly hard in the eastern counties on Friday and Saturday, but, as the wind was off shore, comparatively little damage was sustained by the shipping.

In the gale of Monday, a singular accident occurred near Leicester. The roof of a boiler-shed was lifted off by the wind, and carried on to a railway truck near at hand, where two men and a boy were sitting. One man was killed, the others were seriously hurt.

A furious gale raged at Portsmouth and along the southern district on Friday and Saturday. During Friday afternoon the danger-flag was hoisted, and at one time the wind blew a hurricane, while the rain descended in torrents. The ships Termagant, Blanche, and others dragged their moorings, and went on the mud in Portsmouth Harbour, but were not damaged. The merchant shipping also suffered more or less and a schooner was seen battling with the gale off St. Catherine's Point on Friday afternoon. Suddenly a squall struck her, and she sank like a stone, with all hands.

During the storm which prevailed at Liverpool on Friday morning, soon after midnight her Majesty's ship Majestic partially broke from her moorings and drifted alongside the Conway, but did very little damage. She was soon secured to her anchors again.

In Yorkshire the heavy rains caused the rivers Rye and Derwent and all the moorland streams to rise rapidly, and on Saturday the waters were over the banks and threatened to lay all the low country under water, as the rivers were still rising at night. The farmers had taken the precaution to drive off their cattle.

The storm broke with great fury over Cumberland on Thursday. At Carlisle the rivers were in high flood, inundating the low-lying holmes in the neighbourhood of the city.

The gale was fearful on the north-east coast, and great anxiety is felt for a fleet of laden colliers which left the Tyne on Sunday.

In Edinburgh the gale of Thursday evening has caused considerable destruction of exposed property, but no personal injury. In Leith the damage has been more serious. The gable of a house in Darling's Brae fell on the roof of an adjoining house, and part of it went through upon the inmates, whose escape was effected with great difficulty. A small church, for 400 persons, became a heap of ruins. The roof was completely lifted off and fell on the south wall, which it demolished, and the northern gable, being left exposed and unprotected, fell soon afterwards. Several casualties in the Firth of Forth have been reported. The sloop Lady of the Lake, laden with stones, was being towed from Queensferry to Leith, when, at the height of the storm, about eight o'clock, the towing-rope broke. The tug was obliged to run under Inchkeith for shelter, being unable to make Leith Harbour, and the sloop, on board which there were two men, has not since been heard of. At Wick the steeple of a Free kirk (only completed on the previous day, with the exception of the vane) was much injured by the scaffold being blown against it, when one third of the steeple was knocked down and crashed through the roof of a house, but without injuring any one. At Campbeltown the crew of a wrecked vessel were saved, partly by the life-boat and partly by ropes from the shore.

In Ireland there was a succession of tremendous gales, with showers of rain, all through the country. In Belfast, Cork, and Limerick it blew a hurricane, hurling slates off the roofs of the houses, throwing down chimneys, demolishing glass windows, lifting children off their feet, and dashing them about fearfully. The storm swept with all its force across the Channel, and the shipping felt its full force. At Drogheda, on Friday morning, the life-boat of the National Life-boat Institution stationed there was the means of rescuing the crew of the Gipsy, of and for this port, with coals from Preston, which went ashore on the north wall, at the entrance of the harbour.

Amongst other vessels which suffered on Thursday night and Friday was the ironclad Prince Consort. Some particulars of the Prince Consort are given in another column.

The Helena, coal laden, from the north, went down off Yarmouth: the master and one man only were saved. An Austrian brig was totally lost on the Girdler Sands; her crew, however, were saved.

The cattle steamers from the north of Europe have lost much cargo, swept overboard or drowned. One lost 185 head of cattle, another 175, a third 200 sheep, and a fourth upwards of 500 pigs.

Disastrous accounts of the effects of the gale continue to come in. The steamers from the Baltic seem to have suffered severely.

A large packet, the Amazon, which left Gravesend for New York with passengers and a general cargo on Saturday, was discovered to be on fire when off the North Foreland on Tuesday night. The flames spread with alarming rapidity, and the crew and passengers were obliged to abandon the burning ship. A heavy sea was running at the time, but all were got into the boats and landed safely at Margate.

The particulars of a heavy loss in the total wreck of the British ship Ocean Mail, the cargo of which is valued at £150,000, has just been reported. The ship was loaded with a rich cargo of tea and silk, and on the 1st of August left Shanghai for London. On the following morning she suddenly struck with a fearful crash, and heeled over six or seven streaks. Her head flew round as she sat upon the rock, and she fell over several more streaks with a crash, as if the whole of her bilge was carried away. The pumps were at once sounded, and it was found that she had already made five feet. All hands were immediately set to them; but of no avail. It was evident that she had sustained a fearful injury in her hull, as the water gradually increased, and the last sounding gave eighteen feet. The ship was working backwards and forwards as on a pivot, and it was certain that she was rapidly going down, the water being up to the deck. The crew were ordered to lower the boats, and, after much difficulty, they were got away; but, unhappily, one of the boats upset under the bow of the ship, and the pilot and two apprentices perished. Captain Linklater, the commander of the vessel, was the last to leave. Both sides of the Yangtoze were lined with portions of her wreck and cargo. The Ocean Mail had chiefly been employed in trading between England and China.

There will be an annular eclipse of the sun on Wednesday, the 11th inst., invisible at Greenwich. On Wednesday, the 25th inst., there will be a partial eclipse of the moon, partly visible at Greenwich, which will begin at 8.50 a.m.

COUNTRY NEWS.

The Oxford election is fixed for Saturday (to-day), when Mr. Charles Neate, it is expected, will be returned unopposed.

The annual meeting of the South Avon Agricultural Society was held at Christchurch on Tuesday—the Earl of Malmesbury in the chair.

The Highway Act of 1861 has been adopted in Wiltshire, the present petty sessional division being taken as the basis for the districts.

The annual soiree of the Bradford Church Literary Institute was held at Bradford on Thursday week. Mr. Forster, M.P., and Mr. Powell, M.P., were among the speakers.

It has been resolved to give a commission of 1300 guineas to Mr. Thorneycroft for an equestrian statue (with pedestal) of the late Prince Consort, to be erected at Halifax.

The Right Hon. Lord Belhaven, K.T., was sworn in on Tuesday Lord Lieutenant of Lanarkshire, in the room of the late Duke of Hamilton, before the Queen's Privy Council.

On Monday a submarine cable, to connect Bristol and South Wales, was successfully laid across the Bristol Channel at New Passage by the British and Irish Magnetic Telegraph Company.

The Windsor election took place on Wednesday, and terminated in the return of the Conservative candidate, Colonel Vyse. The numbers at the close of the poll were—Vyse, 287; Hayter, 236.

The steam-ram El Tousson was towed out of the Birkenhead float on Saturday afternoon, and anchored near her Majesty's ship Majestic. She is now in possession of the naval authorities. El Monassir will be towed out of Messrs. Laird's dock on the 9th, the tide not answering before that date.

Mr. Alderman Hallum, the retiring Mayor of Stockport, has invested the sum of £200 in perpetuity in the Corporation, the interest to be given equally in prizes, annually, to the Grammar School and the Mechanics' Institution.

Mr. Aytoun, M.P., addressed the electors at Kirkcaldy on Monday night. Alluding to American affairs, Mr. Aytoun praised the neutral policy of her Majesty's Government. Mr. Aytoun's past services were rewarded with a vote of confidence.

The foundation-stone of a breakwater was laid, on Tuesday, at the mouth of the river Tees, by Mr. Wilson, chairman of the Tees Commissioners. We shall give some Illustrations in connection with this event in our next Number.

The distribution of certificates and prizes gained at the recent examinations in connection with the West Riding Educational Board took place at the Leeds Townhall, on Tuesday night, by the Archbishop of York, in the presence of a large audience.

It is contemplated to form, at a cost of about £70,000, a new line of railway from Halifax to the valleys of Ovenden and Mixenden, both in the neighbourhood of Halifax. The immense goods traffic to these places is the reason for the new line being proposed.

A committee of the nobility and gentry of Wales is about to be formed for the purpose of promoting the establishment of a University for the Principality. Mr. Williams, M.P. for Lambeth, has signified his intention of giving £1000 towards this laudable object.

A collision took place on the Peebles railway on Thursday week. Some ballast-waggons rolled from a branch on to the main line and met a train from Edinburgh. By the shock one boy was killed and several other passengers were injured.

The distribution of the titles and certificates awarded to the successful candidates in the Oxford examination which took place in Birmingham in June last was made in the theatre of the Midland Institute, on Monday afternoon, by Sir John Pakington.

A free drinking-fountain, which has been erected by subscription in the Market-place, Watford, Herts, was formally opened on Tuesday by the Local Board of Health, who have undertaken to maintain it in future, and to supply it with water, free of any charge.

The spacious schoolrooms behind the Centenary Chapel at York have been destroyed by fire. The schoolrooms which previously stood on that spot were burnt down in April last. They were rebuilt and finished a month ago, and on Saturday last the new buildings were burnt to the ground.

On Monday, at a meeting held at Glasgow, Captain T. R. Anderson, of the British ship Broomielaw, was presented by the Lord Provost with a gold chronometer from the Government of the United States for his gallant and humane conduct in rescuing the officers and crew of the barque George, of Boston, in February, 1861.

The memorial fund to the late Lord Hatherton having proved more than sufficient for a statue, it is proposed to devote the surplus to founding an exhibition, tenable for three years, at either of the Universities, to be competed for every fourth year by poor scholars born and educated within the county of Stafford.

The Dublin Corporation has granted a salary of £100 per annum to the city analyst, Dr. Cameron, who is to hand over to the city treasurer whatever fees he may receive from persons who employ him in his public capacity. The Lord Mayor is also authorised to purchase food suspected to be adulterated and submit it to him for analysation.

On Monday the extra sittings of the Inner House of Session at Edinburgh were commenced. All the Judges of both divisions were present except Lord Ardmillan, who has been suffering for the last ten days from an injury to one of his eyes, sustained when he was shooting, from a part of the exploded matter of a percussion-cap having entered it.

The honorary certificates awarded by the University of Cambridge to the successful candidates at the local examination in connection with the South Staffordshire Educational Institute for the Cambridge University prizes, held in Wolverhampton in December last, were publicly distributed in that town by Lord Lyttelton on Tuesday. The Earl of Lichfield, the Lord Lieutenant of Staffordshire, was also present.

The statue of the illustrious Lord Plunket in the Hall of the Four Courts, Dublin, was uncovered on Monday. The position occupied by it is nearly opposite to the statue of Sir Michael O'Loghlen, late Master of the Rolls. The statue is composed of white marble, and represents the great orator with his right hand outstretched, as if in the act of addressing an assembly. The likeness is well preserved, and the attitude is striking and characteristic. The inscription on the pedestal is:—"Plunket: erected by the Bar of Ireland."

A deputation from Manchester have recently had an interview with the Poor-law Board with reference to a proposition for a loan, under the Public Works (Manufacturing Districts) Act, of £230,000, for the employment of unemployed cotton operatives. Of this sum it is proposed to employ £130,000 in making additional waterworks for the city; £25,000 is to be expended in buying land for and in preparing a public cemetery; and the remainder of the money is to be employed in paving streets in the townships of Ardwick, Cheetham, and Chorlton, in the city of Manchester.

On Friday week the members of the Agricultural Library and the directors of the new Corn Exchange at Farringdon, Berkshire, held a dinner in the new building, which was gaily decorated for the occasion, and thus combined the celebration of the opening of the exchange with the anniversary dinner of the Agricultural Institution. The chair was occupied by Mr. Henry Tucker, and about 150 sat down to dinner, including ladies. Among others present were the Right Hon. E. P. Bouverie, M.P.; Hon. P. P. Bouverie, M.P.; Mr. John Walter, M.P.; and Mr. R. Benyon, M.P.

After considerable discussion and opposition, a Roman Catholic chaplain (the Rev. James Nugent) has at length been appointed to Walton Gaol, near Liverpool, at a salary of £300 a year. The ground upon which the appointment was made was that the number of Roman Catholic prisoners was so large that it necessitated the exclusive services of a Roman Catholic priest. The majority in favour of the appointment was thirteen to three, but the *Liverpool Courier* complains that the proceedings were conducted by stealth, and that the magistrates present were "of one political school."

Considerable sensation has been felt at Southampton and neighbourhood owing to the death of a fisherman whose boat was run down last week by the Lady of the Lake, on its passage to the Isle of Wight. It has been stated that there was a systematic absence of any look-out, that the life-buoys were never thrown to him (and some accounts say they were tied to the vessel), that the steamer was never backed, and that when a boat was at last launched it had but one oar, or a boat-hook. In the meantime, after struggling for ten minutes, the poor fellow sank. He leaves a widow and nine children. Captain Summers, the master of the steamer, has been committed by the Southampton magistrates for trial on the charge of manslaughter.

Mr. Hawkshaw, the eminent engineer, the Liberal candidate for the seat vacant by the death of Mr. Cubitt, has just issued an address to the constituency of Andover. In it he says:—"As your neighbour and permanent resident among you I may claim a personal connection with your local interests. The Liberal policy by which this country has been happily guided for the last thirty-five years has always had my warm sympathy, and, whenever the opportunity offered, my cordial support. I wish still to follow the path of firm but temperate progress. I am satisfied that the Government of Lord Palmerston will henceforth be conducted, as it hitherto has been, in accordance with these principles. I am therefore prepared to give it my support. I am favourable to a final adjustment of the much-vexed question of church rates, either by total abolition, or by any other arrangement which may be acceptable to the parties principally interested. I shall give a favourable consideration to any proposal for the extension of the suffrage which may be brought forward under circumstances calculated to command success."

NEWMARKET HOUGHTON MEETING.—Friday, Oct. 30.

Handicap Plate of 100 sovs.—Touch-and-Go, 1. The Reserve, 2. Sweet Willie, 3.
Audley End Stakes.—Clarissimus, 1. Gorse, 2.
Handicap Sweepstakes of 20 sovs.—The Principal, 1. Fiancée, 2. Welland, 3.
Sweepstakes of 500 sovs.—Echo, 1. Battaglia, 2.
Sweepstakes of 10 sovs.—Prince Lee Boo, 1. Knave of Trumps, 2. Paddy O'Rourke, 3.
Free Handicap Sweepstakes of 100 sovs.—Merry Heart walked over.
First Class Nursery Stakes.—Sheridan, 1. Prince Arthur, 2. Washington, 3.
Second Class of the Nursery Stakes.—Union Jack, 1. Wandering Minstrel, 2. Diviner, 3.
Sweepstakes of 10 sovs.—Lord Burleigh, 1. Amelia, 2. Queen Elizabeth, 3.

Worcestershire Grand Annual Steeplechase.—Reporter, 1. Medora, 2. Yaller Gal, 3.
Handicap Plate of 40 sovs.—Birkenhead, 1. Disdain, 2. Jessie, 3.
Free Handicap Steeplechase—Ocean Witch, 1. Nereus, 2. Elcot Lass, 3.

The steam-launch, fitted with two screws by Mr. A. Murray, Chief Engineer of her Majesty's dockyard at Portsmouth, has made an official trial, which has been attended with the most satisfactory results. A speed of six knots and three quarters was made at the measured mile, and circles were made with extraordinary facility, the maximum time being two minutes and the minimum one minute. She turned repeatedly on her centre by reversing the screws. A very important feature was the steering of the boat, which was done in the most perfect manner by increasing or decreasing the revolutions of the screws. The measurement of the engines and boiler is 7 ft. by 4 ft. 6 in., and the nominal horse-power three.

MONETARY TRANSACTIONS OF THE WEEK.

(From our City Correspondent.)

The demand for gold for export purposes having been very active, and the drain of bullion from the Bank of France being still on an extensive scale, the directors of the Bank of England have been compelled to advance their minimum quotation for money to six per cent. In all other quarters a corresponding advance has taken place, and in the open market the lowest rates for the best commercial paper are as follow:—

Thirty days' bills	5¾ ⅞ per cent.	Four months' bills	6¼ per cent.
Sixty days' bills	5⅞ "	Six months' bills	6¼ ½ "
Three months' bills	6 "		

At the above quotations the demand for accommodation has become less active. In the Stock Exchange no advances can be obtained on Government paper under 5 per cent.

The discount houses have advanced their quotation for Money at Call to 5, and with seven days' notice of withdrawal to 5¼ per cent.

Throughout the Continent money is advancing in price, with an active demand. The rates in the leading cities are as under:—

	Bank rate per cent.	Open market per cent.		Bank rate.	Open market.
Paris	5	5	Amsterdam	3½	3½
Vienna ..	5	5	Turin	6	5½ 6
Berlin ..	4½	4½	Brussels ..	4	4
Frankfort ..	4	4	Hamburg ..	—	5
			St. Petersburg	6	9 10

The Council for India have disposed of £400,000 in bills on the various Presidencies. The minimum prices were unchanged—the quotation on Calcutta and Madras being 1s. 11⅝d., and on Bombay 1s. 11⅝d. per rupee. The applications were for £2,830,000.

Mexican dollars have sold freely at 63⅞d. per oz., being a rise of ⅛d. compared with the previous sale.

The Continental exchanges have become unfavourable, and there is now very little profit on the import of gold from New York. The steamer for the East has taken out £167,230, and the whole of the fresh arrivals of bullion have been taken for the Continent. The amount is about £400,000.

Great inactivity has prevailed in the market for Home Stocks, and prices have had a drooping tendency. In Indian Securities the transactions have been on a very moderate scale. On Monday the Stock Exchange was closed. On Tuesday Consols were 92⅜ ⅞; Reduced and New Three per Cents, 91⅛ ¼; Exchequer Bills, 2s. dis. to 1s. prem. Bank Stock marked 234; India Stock, 224; Ditto, New, 109½ ½; and the Five-and-a-Half per Cent Rupee Paper, 116; India Four per Cents were 100⅞ ¾; and the Bonds, 18s. prem. The business doing on Wednesday was limited. Consols closed at 92½ ¾; Reduced and New Three per Cents, 90⅞ ⅞; India Five per Cents, 108¾; Ditto Four per Cents, 100¾; Exchequer Bills, 4s. dis. to par. The Five per Cent Rupee Paper was 106½ ⅞. On Thursday the market exhibited increased heaviness. Consols, for Money, were 92½ ⅝; Reduced and New Three per Cents, 90½ ⅜; Exchequer Bills were very dull, at 6s. to 1s. dis. India Five per Cent Stock marked 108⅝ ⅞; and India Bonds, 15s. to 20s. prem. Consols, for December, marked 91¼ ⅜ ex div.

Greek and Mexican Securities continue to decline in value, and business in the former has been done at 27, being a decline of 4½ per cent compared with last week. Spanish Certificates and Turkish Consolidés have sold heavily, at reduced quotations. Portuguese Stock, however, rules firm, and the Confederate Loan is steady, at 65 to 67. Brazilian Scrip has fallen to ½ dis.; and Portuguese to 1½ prem. Brazilian Five per Cents have marked 99½; Ditto, 1843, 101; Ditto Four-and-a-Half per Cents, 1860, 90⅞; Buenos Ayres Six per Cents, 92½; Danish Five per Cents, 1863, 89½; Egyptian, 100⅞; Greek, 29 to 27; Ditto, Coupons, 14½ to 12¾; Italian Railway, 81; Mexican Three per Cents, 40½; Moorish, 94¼; New Grenada, 15; Ditto, Deferred, 9; Peruvian Three per Cents, 1862, 87; Portuguese Three per Cents, 1862, 49⅞; Russian Old Five per Cents, 93; Ditto Four-and-a-Half per Cents, 1850, 90½; Ditto, 1862, 90 ex div.; Spanish Three per Cents, 55; Ditto, Passive, 35 to 34; Ditto, Certificates, 13¼ to 12⅞; Turkish Old Six per Cents, 92⅞; Ditto, 1858, 70½; Ditto, 1862, 71½; Ditto Four per Cents, 103; Venezuela Six per Cents, 58; Belgian Four-and-a-Half per Cents, 97⅞ ex div.; Dutch Four per Cents, 100¼; Italian Five per Cents, 72¼.

A fair average business has been transacted in Joint-stock Bank Shares, and the quotations have ruled firm. Alliance have been done at 46; Ditto, New, 26; Australasia, 78¼; Bank of Egypt, 28; British and American Exchange, 8; Chartered of India, Australia, and China, 38; Chartered Mercantile of India, London, and China, 72; English, Scottish, and Australian Chartered, 24; Hindustan, China, and Japan, 28⅞; Imperial, 23½; Imperial Ottoman, 18; London, Buenos Ayres, and River Plate, 52; London Chartered of Australia, 80½; London and County, 54; London Joint-Stock, 37¼; London and Northern, 10½; London and South African, 28; London and Westminster, 80; National of Liverpool, 22¼; National Provincial of England, New, 37; Ditto, 27½; New Zealand, 4¼; Oriental, 53 ex div.; Scinde, Punjaub, and Delhi, 6 ex new; Union of Australia, 60¼; and Union of Ireland, 19¼.

Colonial Government Securities have been dealt in to a moderate extent:—British Columbia Six per Cents have realized 106¼; Cape Six per Cents, 110½; Ceylon Six per Cents, 1878, 114¼; Mauritius Six per Cents, 1873, 107⅞; New South Wales Five per Cents, 1888 to 1892, 102⅝; and Victoria Six per Cents, 111.

The Miscellaneous Market has continued steady. Ceylon Company's shares have sold at 8; Crystal Palace, 38; Egyptian Commercial and Trading, 3¾; Electric Telegraph, 103; General Credit and Finance of London, 6¾; Great Ship, Seventeen-and-a-Half per Cent Preference, ⅝; Hudson's Bay, 13⅝; International Financial Society, 9⅞; Joint-Stock Discount, 6⅜; London General Omnibus, 2¼; Madras Irrigation and Canal, 3⅞; Natal Land and Colonization, 5¼; National Discount, 9¼; Rio de Janiero, City Improvements, 27; Royal Mail Steam, 77 ex div.; Scottish Australian Investment, 145; Trust and Loan Company of Upper Canada, 5¾; Birmingham Canal, 93¾; Imperial Gas, 86¾; London, 87¾; Phœnix, 124; Atlas Insurance, 13¾; Guardian, 50¼; Indemnity Marine, 145; London, 47¼ ex div.; Phœnix, 149 ex div.; Thames and Mersey Marine, 6¾.

American Securities have been heavy, on lower terms. United States Five per Cents have marked 61; Atlantic and Great Western, 76¼; and Erie Shares, 07¼.

The Railway Share Market, almost generally, has been in a state of depression. Annexed are Thursday's official closing quotations:—

Ordinary Shares and Stocks.—Caledonian, 119¼; Great Eastern, 50; Great Northern, 127¼; Ditto, A Stock, 130; Great Western, 65¼; Ditto, South Wales, 66½; Ditto, West Midland—Newport, 35; Ditto, Hereford, 103¼; Lancashire and Yorkshire, 110¼; London and Blackwall, 71; London and Brighton, 111⅞; London, Chatham, and Dover, 45¼; London and North-Western, 103⅞; London and South-Western, 102; Manchester, Sheffield, and Lincolnshire, 49; Metropolitan, 127¼; Ditto, New, 7⅞; Midland, 128; Ditto, Birmingham and Derby, 99; North British, 52¼; North-Eastern—Berwick, 102⅞; Ditto, York, 88⅞; North Staffordshire, 78; South-Eastern, 95; South Yorkshire and River Dun, 97¼; Vale of Neath, 87.

Preference Shares.—Great Western Five per Cent, 101; Ditto, West Midland—Oxford, 129; Midland Four-and-a-Half per Cent, 103⅞; Ditto, Leicester and Hitchin, 95.

Lines leased at Fixed Rentals.—Buckinghamshire, 97; London and Chatham, 92¼; London, Tilbury, and Southend, 100¼; North-Western, 17½; Nottingham and Grantham, 98.

British Possessions.—Atlantic and St. Lawrence, 61⅞; Bombay, Baroda, and Central India, 106⅜; Cape Town and Dock, 102¼; Eastern Bengal, 103¼; East Indian, 108¼; Great Indian Peninsular, 109¼; Madras Five per Cent, 106¼; Melbourne and Hobson's Bay, 58¼; Scinde, 107; Punjaub, 106.

Foreign.—Recife and San Francisco, 17¼; Sambre and Meuse, 9⅞; San Paulo, 9½; South Austrian and Lombardo-Venetian, 22.

The return of the Bank of England for the week ending Nov. 4 shows the following results, when compared with the preceding statement:—

An increase of circulation of	£182,610	An increase of other securities of	£316,035
An increase of public deposits of ..	604,655	A decrease of bullion of	638,146
A decrease of other deposits of ..	1,153,955	A decrease of rest of	1,421
A decrease of Gov. securities of ..	46,000	A decrease of reserve of	809,446

The total circulation is £22,783,018. Public deposits amount to £5,066,818; and private deposits to £13,861,173. Securities are £31,055,887; and the stock of bullion is £13,799,428.

THE MARKETS.

Corn Exchange (Nov. 2).—There was only a moderate supply of English wheat on offer in to-day's market, and all kinds moved off steadily, at prices fully equal to Monday. Fine foreign wheat was in fair request, at full currencies, but inferior kinds were very dull. Malting barley commanded extreme rates. Grinding and distilling sorts were much neglected, and the turn lower. Malt was in fair average supply and sluggish request, on former terms. We had rather an improved sale for oats, at full quotations. Beans and peas, however, were a slow inquiry, at the late decline in value. Town-made flour declined 3s. per 280 lb. Other kinds were steady in price.

Nov. 4.—Both English and foreign wheat was in moderate request, at full prices. All other kinds of produce moved off slowly, at unaltered currencies.

English.—Wheat, Essex and Kent, red, new, 40s. to 45s.; ditto, white, 41s. to 47s.; Norfolk and Suffolk, red, 40s. to 45s.; rye, 32s. to 34s.; grinding barley, 26s. to 28s.; distilling ditto, 29s. to 33s.; malting ditto, 28s. to 34s.; Lincoln and Norfolk malt, 60s. to 66s.; brown ditto, 50s. to 57s.; Kingston and Ware, 60s. to 66s.; Chevalier, 66s to 68s.; Yorkshire and Lincolnshire feed oats, 18s. to 22s.; potato ditto, 22s. to 26s.; Youghal and Cork, black, 16s. to 21s.; ditto, white, 16s. to 23s.; tick beans, 23s. to 30s.; grey peas, 32s. to 34s.; maple, 34s. to 33s.; white, 35s. to 37s.; boilers, 36s. to 38s. per quarter. Town-made flour, 37s. to 40s.; town households, 34s. to 36s.; country marks, 27s. to 30s. per 280lb. American flour 19s. to 25s. per barrel; French, 26s. to 29s. per sack.

Arrivals this Week.—English and Scotch: Wheat, 610; barley, 280; malt, 550; oats, 800; flour, 490. Irish: Oats, 2400. Foreign: Wheat, 6110; barley, 5890; oats, 400; flour, 50 sacks, 10,440 barrels.

Seeds.—Most agricultural seeds have changed hands slowly, at about stationary prices. Linseed, rapeseed, and cakes are tolerably firm.

Linseed, English, crushing, 62s. to 66s.; Calcutta, 62s. 6d. to 64s. 6d.; hempseed, 44s. to 48s. per quarter; coriander, 14s. to 16s. per cwt.; brown mustard seed, 10s. to 13s.; white ditto, 10s. to 12s.; tares, 5s. 6d. to 6s. per bushel; English rapeseed 62s. to 65s. per quarter. Linseed cakes, English, £9 10s. to £10 10s.; ditto, foreign, £9 10s. to £11; rape cakes, £5 to £6 per ton; canary, 42s. to 56s. per quarter; red clover seed, 38s. to 78s.; white ditto, 54s. to 72s. per cwt.

Bread.—The prices of wheaten bread in the metropolis are from 7d. to 7½d.; of household ditto, 5d. to 6½d. per 4lb. loaf.

Imperial Weekly Averages.—Wheat, 41s. 2d.; barley, 34s.; oats, 18s. 11d.; rye, 33s.; beans, 35s. 8d.; peas, 35s. 2d.

The Six Weeks' Averages.—Wheat, 39s. 10d.; barley, 34s. 7d.; oats, 19s. 3d.; rye, 29s. 11d.; beans, 37s. 1d.; peas, 36s.

English Grain Sold Last Week.—Wheat, 98,783; barley, 93,746; oats, 9191; rye 63; beans, 3052; peas, 1801 quarters.

Tea.—Privately, as well as at public sale, a steady business is doing in most kinds, at full quotations. The supply on offer is extensive.

Sugar.—The demand for most kinds has continued active, at a further advance in the quotations of 1s. per cwt. Barbadoes has realised 38s. to 43s.; Jamaica, 38s. 6d. to 40s. 6d.; and Demerara, 37s. to 39s. per cwt. Refined goods are firm, at 50s. per cwt. for common brown lumps. The stock of sugar is 97,185 tons, against 81,782 tons at the corresponding period in 1862.

Coffee.—The market is inactive; nevertheless, prices are supported. Stock, 10,332 tons, against 9726 tons last year.

Rice.—Most descriptions are firm in price; but the market is by no means active. Stock, 40,900 tons, against 63,037 tons.

Provisions.—There is a fair demand for most kinds of butter, and prices are well supported. Bacon, however, is very dull, at 56s. to 61s. per cwt. for Waterford landed. Other provisions are a slow sale.

Tallow.—The market is very quiet. P.Y.C., on the spot, is selling at 43s. 6d. per cwt. Stock, 63,880 casks against 43,600 ditto last year. Rough fat, 2s. 3d. per 8 lb.

Oils.—Linseed oil is in moderate request, at 42s. 9d. per cwt., on the spot. Rape is selling at £40 10s. to £43; olive, £53 to £60; cocoanut, £45 to £48 10s.; and fine palm, £34 to £38 10s. French turpentine, 68s. per cwt. American is nominal, at 85s.

Spirits.—Most kinds of rum are a fair inquiry, at about stationary prices. Proof Leewards, 1s. 5d. per gallon. Brandy is selling at from 3s. to 11s. 4d.; Hambro' spirit, 1s. 4d. to 1s. 5d.; English ditto, grain, 1s. 8d. to 1s. 10d.; ditto, rice, 1s. 4d. to 1s. 5d.; and English gin, for export, proof, 2s. 9d. to 3s. per gallon.

Hay and Straw.—Meadow hay, £3 to £4 5s.; clover, £4 to £5 10s.; and straw, £1 6s. to £1 12s. per load.

Coals.—Best house coals, 19s. to 20s.; seconds, 17s. to 18s.; Hartley's, 14s. 9d. to 15s. 9d.; and manufacturers', 13s. 3d. to 15s. 3d. per ton.

Hops.—There is about an average business doing in most kinds of new hops; and prices range from 100s. to 160s. per cwt.

Wool.—The public sales have commenced steadily, on rather higher terms.

Potatoes.—Full average supplies are on offer, and the demand rules steady, at from 50s. to 90s. per ton.

Metropolitan Cattle Market (Thursday, Nov. 5.)—The supply of beasts on sale in to-day's market was somewhat extensive as to number; but the quality of most breeds was inferior. Prime stock was in fair request, at full prices, but inferior beasts were very dull, and 2d. per 8 lb. lower. About 800 foreign beasts and 2000 foreign sheep have been lost at sea during the recent gales. Sheep, the show of which was only moderate, were inactive. Downs and half-breds realised full currencies, with a fair inquiry; but heavy sheep were very dull, and 2d. per 8lb. cheaper than on Monday. Prime English and foreign calves were taken off freely, at 2d. to 4d. per 8 lb. more money. Inferior calves were dull, but not cheaper. Pigs and milch cows commanded very little attention. Per 8lb. to sink the offal:—Coarse and inferior beasts, 3s. 4d. to 3s. 8d.; second quality ditto, 3s. 10d. to 4s. 2d.; prime large oxen, 4s. 4d. to 4s. 8d.; prime Scots, &c., 4s. 10d. to 5s.; coarse and inferior sheep, 3s. 8d. to 4s.; second quality ditto, 4s. 2d. to 4s. 6d.; prime coarse-woolled sheep, 4s. 8d. to 5s. 4d.; prime Southdown ditto, 5s. 6d. to 5s. 8d.; large coarse calves, 3s. 10d. to 4s. 6d.; prime small ditto, 4s. 8d. to 4s. 10d.; large hogs, 3s. 4d. to 3s. 10d.; neat small porkers, 4s. to 4s. 4d.; suckling calves, 12s. to 20s.; and quarter-old store pigs, 20s. to 25s. each. Total supply:—Beasts, 1350; cows, 130; sheep, 4890; calves, 360; pigs, 400. Foreign: Beasts, 680; sheep, 1500; calves, 270.

Newgate and Leadenhall.—Owing to the mildness of the weather, the trade generally is inactive, as follows:—Beef, from 2s. 10d. to 4s. 2d.; mutton, 3s. 6d. to 4s. 6d.; veal, 3s. 4d. to 4s. 4d.; and pork, 3s. 4d. to 4s. 4d. per 8 lb., by the carcass.

SCOTCH SEQUESTRATIONS.

W. SAGE, Hamilton, Lanarkshire, joiner.—C. ALEXANDER, Edinburgh, nurseryman.—W. WILSON, Edinburgh, coachbuilder.

CHRIST CHURCH, DENSHAW, YORKSHIRE.

This church has been erected, furnished, and decorated at the expense of Mr. and Mrs. Henry Gartside, of Ashton-under-Lyne, who have also provided an endowment and erected a parsonage-house. The land on which the church stands was the gift of Messrs. James Butterworth and Brothers, of Junction. The foundation-stone was laid by the Bishop of Manchester on July 17, 1862; and on Thursday, the 24th of September last, the church was consecrated by the Bishop of Manchester, the service being conducted by the Rev. F. Richardson, the Incumbent.

The township of Friar Mere, in which the district of Christ Church is situated, was given to the Abbot and Convent of Rupe or Roche Abbey (Rochdale), by deed, dated "on the Feast of Conversion of St. Paul," in the year 1314. On the dissolution of the Monasteries, Henry VIII., by letters patent, in the thirty-fifth year of his reign, granted the same lands to Arthur Assheton, of Rochdale; and by deed, dated May 27, 1551, the lands on Friar Mere were equally divided between Arthur Assheton and Roger Gartside, of Gartside Hall, near Rochdale, whose family, according to Baines's "History of Lancashire," were seated there in the reign of Henry II. and Richard I., but who afterwards removed to Oakenrod Hall, near Rochdale; Woodhew, one of the estates mentioned in the deed of 1551, having

EARL DE GREY AND RIPON AT HULL.

THE PROCESSION ON ITS WAY FROM THE SESSIONS-HOUSE TO THE PEOPLE'S PARK PASSING THE WILBERFORCE MONUMENT

LAUNCH OF VESSELS FROM MESSRS. SAMUELSON'S YARD.—SEE PAGE 476.

TESTIMONIAL TO MR. THOMPSON, MAYOR OF BRADFORD.

descended from that time in lineal descent to the late Capt. Gartside. The church is an unpretending structure, in the style of the thirteenth century, arranged with special reference to the requirements of the Church of England ritual. Externally, the principal features are a massive square tower and a well-developed chancel; while, internally, the baptistry, the nave, and the chancel are each distinctly marked. It is built of Pierpoint stone walling, with polished ashlar dressings. Internally, the piers, reredos, &c., are of polished Yorkshire stone. The roof is open-timbered, with arched principals springing from polished shafted stone corbels; the timbers stained dark and varnished, and the iron-work coloured in ultramarine. The east gables of the nave and chancel, and the gables of the transepts, are finished with ornamental iron crosses. The whole length is 88 ft. 6 in., the width 46 ft. 4 in.; height to wall-plate of clerestory 22 ft. 6in., to ridge of nave 41 ft. The chancel is 18 in. lower than the nave. Open benches of a substantial character are provided for over 400 worshippers. The pulpit, which is of Caen stone, is placed on the north, and the reading-desk, facing north and west, on the south. The chancel window is of five lights, with quatrefoils, and a large wheel in the head. The centre light contains a "Crucifixion," with Mary Magdalen clinging to the foot of the cross. Over the dexter side of the cross is the centurion, and opposite the Beloved Disciple; and in the outer lights are full-length figures of the four Evangelists. In the centre sexfoil of the wheel is the "Ascension." This magnificent stained-glass window was designed by Mrs. Gartside, and executed by Mr. Alexander Gibbs, of London.

The tower is 23 ft. 8 in. square, 75 ft. high, with octagonal turret staircase on the south side.

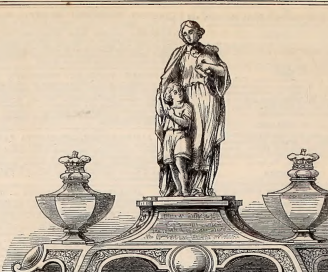
The parsonage is of a character to harmonize with the style of the church, forming an elegant and commodious residence.

The whole of the works were designed and carried out under the superintendence of Mr. Eaton, to the entire satisfaction of Mr. and Mrs. Gartside.

TESTIMONIAL TO THE DOWAGER LADY HATHERTON.

THE silver inkstand of which we give an Engraving has lately been presented to the Dowager Lady Hatherton on her leaving Teddesley Park, Penkridge, Staffordshire, by the inhabitants of Penkridge, in token of their appreciation of her noble character and ever-active charity. The inkstand cost £60, and was made by Messrs. Hunt and Roskell, of New Bond-street.

MONUMENT IN GLASGOW CATHEDRAL.

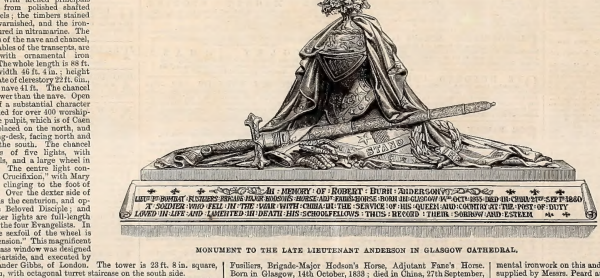


A MONUMENT has been placed in the crypt of Glasgow Cathedral to the memory of Lieutenant R. B. Anderson, who fell in the last war with China.

The fate of this gallant young officer and his unfortunate companions, De Normann, Bowlby, Brabazon, and Phipps, excited at the time a poignant feeling of sorrow and indignation throughout the country. Lieutenant Anderson, who held the appointment of Adjutant of Fane's Irregular Cavalry, commanded the escort which accompanied Sir Harry Parkes to Tung-Chow, when he went in advance of the army to meet the Chinese Commissioners, and the whole party were treacherously captured by the Chinese when under the protection of a flag of truce. The way in which they met their death is well known.

The monument, of which we give an Engraving, is a bronze military trophy, sculptured in relief, and placed in front of a memorial painted window. The trophy consists of shield, helmet, sword, mantle, gauntlet, spurs, and the wreath of Victory, heraldically enriched and engraved with the national emblems and the family arms and motto, the whole group being so artistically designed and executed as to reflect the highest credit upon the artist, Mr. Robert Jackson, of Maida-hill. The trophy rests on a large slab of black marble, placed in the sill of the window, and the window itself is filled in with painted glass of a memorial character, appropriately designed by Messrs. Hughes and Ward, of Soho. In front of the trophy is placed a brass scroll, which bears the following inscription:—

"In memory of Robert Burn Anderson, Lieutenant 1st Bombay Fusiliers, Brigade-Major Hodson's Horse, Adjutant Fane's Horse. Born in Glasgow, 14th October, 1838; died in China, 27th September, 1860. A soldier who fell in the war with China, in the service of his Queen and country, at the post of duty; loved in life and lamented in death. His schoolfellows thus record their sorrow and esteem."

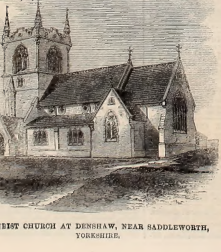


The interest value of the detail is unfortunately almost entirely lost, in consequence of the want of light; and it is much to be regretted that a monument, the effect of which so much depends upon a clear elucidation of the detail, should be placed in a situation which, though good in other respects, possesses this serious and almost fatal defect. In spite, however, of this drawback, the whole group is conceived in such a manner as to reflect the very highest credit on all the artists concerned, and forms a monument which it does an ornament to the noble cathedral in which it is placed and honourable to the feelings and the taste of those who have erected it.

SILVER INKSTAND PRESENTED TO THE DOWAGER LADY HATHERTON.

of black, blue, Staffordshire, and white bricks, with Bath-stone keys and springers; and the interior faced with Malm pickings, with black and red bands, and black, red, and white arches, with keys, corbels, campanile, chancel arch, window-jambs, and other decorative features of Bath stone. The columns supporting the main principals and the arches to the chapel, on the south side of the chancel, are of polished Portugal marble. The only use of plaster in the building is between the rafters of roofs, which are all dressed and stained. The total capacity of the church, inclusive of an upper west gallery for children, is upwards of 1500.

The columns supporting the clerestory are of iron, and have decorations on the bell of the capitals of wrought iron, which, together with the columns, are illuminated in strong polychromic decoration. The carving, which is of an emblematic character, has been skilfully executed by Mr. J. W. Seale, of Lambeth. The contract, which is inclusive of the heating, lighting, carving, and chancel-fitting of a plain character, is in the hands of Messrs. Dove Brothers, and the amount, £6013, will be but slightly exceeded by some additions to the original design. An organ of suitable character, with all the latest improvements and sufficiently powerful for the capacity of the church, has been built by Messrs. Hunter and Webb. A highly-ornamental pulpit, of Caen and red Mansfield stone, polished marble, and wrought and coloured ironwork combined, has been executed from the designs of the architect, at the expense of Mr. F. R. Kendall. The font, which is a contribution from Mr. E. B. Jupps, clerk to the Carpenters' Company, is of Caen stone and marble, with emblematical carving; and a brass lectern, by Leaver, of Maidenhead, has been presented by a lady anonymously. The spire is 140 ft. in height; and the ornamental ironwork on this and other portions of the exterior has been supplied by Messrs. Peard and Jackson. The church was designed by, and has been carried out under the superintendence of, Mr. E. Bassett Keeling, of Gray's Inn. The surrounding neighbourhood has been formed into a new parish, taking only the district parish of St. John's, Notting-hill; and the incumbency will be filled by the Rev. E. K. Kendall, M.A., Curate of St. John's, Notting-hill. The church was built by subscription.



MONUMENT TO THE LATE LIEUTENANT ANDERSON IN GLASGOW CATHEDRAL.

TESTIMONIAL TO THE MAYOR OF BRADFORD.

ON the occasion of the marriage of their Royal Highnesses the Prince of Wales and the Princess Alexandra of Denmark no town was more loyal and earnest in its rejoicings than Bradford, the capital of the English worsted district. This was mainly owing to the exertions of its Mayor, Mr. Thompson, who was indefatigable in organising the public display. Mr. Thompson also gave a magnificent ball in celebration of the Royal marriage. His hospitality, in other respects, was unbounded, and his liberality, as regarded charitable and public institutions, most unregulating. Immediately after the enthusiastic rejoicings of the 10th of March last the ladies of Bradford, proud of their Mayor, began to take common action for giving a significant token of their feelings towards him. The result has been that the handsome piece of plate, represented in our Engraving, has recently been presented to his Worship in the name of 330 ladies. The presentation took place most appropriately in the saloon of St. George's Hall, which has been the scene of Mr. Thompson's princely hospitalities.

The testimonial consists of a vase and cover, 30 in. in height, and weighing upwards of 300 oz. The design is in the rich Italian style, the plain and fluted parts being gilt with rich chasing in frosted silver. Surmounting the vase is a figure of Justice, holding the scales and sword. Immediately beneath, on each side, is a boy-figure, symbolical of Industry and Commerce; behind are medallions of the Prince and the Princess of Wales, with flags; and, in front, the arms of the Mayor of the borough, and the following inscription:—"To Matthew Wm. Thompson, Esq., Mayor of the Borough, this memorial is presented by the ladies of Bradford, as a mark of their high appreciation of his many hospitable courtesies, more particularly on the auspicious event of the marriage of their Royal Highnesses the Prince of Wales and the Princess Alexandra of Denmark." This rich work of art was executed by Mr. Manoah Rhodes, silversmith, of Bradford.

CHEST CHURCH AT DENSHAW, NEAR SADDLEWORTH, YORKSHIRE.

ST. MARK'S CHURCH, NOTTING-HILL.

THE foundation-stone of this church was laid last November by the Rev. J. P. Gell, M.A., incumbent of St. John's, Notting-hill. The building is of brick, with Bath-stone dressings; the exterior being of picked stocks, relieved by bands of black brick, and the arches formed

ST. MARK'S NEW PARISH CHURCH, NOTTING-HILL.

**,* The charge for the insertion of Births, Marriages, and Deaths is Five Shillings for each announcement.*

BIRTHS.

On the 31st ult., at the Royal Naval Hospital, Haslar, the wife of Captain Harry Edgell, R.N., C.B., A.D.C. to the Queen, of a son.

On the 3rd inst., the wife of G. A. Symonds, Esq., Chester-place, S., of a daughter.

On the 30th ult., at Tacolnestone Hall, Norfolk, the wife of Francis G. M. Boileau, Esq., of a son.

On the 31st ult., at No. 23, Hamilton-street, Camden-town, the wife of Mr. Edwin Hammond, of a son.

On the 3rd inst., at May Place, Kent, the wife of Edward Horner, Esq., of a daughter.

MARRIAGE.

On Thursday, the 29th ult., at Bedford-street Chapel, Stroud, by the Rev. W. Wheeler, Mr. Frederick Sturge, of Carrickfergus, in the county of Antrim, Ireland, to Mary Ann, only daughter of Benjamin Bucknall, Esq., of Rodborough Villa, near Stroud. No cards.

DEATHS.

On the 31st ult., in London, after a long and painful illness, Arthur R. Henry, Commander R.N., aged 46, lately invalided from H.M.S. Stromboli.

On the 22nd ult., the Rev. Charles Vernon, D.D., of Wherstead Park, Suffolk, and Dover Court, Essex.

On the 21st ult., at the Grange, Kilburn, Middlesex, Thomas Peters, Esq., in his 85th year.

ROYAL ENGLISH OPERA, COVENT-GARDEN. Under the management of Miss LOUISA PYNE and Mr. W. HARRISON.—On MONDAY, NOV. 9, and during the week, Wallace's Romantic Opera, THE DESERT FLOWER—Miss Louisa Pyne, Miss Susan Pyne, Messrs. W. H. Weiss, H. Corri, A. Cook, and W. Harrison. Conductor, Mr. A. Mellon. Commence at Eight. Box-office open from Ten till Five.

THEATRE ROYAL, DRURY-LANE.—Managers, Messrs. Edmund Falconer and F. B. Chatterton. Great and continued success of the production of Lord Byron's MANFRED, generally acknowledged by the Press and the Public to be one of the most complete and legitimate triumphs of a combination of artistic capabilities achieved on the stage for many years.

On MONDAY, and during the Week, the performances will commence with the Farce of BEAUTY OR THE BEAST; principal characters by Messrs. Addison, G. Neville, Barret, Spencer, and G. Weston; and Mrs. Edmund Falconer and Miss R. Leclercq. After which, commencing at a quarter before Eight o'clock, and concluding about Ten o'clock, Lord Byron's Choral Tragedy of MANFRED. Mortals:—Manfred, Mr. Phelps; Abbot of St. Maurice, Mr. Ryder; a Chamois Hunter, Mr. A. Rayner; Manuel (an aged Retainer), Mr. Neville; Herman (a young Domestic in the Castle of Manfred), Mr. G. Weston; Retainers, Messrs. Bedford, Weaver, Kirk, Wilson, Smith, and Edwards. Immortals:—Arimanes (Ruler of the Evil Agencies), Mr. Warde; Ariel (Spirit of the Ether), Miss Emma Heywood; Hesper (Spirit of the Stars), Miss Louisa Ritter; Undine (Spirit of the Waters), Miss Poole; Miserima (Spirit of Memory), Miss Cicely Nott; Auster (Spirit of the Storm), Mr. Swift; Astaroth (Spirit of the Earth), Mr. Meagreson; Nubes (Spirit of the Shadow of Night), Mr. Ryde; Titanos (Spirit of the Mountains), Mr. G. Spencer; Nemesis (Goddess of Vengeance), Mrs. Edmund Falconer; Clotho, Lachesis, and Atropos (the Three Destinies), Miss Emma Atkinson, Miss C. Weston, and Miss Murray; the Phantom of Astarte, Miss Rose Leclercq; the Witch of the Alps, Miss Eburne; Evil Agencies and Spirit Spectres of the Weird World, Messrs. T. Matthews, J. Morris, and J. Cormack; Miss Seymour, Miss Harfleur, Miss Green, Mrs. Melville, Mrs. Warlow, and the Ladies and Gentlemen of the Choir and the Ballet. Order and Character of the Scenery:—Act I.—Scene 1. Studio and Gothic Gallery in Manfred's Castle. Scene 2. A Precipice and Glaciers nigh the Summit of the Jungfrau. Act II.—Scene 1. The Chalet of the Chamois Hunter and Alpine Pass. Scene 2. The Steinbach, a Waterfall in one of the Lower Valleys among the Alps, and Overhanging Cliffs, the Haunt of the Witch of the Alps.

The sunbow's rays still arch the torrent with the many hues of Heaven,
And roll the sheeted silver's waving column o'er the crag's perpendicular.

Scene 3. The Snow-capped Summit of the Jungfrau, by Moonlight. Scene 4. The Hall of Arimanes in the Nether World, painted by Mr. Danson and Son. Act III.—Scene 1. Terrace and Exterior of Castle. Scene 2. The Turret Studio, the Magian's Midnight Haunt, Shook and Illumined by a Thunderstorm, and finally Destroyed by Flashing Bolt and Crashing Avalanche. Last Scene. A Snowy Alpine Waste or Wilderness. Programme of the Songs and Choruses:—Act 1.—Scene 1 Mystical Responses of Viewless Spirits to the Magian's Invocation. First Solo, "Mortal to thy bidding bow'd." Miss Emma Heywood. Second Solo, "In the blue depth of the waters," Miss Poole. Third Solo, "I am the rider of the wind," Mr. Swift. Septet, Misses Poole, Heywood, Cicely Nott; and Mr. Swift and Chorus. The imprecation solo, "When the moon is on the wave," Miss Cicely Nott. Solo, "Though thy slumber may be deep," Miss Poole. Chorus by the whole choir. Act II.—Scene 3. Solo and chorus, "The Captive Usurper," Miss Cicely Nott and chorus. Song, "The ship sailed on, the ship sailed fast," Miss Emma Heywood. Scene 4. Grand Choral Hymn of the Evil Agencies, "Hail to our master, Prince of Earth and Air!" solo verses by Mr. Swift. Chorus by full choir. Jubilant chorus and accompanying Dance, by full choir and the ballet. Act III.—Last Scene. Grand dual chorus of Good and Evil Spirits by the principal singers and full choir. The general action of the tragedy arranged by Mr. Phelps. The incidental dances designed and directed by Mr. Cormack. Costumes from designs by R. W. Keene, Esq., and from Flaxman's Illustrations of Classical and Mythological Conceptions. Machinery by Mr. J. Tucker and assistants. Gas illuminations by Mr. J. Hinckley. Spectral illusions by Mr. Cox; and also Professor Pepper's adaptation of Dirck's invention, under the special superintendence of Professor Pepper. The whole of the entirely new scenery designed and principally painted by Mr. W. Telbin, assisted by his son, Mr. H. Telbin. The Hall of Arimanes, painted by Mr. Danson and Sons. The increased orchestra and present arrangement of the music (originally composed by Sir Henry Bishop) under the direction of Mr. Barnard. The choir under the direction of Mr. Charles Beale. To conclude with a New and Original Farce by W. Brough and A. Halliday, Esqrs., entitled MY HEART'S IN THE HIGHLANDS. Principal characters by Messrs. Belmore, G. Weston, J. Neville, Warde; Miss Harfleur, and Mrs. Neville.

IMITATION PHEASANTS. So like the original that they defy detection by the most experienced night poacher. They are much used by sportsmen, and give great satisfaction. Price 22s. per dozen.—Address, JOHN LOTT, jun., 1, Eaton-terrace, King Edward's-road, Hackney, N.E.

FOUNTAINS, STATUES, JARDINIÈRES, ANIMALS, &c., the celebrated Bronzes d'Art en fer of Messrs. Barbezart, of Val d'Osne, France. Prize Medal, 1862.—A. SEDLEY and CO. have the honour to announce that they have become Agents for the above beautiful and cheap productions, and have NOW ON VIEW a SUPERB COLLECTION of FIGURES, ANIMALS, FOUNTAINS, and CANDELABRA, suitable for Galleries, Halls, Gardens, Parks, &c., at Paris prices, cost of import only added. Illustrated Lists on application by post to A. Sedley and Co., Upholsterers, Cabinetmakers, and Patentees of Equilibriam Chairs, &c., 210, Regent-street, London, W.

MARRIAGE NOT A LA MODE.—See "Temple Bar" for November, page 518. Extract.—"There lies before me the price-list (illustrated) of a general furnishing and upholstery company, whose premises are in one of the best streets in London, and some of whose things are about me as I write. Let me turn to their 'japanned deal bedroom furniture' in their list. Not to be unnecessarily minute, the 'complete set' costs ten guineas. Of course there figures another set handsomer, but not one whit better, or cleaner, or really nicer-looking, which costs twenty-nine pounds. A 'complete set of furniture for a servant's bedroom' costs five guineas. From these figures guess the rest; and believe me when I tell you that you shall furnish your fifty-pound house for two hundred and fifty pounds."
GENERAL FURNISHING AND UPHOLSTERY COMPANY (Limited), 24 and 25, Baker-street, W.C.
Complete Illustrated Catalogues free by post.

CHINA and GLASS WAREHOUSE.—All the newest patterns in Breakfast, Dinner, Dessert, Tea, and Toilet Services, Table Glass, Lamp and Gas Glasses, Glass Shades, &c. Also, a large assortment of Fancy Goods in Vases, Lustres, and Figures, &c.—CUMING and BONE, 22, Tottenham-court-road, W.

FURNISH YOUR HOUSE with the best articles at DEANE'S Ironmongery and Furnishing Warehouses. Established A.D. 1700. New Illustrated Catalogue and Priced Furnishing List gratis and post-free.
Deane and Co., The Monument, London-bridge.

WILLIAM S. BURTON, GENERAL FURNISHING IRONMONGER by appointment to H.R.H. the PRINCE OF WALES, sends a CATALOGUE gratis and post-paid. It contains upwards of Five Hundred Illustrations of his illimited stock of sterling Silver and Electro-plate, Nickel Silver, and Britannia-metal Goods, Dish Covers, Hot-water Dishes, Stoves, Fenders, Marble Chimneypieces, Kitchen Ranges, Lamps, Gaseliers; Tea Trays, Urns, and Kettles; Clocks, Table Cutlery, Baths, Toilet Ware, Turnery, Iron and Brass Bedsteads, Bedding, Bedroom Cabinet Furniture, &c., with lists of prices and plans of the twenty large Showrooms, at 39, Oxford-street, W.; 1, 1A, 2, 3, and 4, Newman-street; 4, 5, and 6, Perry's-place; and 1, Newman-yd., London.

COSTLY FURNITURE, for Drawing-room, Dining-room, and Bedroom.—The Belgrave Furnishing Company, No. 12, Sloane-street, S.W., have for DISPOSAL (part of the contents of a mansion) THREE SUITES of FURNITURE, of a most superb recherché character. The Drawing-room is in the style of Louis Seize, richly gilt and covered in silk brocade, includes twelve chairs with padded backs, large Turkish ottoman, four easy chairs, and a large conversation settee, the whole luxuriously upholstered; there are also several unique and magnificent inlaid tables, a cabinet, several other ornamental items, and three truly beautiful and very large chimney-glasses, with consoles and girandoles to match. The Dining-room is equally magnificent in oak, and consisting of the usual requisites of an entire suite. The Bedroom is likewise very superb, and comprises all the necessaries of a best bedroom in fine Italian walnut. Noblemen and gentlemen about furnishing a large house would find this a most desirable opportunity, as the above will be sold, together or separately, for a comparatively very low sum.

LONDON CARPET WAREHOUSE, WAUGH and SON, 3 and 4, Goodge-street; and 65 and 66, Tottenham-court-road, W. Curtains, Portières, Chintzes, &c., of first-class manufacture, for every style of decoration.

SEPTEMBER, 1863.—BRADFORD'S WASHING MACHINE.—More Letters of unqualified approval received during this month than in any previous month or year. Cathedral-steps, Manchester; and 63, Fleet-street, London.

New Patent Spring Lever Wringing Machine	.. ..	42s. 0d.
Table ditto	.. ..	32s. 6d.

CHEAP AND GOOD WINES. Offley's and Cockburn's Port, 40s.; Sherries, from 18s.; and Clarets, from 14s. To be obtained pure and cheap of the IMPERIAL WINE COMPANY, which imports the choicest Wines and sells to the public at reasonable prices.
Cellars—Marylebone Court House, W.; Stores and Offices, 314, Oxford-street, W.; Export and Bottling Vaults—15, John-street, Crutchedfriars, E.C., London.

ALLSOPP'S ALE AND GUINNESS'S STOUT.—JOHN F. BIGGS and CO., sole contractors for bottled beer to the International Exhibition. GLYCERINE, which very simple tests show to be impure, is being sold on the statement that it is "in every respect equal to Price's." Most medical men prescribe PRICE'S GLYCERINE. Where purity is of importance, patients can ensure it by desiring to have their Glycerine in 1 lb., 8 oz., 4 oz., or 2 oz. bottles, with capsules over the stopper, marked "Price's Patent." Belmont, Vauxhall.

STARCH MANUFACTURERS
TO H.R.H. THE PRINCESS OF WALES.

GLENFIELD PATENT STARCH, used in the Royal Laundry, and awarded the Prize Medal, 1862.

EPPS'S COCOA
(Commonly called Epps's Homœopathic Cocoa).
Distinguished as a
fragrant, grateful, and invigorating
Breakfast Beverage.
Originated specially for the use of those under homœopathic treatment, it has, through its agreeableness, become generally accepted.
Sold in tin-lined packets, labelled
"Epps, Homœopathic Chemist, London."

DR. DE JONGH'S
(Knight of the Order of Leopold of Belgium)
LIGHT-BROWN COD-LIVER OIL,
prescribed by the most eminent Medical Men throughout the world as the safest, speediest, and most effectual remedy for
CONSUMPTION, CHRONIC BRONCHITIS, ASTHMA, COUGHS, RHEUMATISM, GOUT, GENERAL DEBILITY, DISEASES OF THE SKIN, RICKETS, INFANTILE WASTING, AND ALL SCROFULOUS AFFECTIONS,
is incomparably superior to every other variety.

SELECT MEDICAL OPINIONS.
Sir HENRY MARSH, Bart., M.D.,
Physician in Ordinary to the Queen in Ireland.
"I consider Dr. DE JONGH'S Light-brown Cod-liver Oil to be a very pure Oil, not likely to create disgust, and a therapeutic agent of great value."

DR. GRANVILLE, F.R.S.,
Author of the "Spas of Germany."
"Dr. Granville has found that Dr. DE JONGH'S Light-brown Cod-liver Oil produces the desired effect in a shorter time than other kinds, and that it does not cause the nausea and indigestion too often consequent on the administration of the Pale Oil."

EDWIN CANTON, Esq., F.R.C.S.,
President of the Medical Society of London, &c., &c.
"For several years past I have been in the habit of prescribing Dr. DE JONGH'S Light-brown Cod-liver Oil, and find it to be much more efficacious than other varieties of the same medicine which I have also employed with a view to test their relative superiority."

DR. DE JONGH'S LIGHT-BROWN COD-LIVER OIL is sold only in Imperial half-pints, 2s. 6d.; pints, 4s. 9d.; quarts, 9s.; capsuled and labelled with his stamp and signature, WITHOUT WHICH NONE CAN POSSIBLY BE GENUINE, by respectable Chemists and Druggists.
SOLE CONSIGNEES,
ANSAR HARFORD and CO., 77, STRAND LONDON, W.C.

BOOSEY'S MINIATURE PIANOFORTE, price 17 guineas, in walnut, French polished.—"We have had the pleasure of examining a miniature Cottage Pianoforte, made by Boosey and Sons, which combines quality and sharpness in a remarkable degree with extreme portability. The instrument is in cases and contains all that could be desired in a first-class instrument except volume, which would be caused by a small discovering that the tone is very full and rich, and the touch light and responsive. The workmanship is excellent, and the whole thing open; and the whole mechanism of the instrument seems to be perfect."—Vide Illustrated London News, Saturday, Feb. 28, 1863. The Piano is well adapted for a small room, and is an extreme delicacy of touch and elasticity.
BOOSEY and SONS, Holles-street, London, W.

PRATTEN'S SEVEN-GUINEA PERFECTED CYLINDER FLUTE, old system of Pianoforte, like Instrument, with the Patent Cylinder Head, manufactured on the reputed advantages of the Cylinder Flutes on Boehm's and other systems, and possessing the Improved Tuning Slide Head of the Flageolet Flutes, in addition to which, through Mr. Prattens's improving experience, the instrument has been rendered more perfect in the equalisation of the holes, and in the production of very sylphine flute timbre set.

An Illustrated Prospectus may be had on application to the manufacturers, BOOSEY and SONS, 24, Holles-street, London, W.

SECOND-HAND PIANOFORTES, REGATTING and EXCHANGED.—SECOND-HAND PIANOFORTES for SALE, by BROADWOOD, COLLARD, ERARD, and other Makers, on the most favourable terms, at BOOSEY and SONS' Manufactory, 24, Holles-street, London, W.

CHAPPELL'S FOREIGN PIANINO is specially manufactured to which the Prize Medal was awarded.—A very elegant Pianoforte in Walnut wood, with Trichord Treble, Check Action, Repetition Movement, Fine Quality of Tone, and extra Seconder, &c. Warranted to keep in tune and to be the best and cheapest Pianoforte ever sold for the price. 25 guineas.—50, New Bond-street.

Price, in mahogany, rosewood, or walnut, 35 and 36 guineas. A great variety and Cheaper Pianos.
Chappell and Co.'s, 50, New Bond-street, London.

CHAPPELL and CO.'S ENGLISH MODEL COTTAGE PIANOFORTE.—Is manufactured by the new English form of the Broadwood or Collard quality, the English Model will be found the most perfect and reliable Pianoforte for a moderate price. The action is of the same simple description as that of the Grand Pianoforte, and possesses the full tone and touch of the more elaborate instrument, and will stand in tune as long as the tuners. In elegant rosewood case, with full fret, similar in every respect to the Grand Pianoforte, 50 guineas; with G pedals, 55 guineas; in walnut, 60 guineas.
Chappell and Co., 50, New Bond-street.

CHAPPELL'S FOREIGN MODEL PIANOFORTE, price 30 guineas (in rosewood); or in walnut, 35 guineas. This Pianoforte is manufactured by the most eminent makers in Germany, and is the result of the most careful study and means to combine the greatest amount of wear, and to stand perfectly in tune under the most trying climates. The workmanship of the case is round, full, and rich; and the power equal to that of a Richard Cobbett. The touch is elastic, and the tone full and sympathetic. The Pianoforte is fitted with the Check Action, and every detail is finished at the same price. Every instrument will be warranted, and if desired exchanged after three months' trial if unsatisfactory.
Chappell and Co., 50, New Bond-street.

THE HALL OF LIBERATION AT RELHEIM, BAVARIA, RECENTLY INAUGURATED BY THE KING.—SEE PAGE 479.

ILLUSTRATIONS OF NEW ZEALAND.

WE have been induced, on account of the interest attaching to New Zealand affairs, to give in this week's Impression several Engravings in connection with that colony. Three of these scenes—the Shepherd's Bush, the Devil's Nest, and the Waikato river—are from photographs forwarded to us by Mr. J. Kinder, of Auckland, who also supplied us with the map of the country between Auckland and the River Waikato. The two other Illustrations, Bream Head and the Sugar-loaf Islands, are from drawings obligingly placed at our disposal by Sir James E. Alexander, K.C.L.S. The remarkable formation Bream Head is observed as the voyager is steering for the capital, Auckland, on the north-east coast. The Sugar-loaf Islands are sketched from the Wairoka Hill, where Captain Craycroft, R.N., distinguished himself by a gallant fight and capture of a pah. In a work lately published by Colonel Sir J. E. Alexander, "Incidents of the Maori War," the particulars of the war of 1860-1 are given, with cha-

VIEWS IN NEW ZEALAND: THE RIVER WAIKATO, FROM THE HILLS NEAR NANGATAWHIRI—KOHEROA, THE SCENE OF THE FIGHT ON JULY 17.

INSTALLATION OF EARL DE GREY AND RIPON AS LORD HIGH STEWARD OF HULL.

On Thursday week Earl De Grey and Ripon was installed in the office of Lord High Steward of Hull—his Lordship succeeding the late Marquis of Normanby, who for many years filled the office. Great preparations had been made in the town for the ceremony. In the morning his Lordship was present at the launch of four ships. Subsequently he was made a brother of the Trinity House, and later still an honorary brother of the Humber Lodge of Freemasons. His Lordship then proceeded to the Townhall, and took upon himself the office of Lord High Steward of the borough. That ceremony over, a procession was formed to the People's Park, where a statue of the Queen was unveiled. In the evening his Lordship was entertained at a banquet at the Assembly Room. The chair was occupied by the Mayor, and he was supported on his right by Earl De Grey and Ripon and Mr. Samuel Warren, Q.C., and on his left by Lord Hotham, M.P., and Mr. James Clay, M.P.

We give some further particulars respecting the four principal events of the day, which are illustrated in this week's Impression:—

THE LAUNCHES.

To give additional prominence to the proceedings Messrs. Samuelson and Co., the extensive shipbuilders, determined to launch from their yards four new iron vessels. The preparations for the launch were completed shortly after seven o'clock in the morning, and soon after that hour Earl De Grey; James Clay, Esq., M.P.; and Joseph Somes, Esq., M.P., together with the Mayor and several members of the Corporation, as well as the leading merchants of the town, entered the yard. Shortly afterwards a signal-gun was fired from her Majesty's ship Cornwallis, and the sailing-ship Countess of Ripon and the Lightning, two fine East Indiamen, were released from their bondage to find a home in the waters. The steamer Earl De Grey and Ripon, which has been built for a London firm, and a small steamer for the French Government, were then knocked off the slips. After the launches his Lordship and about 250 invited guests sat down to a superb breakfast in Messrs. Samuelson's moulding-loft.

THE INSTALLATION.

This, the chief feature in the day's ceremonial, took place between two and three o'clock in the Sessions House. Here were assembled the members of the Corporation, the members of the consular body, as well as the various orders, guilds, and societies of the town. On the platform were the aldermen of the borough; Mr. Samuel Warren, Q.C., D.C.L., the borough recorder; and Messrs. Clay and Somes, borough members. The Mayor occupied the chair. The preliminaries having been arranged, his Lordship formally accepted the office of Lord High Steward of Hull. The Town Clerk then administered the oaths of the office, which were attested by the Mayor and Recorder. His Lordship then briefly addressed the audience. He said he felt grateful for the high office bestowed upon him, grateful because he had thus an opportunity of renewing his connection with that ancient and honourable borough; and, as he had now become an officer of the town, he should feel called upon at all times to promote the interests of the town, and guard them as he would guard his own. A list of the High Stewards from the establishment of the office, dated as far back as 1583, was then handed to his Lordship.

PROCESSION TO THE PEOPLE'S PARK.

During the ceremony of installation, those who were unable to obtain admission, but were to take part in the uncovering of the statue of her Majesty, were arranged in order of procession, and the proceedings in the Sessions House being completed, at three o'clock the Corporation, the High Steward, and various public bodies moved towards the park in the following order:—

Police.
Volunteer Artillery, 300 in number.
Volunteer Rifles, 500 in number.
Mayor, Earl De Grey, and Town Clerk.
The Sheriff and Deputy Sheriff.
The Magistrates (three abreast).
The Aldermen and Town Councillors (three abreast).
Treasurer, Coroner, and Clerk of the Peace
Clergy (three abreast).
Ministers of all other Denominations (three abreast).
Corporation of the Trinity House and Secretary (three abreast).
Consuls (three abreast).
Corporation of the Hull Dock Company and Secretary (three abreast).
Chamber of Commerce (three abreast).
Corporation of the Governor and Guardians of the Poor and Clerk (three abreast).
The Chairman and Guardians of the Poor of Sculcoates (three abreast).
President and Committee of the Guardian Society (three abreast).
Friendly Societies, with their Bands, Banners, Sashes, and other insignia.
Police.

Police. Police.

Bringing up the rear of the procession was an emblematical car belonging to the lessees of the Queen's Theatre (Mrs. Wolfenden and Mr. Melbourne). It was very artistically arrayed, but the exposed position to the pitiless rain of the ladies and gentlemen who were intended to represent the different nations of the globe with which Hull held commercial relations, detracted in a great degree from the pleasure which, under more genial weather and a brighter sky, the representation would have excited. Nevertheless, as it was, it called forth universal praise. The route taken was Lowgate, Silver-street, Whitefriargate, Savile-street, Bond-street, Albion-street, Prospect-street, and Beverley-road. Notwithstanding that the rain was falling somewhat sharply, the thoroughfares along the mile-and-a-half route were lined with people, either proceeding to the park or patiently awaiting the arrival of the procession. The afternoon, at the suggestion of the Mayor, was observed as a holiday; the bells of the churches rang out merrily, and the strains of music, as the volunteer corps, headed by their bands, appeared, dissipated even the dulness which the damp day might have produced.

UNVEILING THE STATUE OF THE QUEEN.

At the entrance to the park the noble Earl, the Mayor, magistrates, and visitors were received by the committee having the management of the ceremony. The High Steward, the Mayor and Corporation, the park committee, &c., took up their positions on the platform; and the volunteer corps, the friendly societies, and other public bodies were ranged on each side the inclosure. The Mayor formally presented the statue to Mr. Alderman Ellison, the chairman of the park committee, and briefly explained that it was intended to commemorate the visit of her Majesty to that town. Mr. Alderman Ellison received the gift, formally presented it to the town, and then, amidst cheers, requested the Lord High Steward to order it to be unveiled.

Earl De Grey and Ripon, the Lord High Steward, then said:—Mr. Mayor and Gentlemen,—I accept with great pleasure the duty which I have just been requested to undertake, of directing the unveiling of this statue of her Most Gracious Majesty the Queen. And I am happy to find that the first duty I am asked to undertake since my installation in the office of High Steward of this borough should be the unveiling to the public of Hull of the statue of the Sovereign whom we all so love. In all monarchical countries, and in all times, it has been the practice to erect statues of the reigning Sovereign; but the motives which have actuated men in so doing have been very various. Sometimes it has been the desire to secure the favour of a powerful and dreaded despot; sometimes it has been merely a matter, as I may say, comparatively, of form, or at the most a proof of the attachment of the people to monarchical institutions and to the family on the throne. But, in our days, and in the reign of Queen Victoria, when we assemble for such a purpose as this we are animated by very different feelings. It is not to us a mere matter of form or of ceremony, but we shall unveil that statue and hand it over to the public of this town, animated by those feelings of deep affection and profound respect which fill the heart of every Englishman when he thinks of her Majesty the Queen. We have been just reminded of the course of her reign, and we have watched it from the commencement with deep and loyal interest. We have watched it from the day when, in early youth, Queen Victoria took upon herself the arduous duties of a great and most responsible office, and we have watched with pride and with affection the manner in which those duties have been discharged. We have rejoiced in her joy, and we have sorrowed with her sorrow. And never had a nation more just cause to be sorry than we have for the loss of that illustrious Prince who was so lately taken from the side of our beloved Queen, to whom he had been for very long years a loving husband, a sagacious counsellor, and a constant support. No one can measure nor doubt the magnitude of that loss to her Majesty. But when we heard of the death of the Prince Consort there sprang spontaneously from the hearts of this people an outburst of sorrow which proved how entirely that Prince, who had come among us a young man from a foreign country, had, by his wisdom, his beneficence, and his noble character, won to himself the hearts of his adopted countrymen. I need not detain you any longer upon such a topic, though one upon which any words are feeble, but which the hearts of the people can interpret better than any language. Let us, then, proceed to unveil that statue, so that when men gaze upon it in future times it may recall to their recollection the events of the reign of our gracious Queen; those events which, as it has been truly said, have been marked in an eminent degree by prosperity and by glories. I speak not so much of the glories of warlike successes, which have added their names, not unworthy of those that preceded them, to the long list of British victories, though they have not been wanting; but I speak rather of those peaceful glories of extended commerce, of advancing industry, and of improved laws and better process of legislation—of increased public contentment, advanced education, and developed intelligence among the people. Though that great progress which marks so eminently the reign of Queen Victoria has no doubt been due to various causes under Providence—to the circumstances of the country and the character of the people; yet it has been due in a very great extent to the character of our Sovereign herself—to her public wisdom, to her firm and hearty attachment to the Constitution and the law, and, above all, to those private virtues which have made her alike a model to every family in the country, and have written deep her name in the grateful hearts of her adoring people.
